Cover illustration

Geologists examining hyper-enriched black shale (HEBS) mineralization exposed in the north bank of the Peel River, Yukon. This mineralization (middle HEBS layer) is underlain and overlain by Middle Devonian black shales of the Road River Group. *See* Gadd, M.G., Peter, J.M., and Layton-Matthews, D. (this volume) for further details. Photograph courtesy of D. Layton-Matthews, Queen's University, Kingston, Ontario.
