# MONTHLY REVIEW OF BUSINESS STATISTICS

Vol. VIII

OTTAWA, JUNE, 1933

No. 6

DOMINION STATISTICIAN: R. H. COATS, B.A., F.S.S. (HON.), F.R.S.C.

CHIEF, BRANCH OF GENERAL STATISTICS: S. A. CUDMORE, M.A., F.S.S.

ASSISTANT ON BUSINESS STATISTICS: SYDNEY B. SMITH, M.A.

## THE BUSINESS SITUATION IN CANADA

A brighter outlook characterized economic conditions in May, marked gains being shown over the preceding month in many significant factors.

The advance in common stocks reflected the more optimistic attitude of speculators, the index being 63·7 compared with 51·9 in April, a gain of more than 22 p.c. The index of 20 mining stocks moved up from 74·5 to 89·6 and all speculative stock groups of the official classification recorded gains.

High-grade bonds showed an advance during the month. The yield on the most popular Ontario Government bonds was 4·70 p.c. compared with 4·85 p.c., implying a substantial advance in prices. The average yield of four Dominion Government refunding bonds was 4·51 p.c. compared with 4·65 in April. The increase in the price of high-grade bonds is regarded as a constructive development of fundamental significance.

The depreciation of the American dollar resulted in a reduction of the premium for the Canadian dollar in New York funds, which fluctuated from \$1·151 to \$1·129 in May compared with \$1·211 to \$1·151 in April.

Bank deposits showed a gain at the end of April, the sum of the notice and demand deposits being \$1,884,000,000, a gain of \$41,000,000 during the month. Current loans were \$913,000,000 compared with \$925,000,000, the decline in progress since 1929 being continued. Investment holdings were \$805,900,000 compared with \$792,800,000. The liquid position of the banks was strengthened during the month, the sum of eight accounts of readily available assets being \$1,003,800,000 compared with \$992,900,000 at the end of March.

Wholesale prices, especially for the speculative commodities, recorded a marked advance in May, the index being 66·9 compared with 65·4 in April. The textile group recorded a considerable gain, while the increases of preceding months in Canadian farm products and non-ferrous metals were extended.

