MANUFACTURING IN CANADA FOR NORTH AMERICA'S HEALTH CARE MARKET

A Brief to U.S. Managers

Investment Canada February 1989

CANADA WANTS U.S. BIOMEDICAL FIRMS

Canada's health care market has grown substantially since the late seventies, as have the commercial opportunities presented by advances in biotechnology. This report presents key facts for senior managers of U.S. biomedical and biotechnology companies who are poised to establish new facilities in Canada.

Canada seeks your attention and business. We give priority to building an even stronger health care industry and are ready and able to help young and growing U.S. biomedical companies get started in Canada through Canadian subsidiaries or joint ventures.

Governments at every level, together with banks, investment firms, universities and joint venture partners, are eager to work with you to build your business in Canada.

CANADA'S OFFER TO U.S. BIOMEDICAL FIRMS

The Canadian Consulate in Boston will prepare a specific fact-finding trip for you to Canada so you can assess:

- * suitable manufacturing sites
- * government financial support for capital investment and operating phases
- * private financial support for off-balance sheet financing of your Canadian venture
- * the regulatory approval process
- * university connections for product development
- * interim or prospective managers and consultants to get your project going
- * distributors
- * joint venture partners
- * tax specialists
- * other contacts you require.

WHY THIS IS A GOOD TIME TO ENTER THE CANADIAN MARKET

The 1990s is an attractive period to establish a Canadian base for your products.

Consolidated North American markets: The Canada-U.S. free trade agreement, effective January 1, 1989, will consolidate these two markets in the 1990s as tariff and many non-tariff barriers to trade are removed. The agreement will enhance access to the entire U.S.-Canada market of over 266 million people and will liberalize cross-border invesment.

Exchange rate: Canada's dollar historically has remained at a favourable level in relation to the U.S. dollar, providing Canadian firms with operating and production cost advantages. Corporate profitability is enhanced through exchange-rate adjusted cost advantages and pricing in U.S. dollars.

Restructuring of the North American health care system: Cost containment pressures, an aging society and rationalization of the health delivery systems are resulting in new markets for new products in North America. There are many opportunities for entrepreneurial biomedical firms in this market. In 1987, the combined U.S.-Canada market for health care products was estimated at Can\$705.3 billion, which was considerably greater than that for Europe.

THIRTEEN REASONS TO INVEST IN CANADA'S HEALTH CARE MARKET

- 1. Favourable exchange rate and comparatively lower manufacturing costs.
- 2. Competitive tax structures.
- 3. Virtually free access to the entire U.S.-Canada market for most health care products.
- 4. Government cost sharing on capital investment in most regions, cost sharing on basic R&D, and incentives for product development.
- 5. Relatively rapid regulatory approval for most health care products.
- 6. International calibre universities and research institutions eager to do business with you.
- 7. Good clinical trial sites and a homogeneous market for product launch.
- 8. Universal access to a national health care system.
- 9. Strong interest by investment firms and venture capitalists in biomedical companies with a proven product.
- 10. Strong support for industrial research and development.
- 11. Efficient transportation to major markets.
- 12. A fast growing biomedical industry interested in doing business with you.
- 13. Availability of a highly qualified workforce.

FOR MORE FACTS AND FIGURES SEE CHARTS 1-13

HOW DO YOU PURSUE OUR OFFER TO INVESTIGATE CANADA?

Please contact:

Ms. Laura M. Robinson Technology Development Officer Canadian Consulate General Three Copley Place Suite 400 Boston, Massachusetts 02116 Tel: (617) 262-3760

Telex: 94-0625

FAX: (617) 262-3415

who will assist you in arranging your visit to Canada so that you can meet all the necessary contacts for planning a Canadian facility.

COMPARISON OF CANADIAN AND U.S. HOURLY EARNINGS IN MANUFACTURING

In the table below, the average U.S. manufacturing wage in 1987, expressed in Canadian dollars, is shown as 97¢ an hour higher than the average Canadian manufacturing wage. In 1986, the U.S. wage was \$1.57 an hour higher.

	1983	1984	1985 (Can\$ per hour)	1986	1987
Canada U.S.	10.61 11.88	10.87 11.90	11.29 13.02	11.62 13.52	12.25 13.14
Wage Gap	0.27	1.03	1.73	1.90	0.89

WHAT'S POSSIBLE IN CANADA

Typically, the Canadian government supports new ventures in a partnership with private-sector financing, technology and know-how. Canadian investment policy is flexible and accommodates the needs of the particular investment situation. The government can help at the front end with capital subsidies, and can help on feasibility studies and analysis. The government also helps in the crucial early operating stages with assistance in product development, solving technical problems, finding export outlets and training.

Canadian federal and provincial governments particularly favour fast growing, profitable firms with proprietary technology, seeking to utilize Canadian capabilities in the biomedical sciences.

