BASIC OUTLINE
OF THE
FISHERIES HOUSEHOLD RESETTLEMENT
PROGRAM IN NEWFOUNDLAND

GENERAL INFORMATION

1. The Government of Canada and the Government of Newfoundland and Labrador have an Agreement to provide financial assistance for the resettlement within Newfoundland of householders from outlying communities.
2. This Agreement was revised with respect to movements in the three year period commencing April 1st, 1967, and ending March 31st, 1970. This outline is a summary of the provisions of greatest concern to eligible householders interested in moving.
3. The Fisheries Household Resettlement Committee for Newfoundland consists of fifteen members; ten representing the Province, and five representing the Government of Canada. This Committee is authorized to review applications and approve or deny them.
4. Those eligible for assistance under the Agreement are:
 - a) All householders in outlying communities which have decided by a petition of at least 80% of the householders to move to approved relocation areas. On approval of this petition such a community is termed "designated outport".
 - b) Individual householders in outlying areas wishing to resettle in approved growth centres where employment opportunities are available.
 - c) Widows or handicapped or incapacitated persons wishing to be resettled from outlying communities to improved circumstances.

5. The amount of assistance which may be available is as follows:

- a) A direct grant of \$1,000 to each eligible household.
- b) An additional grant of \$200 on behalf of each member of that household.
- c) The actual travel and removal expenses of the family, the personal effects, the fishing equipment and other means of earning a livelihood, including the stock in trade of a business, but not to include the cost of movement or replacement of real or immovable property. (Travel and removal claims must be accompanied by receipts showing expenses incurred.)
- d) To any householder moving from a "designated outpost" to an Approved Land Assembly Area in a designated major Fishery Growth Centre, supplementary assistance toward the price of a serviced building lot may be granted, not to exceed \$3,000 or the actual cost of the lot, whichever is the lesser. (This special assistance takes the form of a mortgage which is reduced by 20% annually, that is it becomes non-repayable provided the family lives on the lot for 5 years.
- e) As an alternative to any householder moving from a "designated outpost", if he moves to an Approved Resettlement Centre where serviced land is involved or pending, supplementary assistance toward the price of a building lot may be provided, not to exceed \$1,000 or the actual cost of the lot, whichever is the lesser. (This amount is also in the form of a similar self-reducing mortgage which becomes non-repayable provided the family lives on the lot for 5 years.

THE DEFINITION OF A "HOUSEHOLD" IS A UNIT COMPRISED OF:

- a) a family including lodgers or employees,
- b) two or more unrelated persons,
- c) one person living alone,
- d) two or more families sharing one dwelling, if they move separately into separate dwellings after moving, they are considered as two householders.

7. It should be clearly understood that after a property has been abandoned, the land, including structures thereon which have not been removed, becomes the property of the Crown. However, where a fisherman intends to return to his former premises for the purpose of fishing and use his former dwelling while engaged in fishing, permission for this use may be granted upon application to the Minister. The same applies to other seasonal uses of the property (e.g. tourism).

In the case of individual householders, applying without a community petition, a letter of inquiry is sufficient to obtain the necessary application forms. However, it is stressed that:

- a) The householder must provide evidence that either moving to an approved growth centre preferably with a firm job opportunity, or of being otherwise eligible such as being a widow, handicapped or incapacitated person, and the improvement in circumstances that will be involved, resulting from the move must also be indicated.
- b) Individual householders do not have the benefits of supplementary assistance as do householders from "designated outports".

DEPARTMENT OF MANPOWER PROGRAM

An arrangement has been worked out with the Department of Manpower which will assist those householders who resettle to find employment. Under the Manpower Program the householder or members of his household may be eligible for financial assistance in the form of an exploratory grant to visit and look for work in other communities. If employment is found a relocation grant may be available from the Department of Manpower. If the employment is in one of the approved growth centres within the Province and the move is made under the Manpower Program, the Department of Community and Social Development will pay the difference between the relocation grant paid by the Manpower Department and what the householder would be entitled to had he been moved under the Resettlement Program. For example, if the relocation grant was \$1,500 and the payments eligible under the Resettlement Program were \$3,000, the householder would receive the difference of \$1,500 from the Resettlement Division.

The Manpower Department will also provide training for those householders and any members of their families who are eligible for this kind of assistance.
