PREFACE

In the education statistics of 1931, evidence of the economic reaction is more apparent among the pupils than teachers. There are exceptionally large increases in the number of older pupils, indicating that lack of employment kept them in school, but the school year under review was too early to reflect the more recent general reductions in teachers' salaries. The census of 1931 shows a ten-year increase of about 20 p.c. in the number of children of school age as compared with the much larger increase of $25 \cdot 8$ p.c. in the number at school. This means that the school life of Canadian children has lengthened considerably, and it is further shown by the census that the regularity of attendance during the years at school has improved in every province. Chapter I also gives the broad results of the census on literacy, showing that $92 \cdot 34$ p.c. of the population over 5 years of age in 1931 could read and write as compared with $90 \cdot 00$ p.c. in 1921. Every province showed advance in this respect, the most rapid improvement being in the four Western Provinces and the North West Territories.

A new compilation in the present report (Tables 3 and 4) shows the total school enrolment and secondary grade enrolment together with the population of school ages in each county or census division, and each city of over 10,000 population in the Dominion. These tables should be of considerable value in studying the school situation in particular sections of any province. For the four Western Provinces the tables are supplemented by a description, in Appendix II, of the area included in each census division, and for each of the three Prairie Provinces a spot-map is provided showing the boundaries of census divisions and the location of all schools. The tables on teachers in provincial schools and those on technical education have been improved, and a special feature of this edition of the Survey is a directory of private elementary, secondary and business schools in Canada.

Part I consists of four chapters, Part II has four sections of statistics. Chapter I gives a brief review of all educational institutions in the Dominion, noting the first results released by the census of 1931 on school attendance and literacy, and particularly data on the provincial schools. This corresponds to the first and second statistical sections of Part II. Chapter II reviews non provincial educational activities including the Dominion Government's Indian schools and other educational activities, private schools, magazines and associations particularly interested in the schools. The corresponding statistical tables are in the fourth section of Part II. Chapter III deals with universities, colleges, and professional schools, for which the corresponding statistical tables are in the third section of Part II. Chapter IV reviews all educational institutions summarily for each province separately and is followed by a résumé of the year's legislation relating to education.

The text has been written by J. E. Robbins, M.A., and the statistical tables prepared under his direction, all with the supervision and advice of M. C. MacLean, M.A., F.S.S. As in former years, the several provincial Departments of Education co-operated with the Bureau of Statistics, some undertaking entirely

new compilations to make uniform statistics possible.

R. H. COATS,
Dominion Statistician.

Dominion Bureau of Statistics, October, 1932.

SPECIAL FEATURES OF PAST ANNUAL SURVEYS NOT REPEATED IN THE PRESENT EDITION

- 1922.—Historical notes on the provincial schools. Statistics of Playgrounds and medical inspection.
- 1923.—School attendance and illiteracy data from the Census of 1921,—tables and analysis.
- 1925.—Child labour laws in Canada (also 1926). Library statistics and legislation.
- 1926.—Census information on teachers,—statistics and analysis.
- 1928.—Teachers' pension plans reviewed (also 1929). Library statistics.
- 1929.—Review of university extension work, and other organizations for adult education. Research Councils of Canada.
 Review of health, welfare, and other organizations connected with the schools.
- 1930.—Descriptive directory of universities and colleges.
 Consolidated and rural schools compared in efficiency.

INTRODUCTORY NOTES

Definition of Terms

- Academy.—A term used a few years ago to designate a definite type of school in some of the provinces.

