INTRODUCTION

The Technology Networking Guide - International, documents world-wide private and public sector technology information sources, services, and contacts. A companion publication, the Technology Networking Guide - Canada, documents the respective domestic technology information. These publications are intended to assist Canadian business persons with the identification of expertise, assistance and technology-based opportunities which will aid in the creation of new business enterprises and the improvement and expansion of existing ones.

Due to the rapidly changing nature of the technology field, this publication will be frequently updated to accommodate new listings and to modify existing ones. Contributions of information which may be considered for inclusion in this publication will be most appreciated.

The following federal government information sources, services, programs and contacts are especially relevant to technology transfer from international sources:

- Industry, Science and Technology (ISTC) has many sector specialists that can provide international information and referrals, and a number of financial assistance and information programs supportive of technology transfer. Access is via the ISTC Regional Offices listed in section L2 in the Technology Networking Guide - Canada.
- External Affairs and International Trade has technology specialists in Canadian embassies abroad that can provide a range of services from sourcing technical information and required new technologies, to identifying potential joint venture partners and arranging meetings. Financial support to assist firms in accessing foreign technology may also be provided. Please refer to Technology Inflow Program (TIP) Officers listed in section J1.
- The Field Advisory Services of the National Research Council (NRC) provides access to:
 - an extensive Canada-wide laboratory and technical advice network consisting of such components as laboratories of the NRC, other federal government departments, provincial government research centres, universities, and firms; international facilities and expertise can be accessed through these resources.

- the major scientific and technical library and database search services of the world-class Institute for Scientific and Technical Information (CISTI) in Ottawa.
- the Industrial Research Assistance Program (IRAP) which financially assists firms with technology projects.

The NRC Field Advisory Services are listed under Technology Assistance in the yellow pages. Please call (613) 993-3996 in Ottawa if you have difficulties.

Comments and questions concerning this publication and suggestions for new technology information to be listed should be directed to:

AND CATALOGUES PUBLICIZING
NEW TECHNOLOGIES**

NEWSLETTERS, PERIODICALS, AND CATALOGUES PUBLICIZING NEW TECHNOLOGIES

These documents refer to various styles of publications prepared on a periodic basis by International organizations. The publications include some of the following materials.

- documents which describe scientific research programs or technology development activities, or new products incorporating current or advanced technology in a meaningful way.
- documents which list opportunities for the licensing of technology.
- publications which principally describe and report on the international science and technology community, or service to facilitate networking within the international science and technology community.

■ Australia

■ Austria

HIGH TECH AUSTRIA (VOLUMES I, II AND III)

This three-volume brochure, commissioned by Austria's Federal Ministry of Science and Research, lists

high tech organizations in Austria seeking R&D cooperation from or with other countries. Provides information on each project, such as project target and application, stage of development, desired cooperation and contact person. Some areas covered are: analysis equipment, measuring control, computer technology, chemical engineering, and medicine.

LICENSING AND RESEARCH SPONSORSHIP OPPORTUNITIES AT THE CLEVELAND CLINIC FOUNDATION

A booklet published by the Office of New Enterprises established by The Cleveland Clinic Foundation to facilitate the commercial transfer of technology. The first section lists info and brief descriptions of medical and related patents, patent applications and other invention disclosures that are available for licensing. The second lists current interests of research staff and contains information on projects in which a corporate sponsor could receive a right of first refusal to technological developments.

**COMPUTER DATABASES OF
NEW TECHNOLOGIES**

COMPUTER DATABASES OF NEW TECHNOLOGIES

Eligible entries in this category include computer databases which were substantially created and are currently maintained by international organizations and which can be utilized or accessed by the public in the search for new products or technologies.

A large and growing number of computer databases can be utilized to search for new products and technologies. For purposes of discussion, these databases may be grouped or categorized as follows:

Thousands of computer databases exist in Canada and internationally to assist firms seeking contacts, information and external help in innovation, technology transfer and successful product development. These databases can provide a wide range of information relative to technology transfer, including such things as identification of new technology opportunities, market information and identification of expertise.

- A number of selected databases have been grouped into the following categories: Food and Beverages, Electronics, Energy, Cosmetics, Advanced Industrial Materials, Technology Exhibitions, Patents and Trademarks, General, Forest Products, News, Robotics, Computers, Communications, Aerospace, Biotechnology, Aquatic Sciences, Agriculture, Consultants, Medicine/Health, Information Sciences, Construction, Business and Defense.
- Firms should be aware that there are many more databases than those listed here, and that a more complete selection can be obtained from sources such as the Directory of Online Databases, found in Section A, or from several Databases of Databases listed at the beginning of Section B.
- Specialized knowledge and skills are required to effectively and economically search these databases. Such expertise is listed in Section C.
- Many of these databases are accessed through a relatively small number of on-line service systems or "hosts", which contain a large number of databases covering a wide range of categories or fields. Some of these include:

DIALOG INFORMATION SERVICES INC. - accesses over 300 bibliographic and textual databases and provides international coverage in scientific and business fields. Subscription fee: \$US25. Usage rates range from \$.58 to \$2.55/min.
Contact: (416) 593-5211

DATA STAR - accesses European information. Licenses databases in such things as business, science and technology.
Contact: Laupenstr. 18
CH-3008 Berne, Switzerland
Tel: 031-659 111

BRS INFORMATION TECHNOLOGIES - accesses more than 500 international databases in biomedicine, science, technology, business, economics, social science, the humanities, etc.
Contact: 8000 Westpark Dr.
McLean, VA USA 22100
Tel: (703) 442-0900

NEWSNET, INC. - accesses newsletters and other specialized business information.
Contact: 945 Haverford Rd.
Bryn Mawr, PA USA 19010
Tel: (215) 527-8030

COMPUTER READABLE DATABASES
Online Service: DIALOG
The database of databases contains descriptions of about 4200 databases available internationally.

NEWS
Online Service: FIZ Technik
Two databases which access the online databases in the Federal Republic of Germany.
Available in English and German.

REBK (REPertoire des Banques des Données en Conversationnel)
Contains references to over 1200 databases available online in France.
Available in French only.

ALPHA - DATENBANK

Online Service: Genios Wirtschaftsdatenbanken

Contains descriptions of 1700 worldwide databases available in the Federal Republic of Germany. Covers business, life and social sciences, medicine and technology.

Available in German only.

"GENERAL" NEW PRODUCT/NEW TECHNOLOGY DATABASES

These databases are non-specialized by technical category and thus may include listings that vary from electronic devices to new materials to chemical process catalysts and beyond. Many governments and national business organizations develop such databases as an aid to diffusing technological innovation developed by their nationals. A number of private technology consulting firms also have developed such "general" databases.

Most of these "general" databases are not "on-line" and thus must be accessed by contacting the appropriate organization by telephone/fax/telex/ mail. The Technology Inflow Program (TIP), with officers stationed at various Canadian embassies, can assist in accessing many of these databases in foreign countries.

