Automotive Trade Overview - 2005

NOTES:

The tables presented in this publication are compiled by Automotive and Industrial Materials Branch of Industry Canada based on Statistics Canada trade data.

For purposes of this publication Europe includes: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden and the United Kingdom.

Exports refer to Domestic Exports throughout and do not include re-exports. Trade balance equals total exports (including re-exports) minus imports.

All the trade numbers presented are based on the North American Industry Classification System (NAICS), which is a new classification system that is being used by Canada, the U.S., and Mexico. The statistics in the publication prior to "Automotive Trade 2000" were based on the Statistics Canada's Harmonized System product codes. Despite efforts to reconcile the differences, discrepancies in some statistics resulted from the change from HS codes to NAICS by Statistics Canada.