 The word now only survives as the local name of a few secondary schools, generally privately controlled.
- Affiliated College.—A college whose courses are approved, or in some cases prescribed, by a university which conducts the examinations and awards the diplomas to the college's students. But commonly the university exercises no financial control over the college.
- Annexed College.—In Quebec, a college is said to be annexed when the university merely approves the curriculum and by-laws, is represented at the examinations, and sanctions the diplomas awarded by the college.
- Associated College.—In Quebec, an associated college is an affiliated college situated outside of Quebec or Ontario, or more accurately outside of the former Lower Canada and Upper Canada.
- Assisted School.—In British Columbia, a rural school of which the teacher's salary is paid by the Provincial Government.
- Assisted Section.—A term used in Nova Scotia to indicate that the School Section requires some extra aid from Government or Municipality in order to support a school.
- Boards, School.—The local bodies administering the publicly-controlled schools. (See under Trustee).
- Business College.—In Canada the term is generally applied to a private institution training young people for office positions. The courses do not usually require more than a year to complete. The institutions generally confer their own diplomas, while also preparing students for public examinations such as those for the Civil Service, and chartered accountants.
- Catholic Schools.—In Quebec there are two distinct school systems, both publicly-controlled, one for the Catholic residents of the province—the Catholic Schools; the other group—the Protestant Schools—being attended by most of the non-Catholic elements in the province, including the large Jewish Community in Montreal.
- Classical College.—The most numerous type of affiliated college in Quebec. Within the province they are termed "secondary" institutions. They give instruction all the way from what would be considered the elementary grades in other provinces to the end of a full course for the B.A. Degree. They are subsidized by the Provincial Government, but their courses are controlled by the universities to which they are affiliated (Laval and Montreal), not by the Department of Education.
- Collegiate Department.—In Manitoba, a school in a town which has three teachers teaching high school work only, in contradistinction to "high school," which has only two such teachers. This "Department" is housed in the same building and under the same principal as the elementary classes. The latter fact distinguishes it from "Collegiate Institutes," where only high school and technical classes are housed.
- Collegiate Institute.—In Ontario, Manitoba and Saskatchewan, a pure high school which has attained to a certain standard in equipment and staff.
- Commissioners, Board of.—In Quebec, where the administrative school unit is the municipality instead of the district or section, the regular school board is called the Board of Commissioners, while the dissentient or minority board whether Roman Catholic or Protestant, is called the Board of Trustees.
- Commissioners, District.—The administrative school unit which is called "school district" in all other provinces except Quebec, Ontario and Nova Scotia, is in Nova Scotia, called a school section. All these sections are included in 33 "districts" under district commissioners, whose powers now are mainly confined to altering the boundaries of school sections. The inspector is ex officio the secretary of the district commissioners.
- Commissioners, School.—In Nova Scotia, the name given to members of school boards in incorporated towns.
- Consolidated School.—An amalgamation of two or more rural schools, or of rural schools with village or town schools, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages such as conveyance, instead of the original one-room school. In some cases (as in Saskatchewan) it need not be an amalgamation. The original district may be a "large district" with a graded school and provisions for conveyance, etc.
- Continuation School.—Generally, a school where instruction is continued beyond elementary grades, but which has not reached the official status of a high school. In "Continuation schools" in Ontario, at least one teacher devotes full time to work of secondary grade; they are, generally speaking, the high schools of villages and rural centres.

- Day Schools.—In this report the term is used to distinguish classes conducted during the day from evening or night schools. It never means "non-residential" as it does, for instance, when the Report of the Department of Indian Affairs classifies Indian schools as residential and day schools.
- Department.—Used in some provinces to mean classroom.
- Department of Education.—The term is used in all provinces to define the chief permanent central body in charge of public education; in Quebec the department is not under the direction of the Provincial Government, but linked with it through the Provincial Secretary; in the other provinces it is directly under the Provincial Government.
- Departmental.—Refers always to the Department of Education, e.g. Departmental Summer School means a summer school conducted by the Department of Education.
- District, School.—In all provinces except Nova Scotia, Quebec and Ontario, the smallest administrative school unit, locally governed by a board of school trustees (called "section" in Nova Scotia and Ontario); in Nova Scotia, see District Commissioners above; in Ontario it refers to a high school district; in Quebec it is a subdivision of the school municipality.
- District, Poor.—In New Brunswick, a school needing a special government and county fund grant for its support.
- Division, School.—In British Columbia, a department or classroom in a school.
- Elementary Grades.—In all of the provinces except Quebec, the first eight grades (not counting kindergarten) in the ordinary schools, as distinguished from the more advanced "secondary" grades. See table VII.
- Elementary School.—A school that teaches the work of elementary grades.
- General Schools.—The expression used in Nova Scotia Reports with the meaning that "ordinary schools" has in this report.
- Grade, School—The subdivisions of the work of ordinary day schools, the elementary "grades" being, in all provinces except Quebec, Grades I to VIII, and the secondary, Grades IX to XII, each of the twelve grades requiring about one year for the average child to complete. See table VII.
- Graded School.—A school with more than one classroom or teacher.
- Grammar School.—The High School which is free to all qualified pupils in the county is in New Brunswick called a Grammar School.
- High School.—A secondary school in all provinces, or at least a school where one or more teachers devote the greater part of their time to instruction in the secondary grades. In Nova Scotia, Protestant Quebec, Alberta and British Columbia all purely secondary schools are called high schools. In Ontario, Manitoba, and Saskatchewan the largest secondary schools are called collegiate institutes and smaller schools are called high schools. (In Ontario the smallest of all are called continuation schools.) The Quebec English Catholic communities also use the term "high school."
- High School Grades.—Same as secondary grades.
- Independent School.—In Quebec, the primary schools (ordinary schools) that are not publicly-administered by boards of commissioners or trustees, but by private organizations. The term is practically the equivalent of "private school" as that term is used in this report. But most of the Quebec independent schools receive grants from the provincial Government, whereas the private schools in other provinces ordinarily do not.
- Inspectors.—In all provinces, the representatives of the Department of Education who periodically visit all provincially controlled schools. They are paid by, and in most provinces they are appointed by, the Department of Education. But in Ontario city elementary schools, they are appointed locally by the Municipality from a list approved by the Department.
- Inspectorate.—The area under the supervision of a school inspector.
- Intermediate School.—In Manitoba, a graded school with one teacher employed for high school work; in Quebec, Protestant schools in which the first nine grades are taught.
- Junior College.—An expression not frequently used in Canadian education, but when used in this report means a college teaching only part of the course for the B.A. degree, usually only two years in advance of matriculation.
- Junior High School.—In British Columbia, Nova Scotia and Manitoba a school teaching grades VII, VIII and IX, and offering subjects (especially prevocational such as manual training) that cannot be taught in all schools handling these grades. They are practically all located in the larger centres, in Manitoba all being in Winnipeg.
- Kindergarten Primary.—In Ontario, a school or room, combining the work of kindergarten and Grade I.
- Official Trustee.—A trustee specially appointed to deal with unusual problems in a school district or section or to take the place of the regular board where the latter refuses or fails to carry out the provisions of the Education Act.

