Pre-Retirement Years...

An Age of Transition

In 1990, Canadians aged 55-64 numbered almost 2.4 million. While much has been written about people aged 65 and over, the pre-retirement age group has received little attention. The Target Group's publication, *Canadians in the Pre-Retirement Years: A Profile of People Aged 55-64* provides a comprehensive, statistical overview of the population nearing retirement age.

This 40-page publication starts with a Highlights section for you to scan and decide which topics interest you most. When you want to delve deeper, you'll find the **latest facts** and **concise summaries** on the following issues:

- Population
- Family and Living Arrangements
- Health
- Education
- Work
- Income
- Housing
- Activity Patterns

Written in an **easy-to-read** style and supported by **more than 40 charts and tables**, the information at the core of *Canadians in the Pre-Retirement Years* is taken from many published and unpublished sources including: a variety of Statistics Canada publications and the General Social Survey.

This is "**must-reading**" for those involved in **planning, designing or implementing services** to older Canadians, as well as those with an interest in the "greying" of Canadian society.

Order your copy of *Canadians in the Pre-Retirement Years: A Profile of People Aged 55-64* (Cat. #89-521E) today, for only \$36 in Canada, US \$43 in the United States, and US \$50 in other countries.