The longest established of the "general" new product/new technology databases is:

Dr. Dvorkovitz & Associates

Tel: (904) 677-7033

World Bank of Licensable Technology

Fax: (904) 677-7113

P.O. Box 1748

Tlx: 494-0321

Ormond Beach, Florida U.S.A.

This database, containing approximately 20,000 listings, is long-established. Franchised affiliates in such countries as Italy and Japan have been recently established, which should lead to further enrichment of the database over time. The database was once on-line, but returned to off-line some years ago due to economics. New cost-effective computer technology has now permitted a return to on-line access.

AMERICAN BULLETIN OF TECHNOLOGY TRANSFER

Online Service: International Advancement, Inc. Contains full text of American Bulletin of Technology Transfer, a newsletter listing descriptions of offers and requests for international joint-venture and licensing agreements. Annual subscription of \$75 required.

APPLIED SCIENCE & TECHNOLOGY INDEX

Online Service: WILSONLINE Contains about 272,000 citations to articles, book reviews, interviews, new product reviews, and selected editorials and letters to the editor in 336 English-language publications in the applied sciences and technology.

ARISTOTELE

Online Service: Serveur Universitaire National de l'information Scientifique et Technique (SUNIST) Contains 500 references to technology resources for organizations in the Rhone-Alpes region of France. Covers regional government agencies, trade organizations, research and technical centers, scientific organizations, and private consultants in the areas of agriculture, chemistry, energy, environment, health science, information science, materials, measurement and controls, mechanical and civil engineering, and physics. Available in French.

ARTHUR D. LITTLE/ONLINE

Online Service: DIALOG Information Service, Inc. (File 192) Contains more than 1500 citations to, or full text of, non-exclusive publications produced by Arthur D. Little, Inc., its divisions and subsidiaries. Includes industry forecasts, technology assessments, product and market overviews, corporate profiles

and assessments, and opinion research. Surcharge of \$100 required on selected Executive Summaries and full text articles.

ASAHI NEWS SERVICE

Online Service: Mead Data Central, Inc. (ASAHI) (as a NEXIS database); PROFILE Information Contains full text of the Asahi News Service, covering international news and political, economic, technological, and cultural developments in Japan and the Far East. Subscription to Mead Data Central required.

B.E.S.T. GREAT BRITAIN

Online Service: Longman Catermill Limited Contains information on over 22000 scientists and researchers in the UK in public sector institutions. Covers 250 scientific and technical areas. Annual subscription required.

DR. DVORKOVITZ & ASSOCIATES

This database, containing approximately 20,000 listings, is long-established. Franchised affiliates in such countries as Italy and Japan have been recently established, which should lead to further enrichment of the database over time. The database was once on-line, but returned to off-line some years ago due to economics. New cost-effective computer technology has now permitted a return to on-line access.

FACTORY AUTOMATION NEWS

Online Service: Data-Star (PTBN) (as part of PTS NEWSLETTER DATABASE); DIALOG Information Services, Inc. (File 636) (as part of PTS NEWSLETTER DATABASE); NewsNet, Inc. Contains full text of Factory Automation News, a monthly newsletter on technical and commercial developments in industrial automation. Covers new products and applications, industry trends, and corporate news, including new ventures and licensing agreements. Monthly subscription to NewsNet required; differential charges for subscribers and non-subscribers to Factory Automation News.

FACTS ON FILE WORLD NEWS DIGEST

Online Service: DIALOG Information Services, Inc. (FACTS ON FILE) (File 264); Mead Data Central, Inc. (FACTS) (as a NEXIS database) Content: Contains full text of Facts on File World-News Digest, providing news summaries of current events worldwide. Covers politics, foreign affairs, government, business, the economy, arts, sports, and medicine. Subscription to Mead Data Central required.

FEDERAL APPLIED TECHNOLOGY DATABASE

Online Service: BRS (FATD); BRS/Colleague (FATD) Contains information on technical products, processes, and services developed or maintained by U.S. federal government agencies and available to the private sector for practical or commercial applications.

FEDERAL RESEARCH IN PROGRESS

Online Service: DIALOG Information Services, Inc. (Files 265, 266) Contains descriptions of and refer

ences to research in progress and recently completed research sponsored primarily by federal government agencies. Covers basic and applied research in all areas of the life, physical, social behavioural, and engineering sciences. Records from the National Aeronautics and Space Administration (NASA) and U.S. Department of Energy (DOE) are available only in the U.S.

FOCUS ONLINE

Online Service: Focus Research Systems, a company of The Dun & Bradstreet Corporation (D&B). Contains information on computer hardware, software, data communications, telecommunications and office automation products installed or planned for purchase in approximately 350,000 companies.

FUJITSU WEEKLY

Online Service: Data Star or DIALOG Contains information on new products, technical developments, production capacity, major orders, license arrangements and marketing plans.

HIGH TECH INTERNATIONAL

Online Service: Data-Star; DIALOG or NewsNet Contains information on hightech industries and business trends in the FRG and Europe C..... marketing, production, patents and licenses and technology transfer. Subscription NewsNet required, differential charges for subscribers and non-subscribers of High Tech International Magazine.

HIGH TECHNOLOGY BUSINESS

Online Service: Mead Data Central, Inc. Covers trends in the application of new technologies in business and industrial settings.

INFORMAT INTERNATIONAL BUSINESS

Online Service: Data Star or DIALOG Contains over 500 000 summaries of business news reports from 425 worldwide publications. Includes information on marketing, advertising new products, services and technologies.

INFORMATION AND TECHNOLOGY TRANSFER DATABASE

Online Service: International Research Evaluation Contains over 3 million citations covering various subjects such as energy, justice, waste management, fibre optics, lasers, medicine, health, transportation and agriculture.

INNOVATOR'S DIGEST

Online Service: NewsNet, Inc. Provides citations, with abstracts, to selected reports on technological innovations. Covers products, materials, processes, techniques, and current research in such fields as agriculture, biomedicine, communications, construction, computers, electronics, engineering, energy, and manufacturing. Subscription to NewsNet required.

INSIDE R&D

Online Service: Data-Star DIALOG; Mead Data Central, Inc.; and NewsNet Inc. Contains information on developments with industrial potential available for licensing. Covers chemistry, electronics, materials engineering, instrumentation, biotechnology, robotics, and emerging technologies. Subscription to Mead Data Central required; monthly subscription to NewsNet required, with differential charges for subscribers and non-subscribers to Inside R&D.

THE JAPAN ECONOMIC JOURNAL

Online Service: Mead Data Central, Inc. Contains information on developments in Japanese industry, technology, finance, and the raw materials markets. Also covers company, product, and industry information for such industries as chemicals and textiles, construction, electricals and electronics, computers, food, and leisure. Subscription required.

JAPAN HIGH TECH REVIEW

Online Service: NewsNet, Inc. Contains information on Japanese high technology industries, including computer hardware and software, data communications, fiber optics video technologies, television, and robotics. Subscription to Newsletter required.

JAPAN REPORT: PRODUCT OPPORTUNITIES

Online Service: Data-Star; DIALOG Contains full text of Japan Report: Product Opportunities, a monthly newsletter on Japanese products and technologies available to non-Japanese firms for licensing, distribution rights, and other business relationships.

