Endnotes.....	71

Message from the President of the Treasury Board

I am pleased to present the 33rd Annual Report on Official Languages for fiscal year 2020-21. This report describes the measures that federal institutions have taken to meet their obligations to serve the public in English and French, and to strengthen their use as the languages of work in the federal public administration.

Along with Indigenous languages, English and French are at the heart of Canada's history and identity. Official languages reinforce the values of diversity and inclusion and contribute to our social cohesion and resilience. However, Canadians expect us to do more to strengthen French across the country and to ensure the continued vitality of official language minority communities. The *Official Languages Act* came into effect over 50 years ago and it has been more than 30 years since its last major reform. Our world has changed dramatically since that time. Social media has emerged as a powerful force impacting language and culture. Immigration has accelerated, making Canada more dynamic and diverse, but we need to do more to ensure immigration also benefits francophone minority communities. To respond to these new realities, the government tabled the [bill for the substantive equality of Canada's official languages](#) last March. The bill proposes a number of significant improvements to modernize the *Official Languages Act*, ensuring it continues to serve Canadians in the 21st century.

The Honourable Mona Fortier
President of the Treasury Board

This annual report also identifies where federal institutions can do better. The federal government must be exemplary in its use of English and French, both in its communications with the public and within its institutions. To ensure this, I have asked my officials to implement the administrative measures described in the document "[English and French: Towards a substantive equality of official languages in Canada.](#)" These measures will help strengthen linguistic duality within federal institutions, enhancing service delivery to citizens in the official language of their choice, and improving accountability for the performance of institutions as to their compliance with the *Official Languages Act*.

I invite you to read this report to learn how federal institutions are delivering on their responsibilities and putting into practice the government's commitment to Canada's official languages.

Original signed by:

The Honourable Mona Fortier
President of the Treasury Board

Introduction

The [Official Languages Act](#) (the Act)¹ states that the Treasury Board is responsible for the general direction and coordination of the policies and programs relating to the implementation of Parts IV, V and VI of the Act in federal institutions. The Office of the Chief Human Resources Officer, within the Treasury Board of Canada Secretariat (TBS), is responsible for establishing and assessing the extent to which these policies and programs were applied and what impacts they have had.

Concretely, TBS assists some 200 federal institutions (meaning institutions in the core public administration, Crown corporations, privatized organizations, separate agencies and public institutions subject to the Act) in meeting their linguistic obligations.

These obligations fall into four main categories. Both under normal and emergency situations, federal institutions must:

1. serve members of the public and communicate with them in both official languages
2. establish a bilingual workplace in regions designated bilingual
3. contribute to maintaining a public service whose workforce tends to reflect Canada's demographic composition in terms of official languages
4. ensure that official languages issues are suitably managed

This 33rd Annual Report describes the extent to which federal institutions have been successful in meeting the above-mentioned objectives over the past three years, including the 2020–21 fiscal year. This report also provides examples of the activities that institutions have undertaken to meet their responsibilities in the area of bilingualism.

To conduct its analysis, TBS requires federal institutions to submit an official languages review at least once every three years.¹ In order to cover all institutions subject to the Act, TBS took into account the results of the most recent reviews that federal institutions provided to TBS for fiscal years 2018–19, 2019–20 and 2020–21 ([Appendix A](#) of this report presents the specific methodology used to conduct this analysis).

1. This schedule was established to ensure compliance with the Act while reducing the reporting burden on federal institutions. However, 20 large institutions submit a review every year.

The data presented in this report, unlike those presented in previous reports, cover a three-year cycle and all federal institutions, rather than a single fiscal year (for example, 2020–21) and only those institutions required to submit a review in that year. In some cases,² the data can be compared with the data gathered by TBS for the 2015–18 cycle to determine whether a particular situation (such as the use of both official languages in meetings in federal institutions) has improved, remained stable or deteriorated.

TBS’s analysis of the last cycle’s reviews has led to a number of findings. As can be seen in Chapter 1, which deals with communications with and services to the public, two issues are among those that institutions should seek to address most vigorously in the years to come:

- ▶ active offer in person
- ▶ in contracts and agreements with third parties acting on behalf of an institution, the inclusion of clauses that clearly set out the language requirements that the third parties must comply with (for example, the screening officers at boarding areas in the airports are subcontractors of the Canadian Air Transport Security Authority)

Chapter 2 shows that federal institutions focus on actions that will promote, within bilingual regions, a work environment that is truly conducive to the use of English and French. In particular, greater leadership is required to make federal employees feel comfortable using the language of their choice when writing or attending meetings. In a slightly different vein, institutions should focus on developing the second language skills that their employees would like to achieve.

Chapter 3 deals with Francophone and Anglophone representation in the federal public service. Here, we can conclude that the federal workforce, as a whole, accurately reflects the linguistic composition of the Canadian population, particularly because of the targeted actions taken by many institutions.

Chapter 4, which deals with official languages governance, highlights the need for institutions to use the tools available to them to make sure that the language designation of positions is appropriately identified.

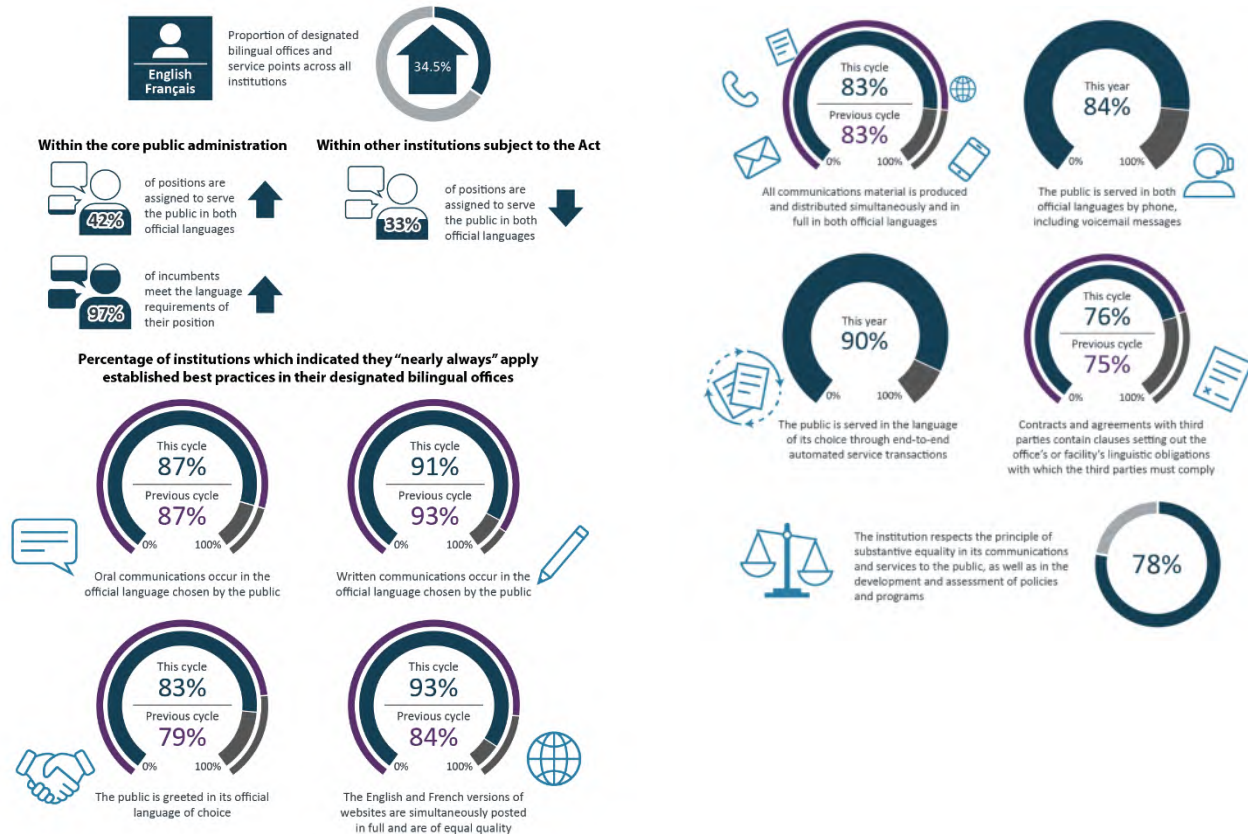

Chapter 5 shows that more organizations would benefit from taking official languages into account when developing plans for emergency or crisis situations.

Finally, Chapter 6 describes some of the measures taken in 2020–21 by TBS to promote overall compliance with the Act across the federal system.

2. In cases where an equivalent existed in the 2015–18 cycle to the questions asked in the 2018–21 cycle.

Chapter 1: Communications with and services to the public

1.1. Offices and service locations

The network of public offices and service locations operated by the federal government spans all provinces and territories, and extends to Canadian offices internationally. This network provides service in person; over the telephone; aboard aircraft, ferries and trains; and through interactive kiosks.

As of March 31, 2021, institutions had 11,164 offices and service locations,³ of which 3,847 (34.5%) were required to provide services to and communicate with the public in both official languages (see [Appendix F](#) for a map of the network of offices and service locations).

3. See the definition of “office” in the [Directive on the Implementation of the Official Languages \(Communications with and Services to the Public\) Regulations](#).

1.2 Oral and written communications

As shown in Figure 1, 91% and 87% of institutions, respectively, said in their last review that when communicating with the public in writing (particularly through press releases and public notices) or orally (at press conferences, in public speeches, in videos), they do so “nearly always” in the official language chosen by the public.

Figure 1. Proportion of federal institutions that report nearly always applying best practice in communications with the public, 2018–21

Although federal institutions meet the target set by TBS for written communications,⁴ they miss the target for oral communications by three percentage points, as they did in the 2015–18 cycle.

4. See the response scale used in the reviews in [Appendix A, Methodology for reporting on the status of official languages programs](#). TBS expects federal institutions to meet their obligations under the Act or use certain best practice 90% of the time or more (nearly always). Ensuring that official languages are regularly on the agenda of senior management meetings is an example of a best practice that institutions should adopt (Chapter 4).

Showcasing best practice

This document contains passages highlighted to showcase best practices that all federal institutions should seek to emulate.

Best practice

The Bank of Canada is one of the institutions that indicated that they communicated with the public “nearly always” in the official language of its choice. Key speeches by Bank officials are made in both official languages, and any observer is invited to speak in English or French. The Bank also receives requests from organizations that wish to invite the Bank to make a speech. Bank officials then give their speech in the language chosen by the host organization while ensuring to include content in the other official language. Speeches made in public by the Bank’s spokespersons are available on the Web in English and French.

Best practice

Public Safety Canada receives over 4,500 media and public inquiries annually. All responses from the institution are provided in the official language in which the inquiry was made unless the inquirer instructed otherwise.

The above results are largely explained by the fact that federal institutions have the ability to provide services in both languages. As of March 31, 2021, 45,830 (41.1%) of the 111,542 incumbents of positions that provided service to the public in the core public administration were required to offer services in both English and French. Of these 45,830 incumbents, 96.9% met the language requirements of their position. A similar situation existed in institutions subject to the Act that are not part of the core public administration. Accordingly, 21,763 employees out of the 66,076 (32.9%) that provided service to the public were able to do so in both official languages in the offices of these institutions.⁵

1.3 Active offer

In bilingual offices, federal institutions are required to take measures to ensure an active offer of services to the public in both official languages. According to the *Policy on Official Languages*,ⁱⁱ active offer means to “clearly indicate visually and verbally that members of the public can

5. A 21% decrease from the previous year, but it is important to consider that some institutions’ activities were partially frozen at the height of the pandemic. See tables 6, 7, 8 and 19 in [Appendix D](#).

communicate with and obtain services from a designated office in either English or French.” It is important for institutions and their staff to practise the active offer, as research has shown that it strongly encourages⁶ the public to use their own official language when communicating with or seeking services from the government.