### Business Operations

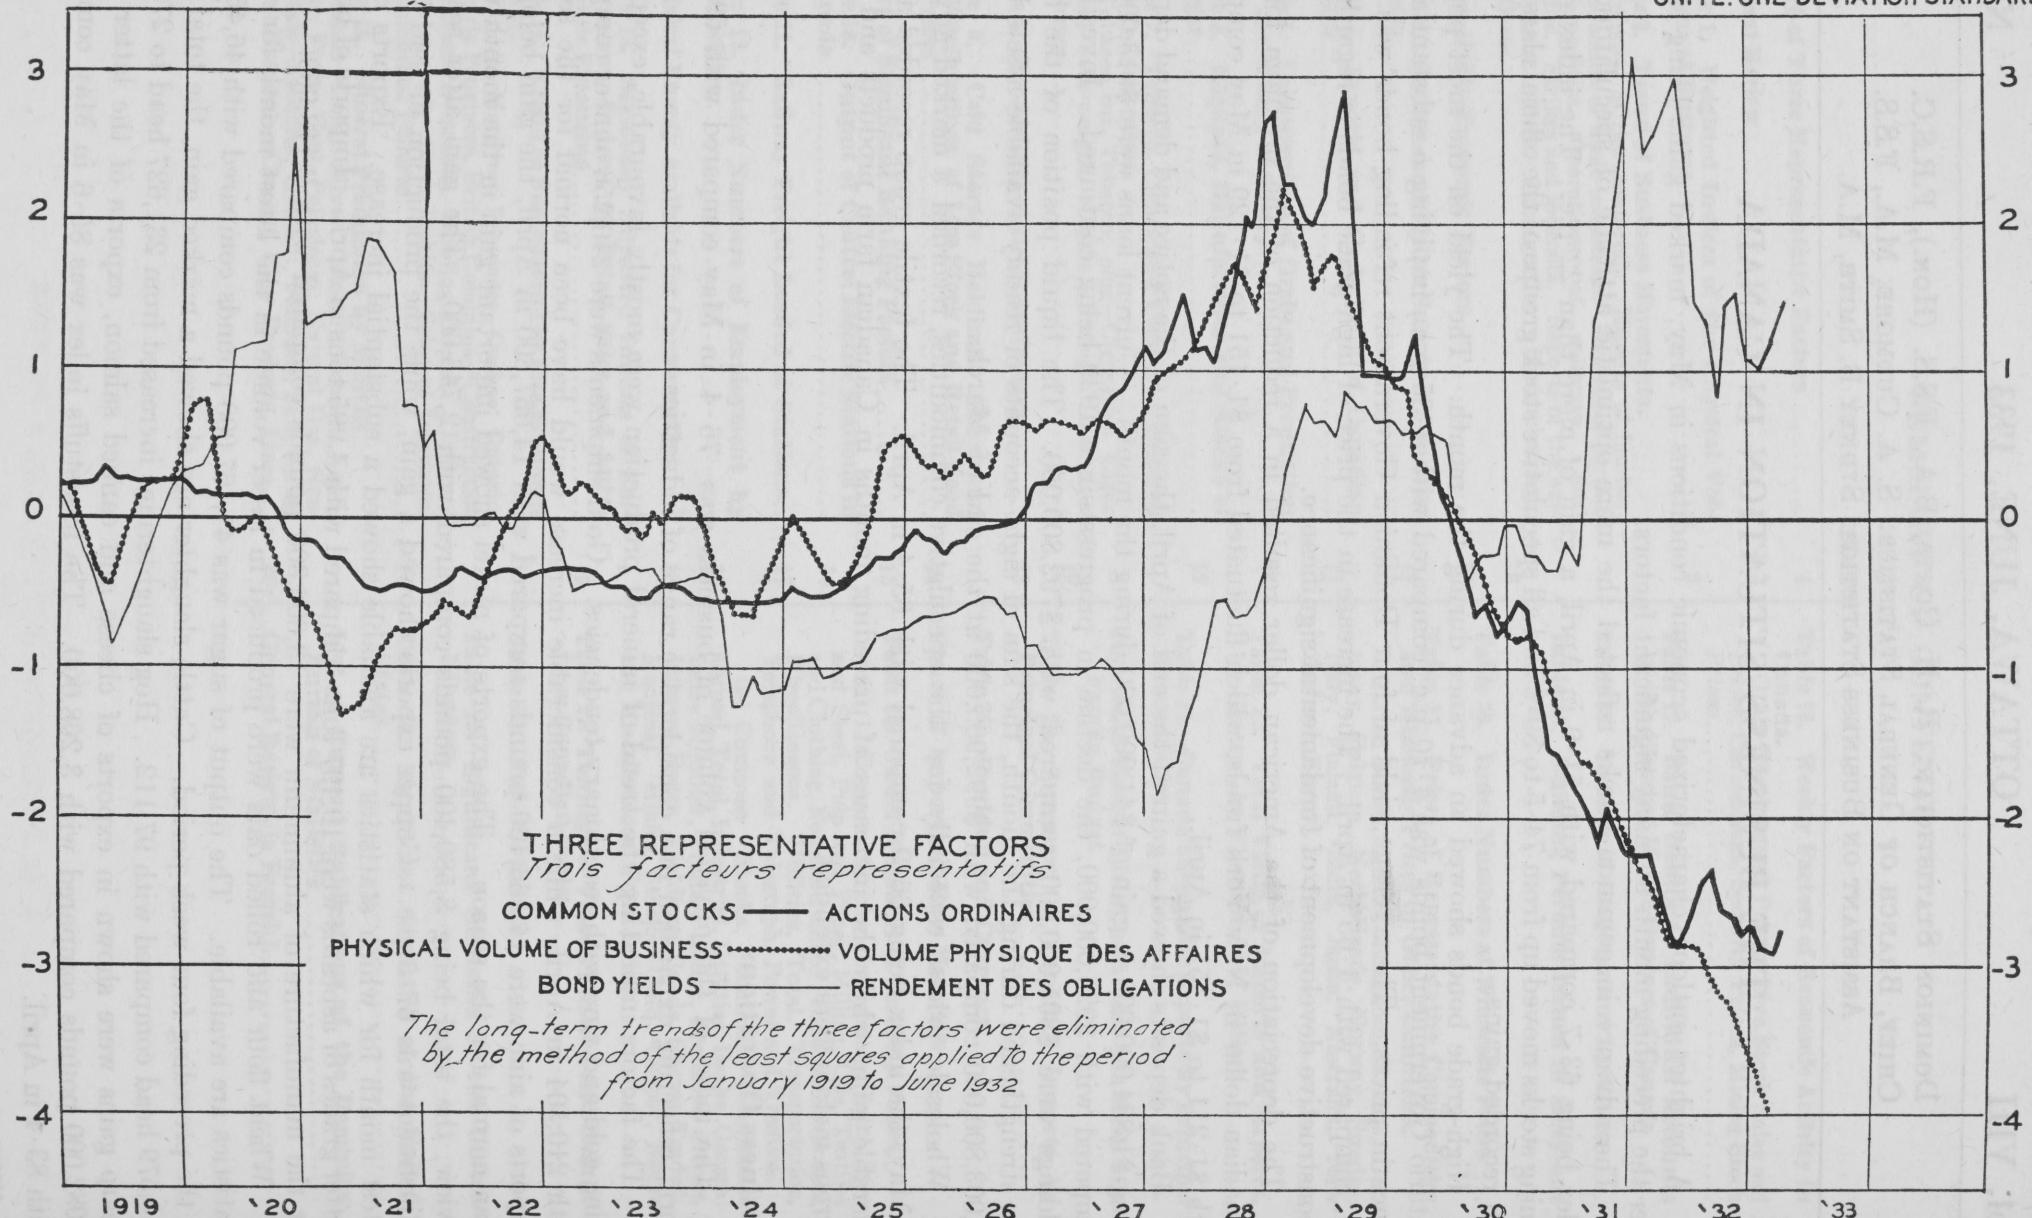

The index of the physical volume of business was 76·4 in May compared with 69·8 in April, reflecting expansion in a considerable range of industries.

The factors indicating the trend of mineral production were mostly favourable, exceptions being gold and zinc with reactionary tendencies. Gold shipments were 210,256 ounces compared with 210,504 in April, while a considerable increase would have been normal for the season. Exports of zinc were 14,166,400 pounds compared with 14,057,800 in April, the gain being less than normal for the season. The exports of nickel showed important gain in the month under review, the total being 8,580,400 pounds compared with 2,746,000. The gain after seasonal adjustment was 67·5 p.c. Copper exports showed a gain, while the production of lead in the latest month for which statistics are available showed a substantial increase. Exports of the better grades of asbestos were 10,497 tons compared with 4,995 tons in April. Imports of bauxite for the manufacture of aluminium were 13,606,300 pounds compared with 2,113,900.

Wheat flour and rolled oats were produced in lesser volume in the latest month for which statistics are available. The output of sugar was 41,167,000 pounds compared with 46,455,000 in the preceding four-week period. Cattle slaughterings showed a marked gain, the total being 115,579 head compared with 97,112. Hog slaughterings increased from 231,627 head to 278,906. Sharp gains were shown in exports of cheese and canned salmon, exports of the latter being 4,082,000 pounds compared with 3,268,000. The foodstuffs index was 85·6 in May compared with 83·4 in April.

UNIT : ONE STANDARD DEVIATION

UNITE: UNE DEVIATION STANDARDISEE

Imports of crude rubber were 3,817,398 pounds compared with 1,244,621, the gain after seasonal adjustment being no less than 184 p.c. Raw cotton imports were 8,111,000 pounds compared with 4,050,459 and the imports of cotton yarn, raw wool and wool yarn for further manufacture showed important gains. The textile index based on the imports of raw materials moved up from 47.7 to 87.5.

Newsprint production, reflecting improved demand, was 171,776 tons in May compared with 147,759 in April. The export of planks and boards was 75,694,000 feet compared with 33,735,000 and the exports of wood pulp and shingles showed expansion. Steel ingots were produced to the extent of 23,126 tons compared with 11,384, blast furnaces remaining inoperative during the month. The output of motor cars was 9,396 units compared with 8,255, the gain after seasonal adjustment being nearly 12 p.c.

Imports of crude petroleum were 83,981,000 gallons compared with 36,187,000 in April, the adjusted gain being about 46 p.c.

The index of construction declined to 14.1 in May from 20.6 in the preceding month. As these indexes are expressed as percentages of the monthly average of 1926, a low level of construction operations is indicated for the present season. Contracts awarded in May were valued at \$6,514,000 compared with \$8,609,000 in the preceding month, and building permits were \$2,002,000 compared with \$1,552,000. A gain was indicated in building permits after seasonal adjustment but operations were at a low level.

Carloadings were 161,401 compared with 138,475 in April, the adjusted gain being about 6 p.c. One of the bright spots of the month was the gain in external trade. Exports amounted to \$46,109,000 compared with \$20,312,000 in April, the index after adjustment for seasonal tendencies and price changes being 66.6 compared with 47.3, a gain of about 41 p.c. Imports were \$32,927,000 compared with \$20,457,000, the adjusted gain being 24 p.c.

Bank debits, reflecting the increased business and speculative activity, were \$2,650,000,000 compared with \$1,877,000,000. After adjustment for seasonal tendencies and price changes, the gain was nearly 39 p.c.

### Economic Changes

Each of the three representative factors shown in the chart on page 4 gave favourable indications in May. The index of the physical volume of business, after reaching an extremely low point in March through the continuous decline of the four preceding years, turned upward in the current period and is now recording considerable revival of productive operations.

The yield of Ontario government bonds was 4.70 p.c. in May compared with 4.85 p.c., reflecting a gain in bond prices; this is regarded as a constructive development. The gain in the index of common stock prices was the most spectacular factor of the month, the advance being general for the groups of the classification.

### Six Economic Factors

Some of the factors entering into the economic progress of Canada are presented in the chart on page 10. A marked correlation is shown between the indexes of the physical volume of business and of employment, although wider fluctuations occurred in the former.