JAPAN SCIENCE SCAN

Online Service: Data-Star; DIALOG; NewsNet, Inc. Contains full text of Japan Science Scan, a weekly newsletter on current Japanese scientific research, environmental policy, medical news, and health-related articles. Monthly subscription to NewsNet required; differential charged for subscribers and non-subscribers to Japan Science Scan.

JICST FILE ON CURRENT SCIENCE AND TECHNOLOGY RESEARCH IN JAPAN

Online Service: The Japan Information Center of Science and Technol

ogy (JICST) Contains descriptions of and references to research in progress in Japan. Includes both current and recently completed basic and applied research in the fields of engineering, science, and technology, with primary coverage of research sponsored by government agencies. Available in Japanese only.

JICST FILE ON GOVERNMENT REPORTS IN JAPAN

Online Service: The Japan Information Center of Science and Technology (JICST) Contains citations, with abstracts, to reports of research and development projects sponsored by the Japanese government. Covers engineering and technology. Available in Japanese only.

JICST FILE ON SCIENCE, TECHNOLOGY, AND MEDICINE IN JAPAN

Online Service: The Japan Information Center of Science and Technology (JICST); STN International (JICST-E) Contains about 690,000 citations, with abstracts, to scientific, technical, and biomedical literature published in Japan. Covers chemistry, biochemistry, and life sciences; pharmacology; medicine; electrical engineering and electronics; civil engineering and architecture; mechanical engineering; metallurgy and mining engineering; physics; space and earth sciences; and miscellaneous technologies.

JICST FILE ON SCIENCE AND TECHNOLOGY

Online Service: The Japan Information Center of Science and Technology (JICST) Contains citations, with abstracts, to the worldwide literature on chemistry, civil engineering and architecture, electronics and electrical engineering, energy, environmental pollution, life sciences, management science, mechanical

engineering, nuclear engineering, pure and applied physics, and systems engineering. Available in Japanese only.

J-TIES

Online Service: COM-NET Contains about 5000 citations, with abstracts and evaluations, to papers presented at Japanese-language conferences, seminars, and professional meetings. Covers 8 high technology fields: semiconductor electronics, including silicon-based and compounds, integrated electronics, optoelectronics, new ceramics and superconductors, artificial intelligence, computers and communication, and image processing. Various subscriptions options ranging from \$15,000 to \$40,000 to J-ties required; initiation fee of \$40 and monthly minimum of \$10 to COM-NET required.

PMI CONTACT

Online Service: Chambre Regional de Commerce et d'Industrie Languedoc-Roussillon Contains announcements of French industrial business opportunities, including domestic and foreign joint venture, stock offers, businesses for sale, industrial properties, markets or capital sought, and patents, licenses, and new products. Non-subscribers can access the text of the announcements without the contact information. Available in French. Annual subscription fee of about \$85 required.

PRODUKT (NEUE PRODUKTE UND VERFAHREN)

Online Service: Gesellschaft fuer Betriebswirtschaftliche information mbH (GBI) Contains about 30,000 references to new German products, processes, and technologies. Includes product description and vendor name. Sources include press releases and trade periodicals. Available in German only

PTS NEW PRODUCT ANNOUNCEMENTS/PLUS

Online Service: Data-Star (PTNP); DIALOG Information Services, Inc. (File 621) Contains full text of about 110,000 press releases from over 15,000 companies on new products and technologies and corporate activities. Covers announcements of new products and services, product modifications, and new technologies and processes from manufacturers, distributors, and service companies in nearly 60 industries.

SITRAFO

Online Service: STN International Contains references to about 1500 current research projects at the Universitaet Karlsruhe, the Universite Louis Pasteur, and universities and research institutes in West Berlin. Covers projects with potential for technology transfer. Includes descriptions and contact information.

SOVIET SCIENCE AND TECHNOLOGY

Online Service: DIALOG Information Services, Inc. (File 270) Contains about 120,000 citations, most with abstracts, to the scientific and technical literature published in the Soviet Union and other Soviet-bloc countries, with a focus on technology applications. Includes aerospace, aeronautics, computer technology, cybernetics, earth science, energy use and conservation, environmental sciences, fuels and petroleum products, geosciences, metallurgy, meteorology, pollution abatement and control, robotics, solar energy, and telecommunications.

SOVIET TECHNOLOGY ALERT

Online Service: Data-Star; DIALOG Contains full text of Soviet Technology Alert, a monthly newsletter on advanced materials and technolo-

gies developed in Soviet-bloc countries. Includes contract and licensing opportunities in those countries.

SSIE CURRENT RESEARCH

Online Service: DIALOG Contains descriptions of and references to research in progress and recently completed research sponsored by government agencies, major foundations, individuals, universities and colleges.

TECHNICAL REPORTS DATABASE

Online Service: Defense Technical Information Centre (DTIC) Contains over 1.4 million citations to reports on the results of U.S. Department of Defense-sponsored scientific and technical research, development, test, and evaluation projects. Covers defense-related subjects and such scientific and technical topics as biology, chemistry, energy, environmental sciences, oceanography, computer sciences, sociology, and human factors engineering. Available only to organizations registered with the U.S. Department of Defense; registration is open to U.S. government agencies and their contractors or grantees.

TECHNO-SEARCH

Online Service: Heiwa Information Centre Co., Ltd. Contains about 325,000 citations, abstracts, and edited news stories from 5 major Japanese industrial and technical newspapers. Available in Japanese

TEKTRAN (TECHNOLOGY TRANSFER AUTOMATED RETRIEVAL SYSTEM)

Contains over 7000 summaries of results from research projects undertaken by USDA-ARS. Research reported in the database has been completed and reviewed but, in most cases, has not yet been published. Covers genetic engi-

neering, human nutrition, crop and animal production and protection, farm products processing, soil and water conservation, and water quality management. Access limited to US users

ADVANCED COATINGS & SURFACE TECHNOLOGY

Online Service: Data-Star; DIALOG; NewsNet, Inc. Contain full text of Advanced Coatings & Surface Technology, a monthly newsletter on coating materials and processes for adding corrosion resistance, extra strength, and other desirable properties to a variety of substrate material. Monthly subscription to NewsNet required; differential charged for subscribers and non-subscribers to Advanced Coatings & Surface Technology.

Limited to a specialized area or industry, such databases are frequently maintained by industry associations, research organizations or government departments.

THOMAS NEW INDUSTRIAL PRODUCTS

Online Service: DIALOG Information Services, Inc. (File 536) Contains descriptive and technical information on over 34,000 new industrial products and systems worldwide. Includes product and trade name, synonyms, model number, Standard Industrial Classification (SIC) code, features, performance specifications, uses, and price. SPECIFIC SECTOR NEW PRODUCT/NEW TECHNOLOGY DATABASE

ADVANCED COMPOSITES BULLETIN

Online Service: Data-Star; DIALOG Contains full text of Advanced Composites Bulletin, a monthly newsletter on research, development, and applications in advanced composite

materials, metal matrix composites, and reinforced plastics and ceramics.