Among all institutions that have submitted a review in the past three years, 83% indicate that they nearly always take appropriate measures to use both official languages to greet members of the public who visit their offices in person, an increase of four percentage points since 2015–18 (Figure 1).

The telephone is the preferred means for many citizens to contact federal institutions. Reviews gathered by TBS for the 2020–21 fiscal year show that 84% of federal institutions nearly always practise active offer over the telephone, including in their recorded messages. Lastly, reviews now take into account the fact that citizens can sometimes get the information or federal services they are seeking without human interaction. According to the reviews, 90% of federal institutions nearly always implement measures so that the active offer is provided on the digital devices they use.⁷

Some federal institutions react quickly when they realize that their staff are not practising the active offer the way they should.

Best practice

For example, during the pandemic, Transport Canada was informed that some of the French-language greetings from its toll-free automated line were unsuitable. The Department reported in its 2020–21 review that, once it was notified of the problem, the team responsible made sure to fix it.

1.4 Outreach

Over time, the Web has become the primary means of outreach used by federal institutions. Federal institutions’ websites, like www.canada.ca, must be consistently accessible in both official languages.

6. See https://acadien.novascotia.ca/sites/default/files/files/summary_deveau_gov_services.pdf.

7. A recent study by the Institute for Citizen-Centred Service included an official languages component. Its results are consistent with those presented in this section of the annual report. The survey showed that 88% of Canadians surveyed agreed with the statement “I was able to easily access the service in my choice of English or French.” See Institute for Citizen-Centred Services, *Citizens First 2020, Government of Canada Jurisdictional Report*, 2020, p. 47.

This is currently the case for most federal websites. In fact, 93% of institutions indicated in their last review that the English and French content on their website is nearly always posted simultaneously (there is no significant time lag between the time the French and English versions are posted online) and published in full (for example, the French version is not a mere summary of the English version). This is a major leap of nine percentage points since the 2015–18 cycle.

Best practice

The Public Health Agency of Canada and Health Canada are among the institutions that are taking strong action to ensure linguistic duality on the Web. The publishing software of these institutions is designed to ensure that only webpages containing both English and French content can be posted on www.canada.ca. Moreover, a number of their organizational units have robust translation and editing processes in place to ensure that English and French content is of equal quality. The Agency also continuously monitors the online dissemination practises of its various branches.

While the Web is becoming increasingly important in our society, it is still important that federal institutions continue to communicate effectively with citizens through other means. In this regard, 83% of institutions stated in their latest review that communication materials⁸ released from their designated bilingual offices are nearly always produced and disseminated simultaneously and in full in both English and French.⁹

Best practice

Institutions that claimed to follow this practice include the Office of the Chief Electoral Officer (Elections Canada). Elections Canada's plans and strategies include measures to ensure that its communications materials are disseminated in both official languages in full and simultaneously. During an election, Elections Canada also monitors whether these bilingual materials are, in fact, available. Finally, follow-ups are conducted with all returning officers to inform them of the results of this monitoring exercise and to encourage them to correct any problems that arise.

-
8. Communication materials include all elements of information, including any correspondence, memorandum, book, plan, map, drawing, diagram, pictorial or graph work, photograph, film, microform, sound recording, videotape, machine-readable record, and any other documentary material, regardless of physical form or characteristics, and any copy thereof.
 9. Some institutions, such as five airport authorities, the Royal Canadian Mounted Police, the Freshwater Fish Marketing Corporation and the Canada Energy Regulator, very often claim to be following this practice.

1.5 Contracts and agreements with third parties

The Act provides that federal institutions must ensure that the information or services provided by a third party on their behalf to members of the public are indeed provided in the official language preferred by members of the public. Federal institutions do not always do so. In fact, only 76% ensure that contracts and agreements with third parties acting on behalf of bilingual offices nearly always include clauses that set out the language obligations that these third parties must meet. This situation has remained virtually unchanged since 2015–18, when the proportion was 75%.

Best practice

The contracts that Innovation, Science and Economic Development Canada signs with third parties include a provision on bilingualism. In the summary of these agreements, a mandatory section specifies the official languages in which the work will be performed and the products or deliverables will be submitted. Project managers from the Department are responsible for ensuring that the language obligations set out in these contracts are met. For example, the Digital Literacy Exchange Program targets underrepresented groups in the digital economy, including members of official language minority communities. The Department is closely monitoring the six recipients of this program in 2020–21 for compliance with the language clauses contained in the contribution agreements between them and the government.

1.6 Upholding the principle of substantive equality

“Substantive equality is achieved when one takes into account, where necessary, the differences in characteristics and circumstances of minority communities and provides services with distinct content or using a different method of delivery to ensure that the minority receives services of the same quality as the majority. This approach is the norm in Canadian law.”¹⁰

According to the reviews submitted in the past three years, 78% of federal institutions nearly always respect the principle of substantive equality when communicating with or providing services to the public. This leaves room for improvement.

To ensure that substantively equal services are provided in both English and French, federal institutions use the [Analytical Grid for Analysing Federal Services and Programs in Light of the Principle of Substantive Equality](https://www.canada.ca/en/treasury-board-secretariat/services/values-ethics/official-languages/public-services/analytical-grid-substantive-equality.html).ⁱⁱⁱ The grid includes a series of questions to help federal institutions consider the impact of new initiatives on official languages issues. The questions relate to Parts IV, V, VI and VII of the Act and will ensure that official languages duties and

10. See <https://www.canada.ca/en/treasury-board-secretariat/services/values-ethics/official-languages/public-services/analytical-grid-substantive-equality.html>.

considerations are taken into account early in the process of developing a Treasury Board submission.

During the 2020–21 fiscal year, TBS undertook a review of its [Guidance for Drafters of Treasury Board Submissions](#),^{iv} including the [official languages impact analysis](#). TBS consulted with the community of practice on the draft of the new version of the guide. The guide was released in June 2021. The Department of Canadian Heritage also drafted a new guide to facilitate the analysis of official languages when preparing a Memorandum to Cabinet. Its title is [Guide for Drafting Memoranda to Cabinet — Official Languages Impact Analysis](#).^v TBS promoted it in its April 2021 *OL Connection* newsletter for the official languages community of practice.

1.7 Conclusion

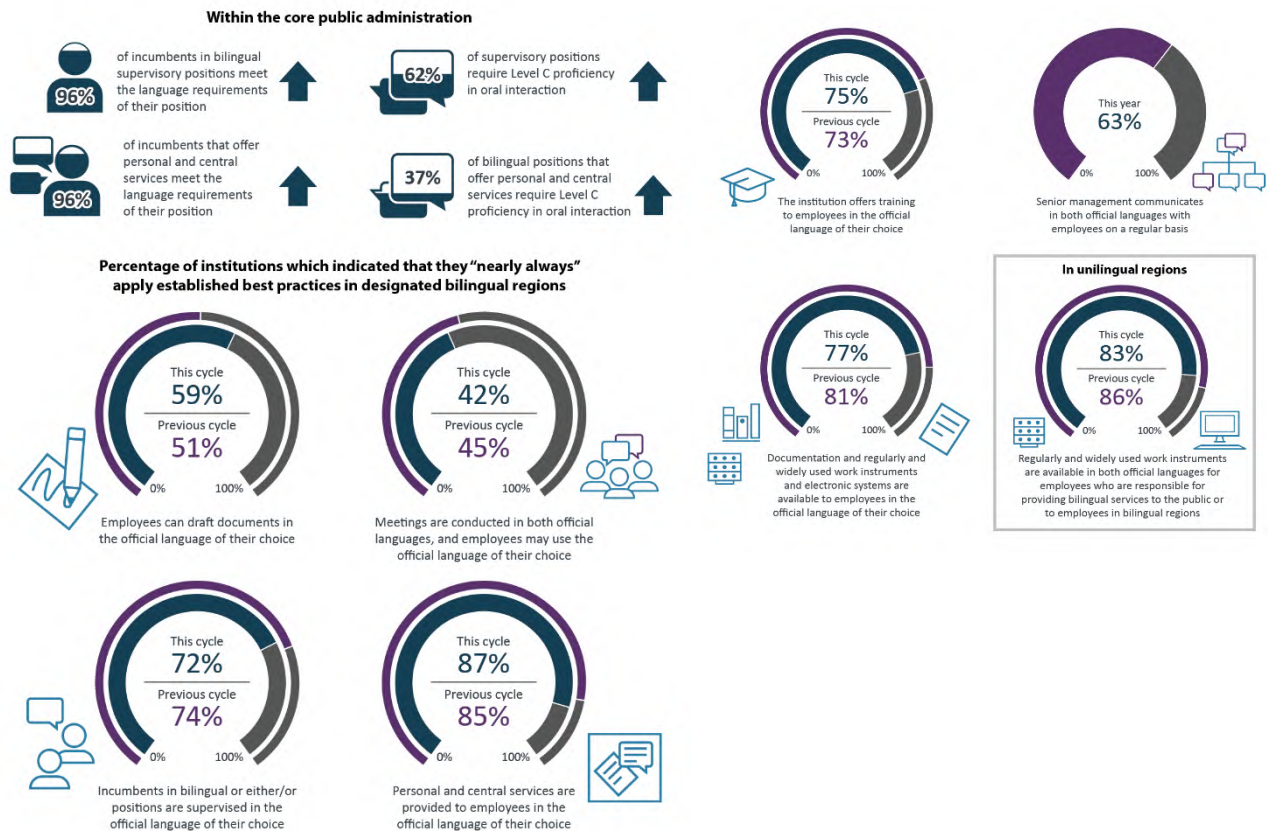

The reviews submitted to TBS over the past three years show that many federal institutions are complying with obligations under Part IV of the *Official Languages Act* or are adopting certain practices deemed to be best practice. As a result, written communications and government websites are at a high level of compliance.

However, there is still room for improvement in some areas.

In particular, many federal institutions have shortcomings when it comes to in-person active offer, which could make some members of the public (particularly those belonging to minority language communities) feel less secure. This insecurity can result in Canadians or travellers not daring to ask to be served in the official language of their choice, even though they should be able to exercise this right.

The omission by some institutions of language clauses in agreements with third parties is also an issue that needs to be addressed, since, in the absence of such clauses, some third parties may not offer the services in English or French that members of the public expect. Federal institutions must respect the same language obligation whether they provide a service directly or through a partner.

Chapter 2: Language of work

Part V of the Act defines the language rights of federal employees. Its key objective is to foster the full recognition of English and French in the federal public service. It is also intended to ensure that public servants have the opportunity to use either language in designated bilingual regions for language-of-work purposes.

Based on the reviews submitted by federal institutions from 2018 to 2021, there remains room for improvement to ensure that employees in designated bilingual regions for language-of-work purposes can truly work in the official language of their choice.

