## INTRODUCTION

The previous import trend study of chemicals was issued in 1970 covering the period 1965 to 1967. Through popular demand this survey has been reinstated and the following report lists chemical products imported during April, May and June, 1972 in order to identify opportunities for additional manufacturing operations in Canada.

In 1972, imports of chemical, petroleum, plastic and rubber products reached a total of \$2,157.2 million. Chemicals and chemical products accounted for \$894.4 million of which \$154.1 million was reported in 22 selected n.e.s. import classes. These classes were reviewed and the individual items are listed in Part II of this report.

Additional information and enquiries relating to any aspect of this report should be directed to the Chemicals Branch.

## EXPLANATORY NOTES

This report is in two parts. Part I lists those chemical, petroleum, plastic and rubber commodities and other materials by class as they are reported by "Imports by Commodities", December, 1972. Part II is a breakdown of twenty-two selected n.e.s. classes for the months of April, May and June of 1972.

Part I lists the class number as well as the most common tariff item, while Part II specifies the most common class number with the corresponding Brussels tariff number. Persons wishing official rulings on the tariff status of particular commodities should consult the Customs and Excise Division of Revenue Canada, Ottawa.

Where duplications appear between Part I and Part II, the data of Part II is additional to that of Part I. These duplications among classes occur because of description variations and trade names.

The following symbols and abbreviations are used:

B.N. No.	- Brussels Nomenclature Number
*	- Confidential
n.e.s.	- Not elsewhere specified
n.f.i.	- Not further identified
gal.	- Gallons
M.C.F.	- Thousand cubic feet
pr.	- Pairs
ft.	- Feet
bbl.	- Barrels
-	- Figure not available
lb.	- Weight in pounds