ADVANCED MANUFACTURING TECHNOLOGY

Online Service: Data-Star; DIALOG Mead Data Central; Inc. (ADMANF); NewsNet, Inc. Contains full text of Advanced Manufacturing Technology, a biweekly newsletter on robotics and manufacturing technology. Covers artificial intelligence, automated machining, lasers, products and applications, and company news. Monthly subscription to NewsNet required; differential charges for subscribers and non-subscribers to Advanced Manufacturing Technology; subscription to Mead Data Central required.

ADVANCED MEDICAL INFORMATION SERVICES

Online Service: AMS Corporation Contains news, literature references, and other information and electronic services for physicians, hospital administrators, and public health officials in Japan. Available in Japanese.

AEROSPACE DATABASE

Online Service: DIALOG Information Services, Inc. (File 108) Content: Contains over 1.5 million citations, with abstracts, to the worldwide published and unpublished literature on research and development in aerospace and related technological areas. Access limited to users within the U.S.; intended only for organizations or persons whose primary activities are within the U.S. or its territories.

THE AEROSPACE INDUSTRY COMPETITIVE INTELLIGENCE DATABASE

Online Service: Strategic Intelligence Systems, Inc. (SIS) Contains citations, with abstracts, to periodical literature on the aerospace

industry. Covers industry trends, technical developments, legislation and regulation, international markets, and company news, including new products, contract awards, mergers, acquisitions, joint venture, and financial performances. Subscription required.

AGREP (AGRICULTURAL RESEARCH PROJECTS)

Online Service: Datacentralen; DIMDI Contains over 25,000 descriptions of current agricultural research projects in member countries of the European Economic Community (EEC). Covers conservation and natural resources, land use and development, animal production, veterinary medicine, food and nutrition, fisheries, forestry, agricultural economics, and rural sociology.

APPLIED GENETICS NEWS

Online Service: NewsNet, Inc. Contains full text of Applied Genetics News, a monthly newsletter covering business and technological developments in biotechnology and genetic engineering. Monthly subscription to NewsNet required; differential charged for subscribers and non-subscribers to Applied Genetics News.

AQUACULTURE

Online Service: DIALOG Information Services, Inc. (File 112) Contains citations, with some abstracts, to literature on the growing of marine, brackish, and freshwater organisms. Subjects covered include disease, economics, engineering, feed and nutrition, growing requirements, legal aspects, and life history. Hydroponic techniques are not included.

AQUATIC SCIENCES AND FISHERIES ABSTRACTS

Online Service: BRS/Colleague CISTI CISTI; Canadian Online Enquiry Service (CAN/OLE); (ASFA); DIALOG; DIMDI (ASFA); ESA-IRS; Universidad Nacional Autonoma de Mexico, Servicio de Consulta a Bancos de Informacion (SECOBI). Contains about 280,000 citations, with abstracts, to worldwide literature on the science, technology, and management of marine, brackish, and freshwater environments.

ARTIFICIAL INTELLIGENCE

Online Service: Date-Star; The Turing Institute Access through The Turing Institute limited to its affiliates. Contains over 50,000 citations, with abstracts, to the worldwide literature on artificial intelligence. Covers expert systems, knowledge representation, natural language, machine learning, computer vision, robotics, and interactions between humans and computers.

BIOBUSINESS

Online Service: BRS (BBUS); BRS/Colleague (BBUS); Central Institute Scientific and Technical Information; Data-Star (BBUS); DIALOG; ESA-IRS (File 137) Contains about 164,000 citations, with abstracts, to the worldwide periodical literature on business applications of biological and biomedical research. Covers agriculture and forestry, food technology, genetic engineering, pharmaceutical products, and other industries affected by biotechnological developments.

BIOTECHNOLOGY ABSTRACTS

Online Service: DIALOG Information Services, Inc. (File 357); ORBIT Search Service (BIOTECHNOLOGY) Contains about 75,000 citations, with abstracts and indexing, to the worldwide journal and patent litera-

ture on biotechnology, including microbiology, genetic manipulation, biochemical engineering, fermentation, down-stream processing, pharmaceuticals, industrial uses of micro-organisms, plant breeding, cell hybridization, and industrial waste management. Differential charges for subscribers and non-subscribers to Biotechnology Abstracts.

BIOTECHNOLOGY INVESTMENT OPPORTUNITIES

Online Service: Newslet, Inc. Contains full text of Biotechnology Investment Opportunities, a newsletter on investment opportunities in genetic engineering. Covers initial public stock offerings, company profiles and activities, current research, emerging markets and commercial applications, industry trends, and relevant government policies and activities. Monthly subscription required.

BIOTECHNOLOGY NEWSWATCH

Online Service: DIALOG Information Services, Inc. (File 624) (as part of McGRAW-HILL PUBLICATIONS ONLINE); Dow Jones News/Retrieval (as a DOW JONES TEXT-SEARCH SERVICES database (see)); Mead Data Central, Inc. (BIOTEC) (as a NEXIS database) Contains full text of Biotechnology Newswatch, a newsletter on biotechnology and the international biotechnology industry. Annual fee of \$18 to Dow Jones required; subscription to Mead Data Central required.

THE BREADS & CEREALS INDUSTRY COMPETITIVE INTELLIGENCE DATABASE

Online Service: Strategic Intelligence Systems, Inc. (SIS) Provides information on the manufacture and marketing of breads, cereals

and pasta products. Covers industry trends, consumer attitudes, advertising, new products and company news. Subscription or monthly minimum required.

BREW - INFO

Online Service: European Brewery Convention (EBC) Contains about 32 500 citations to worldwide scientific, technical and business literature on the brewing industry. Covers such things as brewery design, installation, management, raw materials analysis and processing and distribution.

BUSINESS

Business is a newly established European database on worldwide trade opportunities and business contacts for manufacturing, marketing, services, cooperations and research and development. Business opportunities are taken from a wide range of traditionally published exchanges, exhibition catalogues and directories. Also included are original company/institute profiles stating corporate data and specific business interests. Main database language is English abstracts are in English, French or German depending on the country at which the particular business opportunities are aiming. Business is accessible on-line via the two leading EURONET hosts DATASTAR (CH) and INKA (D). Customers may store their own product offers/demands in the database.

Business

Online GMBH
Poststrasse 42
D-6900 Heidelberg West Germany
Tel: (06 221) 21536
Tlx: 461782

BUSINESS COOPERATION NETWORK - BC NET

A computer database of international business opportunities, emphasizing business cooperation via joint ventures and similar arrangements. Some of the opportunities involve technology transfer. Copies of the latest listings, and also application forms of canadian firms wishing to be listed on this database to either seek or offer opportunities are available from:

Commission of the European Communities

80, rue d'Arlon
B-1040 Brussels
Belgium
Tel: 02/230 3949
02/230 4091
Fax: 02/236 2572
Tlx: 61655 BURAP

CLAIMS/U.S. PATENTS

Online Service: DIALOG; ORBIT Search Service (CLAIMS); STN International (IFIPAT) Contains about 1.7 million citations to granted U.S. utility patents, reissued patents, and defense publications announced in the U.S. Patent Office Official Gazette. Equivalent patents issued by Belgium, Federal Republic of Germany, France, Great Britain, and the Netherlands are also included for chemical patents.