Follow-up of the Borbey-Mendelsohn report

In 2017, the Clerk of the Privy Council mandated the Committee of Assistant Deputy Ministers on Official Languages to oversee the implementation of the recommendations of the Borbey-Mendelsohn report titled [*The next level: Normalizing a culture of inclusive linguistic duality in the Federal Public Service workplace*](#).^{vi} Since 2018, the Language Portal of Canada has provided a [dashboard](#)^{vii} to measure progress in implementing the 14 categories of recommendations contained in the Borbey-Mendelsohn report. And significant progress has been made in implementing these recommendations. However, the most complex recommendations (for example, language training and raising the linguistic profile of supervisory positions) were incorporated into a broader language of work strategy and into administrative proposals as part of the modernization of the *Official Languages Act*. Going forward, TBS will report on the progress made to strengthen bilingualism in the public service.

2.1 Language of writing

According to Figure 2, only 59% of federal institutions (up from 51% in 2015–18) reported in their last review that their staff are “nearly always” able to draft documents in the official language of their choice.

Best practice

Natural Resources Canada is one of the organizations that works to respect the right of public servants to draft documents in their language of choice. In its action plan for official languages, the Department focuses on measures to raise their employees’ awareness of their right to work in English or French. In fact, in a message to all employees, the deputy minister encouraged them to work in the language of their choice when preparing briefing notes and documents. Natural Resources Canada has also installed bilingual automatic correction software on all of its staff’s workstations following a recommendation from the Borbey-Mendelsohn report.

2.2 Languages at meetings

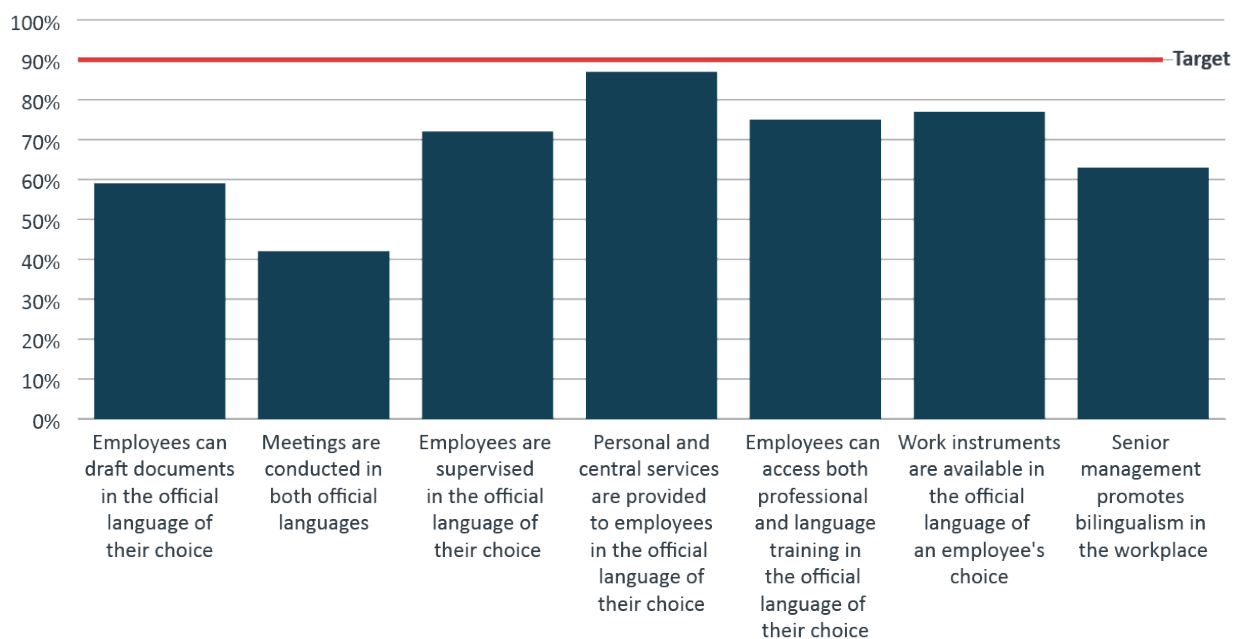

Figure 2 also shows that only 42% of federal institutions reported in their last review that meetings in designated bilingual regions are nearly always conducted in both official languages. This is a decrease of three percentage points from 2015–18. Most federal institutions must do more to respect the right of public servants to use English or French in face-to-face or virtual meetings.

Best practice

The Office of the Superintendent of Financial Institutions Canada posted an infographic on its intranet on the specific topic of official languages and teleworking. The infographic tells public servants about their rights and the practices they should observe when organizing or participating in virtual meetings. The Office also created special backgrounds that employees can install when they are on video conferencing to indicate that everyone should feel comfortable using either English or French.

Figure 2. Proportion of federal institutions that report nearly always applying best practice when it comes to bilingualism in the workplace, 2018–21

2.3 Language of employee supervision

In accordance with the [Directive on Official Languages for People Management](#),^{viii} managers and supervisors are required to supervise “employees located in bilingual regions in the official language of the employee’s choice when they occupy bilingual or either/or positions¹¹ and in the language of the position when they occupy unilingual positions.”

11. See the definition of “bilingual positions” and “either/or positions” and other important terms in [Appendix C](#).

However, only 72% of federal institutions indicated in their last review that incumbents of bilingual or either/or positions are nearly always supervised in the official language of their choice (Figure 2).

These results do not appear to be due to the supervisors having poor language skills. As of March 31, 2021, 96.1% of the incumbents of the 28,811 bilingual supervisory positions in the core public administration ¹² met the language requirements of their position — these are high requirements, since 62% of bilingual supervisory positions require a C level for oral interaction, which is the highest standard.

Best practice

The Financial Transactions and Reports Analysis Centre of Canada has, among other things, made it a priority to respect the right of its employees to be supervised in the official language of their choice. In June 2021, the Centre will initiate its own official languages policy, which will make it mandatory for incumbents of supervisory positions in a bilingual region to have a CBC level.

2.4 Personal and central services

As shown in Figure 2, 87% of institutions that have submitted a review in the past three years reported that the personal and central services they provide to employees in designated bilingual regions are nearly always in their preferred official language. This means, for example, that employees who want help to resolve a problem with their pay or computer can do so in either English or French.

As of March 31, 2021, 96.4% of the 68,581 incumbents of bilingual positions who provide personal and central services within the core public administration met the linguistic requirements of their position, and 37.1% of these incumbents had a Level C proficiency for oral interaction.

12. The core public administration consists of all the departments that appear in Schedule I and the portions of the federal public administration named in Schedule IV to the *Financial Administration Act* pursuant to sections 3 and 11 of that Act. A minister of the Crown, the Treasury Board or the Governor in Council is authorized to establish or approve terms and conditions of employment for those departments and agencies. This excludes federal employees working outside Canada.

2.5 Training and professional development

In bilingual regions, institutions must provide training and professional development services in the official language preferred by the employee. Three quarters (75%) of large federal institutions,¹³ the only ones required to address this particular issue in the review, indicated that they nearly always did so (Figure 2).

Best practice

Some institutions look elsewhere than the Canada School of Public Service for courses in both official languages. For example, employees of Employment and Social Development Canada have access to the courses of the College, a training centre created by that department. The College oversaw the creation of 481 bilingual courses to train employees across the country on issues prioritized by the institution. Over 100 courses in English and French were also created by the Atlantic Regional Office for employees in that region. Part-time and full-time individual or group training is also provided to staff to improve their second language skills.

2.6 Work tools

Employees located in bilingual regions and employees who are required to provide services to the public in both official languages in a unilingual region have the right to access regularly and widely used work instruments, work tools and information systems (such as a spreadsheet or a collaborative cloud-based application) in the official language of their choice. Based on the reviews examined by TBS for this cycle, 77% of federal institutions, a decrease of 4 percentage points since 2015–18 (Figure 2), believe that their staff are nearly always able to exercise this right, which is of particular importance in this era of remote work.

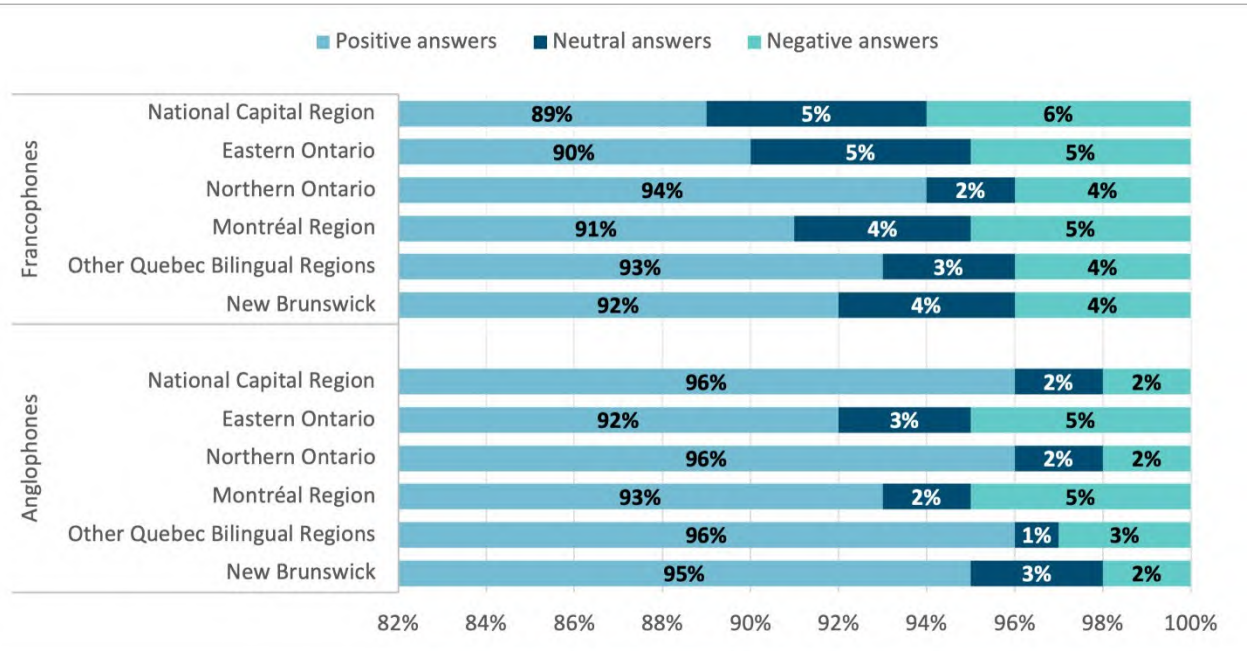

However, the data from the [2020 Public Service Employee Survey](#)^{14,ix} somewhat qualify this result. In fact, 94% of public servants responded affirmatively in 2020 to the statement: “The material and tools provided for my work, including software and other automated tools, are available in the official language of my choice.”

13. Large institutions employ over 500 people.

14. In total, 188,786 employees from 87 federal departments and agencies responded to the 2020 Public Service Employee Survey, which is a participation rate of 61%.

Figure 3. Perception of public servants concerning the availability of materials and work tools in the language of their choice in regions designated bilingual for the purpose of language of work ¹⁵

Best practice

Public Safety Canada is one of the institutions that is making a particular effort to provide their public servants with work tools in their preferred official language. In 2020, it created a working group to ensure that information technologies acquired by the organization are in compliance with current policies on official languages, accessibility and security. The following questions are included in the technology approval form: “Will this tool be used by employees located in designated bilingual regions for language of work purposes? If so, the tool should be available to them in the official language of their choice.” and “Is this tool required to enable employees to communicate with or provide services to the public or employees in both English and French? If so, the tool should be available in both official languages.”