The index of employment reflected in 1921 a relatively higher level than justified by productive output, the lowest point of the primary post-war depression being reached in the early months of 1922. Aside from the reaction in 1924, a fairly steady gain was recorded in employment until August 1929. The continuous decline to recent months results in a lower index than at any other time during the period of observation.

The index of the physical volume of business followed much the same general course but the starting point in early post-war years was relatively lower. Operating efficiency increased, the business index showing a greater increase than employment in 1928 and 1929. The business index normally indicates a change in trend earlier than the index of employment.

The movement of wholesale prices and business operations presents a clue to the changes in the index of common stock prices. The inflation in wholesale prices was the chief cause of the rise in common stock prices in 1920, while the marked gain in business operations with relative stability of wholesale prices accounted for the sharp advance in speculative values from 1926 to 1929. Decline in business operations and in commodity prices has formed a background for the reactionary trend of stock prices during the last four years. A gain in the two generating

factors in recent months has coincided with a marked advance on the Canadian stock exchanges.

The relative stability of notice deposits held by the chartered banks has been a constructive factor during the last four years. An increase was recorded from 1922 to 1928 when the long-term maximum was reached. In the last five years relatively moderate decline in notice deposits has proven a source of strength to the financial situation.

The average price of Ontario government bonds reached a maximum for the post-war period in the early months of 1928. Owing to the high rates for short term money, the price of high-grade bonds declined during the greater part of 1928 and remained at a moderate level in 1929. Recovery was effected until September 1931, when sterling was divorced from gold, resulting in sharp reaction in government bond prices. Since August 1932, a somewhat higher level has been in evidence, an appreciable rise being shown in May.

### **Banking Factors**

The chart on page 15 shows the trend of six banking factors from 1919 to the present. Considerable correlation is shown between current loans and the sum of the notice and demand deposits. The gain in current loans, however, tends to be sharper in a period of marked business activity and the decline normally has a longer duration than is observable in bank deposits. Deposits reached the lowest point of the primary post-war depression in 1922, while the decline in current loans continued until the end of 1925. Current loans reached a maximum point in October 1929 and a marked decline has since been in evidence. The drop in bank deposits in the last four years has been relatively more moderate. The readily available assets of the banks, consisting of eight accounts as listed on page 29, have been well maintained in recent years, the fluctuations in the post-war period being of a more moderate character than most economic factors of prime importance. From 1920 to 1925 quick assets recorded a gain until the total was in excess of \$1,000,000,000. Despite fluctuations in the meantime, the net result has been a maintenance of that position in that the total on April 30 was \$1,004,000,000. An important factor in the liquid position of the banks has been the extensive purchase of Dominion and provincial government bonds, the sum of the three classes of investments reaching a new high point at the end of April. Since midsummer 1930, the investment holdings of the banks have shown marked increase. The portfolios of the banks were well maintained from 1924 to 1929, while heavy open-market purchases in the last three years have resulted in new high levels.

The amount of bank and Dominion notes in the hands of the public is a relatively stable factor. The decline of financial transfers in time of depression was reflected in the lower level of public circulation of notes from 1921 to 1923 and from 1931 to the present. Circulation was steady during 1922 and the early part of 1923 and the same tendency has been in evidence from the beginning of 1931. The highest level of the post-war period was maintained during 1919 and 1920, and moderate gain only was shown from the latter part of 1923 to 1929. From 1922 to 1928, a sharp seasonal variation was shown in the gold held against Dominion notes. In the latter months of the year gold was received in considerable amount mainly in settlement for heavy grain exports, while in the first part of the year gold was shipped out in payment for merchandise import surpluses. Since 1929 gold holdings have been practically maintained at a moderate level.

The significant banking trends of the last two or three years have included the substantial decline in current loans compared with the moderate recession in bank deposits. The investment holdings have shown a marked gain contributing to the strong liquid position. Note circulation and gold reserves in the last two years have remained steady at moderate levels.

### **Imports of Raw Materials**

A chart showing the imports of raw materials from 1911 to the present time is given on page 30.

Canada, in common with every manufacturing country of the world, is dependent on imported raw materials for certain of her manufacturing industries. A survey of the imports of raw materials into a country dependent on imported raw materials for its industries will indicate as a general rule whether such industries are in a flourishing or depressed condition. For instance, an increase in the imports of raw materials for such industries will invariably reflect greater industrial activity and probably an increase in the exports of those commodities manufactured from imported raw materials, while a decrease in the imports of raw materials will indicate the very opposite result.

An analysis of the imports into Canada reveals that sixty-two commodities comprising about one-third of the total value of all imports were intended for use in the various industries of the Dominion. Compared with the preceding fiscal year, the value of the sixty-two commodities in 1933 showed a decline of 21·6 p.c. The decline in the imports of commodities other than the sixty-two listed for further use by Canadian industries was 33·1 p.c., so that the decrease in the commodities for further manufacture was less than for those imported for direct consumption.

Of the eleven commodities plotted in the accompanying chart, the quantity of the imports of raw sugar, rubber, cotton, silk and noils and worsted tops showed gains in the fiscal year 1933 over the preceding year, while declines were indicated for raw tobacco, wool, artificial silk, iron ore and bauxite. Imports of crude petroleum were 895,600,000 gallons valued at \$26,-878,000 in the fiscal year 1933, a decline of 178,700,000 gallons, but an increase in value of \$2,-684,000.

Raw silk was imported to the extent of 2,573,000 pounds valued at \$4,783,000, an increase of 33,800 pounds, but a decline in value of \$1,716,000.

### Wholesale Prices

Further advances were recorded during May in the prices of Canadian farm products and non-ferrous metals, while the textile group also showed an important gain. Wheat averaged nearly 10 cents higher in May than in April, the price in the latest month being 63·3 cents per bushel for No. 1 Manitoba Northern cash wheat. An abrupt rise in prices produced an unsettling effect upon the domestic flour trade. Cuban raw sugar in New York expressed in Canadian funds increased from \$1.26 per cwt. in April to \$1.49 in May, although final approval of Cuban segregation of raw sugar did not cause any major market response. The 1933-34 Brazilian coffee crop was lately estimated at 29,000,000 bags against 17,000,000 in the preceding year. A sharp increase in U.S. consumption of rubber from 18,047 long tons in April to 26,226 in May was indicative of much greater activity among tire manufacturers. Advances in cotton prices were ascribed mainly to reports of U.S. inflationary measures, unfavourable crop reports and increased activity in the textile business. Statistics showed that Japanese port stocks of silk fell 5,000 bales to a total of about 38,000 bales at the end of May. Some improvement in the lumber outlook accompanied by a stiffening of prices for several grades, was noted in May. It was estimated that the U.S. monthly consumption of copper now exceeds 30,000 tons, which represents an increase of about 50 per cent since the first of the year, while production is believed to approximate 20,000 tons.

### CONDITIONS IN THE UNITED STATES

Sharp recovery in industrial operations throughout the United States characterized May. The steel, motor car and textile industries were participants in the advance. Steel mill operations increased from 14 p.c. of capacity in the last week of March to 44 p.c. in the first week of June, a gain of more than 200 p.c. Sixty-three blast furnaces were in operation at the end of May as compared with 48 at the end of April. Sales of non-ferrous metals showed marked gain, quotations for electrolytic copper rising from 6·5 cents to 8 cents per pound, lead from 3·5 cents to 4·1 cents and zinc from 3·7 cents to 4·3 cents. Construction contracts awarded increased in May in contrast to the usual seasonal decline. The National Industrial Recovery Act includes provisions for public works construction expenditures of approximately \$3,400,000,000.