- Ordinary Schools.—A term used in this report to designate all schools doing the general work of kindergarten and the eight elementary and four secondary grades (in Quebec the primary schools) as distinguished from technical or vocational schools and special schools for physically or mentally deficient children.
- Primary School.—In Prince Edward Island the term is used to mean a one-room school. In Quebec the term is used in the sense that "ordinary schools" is used in this report, and within the province it designates the large group of schools giving a general elementary education as opposed to the groups (the secondary schools) preparing for professional studies in the university.
- Primary Elementary Schools.—A subdivision of the Catholic Primary Schools of Quebec. They provide a course of one preparatory "year" and six "years" in advance of it.
- Primary Complementary.—A second subdivision of Catholic Primary Schools in Quebec providing a general two-year course in advance of the Primary Elementary Schools (the 7th and 8th "years") directed towards commerce, agriculture, industry or (for girls) domestic economy. They are also called primary vocational schools.
- Primary Superior Schools.—A third subdivision of Catholic Primary Schools in Quebec offering a course of three "years" called respectively the ninth, tenth and eleventh. In existence only since September 1929.
- Private School.—A school not directly under the control of the Department of Education in the matter of program of studies, etc., and administered by persons that are not publicly appointed. Ordinarily they do not receive grants from the Province except in Quebec. (See Independent Schools.)
- Protestant Schools.—One of the two groups of schools in the province of Quebec. See "Catholic Schools."
- Provincially-Controlled Schiols.—A term used in this report to designate all the schools under the immediate jurisdiction of the provincial Departments of Education, and to distinguish them from (1) Indian Schools (2) Private Schools, (3) Colleges and Universities.
- Public Schools.—In Ontario, Saskatchewan and Alberta the elementary schools under provincial control are divided into two classes, "public" schools and "separate" schools. In other provinces the term generally designates all publicly-controlled (i.e. provincially controlled) schools, both elementary and secondary. The term is avoided as far as possible in this Survey on account of its conflicting meanings in the different provinces, but when used, unless speaking only of Ontario, Saskatchewan or Alberta, it means all publicly-controlled schools.
- Rural Municipal Schools.—In British Columbia, each municipality (rural and urban) is a school district and the schools in each municipality are under the control of one Board of trustees. The schools in the rural municipalities are termed rural municipal schools.
- Secondary Grades.—School grades in advance of grade VIII, usually grades IX to XII, as distinguished from the earlier grades which are termed "elementary."
- Secondary Schools.—Schools organized to teach the work of secondary grades except in the Catholic Quebec system. Here the secondary schools are a group preparing students for university professional courses, as opposed to the primary schools which give the training required for admission to normal schools, technical schools, etc.
- Section, School.—A term used in Nova Scotia and Ontario to indicate the unit corporation for school self-government—the equivalent of "school district" in other provinces, except Quebec.
- Separate Schools.—One of the two groups into which provincially controlled elementary (there are a few separate secondary schools in Alberta) schools are divided in Ontario, Saskatchewan, and Alberta, the other group being called "public schools." It is scarcely accurate to say that the separate schools are denominational and the public schools undenominational, for the public school in an area in its management and in the instruction given may be more denominational than the separate school in the same area. Rather the separate schools are dissentient schools that have arisen when either Roman Catholics or Protestants in an area prefer to set up a separate school rather than to patronize the one in existence. The separate schools in these provinces are in all cases either Catholic or Protestant. In fact legal provision does not exist for separate schools for any other group, except for coloured people in Ontario.
- School.—In Nova Scotia, New Brunswick and Saskatchewan Reports, a single school room in charge of a teacher, in other provinces the whole school institution. It is used in the latter sense in this Report.
- Special Schools.—The provincially controlled schools in this Survey are divided into four groups (1) Ordinary, (2) Technical, (3) Teacher Training, (4) Special. The last group contains those for children who are subnormal mentally or physically, correspondence schools, and such other provisions as may be made for those who cannot attend the classes of regular schools.
- Superior Schools.—In New Brunswick, a school equipped and staffed to teach high school work free to all children in grade VII and upwards in the parish or parishes in which the school is located; in British Columbia, a school equipped and staffed to teach the upper elementary and two high school grades.
- Technical School.—A school that offers full time technical courses—commercial, household science, art or industrial. Many of these schools also offer instruction to adults in evening classes.