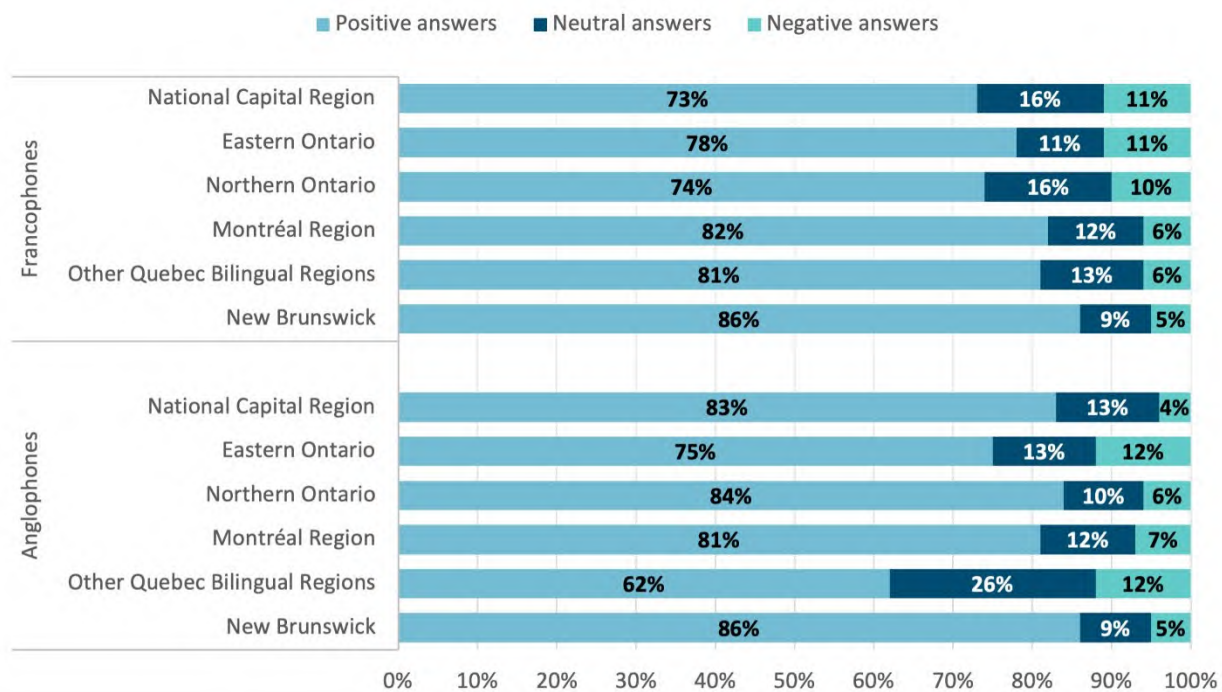

15 . Affirmative responses include “strongly agree” and “somewhat agree.” Neutral responses include “neither agree nor disagree.” Negative responses include “somewhat disagree” and “strongly disagree.” For the question about senior managers, affirmative responses are “always/almost always” and “often.” Neutral responses are “sometimes.” Negative responses are “rarely” and “never/almost never.” The total number of affirmative and negative responses does not take into account “don’t know” and “not applicable” responses.

2.7 Leadership

The *Policy on Official Languages* emphasizes that, in designated bilingual regions, it is the responsibility of the deputy head to set the appropriate tone in terms of respecting both English and French. While only 63% of institutions stated in their review that senior management nearly always exercises the leadership necessary to foster a workplace conducive to the effective use of both official languages (Figure 2), 80% of federal employees in designated bilingual regions for language-of-work purposes stated in the 2020 Public Service Employee Survey that “senior executives in their department or agency use both official languages in their interactions with employees.”

Figure 4. Perception of public servants concerning their senior managers and their use of both official languages when they interact with employees, in regions designated bilingual for the purpose of language of work

2.8 Conclusion

To create truly bilingual workplaces more work is needed in many institutions. Two shortcomings stand out. Nearly five years after the Borbey-Mendelsohn report was tabled, too many public servants are not given the opportunity to draft documents in the official language of their choice or to participate in English or French in meetings. Institutions are doing better, though, in terms of providing bilingual personal and central services to employees.

As shown in Chapter 6, TBS took various steps in 2020–21 to encourage federal institutions to address these issues.

TBS will increase the number of interventions in the years to come in order to bring about a significant improvement in terms of drafting documents in the language of choice and bilingual meetings.

Chapter 3: Federal institutions and the participation of English-speaking and French-speaking Canadians

Sources : Census 2016; Position and Classification Information System and Official Languages Information System II as of March 31, 2021. Trends compared to previous year's data.

90% of institutions have taken steps to ensure that the institution's workforce tends to reflect the composition of the two official language communities in Canada

3.1 Analysis

While providing that the merit principle should guide the federal government's human resources approaches, Part VI of the Act states that the federal government must ensure that "English-speaking Canadians and French-speaking Canadians . . . have equal opportunities to obtain employment and advancement in federal institutions." The government must also ensure that "the composition of the workforce of federal institutions tends to reflect the presence of both the official language communities of Canada, taking into account the characteristics of individual institutions, including their mandates, the public they serve and their location."

Ninety percent of large institutions reported that they took steps during the 2018–21 cycle to ensure that their workforce tended to reflect the composition of the two official language communities in Canada, based on their mandate, target audience and the location of their offices.

For example, federal institutions reported taking part in job fairs at postsecondary institutions frequented by members of official language minority communities. Some institutions ensure that job advertisements appear in Anglophone and Francophone community media, and others use social media and recruitment platforms in both languages to reach all potential candidates across the country.

Best practice

Despite the pandemic, Correctional Service Canada's recruitment and outreach team continued to promote career opportunities in the Department by using social media, placing ads on billboards and websites, and participating in virtual job fairs open to all, including members of official language communities. At these fairs, the recruitment and outreach team made presentations in English and French, and the bilingual recruiters spoke to participants in their preferred official language.

As of March 31, 2021, in the core public administration, the participation rate was 69.2% for Anglophones¹⁶ and 30.8% for Francophones. In all institutions subject to the Act, Anglophones accounted for 73.9% of the workforce and Francophones for 25.9% (an increase of 0.3% in one year).

These percentages are in line with those of the 2016 census, which indicated that 75.4% spoke English as their first official language and 22.8% spoke French.

Anglophones and Francophones are well represented in all federal institutions and offices across Canada's provinces and territories. Nonetheless, English-speaking Quebecers outside the [National Capital Region](#)^x make up only 11.4% of the employees of the core public administration, despite representing 13.7% of the Quebec population.

16. Definitions are available in [Appendix C](#).

Best practice

Recruitment of Anglophone employees in Quebec is an issue for Public Services and Procurement Canada. To increase representation, the Department conducted two recruitment events at English post-secondary institutions in Quebec that resulted in the hiring of new Anglophone employees.

3.2 Conclusion

While continual awareness regarding the representation of English-speaking and French-speaking Canadians in federal institutions will always be required, current indicators are generally satisfactory, except in the core public administration in Quebec, where Anglophones are underrepresented.

In addition, the reviews show that a large percentage of institutions take targeted measures every year to ensure that Anglophones and Francophones are adequately represented.

Chapter 4: Institutions and management of the official languages file

Compliance with the Act depends on establishing rigorous official languages management processes. This section discusses the actions that institutions have taken to create and implement these processes.

4.1 Human resources management

The *Policy on Official Languages* states that federal institutions shall adopt a variety of human resources management practices to ensure that they are fully able to provide quality services in both English and French to the public and their employees.

After examining the reviews, TBS found that, in 2018–21, only 68% of large institutions nearly always had the necessary human resources to meet their language obligations to members of the public and to their employees. In other words, they had enough bilingual staff to communicate with, supervise and assess employees in regions designated as bilingual for language-of-work purposes, offer employees internal services in the official language of their choice and have

sufficient qualified personnel in each of the two official languages to provide services to the public in the language of their choice in full compliance with the Act.

Figure 5 shows the various means used by federal institutions, according to their latest review, to ensure that they can rely on employees who are able to respect their colleagues' and the public's language rights. To start, it shows that as few as 58% of large institutions indicated that they nearly always allow their employees to take French or English courses to advance their careers.

Figure 5. Proportion of federal institutions that reported some human resources management practices that promote the advancement of official languages, 2018-21

Best practice

For example, the Canada Border Services Agency has its own language school. The staff's access is based on factors such as employee demand or the needs for a particular service. For example, the Agency's Information, Science and Technology Branch can count on five full-time instructors to teach employees French. The Branch is particularly committed to helping early-career public servants strengthen their second language so that nothing will hinder their progress.

Best practice

Another example is Public Safety Canada's 2020–23 Action Plan for Official Languages, which states that one of the main activities of the Department's official languages champion is to encourage employees to either acquire new second language skills, maintain those they already have or improve them. The Department has three standing offers with second-language training schools for individual or group training and uses the services of schools under Public Services and Procurement Canada's standing offers.

Best practice

At the Office of the Privacy Commissioner of Canada, the second-language training program that used to be held in a classroom was adapted to the reality of working from home. At the beginning of the pandemic, training was done by telephone. As soon as possible, classroom training resumed but virtually, using a videoconference application. Classes allow the Office's employees to maintain or improve their skills and achieve the desired skill level. The Official Languages Promotion Committee resumed lunch-and-learn sessions. These are now being held virtually.

Best practice

Air Canada offers various language training programs to help employees who may not have the level of proficiency necessary for providing service in both official languages, for maintaining their language qualifications, or for improving oral or written language skills. Tools are also available to employees, such as:

- ▶ an internally developed online training module accessible from different platforms, such as tablets and smartphones
- ▶ an airline vocabulary
- ▶ a quick reference card
- ▶ a booklet containing terminology specific to employee tasks
- ▶ examples of responses to use

Virtual courses were offered during the pandemic.

Best practice

Lastly, Innovation, Science and Economic Development Canada's Official Languages Discussion Network has organized various activities to encourage employees to use their second official language on a daily basis. Among other things, it sent emails on the topic, challenged employees and pursued its mentoring program.

Conducting an objective assessment of the language requirements associated with a position, as set out in section 91 of the Act, is another step that institutions must take to ensure that their staff are fully able to use both English and French at the required level. A study of the latest reviews of federal institutions shows that 83% of them nearly always implement this practice (Figure 5).

Best practice

Several federal institutions reported using the tool developed by TBS to objectively determine the linguistic profile of bilingual positions. Others use the one created by the Office of the Commissioner of Official Languages to establish the linguistic identification of positions. They use it, for example, to determine whether a vacant position should be bilingual or not.

Best practice

Innovation, Science and Economic Development Canada reviewed the linguistic profiles of all of its supervisory positions to see if they had been objectively established. The Department has developed a plan to increase the linguistic profiles of these positions to the CBC level in bilingual regions. This plan will be implemented by 2024.