Output of motor cars was greater in May than in any month since July 1931. The daily average consumption of cotton increased nearly 22 p.c. over April, and the consumption of silk and wool also gained rapidly.

Common stock prices as measured by a 90-stock index recorded a net gain of 16 p.c. for the month, resulting in the highest level since November 1931.

DOMINION BUREAU OF STATISTICS, OTTAWA, June 21, 1933.

## MONTHLY REVIEW OF BUSINESS STATISTICS

Table 24. Summary of Canada's Imports, in Thousands of Dollars

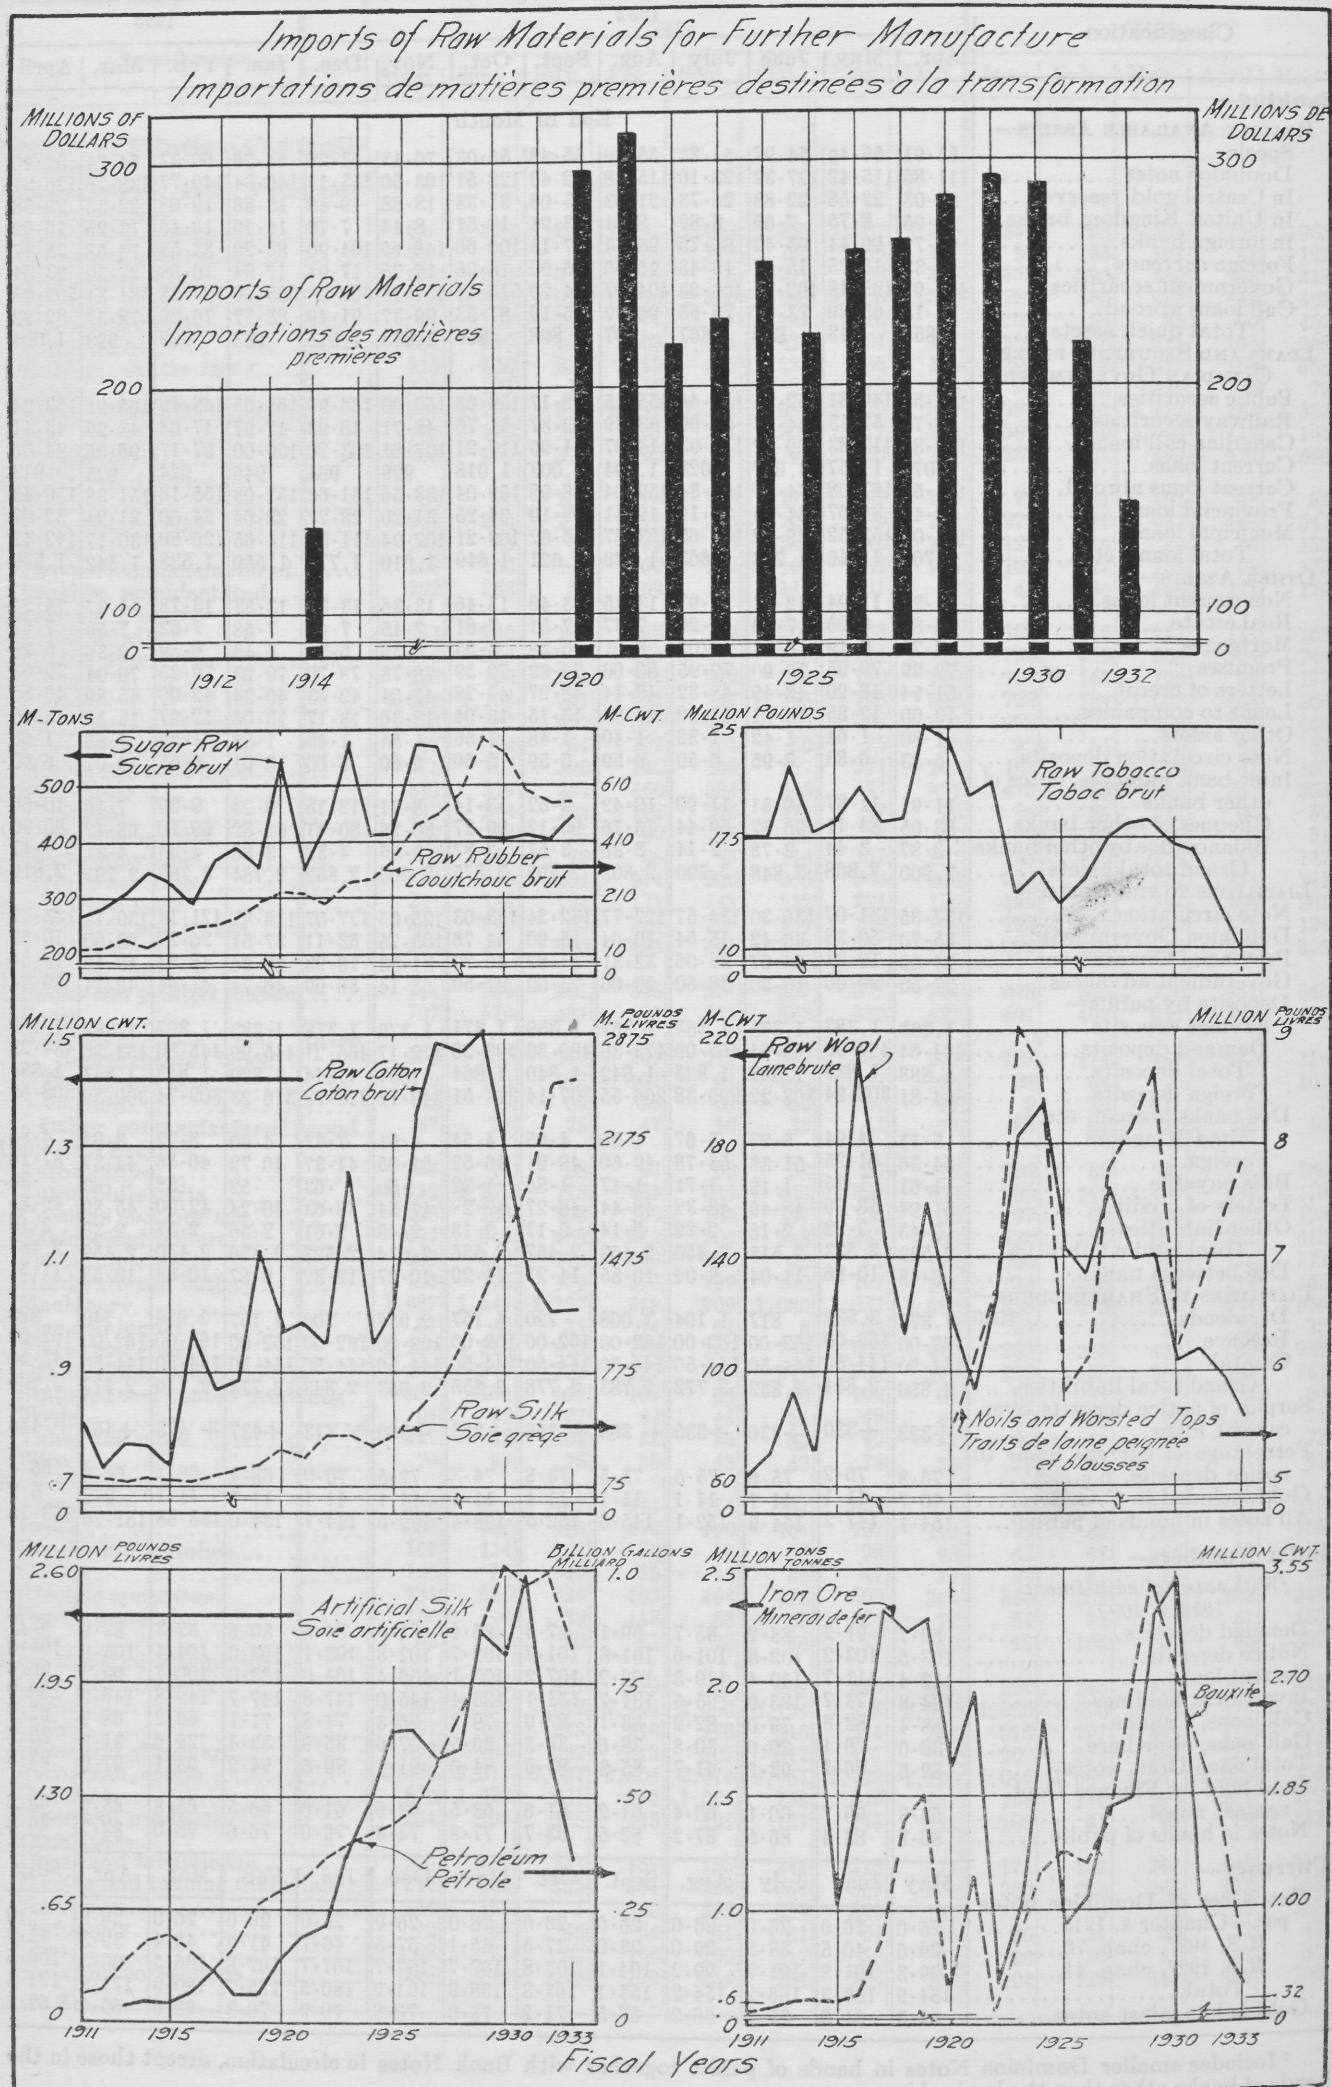

Classification	1932										1933				
	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.	Feb.	Mar.	April	May		
<b>Imports of Principal Commodities—</b>															
AGRICULTURAL AND VEGETABLE PRODUCTS—															
Alcoholic beverages.....	830	1,328	890	1,122	1,053	1,358	1,537	2,305	894	798	3,505	750	1,003		
Cocoa and chocolate.....	191	95	95	60	113	135	136	147	85	95	103	62	122		
Coffee and chicory.....	463	316	315	206	175	276	352	389	454	296	650	248	318		
Fruits.....	1,908	2,216	1,903	1,746	1,505	1,651	1,338	1,567	786	669	998	845	1,462		
Gums and resins.....	97	104	103	77	97	107	110	61	109	88	96	90	152		
Nuts (edible).....	261	210	133	108	111	274	521	183	160	116	215	105	208		
Rubber (chiefly raw).....	315	402	288	219	435	231	266	185	201	216	352	168	358		
Seeds.....	301	121	18	19	21	28	43	109	95	113	135	75	79		
Sugar, chiefly for refining.....	2,017	1,233	1,816	2,042	1,562	1,872	1,479	897	384	397	2,173	262	1,552		
Tea.....	143	170	228	261	287	502	377	339	366	759	1,090	117	161		
Vegetables.....	1,058	955	330	95	81	91	200	211	261	231	499	424	669		
ANIMAL PRODUCTS—															
Fish.....	83	90	130	98	126	174	147	116	71	61	101	48	66		
Furs, chiefly raw.....	323	369	223	211	246	201	180	176	273	281	431	161	547		
Hides.....	248	83	68	95	96	233	240	118	123	116	80	64	153		
Leather, unmanufactured.....	198	150	177	220	197	190	156	135	102	127	133	99	173		
Leather, manufactured.....	292	288	59	109	147	117	91	77	49	94	169	121	124		