Trustees, School.—The members of school boards. They are generally appointed by the local ratepayers (urban sections in Nova Scotia, and high school districts in Ontario excepted) to manage the school or schools in a particular district (or section or municipality, according as the local administrative school unit may have the one name or the other in different provinces). The term is used in all provinces, but is applied in Quebec only to the members of minority boards, the members of majority boards being called commissioners, as also are the school board members in incorporated towns of Nova Scotia.

Ungraded School.—When used, means a one-room school.

Ages of Free Admission to Schools

- Prince Edward Island.—Resident children from the 6th to the 16th year of their age; older children if there is accommodation.
- Nova Scotia.—Trustees must provide accommodation for all residents over 5 years of age who wish to attend, in accordance with the regulation of the Council of Public Instruction.
- New Brunswick.—Trustees must provide accommodation for residents between 6 and 20; others may attend if there is accommodation.
- Quebec.—Usually 5 to 16 in elementary schools. A fee is charged in all cases except where abolished by the municipality, and children 7 to 14 have to pay this fee whether they attend school or not, but no child from 7 to 14 years of age is excluded from school for non-payment of monthly fees.
- Ontario.—The public schools are free to all residents (except separate school supporters) between the ages of 5 and 21; the separate schools are free to separate school supporters.
- Manitoba.—Every person between the ages of 6 and 21 years has the right to attend some school.
- Saskatchewan.—In rural and village districts, between 5 and 21; in towns and cities, between 6 and 21. In order to equalize educational costs in Saskatchewan boards of trustees are allowed to charge certain fees when the residents are not taxpayers of the district, and in certain other cases where it is considered that the revenue derived does not provide for the service rendered. Certain fees are chargeable for pupils classified in grades above VIII when a high school or continuation room is maintained.
- Alberta.—Children are admitted to Alberta schools as soon as they have attained the age of six.
- British Columbia.—Accommodation must be provided between the ages of 6 and 16 years. In the discretion of School Boards children may be admitted who are under 6 years or over 16 years.
- Yukon.—Children are admitted to school as soon as they have attained the age of six years.

Ages of Compulsory Attendance

- Prince Edward Island.—Ages 7 to 13, inclusive; monthly attendance must be 60 per cent of the days schools are in operation. In Charlottetown and Summerside, attendance must be 100 per cent.
- Nova Scotia.—Children of ages from 7 to 14 in rural schools, and 6 to 16 in towns and cities. Within the age limits, children in town and country schools must attend regularly; must be reported for discipline when 5 days absent; and parents and guardians, in addition to fines, may have 2 cents a day added to their taxes for each absence to compensate the section for the loss of the "attendance" portion of the Municipal school fund.
- New Brunswick.—In districts other than cities and towns under section 105 of the Schools Act (on resolution of trustees, but the question must be brought up at every annual meeting until adopted)—age 7 to 12 for a period of 80 days; in cities and in incorporated towns under same section, in which the compulsory act has been adopted by city or town council, ages 6 to 16 or grade VII standing if over 12 years old, period 120 days; in Saint John, Fredericton, Chatham and Newcastle, 6 to 14. Employment of children under 16 may be forbidden by the school board.
- Quebec.—No statutory laws for compulsory attendance.
- Ontario.—(a) Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. (b) Adolescents 14 to 16 who have not attained university matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part time for 400 hours a year in municipalities where part-time courses are provided. This provision came into force in September, 1921. In September, 1922, urban municipalities with a population of 5,000 and over were required to provide part time courses.
- Manitoba.—Children of ages 7 to 14 must attend full time. Any pupil over 14 if enrolled must attend regularly. A child over 12 may be exempted for employment, but only six weeks in the term. Employment under 14 (except as mentioned) is forbidden. Children of ages 14 to 16 must attend school regularly if not engaged in some regular occupation.
- Saskatchewan.—All children 7 to 15 who have not passed grade VIII standing, subject to certain conditions as to distance from school, etc., must attend full time. Employment of unexempted children under 15 forbidden. Deaf mutes between the ages of 8 and 15 must attend an institution seven months in each year.

