# Household Facilities by Income and Other Characteristics 1987

In 1987, the fastest growing consumer items – microwave ovens and video cassette recorders (VCRs) – showed large differences in ownership rates among household income groups.

Microwave ovens were found in 18.3% of households with income under \$10,000 compared to 64.6% of households with income of \$55,000 and over. VCRs were in 16.7% of households with incomes under \$10,000 compared to 68.7% for households over \$55,000. Overall, 43.2% of households had microwaves and 45.0% had VCRs.

Household Facilities by Income and Other Characteristics, 1987 is the latest report providing data on ownership and dwelling characteristics and household goods by 1986 household income class.

Other highlights from the report include:

- Average household income ranged from \$18,412 for one-person households (22.0% of households) to \$40,528 for single-family households (73.6% of households) and \$40,698 for multi-unit households (4.4% of households).
- In 1987, home ownership rates ranged from 33.5% in the less than \$10,000 income class to 86.8% in the \$55,000 and over group. The ownership rate overall was 62.3%, little changed from a decade earlier.
- A need for major repairs was identified by 11.0% of homeowners. It varied from 19.8% for those with household income less than \$10,000 to 7.7% for those with \$55,000 and over.

- For widely held household items such as bathroom facilities, telephones, radios and refrigerators, there was very little variation in availability by income. For example, in the under \$10,000 group, 93.8% of households had telephones compared to 99.7% in the \$55,000 and over group. Comparable data for television sets were 96.4% (under \$10,000) and 99.3% (\$55,000 and over).
- For household items less widely held, there was a stronger relationship to income. Automatic dishwashers, found in 12.8% of households with income under \$10,000, increased to 68.6% of households with income \$55,000 and over. For the same income groups, freezers increased from 33.3% to 69.9% and snowblowers from 3.9% to 21.8%.
- Recreational items such as bicycles and skis varied substantially by income class. Adult bicycles, found in 23.9% of households in the under \$10,000 group, increased steadily to 68.8% in the \$55,000 and over group. Similarly, skis increased from 14.3% to 56.8% over the same income groups.
- Renter households spent 17.8% of their income on rent, about the same as the previous year (17.6%). Eleven years ago, the comparable figure was 16.4%.

This report presents variations in household items and dwelling characteristics by income, province, urbanization, age of household head and household type. Tables are based on household facilities and equipment data as of the survey date (May 1987) and income data for the calendar year 1986.

Household Facilities by Income and Other Characteristics, 1987 (13-218, \$35) is now available. See "How to Order Publications".

For more detailed information on this release, contact Kevin Bishop (613-951-2211) or Penny Barclay (613-951-4634), Household Surveys Division.

A microdata tape containing 1986 household income and 1987 facilities and equipment data, along with dwelling characteristics and socio-demographic characteristics of the household, will be available shortly at a cost of \$700. This tape can be ordered by contacting the Household Surveys Division (613-951-9778). Microdata tapes are carefully reviewed to ensure that they do not contain information that could allow identification of specific households.

# Sales of Refined Petroleum Products

January 1988

#### Highlights

#### Seasonally Adjusted

- Seasonally adjusted, preliminary estimates
  of January sales of refined petroleum products totalled 6.5 million cubic metres.
  This represents a decrease of 1.8% from last
  December, extending a generally downward trend which began in July.
- Results for the main products were mixed. Motor gasoline sales, down 3.6%, recorded their seventh decline in the last 10 months while light fuel sales maintained their downward trend which began in 1986, registering a decrease of 0.9%. Diesel sales remained virtually unchanged from December levels. Heavy fuel sales, which are largely influenced by import levels, posted a gain of 29.6% following a drop of 18.6% in December.

#### **Unadjusted Sales**

 Preliminary estimates indicate that total sales of refined petroleum products in January reached a volume of 6.6 million cubic metres. This represents an increase of 8.8% over January 1987. • Three of the four main products contributed to the January increase. Diesel fuel sales maintained a strong pattern of growth, posting a gain of 12.2% over January 1987. A high level of imports of heavy fuel led to a sales increase of 60.8%. Light fuel sales, up 10.5%, rose for the first time since June of last year. Motor gasoline sales, down 1.3%, declined for the first time in three months. Excluding sales for these main products, total sales for the remaining 13 products rose only 2.5%.

(see table on page 5)

Available on CANSIM: matrices 628-642 and 644-647.

The January 1988 issue of Refined Petroleum Products (45-004, \$16.50/\$165) will be available the third week of April. See "How to Order Publications".