TEXTILE PRODUCTS—															
Artificial silk.....	211	240	193	198	199	200	165	168	182	216	252	131	164		
Cotton, raw.....	918	234	287	472	441	656	1,181	1,122	706	498	508	354	748		
yarn.....	222	190	178	201	232	336	140	149	186	143	199	96	177		
other.....	1,032	1,108	781	812	747	758	728	552	725	784	1,007	653	806		
Flax, hemp and jute.....	573	587	451	510	425	589	603	491	422	396	406	323	486		
Hats and caps.....	93	64	54	122	101	50	25	13	32	84	86	62	56		
Manila and sisal grass.....	178	102	320	140	159	227	221	242	162	87	179	82	103		
Silk—Raw.....	381	314	252	460	584	548	471	327	415	285	342	234	363		
Fabrics.....	217	244	133	193	225	211	97	70	89	84	117	90	89		
Wearing apparel.....	67	54	25	90	98	92	76	57	60	62	97	48	51		
Wool—Raw wool.....	203	131	70	96	83	116	157	191	138	105	179	118	147		
Noils and tops.....	194	146	154	174	230	255	346	296	374	262	287	138	241		
Woollen yarn.....	221	144	194	171	143	222	221	185	199	146	184	108	201		
Worsted and serges.....	340	340	53	284	228	154	138	138	188	247	272	123	134		
Other wool.....	392	472	600	433	441	387	347	282	378	450	532	272	355		
WOOD AND PAPER—															
Books and printed matter.....	744	786	861	828	874	907	871	744	618	605	776	531	643		
Paper.....	707	576	481	496	517	567	536	421	401	493	511	316	406		
Wood—Furniture and other manufactured wood.....	301	309	247	247	213	215	232	201	173	174	184	112	216		
Planks and boards.....	210	173	113	101	93	140	147	116	64	64	73	65	101		
Veneers.....	31	19	25	26	23	39	17	11	9	15	11	5	7		
Other unmanufactured wood.....	57	38	25	47	10	33	43	73	39	34	56	33	40		
IRON AND STEEL—															
Automobiles.....	163	74	68	63	60	38	33	14	104	59	91	133	100		
Automobile parts.....	1,112	1,270	778	553	632	469	557	658	868	747	1,407	884	1,170

# REVUE MENSUELLE DE LA SITUATION ECONOMIQUE

Vol. VIII

OTTAWA, JUIN, 1933

N° 6

STATISTICIEN DU DOMINION: R. H. COATS, B.A., F.S.S. (HON.), F.R.S.C.  
CHEF DE LA SECTION DE LA STATISTIQUE GÉNÉRALE: S. A. CUDMORE, M.A., F.S.S.  
ADJOINT (STATISTIQUES ÉCONOMIQUES): S. B. SMITH, M.A.

