1986 Census – Basic Summary Tabulations

Many of the leading indicators from Canada's largest demographic survey – the 1986 Census – are now available. User summary tabulations on computer tape are once again being provided and are ready to use.

The content of these tabulations represent the most commonly expressed needs of Census data users. These tabulations, produced from information collected from all Canadian households, are designed to yield quick answers to fundamental information requirements and are available for provincial, census division and census subdivision levels.

Because these products have a standard format, they can be offered for the lowest price of all machine-readable data from the 1986 Census.

See page 2 for a list of tables and prices.

Data Availability Announcements

1986 Census - Basic Summary Tabulations

The following tables at the census subdivision level with totals for census divisions and provinces are available today. Each table presents information on two or three census variables. Language, households, families, income and occupation are just some of the topics included in the user summary tabulations.

Prices for tape output range from \$300 for the Yukon to \$900 for Canada-wide data. Cost estimates for data for selected subprovincial data or output to diskette or paper will be provided upon demand.

For further information please contact your local Statistics Canada Regional Reference Centre or the Electronic Data Dissemination Division (613-951-8200), Ottawa.
