A PRELIMINARY IMPACT STUDY OF

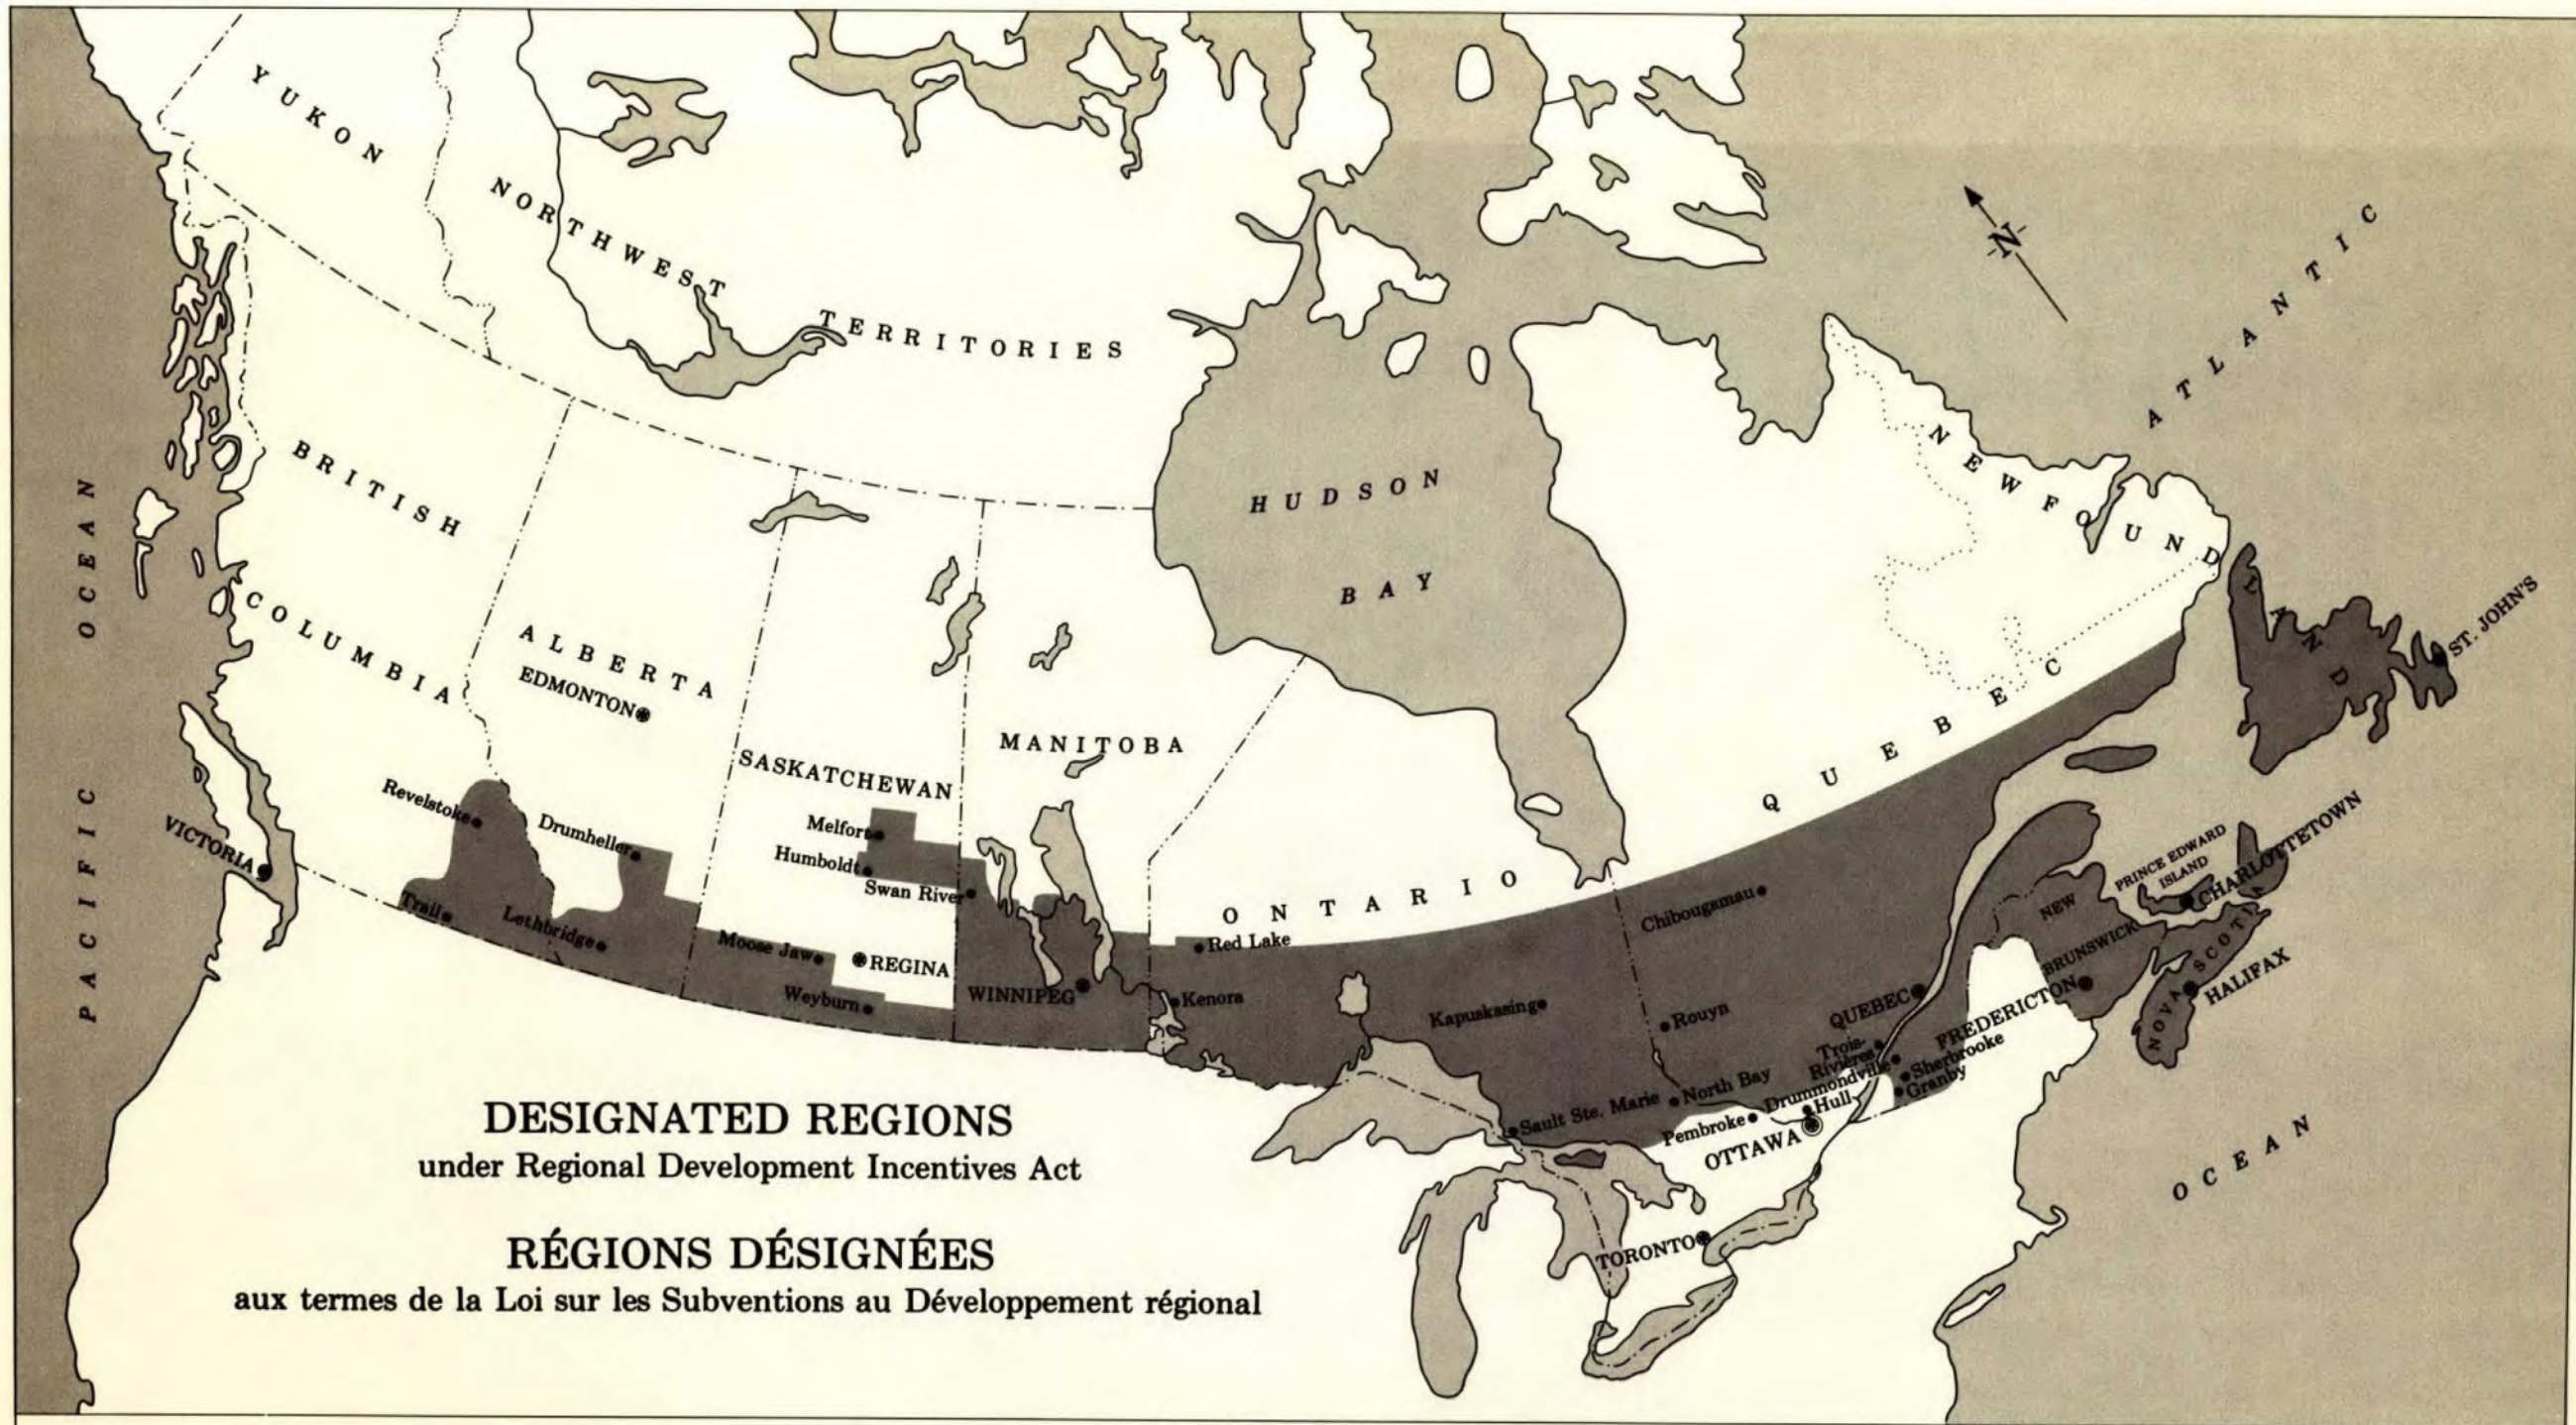

REGIONAL DEVELOPMENT INCENTIVES ACT

TO JUNE 30, 1970

GREGORY FEENEY
MICHAEL CONNOLLY

PROGRAM EVALUATION BRANCH,
DEPARTMENT OF REGIONAL ECONOMIC EXPANSION

DESIGNATED REGIONS
under Regional Development Incentives Act

RÉGIONS DÉSIGNÉES
aux termes de la Loi sur les Subventions au Développement régional