## STATISTIQUE COURANTE DES AFFAIRES AU CANADA

Le mois de mai a été caractérisé par des perspectives économiques plus brillantes, plusieurs facteurs significatifs montrant une amélioration prononcée sur le mois précédent.

L'avance des actions ordinaires reflète une attitude plus optimiste chez les spéculateurs, l'indice marquant 63·7 comparativement à 51·9 en avril, soit un gain de plus de 22 p.c. L'indice de 20 titres miniers a monté de 74·5 à 89·6 et tous les groupes de titres spéculatifs dans la classification ont monté.

Les obligations de tout repos ont avancé au cours du mois. Le rendement des obligations le plus populaires de l'Ontario est descendu à 4·70 comparativement à 4·85, ce qui signifie une hausse substantielle de la cote. Le rendement moyen de quatre titres canadiens de réémission est de 4·51 au lieu de 4·65 en avril. L'avance des obligations de tout repos est considérée comme un développement constructeur de signification fondamentale.

La dépréciation du dollar américain a provoqué une baisse de la prime sur le dollar canadien à New York qui a fluctué de \$1·151 à \$1·129 en mai comparativement à \$1·211 et \$1·151 en avril.

Les dépôts des banques montrent un gain à la fin d'avril, la somme des dépôts à demande étant de \$1,884,000,000, soit un gain de \$41,000,000 en un mois. Les prêts courants à \$913,-000,000 se comparent à \$925,000,000, le déclin commencé en 1929 se continuant. Les valeurs en portefeuille à \$805,900,000 se comparent à \$792,800,000. La position liquide des banques s'est améliorée pendant le mois, la somme des huit comptes d'actif immédiatement réalisable étant de \$1,003,800,000 comparativement à \$992,900,000.

Les prix de gros, principalement dans les denrées qui se prêtent à la spéculation, ont fait une avance marquée en mai, l'indice étant à 66·9 comparativement à 65·4 en avril. Le groupe textile a fait une avance considérable et les gains des mois précédents par les produits de la ferme et des métaux non ferreux du Canada se sont continués.

### Opérations commerciales

L'indice du volume physique des affaires en mai est à 76·4 comparativement à 69·8 en avril, ce qui reflète de l'expansion dans un grand nombre d'industries.

Les facteurs indiquant le cours de la production minérale sont en plus grande partie favorables, les exceptions étant l'or et le zinc qui ont des tendances réactionnaires. Les expéditions d'or, 210,256 onces, se comparent à 210,504 onces en avril, alors qu'une augmentation considérable aurait été normale pour la saison. Les exportations de zinc se chiffrent à 14,166,400 livres comparativement à 14,057,800 livres en avril, le gain étant moins que normal pour la saison. Les exportations de nickel donnent une augmentation considérable, 8,580,400 livres comparativement à 2,746,000 en avril. Après rajustement pour variations saisonnières, il y a un gain de 67·5 p.c. Les exportations de cuivre montrent un gain et la production de plomb montre une augmentation substantielle le dernier mois sur lequel les statistiques ont été colligées. Les exportations des meilleures qualités d'amiante ont été de 10,497 tonnes comparativement à 4,995 en avril. Les importations de bauxite pour la fabrication d'aluminium donnent 13,606,300 livres comparativement à 2,113,900.

La production de farine de blé et d'avoine roulée a diminué le dernier mois sur lequel les statistiques existent. La production de sucre, 41,167,000 livres, se compare à 46,455,000 les quatre semaines précédentes. Les abatages de bovins donnent une augmentation marquée, soit 115,579 têtes comparativement à 97,112. Les abatages de porcs ont augmenté de 231,627 à 278,906 têtes. Il y a aussi des gains marqués dans les exportations de fromage et de saumon en boîte, le fromage donnant 4,082,000 livres comparativement à 3,268,000 livres. L'indice des denrées alimentaires marque 85·6 en mai comparativement à 83·4 en avril.

Les importations de caoutchouc brut sont de 3,817,398 livres comparativement à 1,244,621, un gain de pas moins de 184 p.c. après rajustement pour variations saisonnières. Les importations de coton brut, 8,111,000 livres, se comparent à 4,050,459, et les importations de filés de coton, de laine brute et de filés de laine pour plus ample transformation montrent des gains importants. L'indice des textiles basé sur les importations a monté de 47·7 à 87·5.

La production de papier à journal, reflétant une meilleure demande, est de 171,776 tonnes en mai comparativement à 147,759 en avril. Les exportations de planches et madriers sont de 75,694,000 pieds comparativement à 33,735,000 et les exportations de pulpe de bois et de bardeaux montrent aussi de l'expansion. La production d'acier en billes donne 23,126 tonnes comparativement à 11,384 en avril, les hauts fourneaux restant inactifs au cours du mois. La production d'automobiles donne 9,396 au cours du mois comparativement à 8,255 en avril, le gain étant de 12 p.c. après rajustement.

Les importations de pétrole brut ont été de 83,981,000 gallons comparativement à 36,187,000 en avril, le gain ajusté étant d'environ 46 p.c.

L'indice de la construction a décliné à 14·1 de 20·6 qu'il était le mois précédent. Comme ces indices sont exprimés en pourcentages des moyennes mensuelles de 1926, la saison actuelle a vu un nouveau bas dans la construction. Les contrats de mai ont une valeur de \$6,514,000 comparativement à \$8,609,000 le mois précédent, et les permis de bâtir, \$2,002,000 comparativement à \$1,552,000. Il y a un gain dans les permis de construction, après rajustement, mais les opérations dans le bâtiment sont très tranquilles.

Les chargements de wagons, 161,401, se comparent à 138,475 en avril, le gain rajusté étant de 6 p.c. L'avance du commerce extérieur a été le point lumineux du mois. Les exportations donnent \$46,109,000 comparativement à \$20,312,000 en avril, l'indice montrant, après rajustements pour tendances saisonnières et variations des prix, 66·6 comparativement à 47·3 ou un gain d'environ 41 p.c. Les importations, \$32,927,000, se comparent à \$20,457,000, le gain rajusté étant de 24 p.c.

Les débits des banques, reflétant une plus grande activité commerciale et spéculative, s'élèvent à \$2,650,000 comparativement à \$1,877,000,000. Après rajustement pour tendances saisonnières et changements des prix, le gain est de près de 39 p.c.

### **Changements économiques**

Chacun des trois facteurs représentatifs montrés dans le graphique de la page 4 laisse voir des indications favorables. L'indice du volume physique des affaires, après avoir baissé à l'extrême en mars par la continuation d'un déclin de quatre ans, prend une direction ascendante au cours de cette période et reflète maintenant une reprise considérable de la production.

Le rendement des obligations du gouvernement de l'Ontario à 4·70 comparativement à 4·85 indique une hausse dans le cours des obligations, ce qui est considéré comme un développement constructif. Le gain de l'indice des actions ordinaires a été le facteur le plus spectaculaire du mois, l'avance étant générale dans tous les groupes.

### **Six facteurs économiques**

Le graphique de la page 10 présente quelques-uns des facteurs entrant dans le progrès économique du Canada. Il y a une corrélation marquée entre les indices du volume physique des affaires et l'emploiement, bien que le premier montre une plus grande marge de fluctuations.

