

# NUCLEAR AND FIELD-GROWN SEED POTATOES ORIGINATING FROM PEI

<b>Field-grown seed potatoes:</b>	Soil grown
<b>Nuclear stock seed potatoes:</b>	Grown in a soil-free environment (in vitro or protected environment)
<b>Category A:</b>	Index fields, where potato wart has been detected
<b>Category B:</b>	Adjacent fields, next to Category A fields, not separated by a physical barrier of more than 15m wide
<b>Category C:</b>	Primary Contact fields, may have had soil or host plants transferred to them from a Category A field, or had common equipment moved to them directly after use in a Category A field.
<b>Category D:</b>	Other Contact fields, where common equipment has been shared with a Category A field.
<b>National Seed Potato Certification Program:</b>	Supplies Canadian growers of seed, table stock and processing potatoes with certified seed which is of high varietal integrity and is relatively free of tuber borne diseases
<b>Parent field(s):</b>	Field(s) of the seed source
