

Atlantic Pilotage Authority

Second Quarter 2021

Management's Discussion and Analysis

August 30, 2021

NOTICE TO READER

The current report covers the Authority's activities and financial situation for the six-month period ended June 30, 2021 and is meant to be read in conjunction with the audited financial statements for the financial year ended December 31, 2020. These financial statements were established and are presented following IFRS as described in the Authority's 2020 Annual Report.

TRAFFIC REVIEW AND ANALYSIS

Pilotage Area	Actual Traffic through 2nd Qtr 2019	Actual Traffic through 2nd Qtr 2020	Budget Traffic through 2nd Qtr 2021	Actual Traffic through 2nd Qtr 2021	Variance from 2020	Percentage Variance from 2020	Variance from Budget 2021	Percentage Variance from Budget 2021
Halifax	1,197	1,124	1,127	1,084	-40	-4%	-43	-4%
Saint John	861	868	784	890	22	3%	106	14%
Placentia Bay	673	614	599	419	-195	-32%	-180	-30%
Canso	315	263	231	299	36	14%	68	29%
St. John's	214	252	181	176	-76	-30%	-5	-3%
Sydney	141	87	86	105	18	21%	19	22%
Other Newfoundland	138	141	154	148	7	5%	-6	-4%
Other Compulsory	147	88	89	91	3	3%	2	2%
Non-Compulsory	143	115	106	78	-37	-32%	-28	-26%
Total	3,829	3,552	3,357	3,290	-262	-7%	-67	-2%

The following discussion regarding the amount of activity in individual ports is referring to pilotage assignments only, and not the level of cargo or vessel traffic experienced by a port. There are several factors that may result in a difference between the activity reported by the Authority and that reported by another body such as a port authority. These factors include ships not subject to compulsory pilotage, ships utilizing mariners who have pilotage certificates, and the amount of cargo carried on a ship. The Authority reports on pilotage assignments performed by its pilots but does not track the amount of cargo being carried on a vessel.

Overall, pilotage revenue has increased by 4% when compared to the same period in 2020 and is 2% over budget. Pilotage assignment traffic levels are below 2020's pace by 7% for the first six months and are 2% under budget for 2021.

The Authority has four major compulsory ports (Halifax, NS; Strait of Canso, NS; Placentia Bay, NL; and Saint John, NB) that contribute approximately 75% of its pilotage assignments each year. The Strait of Canso and Saint John are two major compulsory ports where traffic has increased materially from the previous year.

Pilotage traffic in Placentia Bay, NL has decreased substantially from 2020. Traffic in the area has been generated primarily from two major oil industry facilities – the oil refinery at Come-by-Chance, and the transshipment terminal at Whiffen Head. The oil refinery at Come-by-Chance suspended its operations in mid-2020. In total, traffic in the area is 30% under budget and has decreased by 32% from the previous year.

The traffic in Halifax, NS is consistent with 2020 levels as an increase of general cargo traffic and steady container traffic has offset the impacts of declines in other sectors. Total pilotage activity in the port is 4% under budget with revenues 1% under budget through June 2021.

In Saint John, NB, pilotage activity has increased by 3% from 2020 and is 14% over budget through June 2021. Pilotage revenues for the port are 18% higher than 2020 levels and are 18% over budget. Tanker and container ship traffic has notably increased over budget and from 2020 levels, offsetting the impacts of the loss in activity associated with a bunker vessel service that stopped operations late in 2020.

In the Strait of Canso, NS, tanker traffic has increased 81% compared to the same period of 2020 and bulk carrier traffic has decreased by 9%. Overall, the port is 29% over budget in activity, and 40% over budget in revenues through June 2021. This level of activity is a return to levels previously experienced in 2018 and 2019.