Examples of Government Incentives

	Ontario	Quebec	Alberta	Saskat- chewan		British Columbia	New Bruns- wick	Nova Scotia	Federal
Funds Committed to Venture Capital Program	x	x	X	x	X	x	x	x	X
Entrepreneurial Assistance Available to High-tech Firms	x	x	x	x	X	x	x	x	
R&D Grants Available	X	X	X	X	X	X	X		X
Technology Transfer Programs	X	x	X	x	X	X	x	X	X
Provincial Funds Committed for Setting Up Incubators		X	x		X	x	X	X	
Tax Exemption for R&D		x							X
University R&D Facilities Available to Industry	X	x	x	x	X	X	X	x	
Provincial Funds Committed to Setting Up Research Parks	X	X	X		X	x		X	

Note: The table provides a general indication of support programs available. Funding for any specific project is often negotiated between the firm and the governments involved, and may involve support mechanisms not shown in the table.

CHART 5A

REGULATORY APPROVAL IN CANADA - DRUGS

In Canada the Health Protection Branch of Health and Welfare Canada is responsible for the administration of the regulatory process. The regulatory process in Canada is internationally recognized as applying high standards in determining the safety and efficacy of new drugs.

The current process and time frame for a typical approval is indicated in the chart below. Changes to this approval process are currently being introduced, making it more efficient and less time consuming.

Stages in the Development and Approval of a New Drug in Canada and the United States

		Average Clears	ance Time for pliance 1981-84
Research	Regulation	Canada	United States
Animal toxicological studies prior to Preclinical New Drug Submission		18 months	12 months
Discovery of new drug; chemical synthesis or extraction, analysis, formulation	Preclinical New Drug Submission (PNDS) with all available information on new drug. Review by Health Protection Branch (HPB) of Health and Welfare Canada. If approved, company may proceed to clinical testing.	4.7 months	5.0 months
	Protocols: detailed descriptions of proposed clinical tests on humans; each is reviewed and approved by HPB and is subject to ethical review of research institution and informed consent of subjects.		
Phase I clinical research	Phase I protocol: toxicology, small sample of healthy subjects.	Phases	Phases
Phase 2 clinical research	Phase 2 protocol: therapeutic effect, toxicology, small sample of patients.	1 - 3	1 - 3
Phase 3 clinical research	Phase 3 protocol: therapeutic effect, toxicology, large sample.	33.1	69.0
Marketing	New Drug Submission (NDS) with complete information on new drug including full report on clinical tests. If approved, company receives Notice of Compliance (NDS\NOC) and Product Monograph.	24.6 months	12.3 months (19.5 for minor advance drugs)
Phase 4 clinical research:	No approval is required.		

Note: research reported for PNDS and NDS need not be done in Canada.

CHART 5B

REGULATORY APPROVAL - MEDICAL DEVICES

For **domestic marketing** of most medical devices, a manufacturer must only submit notification information to appropriate government officials, provided that the manufacturer can demonstrate on request that a device is safe, effective and adequately labelled. Devices which are new "implanted"* products or which fall under specially designated device classes must undergo a pre-market review before they can be marketed.

Canada's **Medical Devices Regulations** do not require manufacturers to have products approved for sale in the domestic market before they may be exported.

^{* &}quot;implanted" refers to devices implanted for 30 days or more.

EXAMPLES OF EXPERTISE IN CANADIAN UNIVERSITIES

Rehabilitation and Biomedical Engineering:

- * University of Toronto and associated Sunnybrook Medical Centre
- * University of Montreal and associated Institut Clinique
- * University of Alberta

Genetic Engineering:

- * Mount Sinai Hospital Research Institute (Toronto)
- * Hospital for Sick Children (Toronto)
- * University of British Columbia Medical School
- * McMaster University Medical Centre

Hybridomas:

* all Canadian medical schools

Biomaterials:

* Centre for Biomaterials, University of Toronto

Plant Biotechnology:

- * University of Guelph
- * McGill University

Animal Health:

- * McDonald College, McGill University
- * Ontario Veterinary College, University of Guelph
- * University of Saskatchewan

CHART 8C

IMPORTS OF PHARMACEUTICALS INTO CANADA

(Can\$million 1987)

Biological Products for Humans	66.9
Penicillin	49.2
Antibiotics	77.1
Hormones	33.1
Vitamins and Preparations	53.0
Other Medicinal & Pharmaceutical Products	316.7
Veterinary Antibiotic Preparations	5.9
Veterinary Biological Products	12.4
Veterinary Medicines	25.1
Antibiotic Vitamins for Feed Supplements	38.6
Other Veterinary Medicine for Feed Supplements	14.4
Total Supplies	692.0

COMPARISON OF CANADIAN AND U.S. TAX INCENTIVES FOR R&D

Tax Measure	Canada	U.S.

