**CENSUS OF CANADA**  
**Short Article Series**

**Me a centenarian? Why not!**

By Jeanine Perreault

The year 1991 Census has revealed that Canada has about 3,700 centenarians and about 1,200 more will pass the incredible milestone this year. The 1991 Census finally measured a large enough 100+ population, so that Statistics Canada analysts could study its growth and composition.

This four-page article is part of the *Short Article Series*. New for the 1991 Census, the series has Statistics Canada analysts tracing and updating Canadian population trends. While the census databases are being created, they're also studying special interest groups (such as common-law couples) and topical subjects like family incomes. About 40 short articles will be released during 1992 and 1993.

Copies of this short article are only available while quantities last. To receive your free copy, contact your nearest Statistics Canada Regional Reference Centre, listed at the back of today's *Daily*.