FINANCIAL AND STATISTICAL REVIEW

COMPARATIVE REVIEW			
FINANCIAL AND STATISTICAL DATA			
As at June 30			
	2021	2021	2020
FINANCIAL	Actual	Budget	Actual
(in thousands of Canadian dollars)			
Total Revenue	\$ 13,391	\$ 13,168	\$ 12,862
Operating Expenses			
Salaries, Fees and Benefits	8,119	8,602	8,427
Pilot Boats	3,596	3,656	3,454
Other	1,208	1,427	1,324
Total Operating Expenses	12,923	13,685	13,205
Profit/(Loss)	\$ 468	\$ (517)	\$ (343)
STATISTICAL			
Pilotage Assignments	3,290	3,357	3,552
Shipping Incidents	0	0	4
% of incident free assignments	100.00%	100.00%	99.89%
Customer Complaints Filed	0	0	16
% of complaint free assignments	100.00%	100.00%	99.55%

Overall, traffic has decreased by 7% from 2020 levels through June, with revenues increasing by 4%.

Salaries, fees, and benefits through June 2021 have decreased from the same period in 2020 due to pilot retirements during this period and overtime expenses being lower because of decreased traffic in Placentia Bay. Administrative staff salary costs are consistent with 2020 levels. Pilot boat costs have increased with larger repair and maintenance expenses. Travel and training expenses are significantly lower due to Covid-19 restrictions.

The Authority had a profit at the end of the second quarter of \$468 thousand (\$343 loss – 2020). A loss of \$517 thousand was budgeted to this point in the year.

CUSTOMER COMPLAINTS AND LEVEL OF SERVICE

The Authority has a structured methodology for handling complaints. The mechanism is designed to be as user friendly as possible, and the goal of the Authority is to ensure that timely feedback is provided to the complainant. The most common reason for a complaint to be submitted is due to a delay in an assignment. In some cases, the delay is caused by factors beyond the control of the Authority, such as weather or delays caused by the non-availability of port services such as tugs.

The Authority received no complaints out of a total of 3,290 assignments through June 30, 2021. For the same period of 2020, there were 16 complaints received out of 3,552 assignments.

Through June 2021 the Authority has had no shipping incidents. There were 4 incidents reported at this point in 2020.

RISK ANALYSIS

The major financial risk faced by the Authority is the variability of traffic in major ports. The Authority does not control or influence the activity in each port. Variations in the number of ships, or the average ship size, from the budget may result in a significant positive or negative result. After a strong first quarter of 2020, there was a severe decline in traffic related to Covid-19, with this trend expected to continue through 2021.

The Authority has been impacted by reduced demand in a number of areas during the pandemic. The cancellation of the cruise season in 2020 and 2021 has had the largest impact on the Authority, followed by the oil refinery in Placentia Bay stopping refining operations with no announcement regarding resumption of activities. This lost traffic led to a \$5 million decrease in revenues for the Authority in 2020 and created the \$1.3 million loss.

The Authority has been relying on its accumulated reserves over this period and has implemented rate increases that include a deficit charge that is intended to recoup a portion of these losses over a five-year period. The situation continues to be monitored to determine if additional actions will be necessary. The financial self-sufficiency of the Authority is not at risk and will not impact the Authority's ability to achieve its mandate.

TRAVEL, HOSPITALITY, AND CONFERENCE EXPENSES

The Atlantic Pilotage Authority's area of operation is defined as all the Canadian waters in and around the provinces of New Brunswick, Prince Edward Island, Nova Scotia, and Newfoundland and Labrador, including the waters of Chaleur Bay in the Province of Quebec. Within this region, the Authority has designated 17 compulsory pilotage areas. Each one has its unique industries and are serviced by licensed pilots and the required infrastructure such as pilot boat services.

Conducting regular pilotage operations requires travel to be conducted by the Authority's pilots and boat crew. These costs are recovered directly from the customers for whom the services were delivered. Travel costs are also incurred for training of operational personnel

as much of the training is done in Europe and Quebec City. These costs are included in the Authority's training budget. Included in the Pilot boats, operating costs category of the Authority's financial statements are travel costs associated with vessel maintenance personnel performing their regular duties.

Travel of pilotage authority board and management representatives is required to meet the needs of stakeholders in each area and manage the Authority's resources effectively. Periodic travel outside of the Authority's area of operation is also required to meet with Government representatives, industry associations, and the other pilotage authorities. Conferences include port specific marine business conferences and pilotage specific conferences. Board travel costs are captured with all other Board costs under Professional and special services in the Authority's financial statements.