COMPANY AND INDUSTRY REPORTS

Online Service: Mead Data Central, Inc. (COIND) (as a LEXIS Financial Information Service database) Contains full text of research reports on U.S. and multinational companies and industries prepared by analysts at about 30 regional, national, and international investment banking, brokerage, and research firms. Subscription to Mead Data Central required.

THE CONFECTIONERY INDUSTRY COMPETITIVE INTELLIGENCE DATABASE

Online Service: Strategic Intelligence Systems, Inc. (SIS) Contains citations, with abstracts, to periodical literature on the manufacture and marketing of candy and other sweet snacks. Covers industry trends (e.g., market for artificially sweetened confections), consumer attitudes, processing, packaging, distribution, advertising campaigns, and company news, including new products, mergers, acquisitions, and financial performances. Subscription required.

CONSULTANT DATA BASE

Online Service: Ja Net't Global Contains references to approximately 30,000 consultants to industry and government. Provides name, address, telephone number, education, professional experience, honors and awards, publications, areas of expertise, geographic limitation on consulting, and fees. Monthly subscription of \$25 required; members of Chambers of Commerce pay \$5 per year.

CONSULTANTS AND CONSULTING ORGANIZATIONS DIRECTORY (CCOD)

Online Service: Executive Telecom System, Inc., The Human Resource Information Network (ETSI/HRIN) Contains information on over 16,000 organizations and individuals available as consultants to business, industry, and government. Covers agriculture, lecture, art, business and finance, computers and data processing, education, engineering, science and technology, environment, health and medicine, human resources management, manufacturing, marketing and sales, and social studies. Annual subscription to ETSI/HRIN required.

THE COOKIE INDUSTRY COMPETITIVE INTELLI- GENCE DATABASE

Online Service: Strategic Intelligence Systems, Inc. (SIS) Contains citations, with abstracts, to periodical literature on the manufacture and marketing of cookies. Covers industry trends, processing, packaging, distribution, advertising campaigns, and company news, including new products, mergers, acquisitions, and financial performances. Subscription required.

DATA BANKS OF INTEREST TO SME'S

This database is an on-line service which charges a fee for set-up, access and retrieval. It covers areas such as agriculture, textiles, chemicals, food, commerce, technology, energy, law, general information i.e. brokers, information and terminology.

Data Banks of Interest to SME's
Commission of the
European Communities
SME Task Force
L-2985 LUXEMBOURG

DEFENCE TECHNOLOGY ENTERPRISES LTD. (DTE)

A private sector firm focussing on commercializing technologies developed in British defence laboratories. Over 500 such technologies, which have non-defence applications, are on an off-line database.

Defence Technology Enterprises Ltd.

Norfolk House
433a Silbury Boulevard
Central Milton Keynes MK9 2HA,
ENGLAND

DOE ENERGY

Online Service: DIALOG; STN International (ENERGY); U.S. Department of Energy, Integrated Technical Information System (DOE) Contains about 2.2 million citations, with abstracts (since June 1976), to literature in all fields of energy. Covers all unclassified scientific and technical information processed by the DOE Office of Scientific and Technical Information in Oak Ridge, Tennessee. Accessible through DIALOG only in countries with which DOE has bilateral exchange agreements, and through STN only in some European countries by specific bilateral agreement.

DOMIS (DIRECTORY OF MATERIALS DATA INFOR- MATION SOURCES)

Online Service: ECHO Service Contains references to information sources and properties for the materials industry. Covers metals, alloys, and steel; ceramics and glass; composite materials, coatings, and joints; plastics and rubber; electricity and electronics; and wood and other organics.

ECHO DATABASE

Echo is a non-commercial organization offering access to unique databases and databanks either wholly or partly sponsored by the CEC which are not available on any

other on-line host service. These are multilingual, mainly of a European nature and range from information on research projects, reports, research organizations and a multilingual terminology databank to user guidance files of interest to the whole European on-line user community.

ELECTRONET INFORMATION SYSTEMS

Online Service: Electronet Information Systems Contains 3 files of information on information technology and factory automation; TECHNOLOGY DATABASE, TECHNOLOGY WATCH, and TECH EXTRA. Initiation fee of \$595 required.

ENERGY INFORMATION DATABASE

Online Service: International Research & Evaluation Contains over 87,000 citations, with abstracts, to energy-related publications. Topics covered include solar energy, bio-conversion/biomass, ocean energy, photovoltaics, photoconversion/chemical energy, wind energy, process heat, hybrid/total energy systems, and models and simulations.

ENGINEERED MATERIALS ABSTRACTS (EMA)

Online Service: DIALOG; ESA-IRS, ORBIT Search Service (EMA); STN International. Contains about 45,000 citations, with abstracts, to the worldwide literature on the development, processing and production of ceramic, composite, and polymeric materials for engineering uses.

EURONET DIANE

Euronet Diane publishes a series of information retrieval materials including a directory of databases and databanks plus "An Introduction to On-Line" which explains what a database is and how to effectively use it to retrieve valuable information.

EUROPEAN PATENTS REGISTER

Online Service: European Patent Office; Telesystemes-Questel (EPAT) Contains bibliographic and legal status information on over 305,000 published European patent applications and 100,000 patents from the start of the European patent procedure (June 1978). Subscription fee of 250DM (German marks) to the European Patent Office required for access through EPO.

FAIRBASE

Online Service: BRN (FAIR); BRS After Dark (FAIR); BRS/Colleague (FAIR); Data-Star (FAIR); FIZ Technik (FAIR) Contains about 32,000 refer

ences, with some abstracts and statistics, to trade fairs, exhibitions, conferences, and meetings in over 100 countries.

FOHA (FORSCHUNGSVORHABEN)

Online Service: DIMDI Contains references to about 550 current German research projects in agriculture, nutrition, veterinary medicine, and forestry. German with titles also in English.

FOOD, COSMETICS AND DRUG PACKAGING

Online Service: Data Star or DIA-LOG Contains information on the technologies and regulations applicable to the packaging of food, cosmetics and drugs.

THE FOOD INDUSTRY COMPETITIVE INTELLIGENCE DATABASE

Online Service: Strategic Intelligence Systems, Inc. (SIS) Includes information on the manufacture and marketing of food products. Covers industry developments consumer attitudes, packaging, distribution, advertising etc. Subscription or monthly minimum required.

FOOD MARKET AWARENESS DATABASE (FMAD)

Online Service: Leatherhead Food Research Association (LFRA) Contains almost 25 000 citations on marketing in the food and beverage industry. Covers advertising, exports and consumption for ingredients and commodities. Various subscriptions available.

FOODS ADLIBRA

Online Service: DIA-LOG Contains about 170 000 citations on research and development in food technology and packaging.

