INTRODUCTION

Many Canadian manufacturers and producers are interested in export trade but hesitate to enter this field because they are not organized to handle the complexities of export. This specialized directory is intended to bring to attention export merchants and agents whose services can be utilized by such manufacturers and producers to market their products abroad.

This first edition of the "Directory of Export Merchants and Agents" contains basic commercial data on some 350 firms registered with this Department. The Directory has been compiled in the hope that it will prove a useful guide to Canadian manufacturers seeking the assistance of experienced intermediaries to gain access to foreign markets. The format of the Directory is simple. The first part contains current data on the registered firms and the products in which they currently specialize. The second part contains detailed information on the companies' experience or interests in specific market areas. To facilitate selection, the firms are listed by provinces. The third part contains a product index based on the Standard Commodity Classification of the Dominion Bureau of Statistics.

Individual copies of this Directory may be requested from the Transportation and Trade Services Branch, Department of Trade and Commerce, Ottawa 4, or from Regional Offices of the Department.

Errors and omissions will inevitably come to light in this first edition, and it will be helpful to have these brought to the attention of the Directories Section so that corrections may be incorporated in future editions.

Prepared by:

Directories Section,
Transportation and Trade Services Branch,
Department of Trade and Commerce,
Ottawa 4, Canada.