INTRODUCTION

The Regional Development Incentives Act is intended to create new job opportunities in regions of slow growth. This publication is an attempt to give a visual impression of the effects of the Act while it is still in progress. Two methods are used to present the information: maps, showing the geographic distribution of offers, incentives, and unemployment; and statistical tables showing incentives and unemployment. The tables also provide data, such as number of jobs created, that could not be shown on the maps. The factual data were collected from weekly and monthly reports, and the status reports of the Incentives Division, for the period August 1969 to June 1970.

The unemployment statistics quoted here are those available from the Department of Manpower and Immigration; these are more nearly up-to-date than the latest available from the Dominion Bureau of Statistics. They are, however, based on the Canada Manpower Centres: thus the areas included by the Canada Manpower Centres have to be the basic units for this study, and the Incentives Division data had to be suitably converted.

Most plants receiving Incentives were still in the construction stage, so that the number of jobs actually created to date is unobtainable. The "jobs created" figures quoted here are no more than 5-year projections made by plant managers. Because of this, there is no map of jobs created: all other maps are based on actual statistics, and a map of jobs created could mislead the reader.

The labour force figures provided by the Department of Manpower and Immigration have a possible error factor of 25%, although they are taken from the 1966 Census. However, the unemployment figures are accurate as to the number reporting as out of work at Manpower offices. For the statistical tables, the unemployment high figures are those for April 1970: April is the month of highest unemployment and does not include the student work force. The unemployment low figures are those for October 1969: this was the month of lowest unemployment during the studied period (except for Corner Brook, Newfoundland).

Persons in training are not considered to be unemployed for this study. No separation into male (full- and part-time) and female (full- and part-time) unemployed was available except for Quebec. This is published here as a graph.

This study, then, is only a snap report of conditions at one point in the life of the Act. The number of offers accepted, jobs created, and total cash value of incentives, is in constant change. In the month since this survey ended, eighteen new offers were made. By the time of publication, the figures will have changed considerably.

ACKNOWLEDGEMENT

The authors wish to thank the many persons of Regional Economic Expansion who have helped throughout the duration of the project and the other government agencies that have given their co-operation.

The Incentives Division of DREE have provided statistics concerning the applications. The Department of Manpower and Immigration have provided the unemployment statistics, while the Audio-Visual Section of Public Information supplied photographs of a few plants that have been assisted by DREE.

As for the preparation stage of the project, we greatly appreciated the work done by the graphic and the cartographic units of DREE.

Our "thank you" to all who helped to make this project possible.

Gregory J. Feeney
Michael J. Connolly

NOVA SCOTIA

Development grants enabled Kentville Publishing Co. Ltd. to expand this web offset press from two units to four units with the capability of printing in full colour.

This automatic bindery equipment, installed by Kentville Publishing Co. Ltd. with the assistance of Area Development grants, accepts signatures printed and folded on a web offset press, assembles, stitches and trims them with a maximum capacity of 10,000 booklets per hour.

NOVA SCOTIA

All of the Canada Manpower Centres in Nova Scotia are in the designated area. They are:

Amherst	New Glasgow
Bridgewater	Port Hawkesbury
Dartmouth	Sydney
Halifax	North Sydney
Kentville	Glace Bay
Liverpool	Yarmouth

Sydney, North Sydney and Glace Bay were combined because the unemployment statistics were on that basis.

¹Note that the designated area does not include the whole province.