THE FROZEN FOODS INDUSTRY COMPETITIVE INTELLIGENCE DATABASE

Online Service: Strategic Intelligence Systems, Inc. (SIS) Contains information on the manufacture and marketing of frozen foods. Subscription or monthly minimum required.

FSTA (FOOD SCIENCE AND TECHNOLOGY ABSTRACTS)

Online Services: CISTI, CAN/OLE, Data Star, DIA-LOG, DIMDI, ESA-IRS, GEM Gesellschaft fuer elektronische Medien, JICST, Knowledge Index (Food I), ORBIT Search Services, STN International Contains about 350 00 citations to worldwide literature in food science and technology dealing with all human food commodities and food processing. COSTO accessible only in Canada.

GERMAN BUSINESS SCOPE

Online Service: Data Star, DIA-LOG or Netslet Covers information on trade, sales and distribution opportunities between West Germany and the USA. Monthly subscription to NewsNet required.

GOETZ SCHAUDE: LICENSE DATA BANK

Over 4,000 technologies from around the world available for licensing. Goetz Schaudé is a West German-based technology transfer brokerage and consulting firm, founded in 1972.

Goetz Schaudé

Finkenstraße 14
D-7534 Birkenfeld, FRG
Tel: 49-0-7231 480723

HIGH PERFORMANCE TEXTILES

Online Service: Data Star or DIA-LOG Contains information on new materials, processes and applications in high performance textiles and fibres.

HIGH PERFORMANCE PLASTICS

Online Service: Data Star or DIALOG Contains information on polymer research and applications in high performance plastics.

HIGH TECH MATERIALS ALERT

Online Service: Data Star, DIALOG or Mead Data Central, Inc. Information on commercial opportunities for advanced materials including polymers, ceramics, metals, reinforcing fibres, composites, optical materials and many more.

HIGH TECH SEPARATION NEWS

Online Service NewsNet Inc. Covers technological, economic, academic, marketing and business aspects of organic and biomolecular separation. Covers liquid and gel chromatography, supercritical fluid separation, affinity technology and much more. Monthly subscription to NewsNet required.

HITACHI WEEKLY

Online Service: Data Star or DIALOG Covers new products, technical developments, production capacity, major orders, licence agreements and marketing plans of the Hitachi company.

HTM-DB HIGH TEMPERATURE MATERIALS DATABANK

Online Service: Commission of the European Communities (CEC), Joint Research Centre (JRC) Contains over 12 000 records on mechanical properties of engineering materials with an emphasis on high temperature applications.

IBM JAPAN WEEKLY

Online Service: DIALOG or Data Star Covers production, applications, marketing, IBM compatible products made by other companies and relations with Asian companies.

ICC BRITISH COMPANIES DATABASE

Online Service: British Telecom Gold Ltd., DIALOG, Data Star, ICC Information Group Ltd., Knowledge Index. Contains 3 files of descriptive and financial information on limited liability companies in the U.K. Includes ICC Directory of Companies, ICC Financial Data and ICC Sharewatch.

IDEA MANAGEMENT AND PATENT ASSISTANCE CORPORATION (IMPAC)

A new product marketing and patent development firm. IMPAC'S new product and technology database, the IMPAC report, contains thousands of new products and technologies available for licensing broken down by product category. Free data base searches are available for companies with an interest in licensing.

Alan L. Kosow, Licensing Manager
Idea Management and Patent Assistance Corporation (IMPAC) 2 Main Street

JAPAN AUTOMATION REVIEW

Online Service: NewsNet, Inc. Contains information on research, applications, and marketing in the Japanese robotics industry. Covers industrial robots, devices for robots, vision systems, computer-aided manufacturing (CAM) systems, artificial intelligence, and automated guided vehicles. Includes new product announcements. Subscription to NewsNet required.

JAPAN COMPUTER INDUSTRY SCAN

Online Service: Data-Star; DIALOG and; NewsNet, Inc. Contains news of developments in the Japanese computer industry and markets. Covers such topics as research and development, market shares and production quotas, licensing agreements with non-Japanese manufacturer, and the Japanese market for U.S. computer products. Subscription to Newsletter required.

JAPAN CONSUMER ELECTRONICS SCAN

Online Service: Data-Star, DIALOG; NewsNet, Inc. Contains information on new electronics products from Japanese companies. Covers price, availability, and target markets. Subscription to Newsletter required.

JAPAN ECONOMIC DAILY

Online Service: Data-Star; Dow Jones News/Retrieval; General Videotex Corporation/DELPHI; NewsNet, Inc. Contains news on Japanese business, industry, economics, and finance. Covers developments in computers, robotics, biotechnology, and other high technology industries, as well as government policies and decision making. Annual fee of \$18 to Dow Jones required; initiation fee of \$49.95 required for access through General Videotex Corporation includes user guide and 2 hours of online connect time; monthly subscription to NewsNet required.

JAPAN INFORMATION CENTRE OF SCIENCE & TECHNOLOGY (JICST): ENGLISH DATABASE

Created by the central technical information agency of the Japanese government, this database includes over 300,000 English-language

records covering various fields of technology. It can be searched online via direct connection to Tokyo or via the U.S. 'host' STN. Other off-line databases can also be sourced and various services, including translation and Selected Dissemination of Information (SDI), can be accessed.

JAPAN REPORT: BIOTECHNOLOGY

Online Service: Data-Star or DIALOG Contains information on the Japanese biotechnology industry. Covers research and applications in agriculture, brewing, food processing and pharmaceuticals.

JAPAN REPORT: INFORMATION TECHNOLOGY

Online Service: Data-Star; DIALOG Contains full text of Japan Report: Information Technology, a monthly newsletter on the Japanese computer industry. Covers computers, integrated circuits, optical disks, peripheral devices, voice systems, workstations, and software.

JAPAN REPORT: MEDICAL TECHNOLOGY

Online Service: Data-Star (PTBN) (as part of PTS NEWSLETTER DATABASE); DIALOG Information Services, Inc. (File 636) (as part of PTS NEWSLETTER DATABASE) Contains full text of Japan Report: Medical Technology, a monthly newsletter on Japanese technology and production of medical diagnostic equipment and materials, therapeutic substances, and prosthetics.

JAPAN REPORT: TELECOMMUNICATIONS

Online Service: Data-Star; DIALOG Contains full text of Japan Report: Telecommunications, a monthly newsletter on the Japanese telecommunications industry. Covers company news, technology, and products.

JAPAN SEMICONDUCTOR SCAN

Online Service: Data-Star; DIALOG; NewsNet, Inc. Contains news and information on competition between the U.S. and Japanese semiconductor industries. Covers analyses of corporate policies and industry trends, including market share data for various products. Monthly Subscription to NewsNet required.

JAPAN TELECOMMUNICATIONS SCAN (FORMERLY NTT TOPICS)

Online Service: Data-Star; DIALOG; NewsNet, Inc. Contains news and information on activities of the Nippon Telegraph & Telephone (NTT) Corporation of Japan. Covers NTT's role in Japanese telecommunications, research and development in new technology areas and equipment, news of procurement agreements, and NTT editorials and policy statements. Monthly Subscription to NewsNet required.