The table below shows the travel, hospitality, and conference expenses for operations, and for administrative employees and the Board.

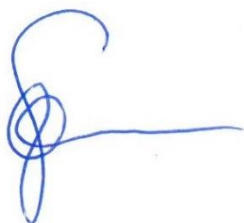

Travel, Hospitality, and Conference Expenses		
As at June		
(in thousands of Canadian dollars)		
	2021	2020

Interim Unaudited
Condensed Financial Statements and Notes

Management's Responsibility for Financial Reporting

Management is responsible for the preparation and fair presentation of these quarterly financial statements in accordance with the Treasury Board of Canada Standard on Quarterly Financial Reports for Crown Corporations, and for such internal controls as management determines is necessary to enable the preparation of quarterly financial statements that are free from material misstatement. Management is also responsible for ensuring all other information in this quarterly financial report is consistent, where appropriate, with the quarterly financial statements.

Based on our knowledge, these unaudited quarterly financial statements present fairly, in all material respects, the financial position, results of operations and cash flows of the corporation, as at the date of and for the periods presented in the quarterly financial statements.

ATLANTIC PILOTAGE AUTHORITY

Notes to the Unaudited Financial Statements

June 30, 2021

(in thousands of Canadian dollars)

1. GENERAL INFORMATION AND BASIS OF PRESENTATION

The Atlantic Pilotage Authority (the “Authority”) was established in 1972 pursuant to the Pilotage Act. The principal registered address of the Authority is 1791 Barrington Street, Halifax, Nova Scotia. The objects of the Authority are to establish, operate, maintain, and administer, in the interests of safety of navigation, an efficient pilotage service within designated Canadian waters. The Pilotage Act provides that pilotage charges be set at levels that allow the Authority to be financially self-sufficient and be fair and reasonable. Under the Pilotage Act, no payment to the Authority may be made under an appropriation by Parliament to discharge an obligation or liability.

The Authority is a Crown corporation listed in Schedule III, Part I of the Financial Administration Act and is not subject to the provisions of the Income Tax Act.

In July 2015, the Authority was issued a directive (PC 2015-1114) pursuant to section 89 of the Financial Administration Act to align its travel, hospitality, conference, and event expenditure policies, guidelines, and practices with the Treasury Board policies, directives, and related instruments on travel, hospitality, conference, and event expenditures in a manner that is consistent with its legal obligations, and to report on the implementation of this directive in the Authority’s next corporate plan. The Authority finalized its implementation of this directive in July 2017. The Authority confirms that the requirements of the directive have been met.

The Atlantic Pilotage Authority is classified as a Government Businesses Enterprise (GBE). As a GBE, the Authority prepares its statements in accordance with International Financial Reporting Standards (IFRS), as issued by the Accounting Standards Board (AcSB).

These financial statements have been prepared in accordance with the Treasury Board of Canada Standard on Quarterly Financial Reports for Crown Corporations. In accordance with the Treasury Board of Canada Standard, these financial statements do not include all of the financial statement disclosures required for annual financial statements and should be read in conjunction with the Authority’s Canadian GAAP annual consolidated financial statements for the year ended December 31, 2020. In management’s opinion, the financial statements reflect all adjustments that are necessary for a fair presentation of the results for the interim period presented.

COVID-19

On March 11, 2020, the World Health Organization officially declared the coronavirus outbreak (COVID-19) a global pandemic. The Authority has been and will continue to be affected by the pandemic. In response, the Government of Canada has implemented restrictions on travel and

commerce, including the prohibition of cruise ships in Canadian waters until February 2022. Other impacts of the virus on the Authority's business could include decline in shipping traffic, additional restrictions on future traffic, closures of shipping terminals, and service disruptions through quarantine of pilots. The pandemic has negatively impacted the Authority's financial results. The duration and future impact of the pandemic on the Authority's operations is unknown at this time. As a result, an estimate of the financial impact of COVID-19 on the Authority's future results of operations and financial position cannot be made at this time.

2. ESTABLISHING OR REVISING PILOTAGE CHARGES

The approval process for establishing or revising pilotage charges is set out in the *Pilotage Act*. The Authority may, by resolution, determine the charges to be paid to the Authority for the provision of services in relation to compulsory pilotage.