L'indice de l'emploiement en 1921 reflétait un niveau relativement plus élevé que la production, le point le plus bas de la dépression primaire d'après-guerre étant atteint dans les premiers mois de 1922. En dehors de la réaction de 1924, il y a eu gain assez continu dans l'emploiement jusqu'en août 1929. Le déclin qui s'est ensuite continué jusqu'à ces derniers mois a baissé l'indice à son plus bas dans la période d'observation.

L'indice du volume physique a suivi la même orientation générale, mais le point de départ dans les premières années d'après-guerre était relativement plus bas. La capacité de rendement a augmenté, l'indice des affaires montrant une plus forte augmentation que l'emploiement en 1928 et 1929. L'indice des affaires fait voir normalement un changement d'orientation plus tôt que l'indice de l'emploiement.

Le mouvement des prix de gros et des opérations commerciales donne la clef des changements dans l'indice du cours des actions ordinaires. L'inflation des prix de gros a été la principale cause de la hausse des actions ordinaires en 1920 tandis que le gain marqué des opérations commerciales et une stabilité relative des prix de gros expliquent la vive avance des valeurs spéculatives de 1926 à 1929. Le déclin dans les opérations commerciales et le prix des denrées sont l'arrière-plan de la tendance réactionnaire des valeurs mobilières depuis quatre ans. Un gain dans les deux facteurs génératrices en ces derniers mois a coïncidé avec une avance marquée de la cote à la Bourse.

La stabilité relative des dépôts à terme dans les banques chartrées a été un facteur constructif au cours des derniers quatre ans. Il y a eu augmentation de 1922 à 1928 alors que fut atteint le maximum à long terme. Les derniers cinq ans, un déclin relativement modéré des dépôts à terme a été une source de force dans la situation financière.

Le cours moyen des obligations de l'Ontario a touché son maximum d'après-guerre dans les premiers mois de 1928. Vu les taux élevés de l'argent à brève échéance, la cote des obligations de tout repos a reculé pendant la plus grande partie de 1928 à son niveau modéré de 1929. Il y a eu reprise jusqu'à septembre 1931, alors que le sterling se détacha de l'or, ce qui provoqua une forte réaction des obligations du gouvernement. Depuis août 1932, le niveau a été un peu plus élevé, la hausse étant appréciable en mai.

### Facteurs bancaires

Le graphique de la page 15 illustre la marche de six facteurs bancaires depuis 1919 jusqu'à date. Il y a beaucoup de corrélation entre les prêts courants et la somme des dépôts à terme et à demande. Le gain des prêts courants, cependant, tend à être plus prononcé dans une période de grande activité commerciale et le déclin dure normalement plus longtemps que celui des dépôts des banques. Les dépôts ont atteint leur minimum de la dépression primaire d'après-guerre en 1922 tandis que le déclin des prêts courants se continuait jusqu'à la fin de 1925. Les prêts courants ont été à leur maximum en octobre 1929, et il y a eu ensuite un déclin marqué. La baisse des dépôts des banques les derniers quatre ans a été relativement plus modérée. L'actif liquide des banques, composé des huit comptes montrés à la page 29 s'est bien maintenu en ces dernières années, les fluctuations de la période d'après-guerre étant d'un caractère plus modéré que celles de la plupart des facteurs économiques de première importance. De 1920 à 1925 l'actif liquide a grossi au point que le total en dépassait \$1,000,000,000. En dépit des fluctuations de cette période, cette position s'est si bien maintenue que ce total était de \$1,004,000,000 le 30 avril. De lourds achats d'obligations fédérales et provinciales ont été un facteur important dans la position liquide des banques, la somme des trois classes de placements touchant un nouveau maximum à la fin d'avril. Depuis l'été de 1930 le portefeuille des banques montre un grossissement. Cette position s'était bien maintenue de 1924 à 1929, et les forts achats sur le marché libre des trois dernières années ont porté les niveaux encore plus haut.

Le montant des billets du Dominion et des banques aux mains du public est un facteur relativement stable. Le déclin des transferts financiers se reflète par une baisse des billets en circulation de 1921 à 1923 et de 1931 jusqu'à date. La circulation a été stable en 1922 et dans les débuts de 1923, et elle a montré la même tendance depuis le commencement de 1931. Le plus haut niveau de la période d'après-guerre s'est maintenu en 1919 et 1920, avec un gain modéré vers la fin de 1923 jusqu'à 1929. De 1922 à 1928, il y a de violentes variations dans le montant d'or détenu en garantie des billets du Dominion. Les derniers mois les rentrées d'or ont été considérables, servant spécialement à payer les exportations de céréales, tandis qu'au commencement de l'année notre or était expédié à l'extérieur en paiement de notre surplus d'importations. Depuis 1929 les réserves d'or ont été gardées à un niveau modéré.

Les orientations bancaires les plus significatives des trois dernières années comprennent un déclin substantiel des prêts courants comparativement à une récession modérée des dépôts bancaires. Les valeurs en portefeuille montrent une forte augmentation qui contribue à la forte position liquide. Les billets en circulation et les réserves d'or des derniers deux ans sont restés à un niveau stable et modéré.

### Importations de matières premières

Un graphique illustrant les importations de matières premières depuis 1911 jusqu'à date paraît à la page 30.

Le Canada, en commun avec tous les pays manufacturiers, dépend de matières premières importées pour plusieurs de ses industries. Un relevé des importations de matières premières dans un tel pays devrait indiquer, règle générale, si ces industries sont florissantes ou déprimées. Une augmentation des importations de matières premières pour ces industries doit invariablement refléter une plus grande activité industrielle et probablement une augmentation dans les exportations des marchandises fabriquées avec ces matières premières, tandis qu'une diminution dans les importations de matières premières indiquera des résultats contraires.

Une analyse des importations canadiennes révèle que soixante-deux articles comprenant environ un tiers de la valeur totale des importations étaient destinées aux différentes industries du Canada. Comparativement à l'année fiscale précédente, la valeur de ces soixante-deux articles montre en 1933 une diminution de 21·6 p.c. Le déclin des autres importations est de 33·1 p.c., de sorte que le déclin des matières importées pour plus ample transformation a été plus faible que celui des articles importés pour consommation directe.

Des onze articles représentés sur ce graphique, les quantités de sucre brut, caoutchouc, coton, soie, de peignés de laine et de blousse de worsted montrent en 1933 une augmentation sur l'année fiscale précédente tandis qu'il y a des déclins dans le tabac en feuilles, la laine, la soie artificielle, le minerai de fer et la bauxite. Les importations de pétrole brut à 895,600,000 gallons, valant \$26,878,000, l'année fiscale 1933 montrent un déclin de 178,700,000 gallons mais une augmentation en valeur de \$2,684,000.

Les importations de soie brute donnent 2,573,000 livres valant \$4,783,000, une augmentation de 33,800 livres en quantité mais une diminution de \$1,716,000 en valeur.