²Jobs created is a projection of jobs, made by the companies that have accepted offers up to June 1970, estimating the number of jobs that will be created until the end of the program.

.denotes major centres

Labour Force in the West

Because the designated area does not conform to the CMC area, proportions of the population have been used to get an approximation of the labour force. For example, the labour force of Melfort and Prince Albert was available but only Melfort was needed.

Let x be the labour force of Melfort:

$$\frac{x}{36,221} \text{ (labour force of both)} = \frac{52,477 \text{ (population of Melfort)}}{136,504 \text{ (total population)}}$$

$$136,504 x = 1,900,769,417$$

$$x = 13,924$$

∴ 13,924 is the labour force of Melfort

Note: Nipawin was included in the figures because it was in census division 14. Therefore, it is already part of Melfort labour force.

The town of Humboldt was included because it had one offer accepted bringing the labour force of Melfort up 1,055 to 14,979.

STATISTICAL TABLES OF RDIA PROGRAMS

Province	CMC 81	CMC 82	CMC 83	CMC 84	CMC 85	CMC	CMC	CMC	CMC
Province of Saskatchewan ¹ Provincial Labour Force 347,707 Labour Force in Designated Area 84,963	*Melfort (including Nipawin & Humboldt)	Estevan	Weyburn	Moose Jaw .Assiniboia	Swift Current				
CMC Labour Force -As a % of Province -As a % of Designated Area	14,979 4% 17%	11,828 3% 13%	9,429 2% 11%	26,498 7% 31%	22,229 6% 26%				
Unemployment High (April 1970) -As a % of CMC Labour Force	2,735 18%	1,088 9%	870 9%	1,900 7%	1,221 5%				
Unemployment Low (October 1969) -As a % of CMC Labour Force	497 3%	315 2%	268 2%	765 2%	572 2%				
Incentives \$000's Cost Per Job	635 \$2,953	40 \$2,857	525 \$21,875	15 \$789					
Number of Jobs Created ² -As a % of the Unemployment High	215 7%	14 1%	24 2%	19 1%					

*The Labour Force for Melfort could only be obtained as included with Prince Albert. Therefore, a ratio was obtained using the population figures from 1966 census to get an approximation of the Labour Force. Since Nipawin and Humboldt were the only offers accepted within their respective CMC areas, they were included under Melfort.

¹Note that the designated area does not include the whole province. Such major centres as Regina, Prince Albert, Saskatoon, North Battleford, and Biggar were excluded. Saskatoon and Prince Albert were not included although a small portion of their CMC area was designated. However, for Regina, Saskatoon and Meadow Lake see Table 2, p.84.

²Jobs created is a projection of jobs, made by the companies that have accepted offers up to June 1970, estimating the number of jobs that will be created until the end of the program.

SPECIAL AREAS

SPECIAL AREAS

The Regional Development Incentives Act confined incentive grants to certain specific types of industry within the rigid boundaries of the designated region. To alleviate any injustice caused by this rigidity, and allow more kinds of industry to receive the benefits of an incentive grant, special areas were set up both inside and outside the designated region in areas of inadequate employment opportunity.

Special Areas did not conform to the Canada Manpower Centres; therefore, meaningful statistical analysis had to be abandoned. However, the population estimates may be of interest to the reader. To assist further studies, the Department of Manpower and Immigration should be instructed to gather data on special areas.

