

Descriptive Notes Regional radiometric data used in this compilation were acquired from the Geological Survey of Canada (GSC) Geophysical Data Repository. Digital data from high-resolution surveys flown by mineral exploration companies and the Geological Survey of Newfoundland and Labrador were made available through the Geoscience Atlas, Newfoundland and Labrador Department of Industry, Energy and Technology. Results from all high-resolution surveys were levelled to each other using the Geosoft Grid Knit utility. Apparent mismatches between survey blocks are a result of differing line spacing, flight altitudes and equipment platforms. For more detailed information regarding this data presentation, please refer to the online open file documentation. This publication is available for free download through GEOSCAN at <a href="https://geoscan.nrcan.gc.ca">https://geoscan.nrcan.gc.ca</a>. Corresponding digital gridded data can be downloaded from the Geological Survey of Canada Geoscience Data Repository for Aeromagnetic Data at <a href="http://gdr.agg.nrcan.gc.ca">http://gdr.agg.nrcan.gc.ca</a>. Digital data and further information regarding detailed Newfoundland surveys can be accessed or downloaded through GSNL's Geoscience Atlas, at <a href="http://gis.geosurv.gov.nl.ca/">https://geosurv.gov.nl.ca/</a>. The following index map and table provide locational and source information for the industry surveys that were merged in this project. Shaded lines in the table indicate surveys which collected radiometric data. Individual surveys on the index map can be identified by their corresponding colour and number in the table below.

-59° -58° -57° -56° SURVEY INDEX AND NATIONAL TOPOGRAPHIC SYSTEM REFERENCE