To establish or revise pilotage charges, the Authority must publish a notice of the proposed charges on its website and allow any party at least 30 days to make representations about the proposal to the Authority. After considering all written representations, the Authority shall publish an announcement that sets out its decision in respect of the proposal, including the date on which it will take effect, which is not to be earlier than 60 days after the date the announcement is published.

Within 90 days of the announcement, a person who has reason to believe that the pilotage charges are not in accordance with the charging principles specified in the *Pilotage Act*, or that the Authority did not follow the proper process to establish or revise the charges, may file a notice of objection with the Canadian Transportation Agency (CTA).

If the CTA determines that an objection is well founded, it may order the Authority to cancel the establishment or revision of the pilotage charge and to refund, with interest, each user of compulsory pilotage services the amount paid in excess of the charge in previously in effect. The CTA shall also provide the person who filed the notice of objection and the Authority with written reasons for any decision that is made and, if applicable, any decision to fix the period within which the Authority is to make a refund to a user of compulsory pilotage services.

3. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies are as follows:

(a) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, together with short-term, highly liquid investments that are readily convertible to a known amount of cash, and that are subject to an insignificant risk of changes in value. The Authority had nil cash equivalents as at June 30, 2021 (2020 - nil).

(b) Financial instruments

Trade and other receivables and trade and other payables, classified as other financial

liabilities, are measured at amortized cost using the effective interest method. Due to their short-term nature, the cost of these financial instruments approximates their fair value.

Bank loans are classified as other financial liabilities and are initially measured at fair value. After initial recognition, bank loans are measured at amortized cost using the effective interest method.

The Authority is not party to any derivative financial instruments or hedges.

(c) Intangible assets

The Authority's intangible assets are comprised of purchased software and web page development. When the software does not form an integral part of the machinery or computer hardware to which it relates, it is separately accounted as an intangible asset. Intangible assets are carried at cost less accumulated amortization and impairment losses.

Any impairment is recognized as an expense in comprehensive income and is measured as the amount by which the carrying amount exceeds its recoverable amount.

(d) Pilot boats and equipment

Pilot boats and equipment are recorded at cost. The cost of pilot boats under construction includes design, project management, legal, material, direct labour, and interest on construction loans. Amounts included in pilot boats under construction are transferred to the appropriate pilot boat classifications upon completion, and depreciation commences.

Any impairment is measured as the amount by which the carrying amount exceeds its recoverable amount and is recognized as a loss for the year. Gains or losses arising on the disposal of pilot boats and equipment are determined as the difference between the disposal proceeds and the carrying amount of the assets and are recognized in profit or loss. Gains are recognized in other income, while losses are recognized as a loss for the year in pilot boats, operating costs or utilities, materials and supplies depending on the assets that were disposed.

(e) Right-of use assets and lease liabilities

Right-of-use (ROU) assets are initially measured based on the present value of the lease payments less any lease inducements received. The ROU assets are subject to testing for impairment and any impairment is measured as the amount by which the carrying amount exceeds its recoverable amount and is recognized as a loss for the year.

The Authority assesses whether a contract is or contains a lease at inception of the contract. A right-of-use asset is recognized, as well as a corresponding lease liability, with respect to all lease arrangements in which the Authority is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of

low value assets (such as office equipment). For these leases, the Authority recognizes the lease payments as a rental expense in the statement of comprehensive income on a straight-line basis over the term.

ROU assets are included in the heading property and equipment, and the lease liabilities are included in the headings for current liabilities and non-current liabilities.

The ROU assets are depreciated, on a straight-line basis, over the shorter of the lease term or the useful life of the underlying asset.

The lease liabilities are initially measured at the present value of the lease payments payable over the lease term, discounted at the Authority's incremental borrowing rate over a similar term as the lease.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

The Authority remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever the following circumstances arise:

- The lease term has changed, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.
- The lease payments change due to changes in an index or rate, in which case the lease liability is remeasured by discounting the revised lease payments using the original discount rate.
- A lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

(f) Employee severance benefits

Employees are entitled to specified severance benefits as provided for under collective agreements or employment contracts, based on their years of service and final salary. The liability for these payments is estimated and recorded in the accounts as the benefits accrue to the employees.