The hiring of candidates who are already bilingual to fill bilingual positions is another key human resources management measure. Of all the institutions that submitted a review and that have bilingual positions, 76% nearly always recruit candidates for those positions who are already bilingual at the time of their appointment (Figure 5). For example, in 2020–21, 366 out of 368 bilingual positions were filled in this manner by Public Safety Canada.

Finally, much of the strengthening of official bilingualism depends on the awareness and training of employees, who need to know what is expected of them. Of all the institutions that submitted a review, 89% stated that they regularly take measures to ensure that employees are aware of obligations related to various parts of the Act.

Best practice

For example, the letters of offer sent by the Bank of Canada indicate that the recruits will work in a bilingual workplace. These letters also indicate the level of bilingualism required for the position that each recruit will occupy. New employees are informed of the Bank's *Bilingualism Policy* and the Bank's obligations under the Act during an information session that they are invited to upon arrival. Finally, staff are periodically reminded of their official languages obligations during the year.

4.2 Governance of official languages

The *Policy on Official Languages* requires that each federal institution have an official languages unit, a person responsible for official languages and a champion of official languages. It is thanks in large part to these teams and individuals that institutions are able to meet their official languages obligations.

An analysis of the reviews submitted over the past three years reveals that the champion (or co-champion) and the persons responsible for Parts IV, V, VI and VII of the Act meet regularly to discuss language issues (Figure 6) in 71% of large institutions.

An internal official languages committee or network is another mechanism that many institutions use to foster coordinated awareness of their official languages program (Figure 4). Based on the reviews received from 2018 to 2021, 75% of large institutions have such a committee or network. And 61% of institutions that have one ensure that it meets regularly.

Figure 6. Proportion of federal institutions that report some governance practices that promote the advancement of official languages, 2018–21

Best practice

For example, Veterans Affairs Canada has created an official languages advisory committee whose membership reflects the structure of the Department and the geographic distribution of its offices. Through its leadership, actions and consultations, this committee helps the institution improve its official languages capacity. It identifies the language issues and challenges to be addressed, develops and implements strategies, and speaks up on official languages within the Department. Meetings of the advisory committee are held every two months by teleconference in the presence of the official languages champion and the departmental official languages advisor.

Senior management leadership is crucial in official languages matters. It is important that language issues regularly be placed on the agenda of management committee meetings. According to the latest reviews received by TBS, this is the case in 61% of large institutions (Figure 6).

Best practice

For example, at the Public Health Agency of Canada, language obligations are regularly discussed at meetings of its departmental executive committee and the executive committees of its various branches. During these meetings, the Agency's leaders address issues such as:

- ▶ deliverables and planned strategies for official languages
- ▶ planning and promoting special events, such as Linguistic Duality Day
- ▶ tracking the Agency's and branches' official languages action plans

Setting performance targets is another key component of the governance structure that institutions must establish. These objectives often involve executives and sometimes managers and supervisors. Of the institutions that filed a review between 2018 and 2021, 60% have performance agreements that set targets for executives to implement Parts IV, V, VI and VII of the Act (Figure 6). Since an amendment to the [*Directive on Performance and Talent Management for Executives*](#)^{xi} was adopted, these targets have included maintaining the second language skills of executives.

Best practice

Since 2017–18, Parks Canada has required in the performance agreements of its senior management that they demonstrate how they have taken measures that promote bilingualism. Parks Canada has tools that allow managers and directors to add specific official languages items in the Agency’s employee performance agreements.

Best practice

Agriculture and Agri-Food Canada has created an Official Languages Guide for Performance Agreements that is available on its intranet. In 2020–21, the Department’s senior managers’ agreements included the performance measure “Encouraging the use of both official languages.”

4.3 Monitoring

In official languages, as in other areas, establishing monitoring mechanisms allows institutions to take note of their progress (or their setbacks), report on them and, ultimately, strengthen their achievements or correct their shortcomings.

Based on the reviews of the 2018–21 cycle, 71% of federal institutions conducted activities to measure the availability and quality of services offered to the public in English and French (Figure 7). These activities include conducting informal assessments (49%), spot checks by supervisors (52%) and client surveys (20%).

Figure 7. Proportion of federal institutions that report monitoring practices that promote the advancement of official languages, 2018–21

In addition, one third of institutions use the results of surveys of federal public servants to measure the level of use of official languages in the workplace. Others use other measures to do this, such as informal assessments, spot checks, monitoring activities and internal surveys.

Best practice

For example, every year, every employee of the Business Development Bank of Canada is invited to complete an omnibus survey that includes specific questions on official languages, such as whether they feel comfortable using English or French.

Based on the reviews received by TBS, 68% of institutions have also established mechanisms to determine the nature and extent to which their decisions have an impact on official languages, when those decisions relate to the adoption or revision of a policy, the creation or abolition of a program, or the establishment or elimination of an office (Figure 7). These mechanisms may include consulting the Treasury Board’s [*Official Languages Requirements and Checklist*](#).^{xii}

Best practice

Agriculture and Agri-Food Canada is one of the institutions that implement such mechanisms. When a policy is adopted or a program is created, the Department's official languages team is systematically consulted to assist public servants in conducting an impact assessment called the "Official Languages AgriFilter." Its questionnaire is used to determine whether the proposed initiatives could impact the Department's level of compliance with the Act. Agriculture and Agri-Food Canada also uses a specific tool to "consider official languages when reviewing spending decisions" and another tool on "what managers must consider" during a "workforce adjustment."

Two other monitoring mechanisms that institutions may also use are audits and evaluations. Based on the reviews received by TBS, 59% of institutions used either approach during the three-year cycle — through their internal audit unit or through other units — to measure the level of compliance with their official languages obligations (Figure 7).

Best practice

Public Services and Procurement Canada ensures annually that positions bear the appropriate language designation and that problems are corrected. The Department also regularly reviews complaints received and irregularities in the payment of the bilingualism bonus.

Finally, it is the responsibility of deputy heads to implement official languages policies. Federal institutions should have processes in place to ensure that their leadership is informed promptly of any challenges. According to the reviews, almost all institutions, or 91% of them, indicate that their deputy head is informed of the results of monitoring activities regarding bilingualism in a timely manner.

Best practice

For example, the Chief Human Resources Officer of the Office of the Superintendent of Financial Institutions Canada appears before the Executive Committee twice a year to provide an update on issues, including the issue of official languages. Among the issues addressed in these presentations were the official languages results of the Public Service Employee Survey.

4.4 Conclusion

Many mechanisms or processes that promote the Government of Canada's compliance with the *Official Languages Act* are already in place in a high proportion of federal institutions. For example, it is encouraging to see that three quarters of federal institutions undertake a variety of activities to establish the level of availability and quality, both in English and French, of the services they provide to the public. Indeed, as the saying goes, what is not measured cannot be improved.

However, some official languages management practices should be more generalized than they currently are in order to produce the expected results for members of the public and federal employees. Employee access to training in English or French, for example, should be improved; meetings between official languages officials should be more frequent; and language issues should be more prominent on the agenda of meetings held by senior management.

What is notable, though, is that institutions conduct awareness activities so that employees know their official languages rights and obligations and they include official languages objectives in performance agreements.

Chapter 5: Official languages and COVID-19

Federal institutions have an obligation to comply with the provisions of the Act during crises and under normal circumstances. Marked by the pandemic, 2020–21 was a crisis year in which official languages created challenges for some institutions, not least because there was a spike in the demand for their digital or telephone services and because remote work and virtual meetings became the norm.

5.1 Crisis planning

Most institutions, or 73%, had endeavoured to be prepared for the COVID-19 crisis by ensuring that official languages were taken into account in their emergency planning and crisis management plans.¹⁷

Best practice

Elections Canada is one of the organizations that sought to anticipate and mitigate the potential effects of the COVID-19 crisis on its ability to meet its language obligations. It therefore began the development of a new operational plan to ensure that, despite the pandemic, elections can be held in a manner that ensures safety and respect for the rights of English- and French-speaking Canadians. The Publications Service provided express editing and translation services to staff to help them respond adequately to urgent requests where needed. The agency also produced communications guidelines that staff were to follow.

Best practice

Official languages are also taken into account in the Canadian Nuclear Safety Commission's emergency and crisis management plan. The Commission established standard procedures to ensure that, even in exceptional circumstances, its communications to the public fully comply with the Act. An agreement allows any staff member to access the services of the Translation Bureau within Public Services and Procurement Canada. The Commission's official languages specialists are part of its emergency management team to ensure that the rights of Anglophones and Francophones are fully respected.

17. Of the 21 institutions that did not consider official languages in their emergency and crisis planning, four, including National Defence and the Canadian Armed Forces indicated they are always ready to respond to emergencies and crises. Of the remaining 17, some noted that communications were always conducted in both official languages. Others, mostly port authorities, indicated that all of their staff were English-speaking or did not have to deal with the public.

5.2 Measures taken during the COVID-19 pandemic

Many of the organizations that submitted a review in 2020–21 described the steps they took during the pandemic to ensure that their obligations in terms of communications with and services to the public as well as in terms of language of work were met.

Best practice

Measures put in place by the Canada Revenue Agency to ensure that its language of work obligations were met include the Canada-wide distribution of a virtual background that promotes the use of both official languages during remote meetings. The Agency also provided information on virtual workplace language rights and obligations for employees on its intranet.

Best practice

Shared Services Canada provided staff with its protocol for urgent and out-of-office translation services. It also established a process by which bilingual employees help to rapidly review translations.

Best practice

To respond adequately to the crisis, Health Canada branches have ensured that they develop their ability to communicate with and provide services to the public in both English and French. They conducted significant recruitment efforts in 2020–21, and hiring managers worked with the persons responsible for official languages so that the positions to be filled have the appropriate language designation. Branches also ensured that language training is provided to employees who serve the public.

Overall, federal public servants are satisfied with the measures taken by their employer to inform them during the COVID-19 crisis. According to a question in the 2020 Public Service Employee Survey, 95% of Anglophones and 94% of Francophones in designated bilingual regions for language-of-work purposes feel that the information on the pandemic was properly received in both official languages.

Figure 8: Perception of public servants concerning the availability of information on the COVID-19 pandemic in both official languages in regions designated bilingual for language-of-work purposes

5.3 Crisis and Emergency Communications Working Group

In October 2020, the Commissioner of Official Languages released a special report, [*A Matter of Respect and Safety: The Impact of Emergency Situations on Official Languages*](#),^{xiii} that discusses shortcomings at press conferences, in alert messages, during communications from government agencies, and when communicating with federal employees in bilingual regions. The report recommends that TBS review and amend emergency communication plans and procedures, train public servants who collaborate on emergency communications and assess the effectiveness of the measures taken.

In early 2020–21, TBS created an interdepartmental working group on bilingual communications in emergency or crisis situations with the mandate of examining the Commissioner’s recommendations, identifying practices and challenges in federal institutions, and developing a strategy and an action plan. The working group includes representatives from TBS, the Privy Council Office, Canadian Heritage, Public Safety Canada and the Translation Bureau.

