NOTES

1. The format of the list follows the structural organization of the office of Commodities and Industries of the Department of Trade and Commerce as of August 27, 1968.
2. The list includes certain Councils, Boards and Associations which are not trade and industry associations in the rigid sense of the term, but which are in one way or another export-oriented.
3. Many of the trade and industry associations listed do not set the date or place of their annual meeting until shortly before the meeting is to take place.
4. The information recorded was provided initially by commodity officers in the various branches.
5. Of the 105 Associations listed, 70 have established formal Export Committees, as regards associations for specific commodity categories.