Deduction for R&D Expenditures

Buildings	Depreciated over life of asset	Depreciated over life of asset
Equipment	Immediate	Depreciated over life of asset
Operating	Immediate	Immediate
Tax Credit for R&D		
Buildings	none	none
Equipment	20%	none
Operating	20%	20% on incremental

Notes:

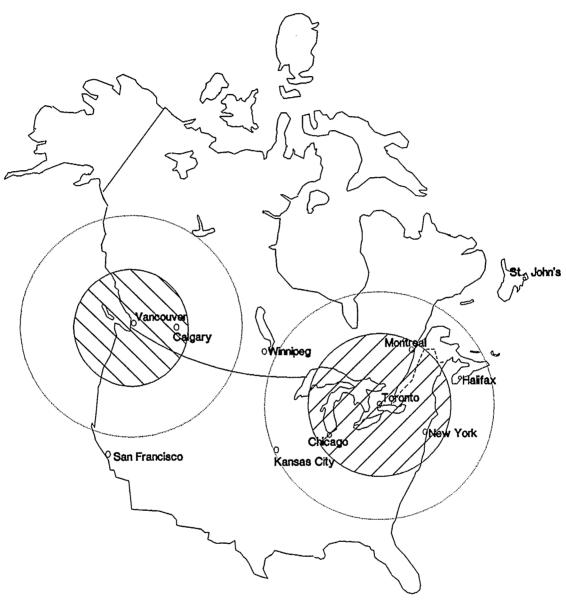

1. The allowable deduction for both current and capital R&D expenditures is reduced by the amount of the tax credit claimed (otherwise the deduction for R&D expenditures would exceed the actual amount spent). Specialized R&D buildings, such as wind tunnels, are eligible for the immediate writeoff and investment tax credit; other buildings used for R&D do not receive preferential tax treatment.

R&D expenditures

2. In the U.S., the tax credit applies only to incremental R&D expenditures of a current nature. The tax credit is 20% of the excess of R&D in the year over the average R&D in the previous three years. R&D expenditures of a capital nature are not eligible for the tax credit, and for tax purposes must be written off over the useful life of the asset.

ACCESS TO NORTH AMERICAN MARKETS FROM CANADIAN CENTRES

WESTERN MARKET

1 Day Trucking: 12 million consumers . Victoria, Seattle

2 Days Trucking: 25 million consumers. Calgary, San Francisco, Salt Lake City

CENTRAL MARKET

1 Day Trucking: 103 million consumers. Chicago, New York, Boston, Washington, D.C.

2 Days Trucking: 164 million. consumers.

Minneapolis, St. Louis, Nashville

EXAMPLES OF JOINT VENTURE INTERESTS AMONG CANADIAN BIOMEDICAL FIRMS

Rehabilitation Products

Ventech (Toronto), Mediquip (Toronto), Extendicare (Toronto), Obus Forme (Toronto)

Human and Veterinary Diagnostics

Quadra Logic Technologies (Vancouver), Joldan Diagnostics (Toronto), Pro Lab Inc. (Toronto), Rougier Diagnostics (Montreal), Allelix Diagnostics (Toronto), Sterivet Labs Ltd. (Toronto), Biostar Inc. (Saskatoon), Inter Haemotol (Burlington), Diagnostic Chemicals Ltd. (Charlottetown), QA Labs (Toronto), Bocknek (Toronto), APO Diagnostics (Toronto).

Catheters and Related in vivo Instruments

Vas-Cath (Toronto)

Monitoring Instruments

Cyberfluor (Toronto)

Vaccines and Immunostimulants

Connaught Laboratories Ltd. (Toronto), IAF Biochem International Ltd. (Montreal), Vetrepharm Inc. (London), Biostar Inc. (Saskatoon)

Sensors

Paradigm (Toronto)

Medical Devices

Ingram & Bell (Toronto), Strite Industries (Cambridge)

Imaging

Atomic Energy of Canada Limited (Ottawa), Equipment Moniteur (Montreal)

Drugs and Therapeutics

Allellix Biochemicals (Toronto), Quadra Logic Technologies (Vancouver), Nordic Laboratories Inc. (Montreal), Richmond Pharmaceuticals Inc. (Toronto), Novopharm Ltd. (Toronto), Connaught Laboratories Ltd. (Toronto), MDS Health Group Ltd. (Toronto), Apotek (Toronto).

HIGHLY QUALIFIED WORKFORCE IN SELECTED FIELDS IN CANADA

University Graduates, 1984

Discipline	Bachelor and Professional Degree	Master and Doctoral Degree
Medicine	2,129	459
Pharmacy	654	33
Dentistry	487	21
Nursing	1,746	7 8
Rehabilitation	857	111
Other Health Professions	135	131
Chemical Engineering	746	188
Electrical Engineering	1,768	371
Mechanical Engineering	1,827	207
Biomedical and Other Engineering	1,529	454
Biochemistry	420	64

Community College Graduates, 1984

Diagnostic and Treatment Technologies	2,763
Medical Equipment and Prosthetics	197
Other Health-related Technologies	538
Chemical Technologies	677
