1991 Census

This publication provides profiles of census metropolitan areas (CMAs) and census agglomerations (CAs) based on data collected from the 1991 Census. The profiles show population counts by age, sex, marital status and mother tongue. Also shown are dwelling counts by type and tenure, households by size, and families by size, structure and presence of never-married sons and daughters.

The publication contains a single table that displays data for each geographic area as well as for Canada, the provinces and territories. A geographic index is included for locating data for a specific CMA or CA. Reference maps showing CMAs and CAs are published separately.

Profile of Census Metropolitan Areas and Census Agglomerations - Part A (93-337, \$40) is now available. See "How to Order Publications."

DATA AVAILABILITY ANNOUNCEMENTS

Labour Market Activity Survey – Microdata Tapes

1990

The last of the annual Labour Market Activity Survey public access microdata files is now available to researchers. This file contains some 800 variables on the 1990 labour market experience of a sample of 63,000 Canadians aged 16 to 69. Information on up to five jobs held by a person during the 12-month period is available. Wages, usual hours, earnings, unionization, pension plan coverage, employer size, and information about unpaid absences from work are also available for every job, along with data on the industry of employer and occupation held.

For non-working periods, there is information on reasons for stopping work, job search methods, difficulties in finding a job, and receipt of Unemployment Insurance benefits. There are identifiers on the file for visible minorities, the disabled and immigrants. Whether individuals or their families received welfare, U.I. or pension payments is documented. A number of family variables have been computed, as all members of sample households were interviewed in the survey.

This is the last file of annual labour market histories to appear until the end of 1994, when the Survey of Labour and Income Dynamics comes on-stream. A micro file of longitudinal three-year (1988-1990) histories from the LMAS will be released at the end of October.

To order LMAS microdata tapes for the period 1986-1990, contact Michael Sivyier (613-951-4598). Each tape file costs \$1,000 plus G.S.T., if applicable.

For more information about the files, contact Special Surveys Group (613-951-4625). ■