### Prix de gros

Les produits de la ferme, les métaux non ferreux et le groupe des textiles ont eu des avances de prix en mai. Le blé donne en moyenne 10 cents le boisseau de plus qu'en avril, le dernier prix en mai étant de 63·3 cents le boisseau pour le No. 1, Manitoba Nord, au comptant. Une brusque hausse a causé une certaine perturbation sur le marché domestique de la farine. Le sucre brut de Cuba, place de New York, a avancé en fonds canadiens de \$1.26 le quintal à \$1.49 au cours de mai, bien que l'approbation finale de la ségrégation du sucre cubain n'ait pas reçu de réponse sur le marché. La récolte de café brésilien de 1933-34 est estimée à 29,000,000 de sacs au lieu de 17,000,000, récolte précédente. Il y a grande augmentation dans la consommation de caoutchouc brut aux Etats-Unis qui a monté de 18,047 tonnes longues en avril à 26,226 en avril, indication de plus grande activité dans la fabrication des bandages. L'avance des prix du coton est attribuée en plus grande partie aux rumeurs d'inflation aux Etats-Unis, aux mauvais rapports sur la température et à une plus grande activité dans l'industrie textile. Les statistiques montrent que les stocks de soie brute du Japon ont baissé de 5,000 balles et ne s'élèvent qu'à 38,000 balles à la fin de mai. Il y a amélioration dans le marché du bois et les prix de plusieurs variétés ont augmenté en mai. Il est estimé que la consommation mensuelle de cuivre aux Etats-Unis est maintenant de 30,000 tonnes, ce qui représente une augmentation de 50 p.c. depuis le commencement de l'année, alors que la production est estimée à 20,000 tonnes.

### LA SITUATION AUX ÉTATS-UNIS

Le mois de mai a été caractérisé par une vive accélération de l'activité industrielle. Les aciéries ont augmenté leur rendement de 14 p.c. qu'il était la dernière semaine de mars à 44 p.c. la première semaine de juin, ce qui fait un gain de plus de 200 p.c. Soixante-trois hauts fourneaux étaient en opération à la fin de mai comparativement à 48 à la fin d'avril. Les ventes de métaux autres que le fer montrent un gain marqué, la cote du cuivre électrolytique montant de 6·5 cents à 8 cents la livre; celle du plomb, de 3·5 à 4·1 cents, et celle du zinc, de 3·7 cents à 4·3 cents. Contrairement au déclin saisonnier de mai, les contrats de construction ont augmenté. La loi de la reprise de l'industrie nationale prévoit une dépense de \$3,400,000 en travaux publics.

La production d'automobiles a été plus grande en mai qu'en tout autre mois depuis juillet 1931. La consommation quotidienne de coton a augmenté de près de 22 p.c. sur avril et la consommation de soie et de laine a aussi avancé.

La cote des actions ordinaires telle que mesurée par l'indice de 90 titres montre une hausse nette de 16 p.c. au cours du mois, ce qui donne le marché le plus fort depuis novembre 1931.

# PUBLICATIONS ISSUED BY THE DOMINION BUREAU OF STATISTICS

---

## 1. ANNUAL OR SPECIAL REPORTS ISSUED DURING THE MONTH ENDED JUNE 16, 1933

**Administration.**—The control and sale of liquor in Canada.

**Population.**—Manual of the international list of causes of death, as adapted for use in Canada by the Dominion Bureau of Statistics; based on the Fourth Decennial Revision by the International Commission, Paris, Oct. 16 to 19, 1929. Census 1931, bulletin XXVIII, Gainfully employed, ten years of age and over, classified according to occupation and sex for cities of 30,000 and over, 1931. Bulletin XXIX, Birthplace of the population classified according to nativity of parents for Canada and provinces, 1931.

**Production.**—AGRICULTURAL PRODUCTS.—Fruit report; conditions up to May 13, 1933. List of correspondents for telegraphic crop reports in Canada. Telegraphic crop report, May 30, 1933; June 6, 1933. Livestock on farms by census divisions, 1931, Alberta. Livestock on farms by census divisions, 1931, British Columbia. Condition of field crops, May 31, 1933, with maps showing condition of spring wheat. The grain situation in the Argentine. ANIMAL PRODUCTS.—Advance report on the concentrated milk plants of Canada, 1932. MINERAL PRODUCTS.—Chemical and allied products, preliminary summary statistics, 1932.

**Manufactures.**—Manufacturing industries of the Maritime Provinces, 1931. IRON AND STEEL AND THEIR PRODUCTS.—The castings and forgings industry, 1931. The machinery industry, 1931. CHEMICALS AND ALLIED PRODUCTS.—The acids, alkalies and salts industry, 1932.

**External Trade.**—Trade of Canada with Asia, Oceania, Alaska, Mexico and countries of Central and South America on the Pacific Ocean, calendar year, 1932; specially compiled for use at the Fifth Pacific Science Congress, Vancouver, B.C., Canada, June 1, 1933.

**Internal Trade.**—Canada's balance of international payments, 1926–1932. Hotel operations in Ontario, 1930.

**Transportation, Communications and Public Utilities.**—Production and use of electric energy in Canada, 1932. International bridge, ferry and tunnel companies, 1932.

## 2. PUBLICATIONS REGULARLY ISSUED BY THE WEEK, MONTH OR QUARTER

**Weekly Bulletin.**—Canadian Grain Statistics, Carloadings of Revenue Freight. Investors' and Traders' Indexes of Security Prices. Index Number of 20 Mining Stocks.

**Monthly Bulletins.**—Agricultural Statistics. The Wheat Situation: Review; statistical supplement. Cold Storage Holdings. Production of—(a) Flour. (b) Sugar. (c) Boots and Shoes. (d) Automobiles. (e) Iron and Steel. (f) Coal and Coke. (g) Leading Mineral Products. (h) Asbestos. (i) Asphalt Roofing. (j) Cement. (k) Clay Products. (l) Copper. (m) Feldspar. (n) Gold. (o) Gypsum. (p) Lead. (q) Lime. (r) Natural Gas. (s) Nickel. (t) Petroleum. (u) Salt. (v) Silver. (w) Zinc. (x) Concentrated Milk Products. (y) Creamery Butter. Building Permits. Summary of the Trades of Canada current month and 12 months. Summary of Canada's domestic exports. Summary of Canada's Imports. Asbestos trade. Farm implements and machinery. Footwear trade. EXPORTS: Grain and flour; Lumber; Meats, lard and sausage casings; Milk, milk products and eggs; Non-ferrous ores and smelter products; Paints and varnishes; Petroleum and its products; Pulpwood, wood pulp and paper; Rubber and insulated wire and cable; Vehicles (of iron). IMPORTS: Coffee and tea; Lumber; Meats, lard and sausage casings; Milk and its products and eggs; Non-ferrous ores and smelter products; Paints and varnishes; Petroleum and its products; Rubber; Stoves, sheet metal products; Refrigerators; Vehicles (of iron). Railway Operating Statistics. Traffic of Canadian Railways. Canal Statistics. Prices and Price Indexes. Automobile Financing. Changes in the value of retail sales. The Employment Situation as reported by Employers. Commercial Failures. Bank Debts. Review of Business Statistics—Price \$1.00 per year. Vital Statistics, Births, Marriages and Deaths, by provinces.

**Quarterly Reports.**—Trade of Canada—Price \$2.00 per year.