The costs and the benefit obligation are actuarially determined using the projected unit credit method prorated on service that incorporates management's best estimate of the rate of employee turnover, retirement age, future salary and benefit levels, and other actuarial factors.

Actuarial gains and losses are recognized in other comprehensive income in the period in which they occur and flow into retained earnings.

(g) Pension plan

Substantially all of the employees of the Authority are covered by the Public Service Pension Plan (the “Plan”), a defined benefit plan established through legislation and sponsored by the Government of Canada. Contributions are required by both the employees and the Authority to cover current service cost. Pursuant to legislation currently in place, the Authority has no legal or constructive obligation to pay further contributions with respect to any past service or funding deficiencies of the Plan. Consequently, contributions are recognized as an expense in the year when employees have rendered service and represent the total pension obligation of the Authority.

(h) Revenue recognition

Revenues from pilotage charges are recognized when pilotage services are provided.

4. USE OF ESTIMATES AND JUDGMENTS

The preparation of financial statements requires management to make judgments, estimates, and assumptions that affect the application of policies and reported amounts of assets and liabilities, and revenue and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised.

(a) Critical accounting estimates

Critical accounting estimates are estimates and assumptions made by management that may result in material adjustments to the carrying amount of assets and liabilities within the next year. Management has made the following critical accounting estimates or assumptions in preparation of these financial statements:

Amortization and depreciation rates

All the intangible assets have finite useful lives. Amortization of intangible assets is charged on a straight-line basis over the estimated useful lives of the assets. The useful lives used in the calculation of amortization for purchased software and web page development is 5 to 10 years.

Depreciation of pilot boats and equipment is calculated on a straight-line basis and is based on the estimated useful life of the assets as follows:

Pilot boat hulls and structures	10 to 25 years
Pilot boat equipment	5 to 10 years
Pilot boat generators	5 years

Pilot boat engines	5 to 10 years
Pilot boat inspections	4 to 5 years
Wharves and structures	10 to 50 years
Furniture and equipment	2 to 10 years
Leasehold improvements	10 years
Right-of-use assets	9 to 10 years

Useful lives are based on management’s estimates of the periods of service provided by the intangible assets and the pilot boats and equipment. The useful lives of these assets are reviewed annually for continued appropriateness. Changes to the useful life estimates would affect future amortization or depreciation expense and the future carrying value of the assets.

Employee severance benefits

The Authority engages an external actuary to assess the fair value of its employee severance benefits. The Authority assesses this obligation at December 31 each year. The plan is sensitive to significant actuarial assumptions, the discount rate, the estimate of salary rate increases, and the assumed age at retirement.

Valuation of lease liabilities and right-of-use assets

The application of IFRS 16, “Leases” requires the Authority to make estimates that affect the valuation of lease liabilities and right-of-use assets. This includes determining the Authority’s incremental borrowing rate used for discounting of future cash flows.

This is the rate of interest that the Authority would have to pay to borrow, over a similar term, and with similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment.

(b) Critical accounting judgments

Critical accounting judgments are accounting policies that have been identified as being complex or involving subjective judgments or assessments.

Impairment test for non-financial assets

The non-financial assets with finite useful lives are required to be tested for impairment only when indication of impairment exists. Management is required to make a judgment with respect to the existence of impairment indicators at the end of each reporting period. Some indicators of impairment that management may consider include changes in the current and expected future use of the asset, external valuations of the assets, and obsolescence or physical damage to the asset.

Valuation of lease liabilities and right-of-use assets

The application of IFRS 16, “Leases” requires the Authority to make judgments that

affect the valuation of lease liabilities and right-of-use assets. These include determining contracts in scope of IFRS 16, and determining the contract term.

The lease term determined by the Authority comprises the non-cancellable period of lease contracts, periods covered by an option to extend the lease if the Authority is reasonably certain to exercise that option and periods covered by an option to terminate the lease if the Authority is reasonably certain not to exercise that option. This same term is applied to determine the depreciation rate of right-of-use assets.