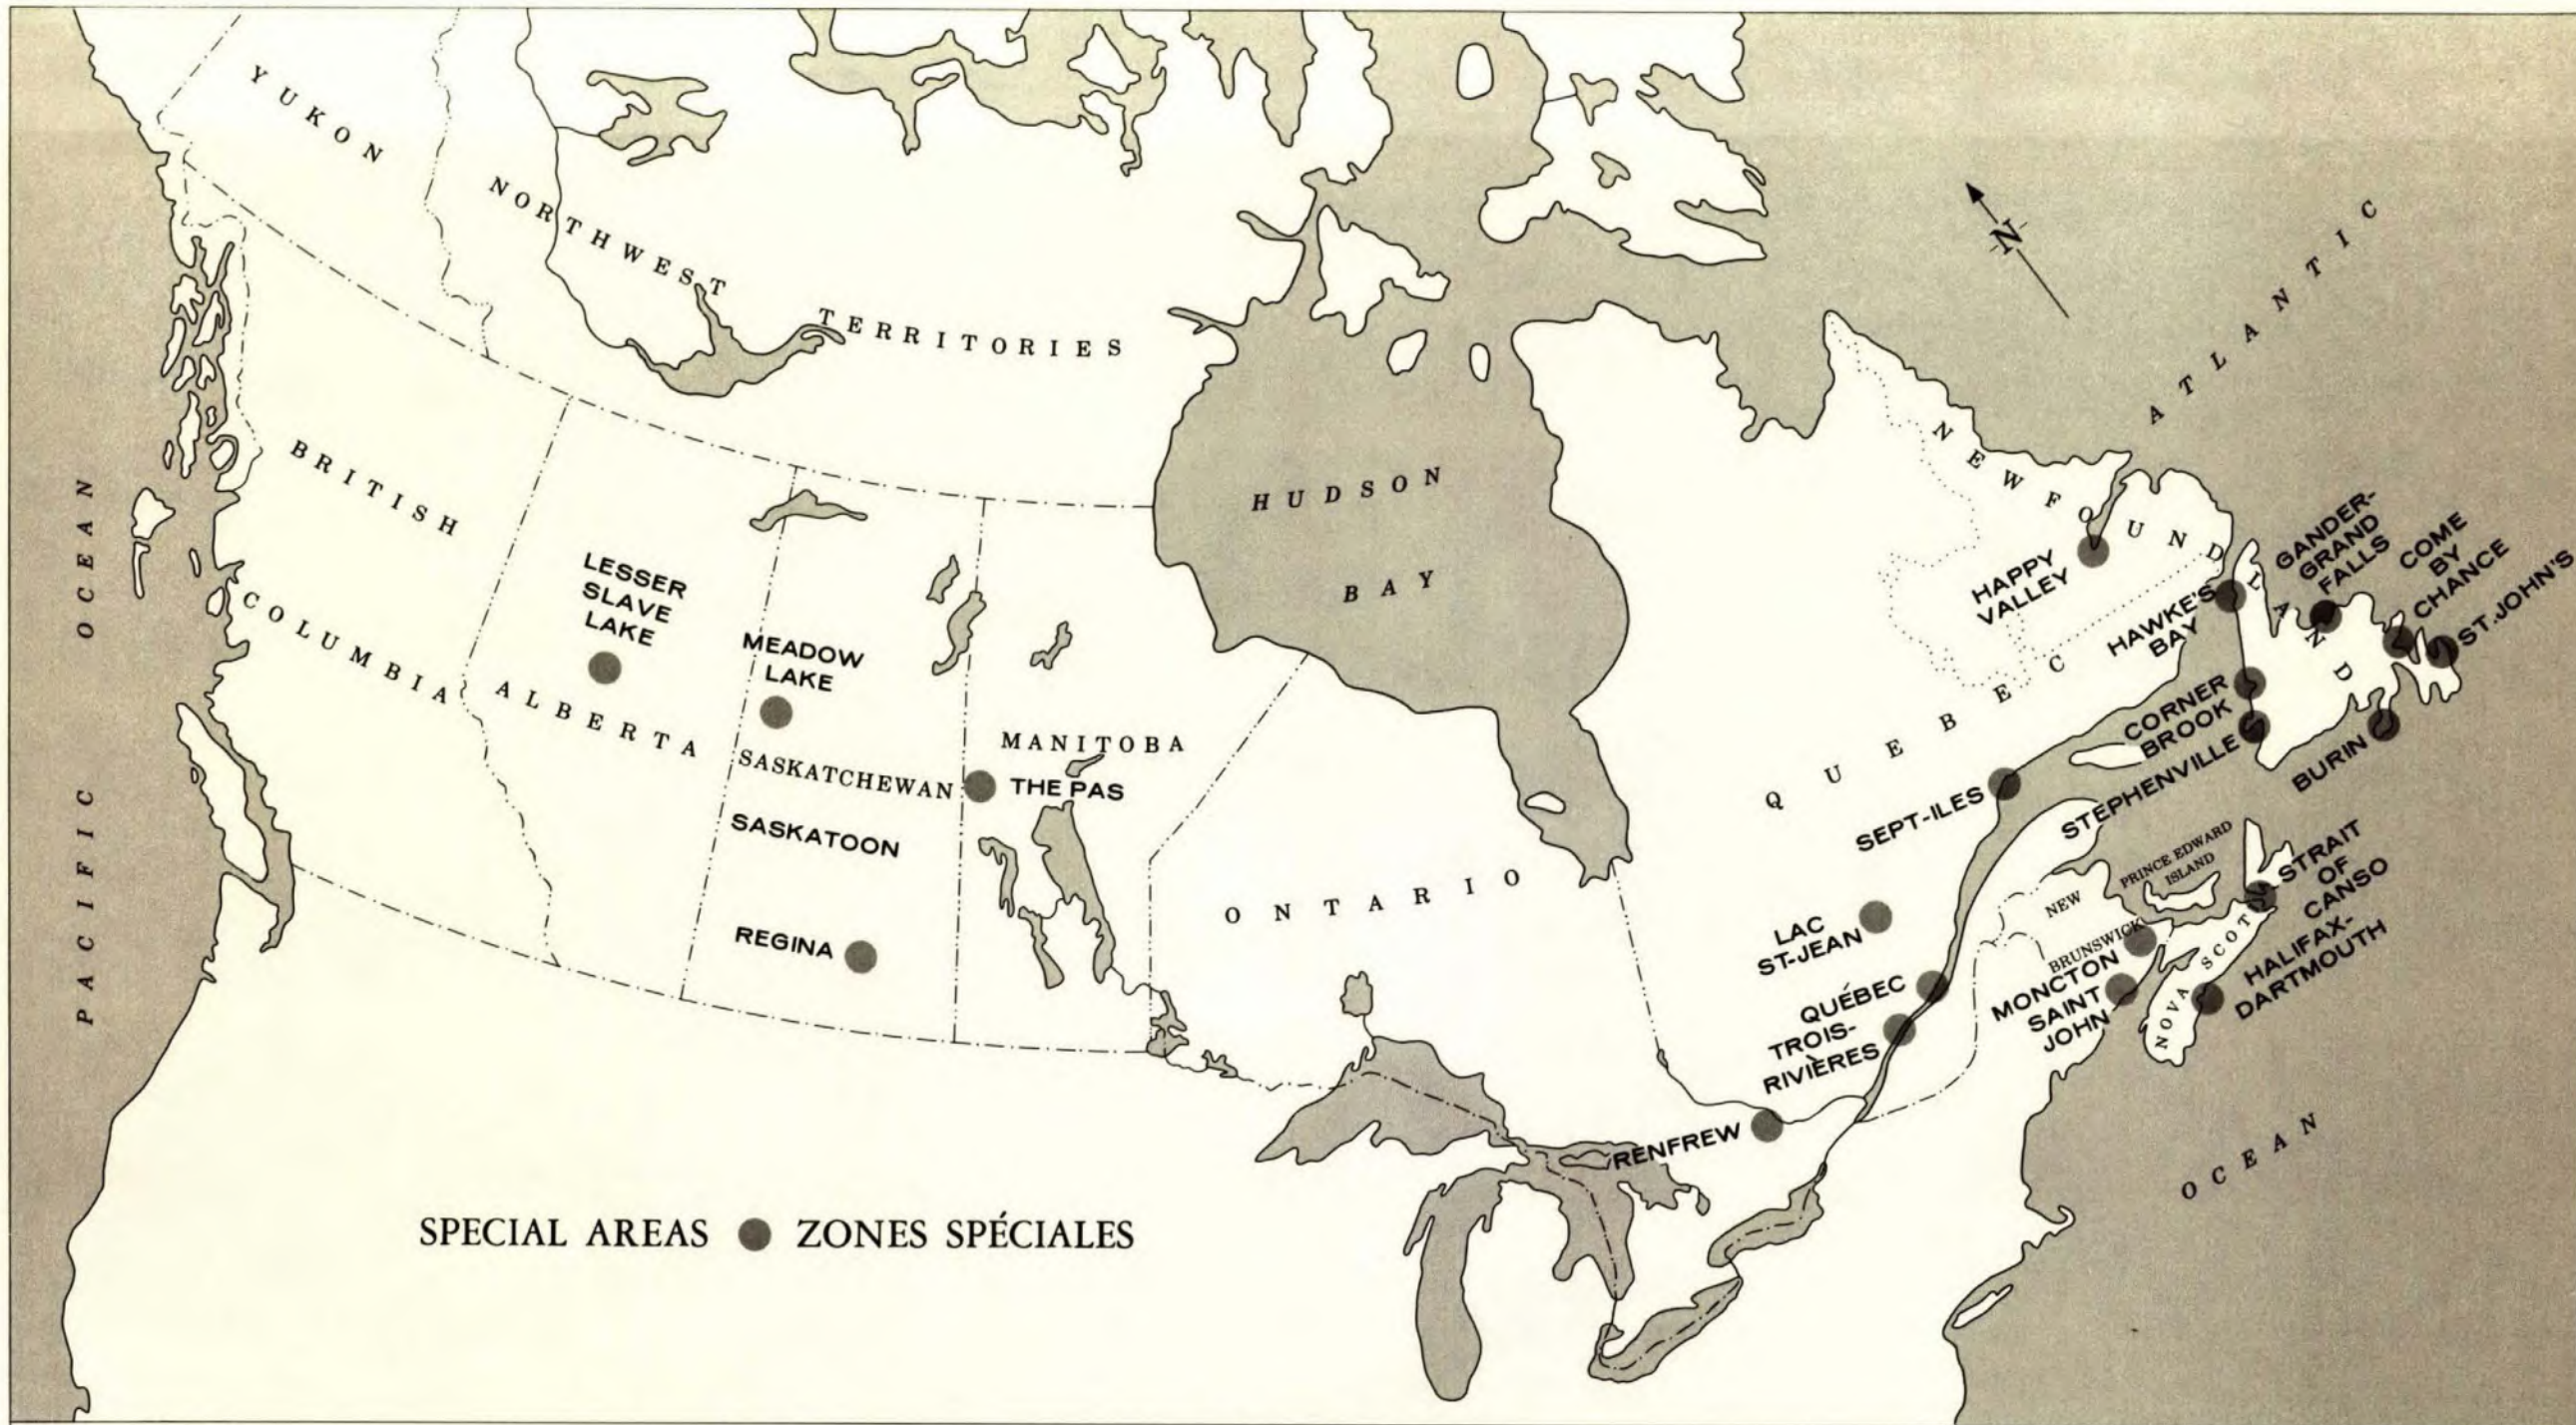

Since no offers have yet been made in the Special Areas program, only the offers accepted under the Regional Development Incentives Act, but located in special areas, could be included (see Table 1, p.83). All the maps of the individual special areas are not yet prepared, but a map of special areas across Canada is included.

TABLE 1

OFFERS ACCEPTED UNDER RDIA BUT LOCATED IN THE SPECIAL AREAS

Province	CMC	Cities	No. of Jobs	No. of Offers Accepted	Cost Per Job \$	Incentive (\$000's)
Newfoundland	11	St. John's	85	4	2,505	213
