

Canada in a Changing Climate: National Issues Report

SECTOR IMPACTS AND ADAPTATION

This chapter examines key issues related to climate change impacts and adaptation within seven sectors in Canada—forestry, agriculture, fisheries, energy, mining, transportation, and tourism—as well as the status of corporate adaptation.

Climate change affects almost every economic sector in Canada

Sustainable forest management is challenged by wildfires and pest outbreaks

Climate change brings new environmental challenges for mining

Changes to ocean health are affecting fisheries and associated livelihoods

Climate change brings benefits and threats to the agriculture sector

Each link of the energy value chain can be vulnerable to climate change

Extreme weather events impact transportation, disrupting supply chains

Climate change is leading to transformational changes in tourism

Increased private sector involvement will accelerate adaptation across sectors