The group has developed a strategy for 2022–24 that will:

- ▶ improve governance by:
 - strengthening governance tools used to address language obligations in emergency/crisis communications
 - strengthening leadership and accountability for communications in emergencies/crises
 - enhancing the bilingualism of positions involved in emergency/crisis communications
- ▶ equip and empower federal institutions to help them meet their official languages obligations in crisis or emergency situations by:
 - strengthening the role and capacity of the Translation Bureau to provide translation and interpretation services during emergency or crisis situations
 - increasing the effective use of both official languages within the federal government by strengthening language security and modernizing the language training framework
 - developing, promoting and sharing best practice in emergency communications
- ▶ strengthen accountability and oversight by optimizing existing monitoring and accountability mechanisms and the use of self-diagnosis tools to effectively integrate official languages in strategic priority planning

5.4 Conclusion

2020–21 was a year unlike any other, including for federal institutions. For the most part, institutions coped well with the official languages challenges brought on by the pandemic. Going forward, it is clear that strong planning and implementation measures will be required to ensure that both in normal and crisis times institutions fully comply with the Act and fully meet the expectations of the public and federal employees.

Chapter 6: Official languages and TBS

In 2020–21, TBS fully assumed its role in developing federal policies and programs for the application of Parts IV, V and VI of the *Official Languages Act* in federal institutions and in coordinating and monitoring activities to implement these policies and programs. It also contributed to efforts to modernize and strengthen the *Official Languages Act*.

6.1 Application of the official languages program and policies

In 2020–21, as in each fiscal year, TBS took steps to strengthen the place of English and French in the sectors under its responsibility. In particular, it has endeavoured, through its actions, to remedy some of the shortcomings identified in the preceding pages.

Much of TBS's efforts have focused on helping institutions deal with the pandemic, as it became clear that it would lead to accelerated workplace transformation and increased use of information technology.

From the beginning of the crisis, TBS worked closely with federal institutions to help them adjust to the new realities of work while fully complying with their official languages obligations. A particular focus was on the use of both English and French in virtual meetings. There was also a need to ensure that the language skills of staff were maintained in order to promote good human resources management.

As a result, shortly after pandemic health measures were imposed, TBS held a virtual meeting with official languages experts to discuss two issues: government communications in crisis situations and adaptations of the Public Service Commission of Canada's measures on language testing and the validity of second language evaluation results.

It is also in this context that, at the start of the pandemic, TBS made available information to public servants on bilingualism in the remote workplace, reminding them via [a Web-based publication](#)^{xiv} of the rules to follow when holding meetings at a distance. TBS also used a dedicated wiki page and a newsletter to inform federal institutions about respecting official languages rights and obligations in a virtual workplace. In October 2020, TBS issued a toolkit on bilingualism in meetings.

In addition, TBS worked with many stakeholders in 2020–21 to adapt its policies and ensure that they are better aligned with the government's intention to create a diverse and inclusive public service and foster reconciliation with Indigenous Peoples.

Among other things, these changes now allow qualified public servants who have a disability affecting their ability to learn a second official language to hold executive positions at the EX-02 to EX-05 levels. This approach, which already exists for all other levels, aims to increase the representation of persons with disabilities without eroding linguistic duality. Institutions that appoint these individuals to executive positions must put in place administrative measures to ensure that their duties can be carried out in both official languages.

In 2020–21, TBS also continued its efforts to engage with federal institutions to prepare for the implementation of the [*Official Languages \(Communications with and Services to the Public\) Regulations*](#) (Regulations)^{xv} that were amended in 2019. This engagement strategy includes developing policy tools, training sessions for official languages experts in federal institutions and simulations to show how provisions of the new Regulations are applied in federal offices. TBS also started discussions with stakeholder groups to update the [*Directive on the Implementation of the Official Languages \(Communications with and Services to the Public\) Regulations*](#).^{xvi}

To address concerns about the equitable participation of English-speaking Quebecers in federal institutions in Quebec in accordance with Part VI of the Act, TBS will work with the Quebec Community Groups Network, other stakeholders and federal institutions to develop a strategy to increase the recruitment of English-speaking Quebecers in federal institutions located in Quebec.

6.2 Support to federal institutions and knowledge sharing

In 2020–21, TBS intensified its work with federal institutions to help them comply with the Act. Specifically, it:

- ▶ provided over 229 interpretations
- ▶ organized 20 meetings and events with communities of practice on official languages
- ▶ participated in 46 meetings with federal institutions
- ▶ published 8 newsletters

In addition, TBS analysts reviewed over 400 Treasury Board submissions with a particular focus on Parts IV, V and VI of the Act.

The numerous meetings organized or co-organized by TBS to discuss official languages issues ([Appendix E](#)) brought together some 1,100 people to discuss:

- ▶ the legislative obligations of institutions
- ▶ their application of official languages policies
- ▶ maintenance of second language skills
- ▶ language training
- ▶ the potential impacts of artificial intelligence on linguistic duality
- ▶ the future of work

-
- ▶ leadership
 - ▶ the challenges of implementing the section of the Act that requires that language requirements of positions be established objectively (section 91)
 - ▶ the linguistic insecurity of public servants, who often hesitate to use their first or second official language in the workplace
 - ▶ the modernization the Act
 - ▶ changes to the Regulations
 - ▶ new approaches, practices and tools to better support official languages in institutions

In particular, TBS organized 30 training sessions to help persons responsible for official languages increase their knowledge of legislative and practical aspects of the Act and of Treasury Board policy instruments. These learning activities were intended to give officials the tools that will allow them to fully carry out their role as coordinators for official languages program implementation within their institution.

Finally, TBS coordinated efforts across the public service to address a variety of horizontal issues related to observations by the Commissioner of Official Languages and to find solutions to new realities. The issues of leadership, linguistic insecurity and communication protocols between officials from different regions headlined the Best Practice Forum on Official Languages held in March 2021.

TBS held meetings with federal institutions to address issues associated with the shift to open government, especially with launching or strengthening initiatives, such as open science. TBS also created a working group to examine a series of tools that will help reduce linguistic insecurity. Specifically, it started to adapt for public servants a linguistic risk-taking passport created by the University of Ottawa. It also created coaching circles and conducted video interviews with exemplary leaders to better understand and explain how authentic leadership promotes sustained risk-taking in a second language and has a positive effect on organizations.

6.3 Modernization of the Act

The September 23, 2020, Speech from the Throne reaffirmed the federal government's commitment to modernize and strengthen the *Official Languages Act*. On January 15, 2021, the Prime Minister mandated the President of the Treasury Board to assist the Minister of Economic Development and Official Languages in modernizing the Act and, in particular, to work to improve the government-wide oversight and coordination of the work aimed at implementing the Act within the federal government.

After extensive consultation with Canadians, the Government of Canada outlined its vision for the reform of the language regime in Canada in “[English and French: Towards a substantive equality of official languages in Canada](#),”^{xvii} a public document released in February 2021. The government’s vision was based on three priorities:

- ▶ improving the official languages compliance of federal institutions
- ▶ strengthening Part VII of the Act
- ▶ engaging Canadians across the country to make the Act a key tool in helping the country meet the challenges of tomorrow

In March 2022, the government tabled a [bill for the substantive equality of Canada’s official languages](#), the first major modernization the *Official Languages Act* in 30 years.

In order to strengthen bilingualism in the public service, the government proposed to develop a new second language-training framework for the public service, which would ensure quality, accessible and adapted French and English training for all learners, including Indigenous people and persons with disabilities.

Conclusion of the report

This annual report demonstrates that, based on the 2018–19, 2019–20 and 2020–21 reviews, institutions are making great strides towards full compliance but that certain areas of improvement remain.

Ensuring that, under both normal and crisis situations, full equality of English and French in communications with and services to the public or in terms of language of work is achieved is one such area.

Institutions will have to ensure that their employees are aware of their official languages rights and obligations, that access to language training is improved, that the second language skills of public servants are maintained and that preparations are made for the effects of the amendments to the *Official Languages (Communications with and Services to the Public) Regulations*.

The COVID-19 pandemic quickened the government's transition to greater use of technology, more flexible work organization, and a more dispersed workforce across the country. A more dispersed workforce will allow us to attract a more diverse pool of bilingual candidates with the skills and abilities the government needs.

If public servants can work in a hybrid fashion, they can also learn English or French at their own pace thanks to a growing number of online learning tools, such as the Mauril, a mobile app developed by the Canadian Broadcasting Corporation and available free of charge to all Canadians.

TBS fully supports institutions' efforts to improve their performance in terms of official bilingualism. TBS envisions language training moving towards a mix of self-directed learning, instructor-led training and cooperative or peer learning. All employees will need to be equipped to ensure that they have the skills they need, including second language skills, to contribute to the public service. By supporting federal institutions, TBS will continue to build and maintain the public service that Canada deserves and that Canadians depend upon.

Appendix A: Methodology for reporting on the status of official languages programs

Federal institutions must submit a review on official languages to TBS at least once every three years. This fiscal year marks the third year of the three-year cycle (2018-21).¹⁸ Sixty-eight (68) organizations¹⁹ had to complete a questionnaire on elements pertaining to the application of Parts IV, V and VI of the Act in 2020–21.

Institutions were required to report on the following elements:

- ▶ communications with and services to the public in both official languages
- ▶ language of work
- ▶ human resources management
- ▶ governance
- ▶ monitoring of official languages programs

These five elements were evaluated mainly by using multiple-choice questions. To reduce the administrative burden on small institutions,^{20, xviii} they were asked fewer questions than large institutions. Deputy heads were responsible for ensuring that their institution's responses were supported by facts and evidence. The following table describes the response scales used in the review on official languages for 2020–21.

18. Twenty institutions submit a review every year.

19. See [Appendix B](#) for the list of institutions required to submit a review for the fiscal year 2020–21.

20. The distinction between small and large institutions is based on their size, in accordance with the recommendations made by the Auditor General of Canada in the spring 2015 report, [Report 2 – Required Reporting by Federal Organizations](#). In general, small organizations have fewer than 500 employees.

Table 1

Response scales used in the review on official languages

Nearly always	In 90% or more of cases
Very often	Between 70% and 89% of cases
Often	Between 50% and 69% of cases
Sometimes	Between 25% and 49% of cases
Almost never	In fewer than 25% of cases
Yes	Completely agree with the statement
No	Completely disagree with the statement
Regularly	With some regularity
Sometimes	From time to time, but not regularly
Almost never	Rarely
N/A	Does not apply to the institution

The previous sections outline the status of official languages programs in the 68 institutions that submitted a review this year or, as the case may be, the most recent results from the 168 institutions that submitted a review over the 2018–21 cycle. The statistical tables in Appendix D of this report outline the results²¹ for all federal institutions.

21. The statistical data from the core public administration institutions came from the Position and Classification Information System, and data from institutions that are not part of the core public administration came from the Official Languages Information System II.

Appendix B: Federal institutions required to submit a review for the fiscal year 2020–21

Sixty-eight federal institutions submitted a review for the fiscal year 2020–21. The distinction between small institutions and large institutions is based on size. Large institutions were required to respond to a longer questionnaire. Small institutions have fewer than 500 employees. The lists of federal institutions that submitted a review over the two precedent fiscal years of the three-year cycle are available in the appendices B of the [Annual Report on Official Languages 2018–19](#)^{xix} and the [Annual Report on Official Languages 2019–20](#).^{xx}

Large institutions

- ▶ Agriculture and Agri-Food Canada
- ▶ Air Canada
- ▶ Bank of Canada
- ▶ Business Development Bank of Canada
- ▶ Canada Border Services Agency
- ▶ Canada Lands Company Limited
- ▶ Canada Post
- ▶ Canada Revenue Agency
- ▶ Canadian Heritage
- ▶ Canadian Northern Economic Development Agency
- ▶ Canadian Nuclear Safety Commission
- ▶ Canadian Radio-television and Telecommunications Commission
- ▶ Correctional Service Canada
- ▶ Courts Administration Service
- ▶ Defence Construction Canada
- ▶ Employment and Social Development Canada
- ▶ Export Development Canada
- ▶ Farm Credit Canada
- ▶ Federal Economic Development Agency for Southern Ontario
- ▶ Fisheries and Oceans Canada
- ▶ Global Affairs Canada

Appendix C: Definitions

“Anglophone” refers to employees whose first official language is English.