JICST FILE ON MEDICAL SCIENCE IN JAPAN

Online Service: The Japan Information Center of Science and Technology (JICST) Contains citations, with abstracts, to Japanese biomedical literature, including journals and conference proceedings, published in Japan. Covers biological sciences (e.g., clinical medicine, dentistry, neurology, pharmacology). Corresponds in part to Current Bibliography on Science and Technology. Available in Japanese only.

MATERIALS BUSINESS FILE

Online Service: Centre de Documentation de l'armement (CEDOCAR); CISTI, Canadian Online Enquiry Service (CAN/OLE); Data-Star (MBUS); DIALOG Information Services, Inc. (File 269); ESA-IRS (File 111); ORBIT Search Service (Materials); STN International (MATBUS) Contains over 40,000 citations, with abstracts, to the worldwide literature on technical and commercial aspects of iron and steel, non-ferrous metals, and relevant non-metallic (e.g., polymers, ceramics, composites) materials. Covers product and process developments; applications and competitive materials; plants and engineering; fuel, energy usage, and raw materials; health and safety; regulations; and management, marketing and economics. CISTI only available in Canada.

MATIMOP (ISRAELI INDUSTRY CENTER FOR R&D)

This database handles hundreds of advanced technology projects in a variety of varied fields: biotechnology, computers, mechanical engineering, diagnostics, chemistry, electro-optics and laser, pharmaceutical, agrotechnology, etc. MATIMOP aims its activities at the promotion and implementation of such advanced projects.

PATOS-GERMAN PATENTS AND UTILITY MODELS

Online Service: Bertelsmann InformationsService GmbH Contains over 1.2 million citations, with some abstracts, to first publications by the German Patent Office (Deutsches Patentamt) of examined and unexamined patents and patent applications. Available in German only.

PATOS-GERMAN UTILITY MODELS

Online Service: Bertelsmann InformationsService GmbH Contains about 75,000 citations to utility models registered with the German Patent Office (Deutsches Patentamt). Available in German only.

PATOS-PCT APPLICATIONS

Online Service: Bertelsmann InformationsService GmbH Contains about 35,000 citations, with abstracts, to international patent applications published by the World Intellectual Property Organization (WIPO)

PNI (PHARMACEUTICAL NEWS INDEX)

Online Service: BRN (PNII); BRS/Colleague (PNII); DIALOG Information Services, Inc. (File 42); ORBIT Search Service (Pharmaceutical News Index) (PNI) Contains over

275,000 citations to business, legislative, and product news items from major pharmaceutical and medical device newsletters.

PRODUCTSCAN

Online Service: Marketing Intelligence Service Ltd. (MI) Contains descriptions of approximately 62,000 new consumer products introduced in 18 markets worldwide, including North America, Europe, Scandinavia, South Africa, Australia, and New Zealand. Covers over 170 product categories in the areas of food and beverages, household products, pet products, and health and beauty aids.

PROTEAS OF UK

A private European database designed to help organizations exploit their R&D by providing information of their results to prospective research and/or business partners. PROTEAS now encompasses all aspects of R&D under the following headings: Biology and Medicine, Information and Communications technologies, Materials, Industrial Manufacturing Technologies, Energy and the Environment.

PTS AEROSPACE/DEFENSE MARKETS & TECHNOLOGY

Online Service: Data-Star (PTDT); DIALOG Information Services, Inc. (File 80) Contains over 160,000 citations, with abstracts, to the worldwide literature on the aerospace and defense industries. Covers companies, technologies, products, and shipments, as well as land, sea, and air defense systems. Includes such

topics as defense budgets and weapon system appropriations, national military trends and preparedness, sales trends, new technologies and their applications. Differential charges for subscribers and non-subscribers to Aerospace/Defense Markets & Technology.

THE SNACK FOOD INDUSTRY COMPETITIVE INTELLIGENCE DATABASE

Online Service: Strategic Intelligence Systems, Inc. (SIS) Contains citations, with abstracts, to periodical literature on the manufacture and marketing of snack food items. Covers industry trends (e.g., market for low-salt snacks), legislation and regulation, processing, packaging, distribution, advertising campaigns, overall market activity, and company news, including new products, mergers, acquisitions, and financial performances. Subscription required.

TECHBASE R&D

Compilation of nearly 1000 significant, new advances from laboratories around the world. They were discovered and analyzed by the Technical Insight Staff after reviewing thousands of developments. Represent significant developments that offer near-term potential for exploration and are generally available for transfer to another organization.

Technical Insight Inc.

TECHNOLOGICAL INNOVATIONS FROM GERMANY

English language version of the technology database (offers and requests) of the German Chambers

of Industry and Commerce. Contains new technology offers and requests dating from November 1986. Earlier listings are on the German-language database Business, and can be accessed on line via the hosts DATASTAR (Bern) and GENIOS (Hamburg). Note that only brief descriptions of these technologies are in English. This information is also available in an English catalogue that can be purchased for 10 DM; however, it would obviously not be as up-to-date as the database. A more complete catalogue in German is available at low cost.

WORLD SURFACE COATINGS ABSTRACTS (WSCA)

Online Service: ORBIT Search Service (WSCA) Contains over 114,000 citations, with abstracts, to the worldwide research literature on all aspects of paints and surface coatings. Covers pigments, dyestuff, resins, solvents, coatings, plasticizers, adhesives, printing inks, insulation, fire retardants, occurrence and prevention of deterioration, corrosion resistant and antifouling finishes, testing, industrial hazards, pollution, marketing, regulations, and statistics.

WORLD TEXTILES

Online Service: DIALOG Information Services, Inc. (File 67) Contains about 150,000 citations, with abstracts from 1983, to the worldwide textile literature from about 500 periodicals, books, pamphlets, technical and conference reports, statistical publications, European, U.K., and U.S. patents, and international standards. Covers the areas of science and technology of textiles and related materials; technical economics, production, and man-

agement of the textile industry; and the consumption of, and international trade in, textile materials and products.

WPIA/WPILA

Online Service: ORBIT Search Service (WPIA, WPILA) Contains citations, with abstracts, to patents included in WPI (see) and APIPAT (see), with the addition of Chemical Abstracts Service (CAS) Registry Numbers and indexing terms supplied by API. Differential charges for subscribers and non-subscribers to Derwent printed publications.

WPIM (WORLD PATENTS INDEX MARKUSH)

Online Service: Telesystemes-Questel Contains graphic representations of generic (Markush) structures commonly used in patents for pharmaceuticals, agricultural chemicals, and general chemical compounds, to represent compounds that are wholly or partially variable. Differential charges for subscribers and non-subscribers to Derwent printed publications.

