How to obtain more information

For information about this product or the wide range of services and data available from Statistics Canada, visit our website, www.statcan.gc.ca.

You can also contact us by

Email at infostats@statcan.gc.ca

Telephone, from Monday to Friday, 8:30 a.m. to 4:30 p.m., at the following numbers:

- Statistical Information Service 1-800-263-1136
- National telecommunications device for the hearing impaired 1-800-363-7629
- Fax line 1-514-283-9350

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner. To this end, Statistics Canada has developed standards of service that its employees observe. To obtain a copy of these service standards, please contact Statistics Canada toll-free at 1-800-263-1136. The service standards are also published on www.statcan.gc.ca under "Contact us" > "[Standards of service to the public.](#)"

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Interim List of Changes to Municipal Boundaries, Status, and Names

Up to January 1st, 2023

The *Interim List of Changes to Municipal Boundaries, Status and Names* provides a summary of the changes to census subdivisions such as municipal boundary or name changes that were processed since the production of the previous *Interim List* and have an effective date on or before January 1, 2023. This report presents the changes which have been processed by Statistics Canada based on the information received and, therefore, may not include all the changes that may have occurred in this time period.

About this product

Preface

Census subdivision (CSD) is the general term for municipalities (as determined by provincial/territorial legislation) or areas treated as municipal equivalents for statistical purposes, such as Indian reserves, Indian settlements and unorganized territories. Municipal status is defined by laws in effect in each province and territory in Canada.

CSDs are an important component of the geographic structure used at Statistics Canada for collecting and disseminating data. As such, Statistics Canada carefully monitors and updates changes to the boundaries, names and other relevant information related to CSD. These changes are published in this *Interim List* to advise users doing trend or longitudinal analysis that the areas being compared have changed over time.

Content considerations

The summary data in this product reflect municipal changes in effect that were processed since the production of the previous *Interim List* and have an effective date on or before January 1, 2023. Notifications of the changes that took place during this period were obtained from provincial gazettes and statutes, orders of the Municipal Board and special provincial acts.

Boundary changes are compiled from legal descriptions and accompanying maps into Statistics Canada's National Geographic Database (NGD) using the best available information. *Census Subdivision Boundary Files* are published on an occasional basis for public use. Any corrections or additional changes to those published boundaries reported back to Statistics Canada are represented in the subsequent issue of the *Interim List*.

An important reference for users of the *Interim List* is the *Standard Geographical Classification* manual. It is composed of:

- [“Volume I, The Classification”](#)
- [“Volume II, Reference Maps”](#)

Geographic changes

After a census, Statistics Canada makes public the total number of persons and the total number of dwellings counted in a given area, for example, in a municipality. By the next census, the municipality's geographic boundaries may have changed, especially if it has annexed part of another municipality or has merged with another municipality. When a boundary change occurs between censuses, the population and dwelling counts for the geographic areas affected by the boundary change are revised (adjusted). Once the dwellings affected by the boundary change are identified; it is possible to establish the population affected. These counts are then added to the geographic area that has increased in size and subtracted from the geographic area that has decreased in size.

Tables

Table 1, “Changes to census subdivisions by province and territory,” presents all changes received to date, with 2021 population adjusted to modified CSD limits, where applicable. The table is available for viewing or download for all of Canada.

In Table 1, the information is presented using the assumption that a CSD may be gaining or losing information, be it area, population, a combination of both area and population, as well as codes, names and types.

Note: A gaining CSD may have more than one entry in the table if more than one losing CSD is associated with the same transaction. Records can be grouped by transaction using the File Number field.

The record layout of Table 1 is presented in Table 2.

Table 2
Record layout - Interim List

| Attribute name | Data type | Description |
|---------------------------------|-----------------|---|
| Gaining CSDuid | Character (7) | The code that uniquely identifies the CSD that is gaining information in the transaction. This code is based on the Standard Geographical Classification (SGC). In order to uniquely identify each CSD in Canada, the two-digit province/territory (PR) code and the two-digit census division (CD) code must precede the three-digit CSD code. |
| Gaining CSDname | Character (100) | The name associated with the CSD that is gaining information in the transaction. |
| Gaining CSDtype | Character (3) | The CSD type associated with the CSD that is gaining information in the transaction. The census subdivision type accompanies the census subdivision name in order to distinguish CSDs with the same name within a given province or territory. |
| Gaining Change Code | Character (2) | The code that is associated with the type of change of the gaining CSD. A full list of change codes and their meanings can be found in the description of Table 4. |
| Gaining Change Code Description | Character (150) | A brief description associated with the change code of the gaining CSD. |
| Losing CSDuid | Character (7) | The code that uniquely identifies the CSD that is losing information in the transaction. This code is based on the Standard Geographical Classification (SGC). In order to uniquely identify each CSD in Canada, the two-digit province/territory (PR) code and the two-digit census division (CD) code must precede the three-digit CSD code. |
| Losing CSDname | Character (100) | The name associated with the CSD that is losing information in the transaction. |
| Losing CSDtype | Character (3) | The CSD type associated with the CSD that is losing information in the transaction. The census subdivision type accompanies the census subdivision name in order to distinguish CSDs with the same name within a given province or territory. |
| Losing Change Code | Character (2) | The code that is associated with the type of change of the losing CSD. A full list of change codes and their meanings can be found in the description of Table 4. |
| Losing Change Code Description | Character (150) | A brief description associated with the change code of the losing CSD. |
| Census Population Affected | Number (8) | The population count, derived from the 2021 Census, that is affected by the transaction, if applicable. |
| Effective Date | Date | The date on which the change was effective. |
| File Number | Character (6) | The code that identifies the transaction number for a given change or set of changes. The code is assigned by Statistics Canada for the purpose of logging CSD changes. The first two digits are equal to the province code in which the affected CSDs are located. The following four digits are assigned sequentially within the tracking system as the transactions are entered. |

Table 3, “Number of census subdivision changes by type of change,” presents the number of CSD changes according to the type of change. The type of change is represented by a change code. The different change codes are presented in Table 4.

Table 3
Number of census subdivision changes by type of change

Table 4
Change codes

| Code | Description |
|------|---|
| 1 | Incorporation |
| 2 | Change of census subdivision name |
| 2C | Correction of census subdivision name |
| 23 | Change of census subdivision name and type |
| 3 | Change of census subdivision type |
| 3C | Correction of census subdivision type |
| 4 | Dissolution |
| 5 | Census subdivision has annexed a new part from another census subdivision |
| 5A | Census subdivision has annexed a complete census subdivision (could also include the annexation of another census subdivision part) |
| 6 | Census subdivision has lost a part annexed by another census subdivision |
| 7 | Revision of Standard Geographical Classification (SGC) code |
| 7C | Correction of Standard Geographical Classification (SGC) code |
| 8 | Census subdivision limits have been corrected and census subdivision has gained land area and population |
| 8C | Census subdivision limits have been corrected and census subdivision has gained land area |
| 9 | Census subdivision limits have been corrected and census subdivision has lost land area and population |
| 9C | Census subdivision limits have been corrected and census subdivision has lost land area |
| 10 | Population has increased |
| 11 | Population has been reduced |

Notes

Due to operational constraints, the CSD updates for the province of New Brunswick dated January 1, 2023 are not yet completed and, as a result, a complete set of updates is not available in this year's product.

No changes to CSDs were processed during the time period covered by this *Interim List* for the following provinces and territories: Nova Scotia and Nunavut.