“Bilingual position” is a position in which all or part of the duties must be performed in both English and French.

“First official language” is the language declared by the employee as the one that they primarily identify with.

“Francophone” refers to employees whose first official language is French.

“Incomplete record” means a position for which data on language requirements are incorrect or missing.

“Position” means a position filled for an indeterminate period or a determinate period of three months or more, according to the information in the Position and Classification Information System (PCIS).

“Resources” refers to the resources required to meet obligations on a regular basis, according to the information available in the Official Languages Information System II (OLIS II). Resources can consist of a combination of full-time and part-time employees, as well as contract resources. Some cases involve automated functions, hence the need to use the term “resources” in this report.

“Reversible” or “either/or position” is a position in which all the duties can be performed in English or French, depending on the employee’s preference.

Appendix D: Statistical tables

There are four main sources of statistical data:

- ▶ [Burolis](#)^{xxi} is the official inventory that indicates whether offices have an obligation to communicate with the public in both official languages
- ▶ The Position and Classification Information System (PCIS) covers the names and positions of employees working within institutions that are part of the core public administration
- ▶ The Official Languages Information System II (OLIS II) provides information on the resources of institutions that are not part of the core public administration (in other words, Crown corporations and separate agencies)
- ▶ The Employment Equity Data Bank (EEDB) provides data based on voluntary declarations by employment equity groups and, for women, the Pay System

March 31 is the reference date of the data in the statistical tables and in the data systems (the Pay System, Burolis, the PCIS, OLIS II and EEDB).

Notes

Percentage totals may not add up to 100% due to rounding.

The data in this report relating to positions in the core public administration are compiled from the PCIS, except for tables 15 to 18, which also use the EEDB. Because the data related to official languages are based on the PCIS, they do not match those posted in the Annual Report on Employment Equity in the Federal Public Service. The sum of the designated groups in employment does not equal the total of all employees because employees may have chosen to self-identify in more than one group and because the men were added to the total.

It is possible that the percentages of incumbents of bilingual positions who meet the language requirements of their position in tables 4, 6, 9 and 11 are higher in reality because the Public Service Commission of Canada temporarily suspended evaluations of second language competencies during the pandemic. Despite the assessments of candidates administered by the institutions during this period, only the Commission can update the PCIS from its own evaluations. The results will be updated as the Commission formally evaluates the recruits and the promoted employees, within 12 months of their appointments being made.

Pursuant to the [Public Service Official Languages Exclusion Approval Order](#),^{xxii} incumbents may not meet the language requirements of their position for two reasons:

- ▶ they are exempted
- ▶ they have two years to meet the language requirements

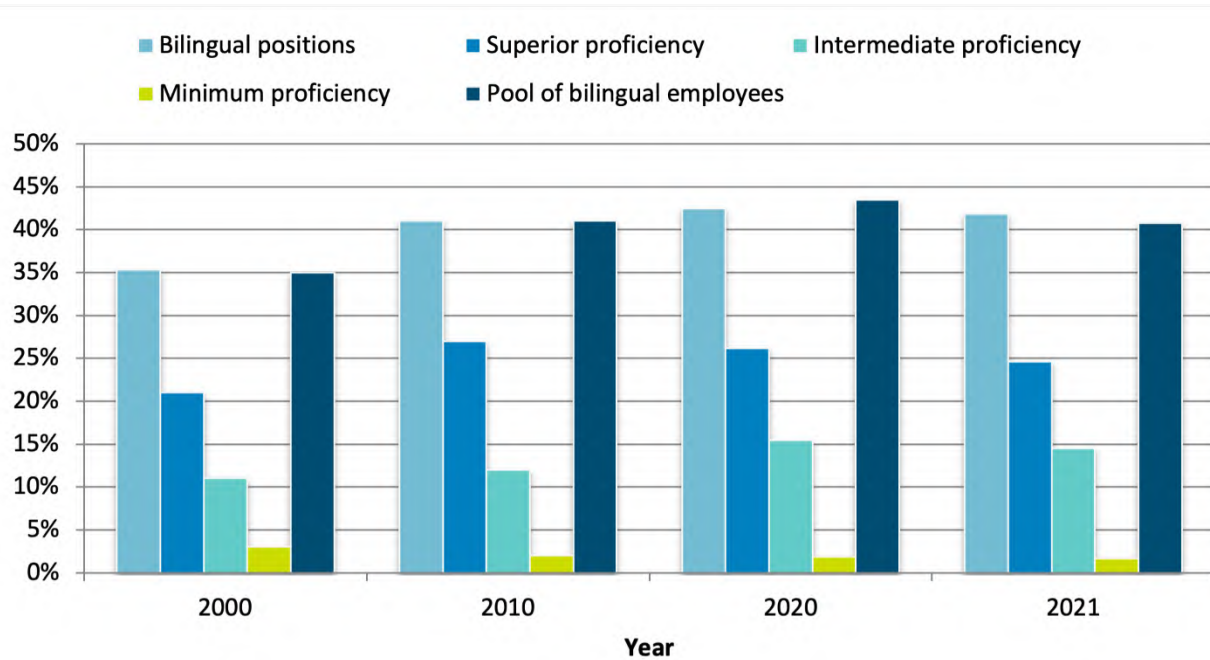

The linguistic profile of a bilingual position is based on three levels of second language proficiency:

- ▶ Level A: minimum proficiency
- ▶ Level B: intermediate proficiency
- ▶ Level C: superior proficiency

Table 1

Bilingual positions and pool of bilingual employees in the core public administration as of March 31

As of March 31, 2021, the percentages of bilingual positions and bilingual employees in the core public administration had decreased slightly, by 0.5% and 2.7%, respectively, to 41.9% and 40.7% compared to March 31, 2020.

Year	Bilingual positions	Superior proficiency	Intermediate proficiency	Minimum proficiency	Pool of bilingual employees
2000	35%	21%	11%	3%	35%
2010	41%	27%	12%	2%	41%
2020	42%	26%	15%	2%	43%
2021	42%	25%	14%	2%	41%

Table 2

Language requirements of positions in the core public administration as of March 31

In the fiscal year 2020–21, the number of bilingual positions in the core public administration increased by 5.1%, but the number of bilingual positions as a percentage of the total number of positions decreased slightly, by 0.5%, compared to the fiscal year 2019–20.

Year	Bilingual positions		English essential positions		French essential positions		English or French essential positions		Incomplete records		Total positions
2000	50,535	35.3%	75,552	52.8%	8,355	5.8%	7,132	5.0%	1,478	1.0%	143,052

Table 4

Bilingual positions in the core public administration and linguistic status of incumbents as of March 31

In the fiscal year 2020–21, the percentage of employees in bilingual positions in the core public administration who met the language requirements of their position slightly increased by 0.9% compared to the fiscal year 2019–20.

Year	Incumbents meet requirements		Incumbents do not meet requirements				Incomplete records		Total employees
	Count	Percentage	Exempted	Count	Percentage	Must meet	Count	Percentage	
2000	41,832	82.8%	5,030	10.0%	968	1.9%	2,705	5.4%	50,535
2010	77,331	93.2%	3,625	4.4%	831	1.0%	1,198	1.4%	82,985
2020	85,676	95.6%	3,297	3.7%	35	0.0%	624	0.7%	89,632
2021	90,893	96.5%	2,297	2.4%	50	0.1%	970	1.0%	94,210

Table 5

Bilingual positions in the core public administration and level of second language proficiency required (oral interaction) as of March 31²²

The percentage of bilingual positions in the core public administration that require Level C proficiency for oral interaction rose 0.9% from the fiscal year 2019–20 to the fiscal year 2020–21.

Year	Level C		Level B		Level A		Other		Total positions
2000	12,836	25.4%	34,677	68.6%	1,085	2.1%	1,937	3.8%	50,535
2010	26,738	32.2%	53,659	64.7%	724	0.9%	1,864	2.2%	82,985
2020	32,435	36.2%	55,471	61.9%	335	0.4%	1,391	1.6%	89,632
2021	34,964	37.1%	57,648	61.2%	333	0.4%	1,265	1.3%	94,210

22. The levels required in second language proficiency refer only to oral interaction (understanding and speaking). The “Other” category refers to positions that require Code P (specialized proficiency) or that do not require any oral interaction skills in the second language.

Table 6

Service to the public: bilingual positions in the core public administration and linguistic status of incumbents as of March 31

From the fiscal year 2019–20 to the fiscal year 2020–21, the percentage of employees in the core public administration who provided services to the public in both English and French and who met the language requirements of their position increased by 1.3%.

Year	Incumbents meet requirements		Incumbents do not meet requirements				Incomplete records		Total employees
			Exempted		Must meet				
2000	26,766	82.3%	3,429	10.5%	690	2.1%	1,631	5.0%	32,516
2010	46,413	93.0%	2,217	4.4%	555	1.1%	746	1.5%	49,931
2020	42,839	95.8%	1,468	3.3%	14	0.0%	378	0.8%	44,699
2021	44,405	96.9%	870	1.9%	20	0.0%	535	1.2%	45,830

Table 7

Service to the public: bilingual positions in the core public administration and level of second language proficiency required (oral interaction) as of March 31²³

The number of bilingual positions in the core public administration has increased since the fiscal year 2019–20. The percentage of bilingual positions that offer services to the public and require Level C proficiency for oral interaction increased 0.4% to 42.0% in the fiscal year 2020–21.

Year	Level C		Level B		Level A		Other		Total positions
2000	9,088	27.9%	22,421	69.0%	587	1.8%	420	1.3%	32,516
2010	17,645	35.3%	31,780	63.6%	340	0.7%	166	0.3%	49,931
2020	18,599	41.6%	25,872	57.9%	99	0.2%	129	0.3%	44,699
2021	19,261	42.0%	26,402	57.6%	101	0.2%	66	0.1%	45,830

23. The levels required in second language proficiency refer only to oral interaction (understanding and speaking). The “Other” category refers to positions that require Code P (specialized proficiency) or that do not require any oral interaction skills in the second language.

Table 8

Service to the public: positions in the core public administration and linguistic status of incumbents, by province, territory or region as of March 31, 2021

In the fiscal year 2020–21, of the 111,542 positions in the core public administration that provide services to the public, 45,830 provide services in both English and French. There were 44,405 incumbents in the 45,830 bilingual positions who met the language requirements of their position.

