FOREWORD

The data contained in these "extracts" are with reference to U.S. Cable Systems which receive one or more Canadian television channels and distribute them to their U.S. subscribers.

Data covers only those Cable systems which are capable of receiving the Canadian channels "Off Air" and in some cases supplemented by terrestrial microwave networks. This accounts for the fact that all the U.S. systems identified are located within border states.

Data on the number of U.S. Cable systems that capture Canadian television programs via satellite signals are not available to us at the present time.

In the preparation of this report, extensive use was made of a U.S. publication, titled the Television Factbook. Statistics were extracted from this publication, and in some cases combined with Departmental data.

The statistics and charts that follow were compiled by Sandra Springer as part of her assignment with the Statistical Information Services Division under the Career Oriented Student Employment Program (COSEP).

SELECTED STATISTICS

GRAPH 1

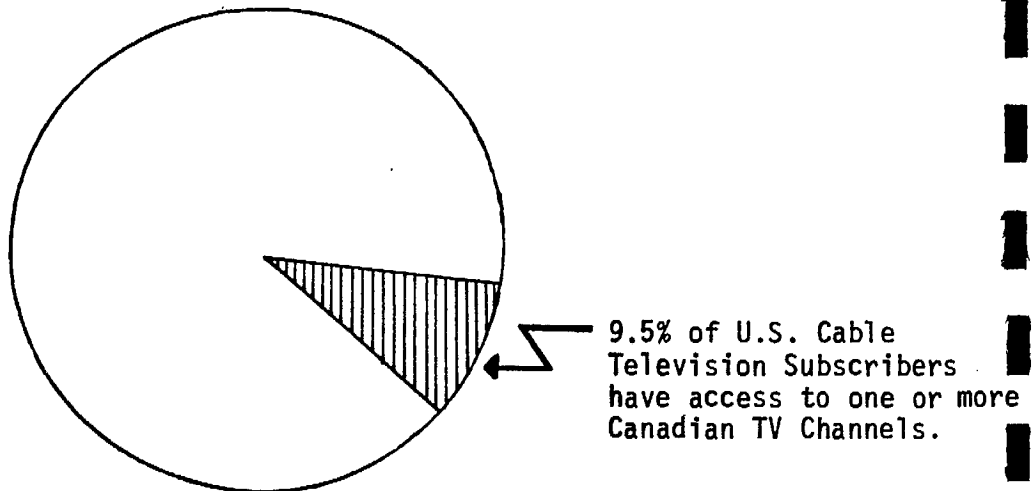

In 1979 there were 283 United States Cable Television Systems carrying one or more Canadian Television Channels.

Total U.S. Cable Television Systems: 4,180 (1979)

GRAPH 2

In 1979, 1,390,410 United States Cable Television subscribers had access to one or more Canadian Television Channels.

Total U.S. Cable Subscribers: 14,660,256 (1979)

HIGHLIGHTS

MAP 2

The States of New York, Washington, and Michigan have the greatest number of U.S. Cable Subscribers that have access to one or more Canadian TV Channels.

The State of Maine has the highest percentage of Cable Subscribers with Canadian TV Channels available, but it has a relatively small total population.