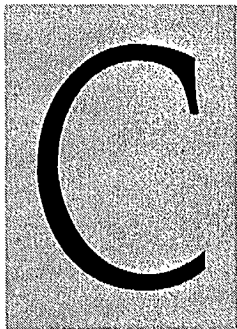

WPI (WORLD PATENTS INDEX)

Online Service: DIALOG; ORBIT Search Service (WPI, WPIL); Telesystemes-Questel Contains about 4.5 million citations, with abstracts, to chemical, electrical, mechanical, and general patents issued by 31 major patent-issuing authorities. Differential charges for subscribers and non-subscribers to Derwent printed publications.

A large, thick, grey, stylized letter 'C' that is open on the right side. It is centered on the page and serves as a background for the title text.

**CAMBRIDGE
CONSULTANTS LTD.**

Using technology to solve business
problems, Cambridge Consultants
Limited, a subsidiary of Arthur D.
Little, provides manufacturers of
innovative consumer and industrial
products with the following ser-
vices: requirement analysis; prepa-
ration and review of product specifi-
cations; feasibility studies on com-
plete design and development (ease
of use, costs, standards, and
patents); systems analysis; design
reviews; R&D capability audits;
market studies; and technology
strategies. CCL makes use of con-
trolled environment test and
assembly facilities (complete with
sensing, simulation and modelling
equipment) to design and develop
technologies in electronics, physics,
mechanical engineering, computer
& information procesing, product

design, and manufacturing. Clients of CCL include industries in the following sectors: food, healthcare, pharmaceuticals and fine chemicals, telecommunication and electronics, industrial and consumer products, paper and package printing, defense, nuclear, and offshore.

DEFENCE TECHNOLOGY ENTERPRISES LTD. (DTE)

A private firm formed as a result of a joint initiative between the Ministry of Defence and a consortium of companies (Barclay's Bank, Lazard Brothers, British Technology Group, CITICORP, etc.). DTE has an exclusive agreement with the Ministry of Defence to search defence laboratories for technologies that can be commercialized. DTE sells 'associate memberships' to companies wishing access to such technological information. DTE will search within defence laboratories to determine if a technology is available to meet a firm's needs. A database in excess of 500 available technologies is maintained. Associate members receive a continuing flow of information on all developments identified as having commercial potential. DTE is linked with an Australian firm that has a similar role in Australia.

**SPECIALIZED TECHNOLOGY
TRANSFER CENTRES**

SPECIALIZED TECHNOLOGY TRANSFER CENTRES

These are non-private sector centres (real or virtual) which enter joint ventures or collaborative relationships with technology recipients. The technology which is transferred to the recipient need not be technology which has been created by the centre. This category also includes public sector organizations which offer significant programs in the form of seminars and workshops or training in skills relating to the business of technology transfer.

BUILDING RESEARCH ESTABLISHMENT

The Building Research Establishment is the principal organisation in the United Kingdom carrying out research into building and construction and the prevention and control of fire. In April 1990, BRE became an Executive Agency of the Department of the Environment. Its main role is to advise and carry out research for DOE and other Government Departments on technical aspects of buildings, all aspects of fire, and environmental issues related to buildings. BRE undertakes a broadly-based research programme, ranging from studies of the basic properties of materials to investigations of specific building problems. Its findings and expertise provide the technical basis for Building Regulations and Codes and Standards, and are communicated widely to the industry and building owner through BRE publications, seminars and exhibitions. The Establishment's unique range of specialist skills and technical facilities are made available to the construction

industry and its suppliers through BRE Technical Consultancy, which was launched in October 1988. BRE has extensive links with research and technical organisations throughout the world. Its staff are prominent in the development of European Codes and Standards, and so support Government Departments and the UK construction industry in meeting the challenge of the Single European Market. BRE operates from four locations: its main site at Garston, near Watford, Hertfordshire; the Fire Research Station at Borehamwood, Hertfordshire, and Cardington, Bedfordshire; and the BRE Scottish Laboratory at East Kilbride, Glasgow.

ADVISORY SERVICE ON TRANSFER OF TECHNOLOGY (ASTT)

Established the institutional basis within UNCTAD to meet the requests and requirements of developing countries, individually and jointly, for assistance, advice, training and other supportive activities aimed at strengthening their technological capacity and accelerating their technological transformation. Within these broad objectives, the ASTT assists developing countries in diagnosing their main problems in the field of technology, advises them in charting suitable strategies, plans and action programmes at overall and sectoral levels; provides for the training of personnel to deal with these issues in an integrated fashion, helps them in evolving the institutional mechanisms, regulatory framework and policy instruments conducive to sustained technological and economic development.

LEGAL CONTACTS

LEGAL CONTACTS

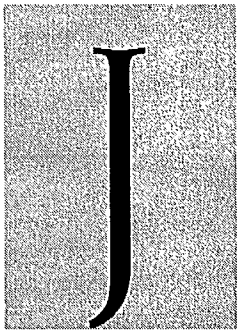

The Canadian embassies abroad assist Canadian firms with the identification of appropriate specialized legal services, specifically with respect to technology-related needs. The technology transfer specialists and organizations listed in this publication can also provide referrals to appropriate legal specialists. The LES publications mentioned in the preceding sections can also be of assistance.

**GOVERNMENT CONTACTS AND
INFORMATION SOURCES**

GOVERNMENT CONTACTS AND INFORMATION SOURCES

J1. TECHNOLOGY INFLOW PROGRAM (TIP) OFFICERS IN CANADIAN EMBASSYS ABROAD

This category includes foreign government offices whose significant function is to provide path finding services and information to assist the public to identify, evaluate, acquire, and implement technology.

Technology search specialists in Canadian Embassies abroad provide the following services to Canadian firms at no charge:

- location of required technologies, joint venture partners, etc.
- location of customers and licensees for Canadian technologies
- location of technology information sources including databases
- location of legal and other specialists to advise on technology transactions and agreements
- advice on selection of technological trade shows, etc.

Canadian firms may contact these specialists directly or through the nationwide offices of the National Research Council and the Department of Industry, Science and Technology Canada (ISTC).

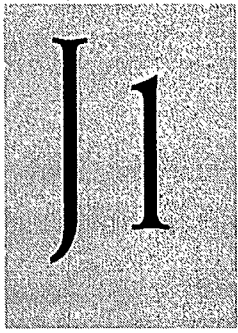

Further information and advice on the services of the specialists may be obtained by dialing: (613) 933-6435 or toll-free 1-800-267-8376.

■ Israel

MINISTRY OF INDUSTRY & TRADE: OFFICE OF THE CHIEF SCIENTIST (OCS)

Office of the Chief Scientist (OCS) provides support to industry. The OCS regularly updates its policy, in order to tailor its efforts to the changing industrial environment. As a result of these and other factors, Israel has attracted many major foreign industrial concerns. More than 150 foreign companies are involved in R&D investments in Israel. A growing number of Israeli firms are listed on overseas stock markets. Israel has signed international agreements with a number of countries to promote cooperation in industrial research. Among the binational agreements in effect to date are those between Israel and the US (BIRD-F), Canada, France, Holland, Ireland and Spain. Many others are currently under negotiation. The country enjoys the advantages of the Free Trade Agreement (FTA) with the US as well as a special relationship with the EEC.