Province, territory or region	Bilingual positions				Unilingual positions			Total employees
	Incumbents meet requirements	Incumbents do not meet requirements			English essential	French essential	English or French essential	
		Exempted	Must meet	Incomplete records				
Western and Northern Canada	1,000	38	0	45	26,303	2	68	27,456
Ontario (excluding the NCR)	1,526	43	0	52	14,315	2	57	15,995
National Capital Region (NCR)	27,652	571	19	167	9,389	145	2,119	40,062
Quebec (excluding the NCR)	9,025	114	0	137	71	3,819	114	13,280
New Brunswick	3,093	54	0	23	2,487	180	36	5,873
Other Atlantic provinces	955	41	1	11	6,558	9	37	7,612
Outside Canada	1,154	9	0	100	1	0	0	1,264
All regions	44,405	870	20	535	59,124	4,157	2,431	111,542

Table 9

Personal and central services: bilingual positions in the core public administration and linguistic status of incumbents as of March 31

In the fiscal year 2020–21, 96.4% of incumbents in the 68,581 bilingual positions in the core public administration that offer personal and central services met the language requirements of their position, which is an increase of 0.9% compared to the fiscal year 2019–20.

Year	Incumbents meet requirements		Incumbents do not meet requirements				Incomplete records		Total employees
			Exempted	Must meet					
2020	61,915	95.5%	2,385	3.7%	18	0.0%	545	0.8%	64,863
2021	66,106	96.4%	1,664	2.4%	16	0.0%	795	1.2%	68,581

Table 10

Personal and central services: bilingual positions in the core public administration and level of second language proficiency required (oral interaction) as of March 31²⁴

In the fiscal year 2020–21, 37.1% of the 68,561 bilingual positions in the core public administration that offer personal and central services required Level C proficiency in oral interaction, which is an increase of 0.6% compared to the fiscal year 2019–20.

Year	Level C		Level B		Level A		Other		Total positions
2020	23,697	36.5%	39,879	61.5%	177	0.3%	1,110	1.7%	64,863
2021	25,467	37.1%	41,930	61.1%	169	0.2%	1,015	1.5%	68,581

24. The levels required in second language proficiency refer only to oral interaction (understanding and speaking). The “Other” category refers to positions that require Code P (specialized proficiency) or that do not require any oral interaction skills in the second language.

Table 11

Supervision: bilingual positions in the core public administration and linguistic status of incumbents as of March 31

As of March 31, 2021, 96.1% of incumbents in the core public administration's 28,811 bilingual supervisory positions met the language requirements of their position.

Year	Incumbents meet requirements		Incumbents do not meet requirements				Incomplete records		Total employees
			Exempted		Must meet				
2020	26,089	95.9%	1,005	3.7%	22	0.1%	86	0.3%	27,202
2021	27,691	96.1%	879	3.1%	37	0.1%	204	0.7%	28,811

Note: This table excludes employees working outside Canada.

Table 12

Supervision: bilingual positions in the core public administration and level of second language proficiency required (oral interaction) as of March 31²⁵

In the fiscal year 2020–21, 62.0% of the core public administration's 28,811 bilingual supervisory positions required Level C proficiency in oral interaction, which is an increase of 1.3% over the fiscal year 2019–20.

Year	Level C		Level B		Level A		Other		Total positions
2020	16,502	60.7%	10,604	39.0%	36	0.1%	60	0.2%	27,202
2021	17,852	62.0%	10,890	37.8%	39	0.1%	30	0.1%	28,811

Note: This table excludes employees working outside Canada.

25. The levels required in second language proficiency refer only to oral interaction (understanding and speaking). The "Other" category refers to positions that require Code P (specialized proficiency) or that do not require any oral interaction skills in the second language.

Table 13

Participation of Anglophones and Francophones in the core public administration, by province, territory or region as of March 31, 2021

As of March 31, 2021, Newfoundland and Labrador had the highest percentage of Anglophones (98.8%) working in the core public administration, and Quebec (excluding the National Capital Region) had the highest percentage of Francophones (88.6%).

Province, territory or region	Anglophones		Francophones		Unknown		Total employees
British Columbia	18,480	98.0%	383	2.0%	2	0.0%	18,865
Alberta	10,990	96.9%	353	3.1%	0	0.0%	11,343
Saskatchewan	4,915	98.6%	70	1.4%	0	0.0%	4,985
Manitoba	7,045	95.9%	304	4.1%	0	0.0%	7,349

All regions	155,793	69.2%	69,204	30.8%	7	0.0%	225,004

Table 14

Participation of Anglophones and Francophones in the core public administration, by occupational category as of March 31, 2021

As of March 31, 2021, the Operations category had the highest percentage of Anglophones (78.8%) and the Administration and foreign service category had the highest percentage of Francophones (37.2%) working in the core public administration. These results are similar to those observed as of March 31, 2020.

Categories	Anglophones		Francophones		Unknown		Total employees
Management (EX)	3,979	65.7%	2,074	34.3%	0	0.0%	6,053
Scientific and professional	33,643	76.5%	10,354	23.5%	3	0.0%	44,000
Administration and foreign service	70,702	62.8%	41,902	37.2%	4	0.0%	112,608
Technical	10,610	77.2%	3,126	22.8%	0	0.0%	13,736
Administrative support	13,771	71.3%	5,555	28.7%	0	0.0%	19,326
Operations	23,088	78.8%	6,193	21.2%	0	0.0%	29,281
All categories	155,793	69.2%	69,204	30.8%	7	0.0%	225,004

Table 15

Language requirements of positions in the core public administration, by employment equity group as of March 31, 2021²⁶

As of March 31, 2021, Indigenous people, members of visible minorities, and persons with disabilities were underrepresented among incumbents of bilingual positions in the core public administration, while women were overrepresented.

Target groups	Bilingual positions		English essential positions		French essential positions		English or French essential positions		Incomplete records		Total
Women	55,923	45.1%	58,762	47.4%	4,504	3.6%	4,836	3.9%	19	0.0%	124,044
Indigenous people	3,841	32.7%	7,358	62.7%	214	1.8%	322	2.7%	2	0.0%	11,737
Persons with disabilities	4,871	38.8%	6,787	54.0%	280	2.2%	629	5.0%	1	0.0%	12,568
Members of visible minorities	15,043	35.7%	23,131	54.9%	924	2.2%	3,046	7.2%	5	0.0%	42,149
All employees	94,210	41.9%	112,513	50.0%	8,258	3.7%	9,989	4.4%	34	0.0%	225,004

26. In this table and the following tables, the columns do not add up because people in the target groups can be in more than one target group, and in the “all employees” line, employees who are not in any of these groups are also counted.

Table 16

Bilingual positions in the core public administration and linguistic status of incumbents, by employment equity group as of March 31, 2021

As of March 31, 2021, members of visible minority groups and persons with disabilities were slightly underrepresented among incumbents of bilingual positions in the core public administration who met the language requirements of their position.

Target groups	Incumbents meet requirements		Incumbents do not meet requirements				Incomplete records		Total
			Exempted		Must meet				
Women	54,209	96.9%	1,189	2.1%	15	0.0%	510	0.9%	55,923
Indigenous people	3,733	97.2%	72	1.9%	2	0.1%	34	0.9%	3,841
Persons with disabilities	4,678	96.0%	148	3.0%	4	0.1%	41	0.8%	4,871
Members of visible minorities	14,473	96.2%	407	2.7%	15	0.1%	148	1.0%	15,043
All employees	90,893	96.5%	2,297	2.4%	50	0.1%	970	1.0%	94,210

Table 17

Bilingual positions in the core public administration and level of second language proficiency required (oral interaction), by employment equity group as of March 31, 2021²⁷

As of March 31, 2021, only members of visible minorities were underrepresented among incumbents of bilingual positions in the core public administration requiring Level C proficiency in oral interaction.

Target groups	Level C		Level B		Level A		Other		Total
Women	21,101	37.7%	34,021	60.8%	59	0.1%	742	1.3%	55,923
Indigenous people	1,446	37.6%	2,367	61.6%	14	0.4%	14	0.4%	3,841
Persons with disabilities	1,828	37.5%	2,996	61.5%	11	0.2%	36	0.7%	4,871
Members of visible minorities	4,975	33.1%	9,945	66.1%	29	0.2%	94	0.6%	15,043
All employees	34,964	37.1%	57,648	61.2%	333	0.4%	1,265	1.3%	94,210

Table 18

Participation of Anglophones and Francophones in the core public administration, by employment equity group as of March 31, 2021

As of March 31, 2021, women were underrepresented among Anglophones in the core public administration, while Indigenous people and members of visible minorities and persons with disabilities were underrepresented among Francophones.

Target groups	Anglophones		Francophones		Unknown		Total
Women	84,392	68.0%	39,650	32.0%	2	0.0%	124,044
Indigenous people	8,770	74.7%	2,967	25.3%	0	0.0%	11,737
Persons with disabilities	9,564	76.1%	3,003	23.9%	1	0.0%	12,568
Members of visible minorities	32,914	78.1%	9,232	21.9%	3	0.0%	42,149
All employees	155,793	69.2%	69,204	30.8%	7	0.0%	225,004

27. The levels required in second language proficiency refer only to oral interaction (understanding and speaking). The "Other" category refers to positions that require Code P (specialized proficiency) or that do not require any oral interaction skills in the second language.

Table 19

Service to the public: number of resources serving the public in bilingual offices in institutions not part of the core public administration, by province, territory, region or method of delivery as of March 31, 2021²⁸

In the fiscal year 2020–21, 66,076 resources offered services to the public in the bilingual offices of federal institutions that are not part of the core public administration. Of these resources, 21,763 provided services in English and French.

Province, territory, region or method of delivery	Resources in English only	Resources in French only	Bilingual resources	Total resources
Western and Northern Canada	18,378	38	1,849	20,265
Ontario (excluding the NCR)	11,628	56	1,595	13,279
National Capital Region (NCR)	5,929	471	7,474	13,874
Quebec (excluding the NCR)	252	1,453	8,322	10,027
New Brunswick	406	136	1,188	1,730
Other Atlantic provinces	3,683	15	834	4,532
Outside Canada	217	3	78	298
Routes	333	0	26	359
Telephone	1,314	1	397	1,712
Total	42,140	2,173	21,763	66,076

28. In this table, Canadian Forces Morale and Welfare Services grouped all its resources serving the public as being in the National Capital Region. The Canadian Broadcasting Corporation was unable to provide complete data for this table.

Table 20

Participation of Anglophones and Francophones in institutions not part of the core public administration, by province, territory or region as of March 31, 2021

As of March 31, 2021, Newfoundland and Labrador had the highest percentage of Anglophones (98.2%) and Quebec (excluding the National Capital Region) had the highest percentage of Francophones (79.3%) working in institutions that are not part of the core public administration.

Province, territory or region	Anglophones		Francophones		Unknown		Total resources
British Columbia	34,500	96.1%	1,290	3.6%	120	0.3%	35,910
Alberta	28,483	95.1%	1,378	4.6%	96	0.3%	29,957
Saskatchewan	7,755	96.5%	277	3.4%	1	0.0%	8,033
Manitoba	14,471	95.2%	732	4.8%	0	0.0%	15,203
Ontario (excluding the NCR)	69,685	93.3%	4,855	6.5%	115	0.2%	74,655
National Capital Region (NCR)	34,793	71.4%	13,936	28.6%	29	0.1%	48,758
Quebec (excluding the NCR)	10,330	20.7%	39,652	79.3%	23	0.0%	50,005
New Brunswick	7,482	73.7%	2,670	26.3%	0	0.0%	10,152
Prince Edward Island	1,958	92.6%	156	7.4%	0	0.0%	2,114
Nova Scotia	13,221	92.1%	1,127	7.9%	0	0.0%	14,348