Alberta.—All children 7 to 15 must attend full time.

British Columbia.—Children of ages from 7 to 15 must attend full time during the school year.

Yukon.—All children 7 to 14 years must attend full time where there is a school established.

School Year and Vacations

- Prince Edward Island.—July 1 to June 30; for financial purposes in Charlottetown and Summerside, calendar year. In Charlottetown and Summerside there are vacations of nine weeks in summer and one week in December, elsewhere there is a summer vacation of six weeks beginning July, a fall vacation of two weeks in October, and a winter vacation of one week in December; or, at the option of the District, there may be three weeks in May, three weeks in October, and one week in either July or December, but schools of two or more departments may have a summer vacation of eight weeks and one in December.
- Nova Scotia.—August 1 to July 31. There is a summer vacation of about eight weeks in July and August (but, with the consent of the inspector, trustees may fix these for January and February) and about two weeks at Christmastide, also Friday and Monday of Easter season, and all statutory holidays. The school year now comprises 200 authorized teaching days. Full Government grant to the teacher is earned by keeping school open 100 days each half year.
- New Brunswick.—July 1 to June 30, with a summer vacation commencing July 1, and extending until the Tuesday immediately following Labor Day, and a winter vacation of two weeks commencing on the Saturday before Christmas.
- Quebec.—July 1 to June 30. The Roman Catholic Committee regulations require schools closed each year, from the 1st of July to the Monday nearest the first of September; the Protestant Committee regulations from the 1st July to the 15th August, but in practice, schools may open in September.
- Ontario.—The school year consists of two terms: September 1 to December 22, and January 3 to June 29. In additional to the interval between these terms there is a vacation of one week following Easter. Statistics of the public and separate schools which are shown in this report, however, are for the two terms which made up the calendar year, while those for secondary schools, normal schools, technical schools, etc., are given for the year ending in June.
- Manitoba.—July 1 to June 30, with the following vacations: (a) Easter—the full week beginning with Easter Sunday; (b) Midsummer—from the first day of July to the third Monday in August, both days inclusive, or by special resolution of the board, to the first day of September; (c) Christmas, from the 24th day of December to the 2nd day of January, both days inclusive.
- Saskatchewan.—For finances, calendar year; for other statistics, July 1 to June 30. (Up to 1920, however, all statistics were given for the calendar year.) The vacations are as follows: In rural and village districts at least seven weeks in the year, of which one to six weeks must be in summer. The board may declare Easter week a holiday. The summer vacation comes between July 1 and October 1, and the winter between December 23 and March 1. In towns and cities at least eight weeks commencing July 2, and Christmas week and Easter week. The board of any district in which the school is to be kept open for at least 200 days during the year may allow additional holidays not exceeding two weeks.
- Alberta.—For finances, calendar year; for statistics, academic year, that is from July 1 to June 30. (Up to the year 1920, however, statistics were given for the calendar year.) The vacations are: In rural districts, seven to ten weeks; Easter week in yearly schools; summer, between July 1 and September 1; winter, December 24 to January 2. In towns and cities, eight to twelve weeks.
- British Columbia.—July 1 to June 30. The vacations are: Summer, July and August; winter, two weeks preceding first Monday in January; Easter, four days following Easter Monday.
- Yukon.—First Monday after Discovery Day (August 17) to Friday before Matriculation examinations in June. Vacations are: From June 18 (approx.) to August 18; December 24 to January 2; from Thursday before Good Friday to Wednesday following Easter Monday.

CHAPTER I.—PROVINCIALLY-CONTROLLED SCHOOLS, AND THE CENSUS OF 1931

The recorded enrolment at Canadian educational institutions in 1931 was 2,542,747, and the cost of their support was \$178,701,507. This represents an increase over the previous year of 2·1 p.c. in attendance, and 8·1 p.c. in costs—the latter percentage increase being higher on account of a great part of the enrolment increase being in the more advanced and more costly institutions. A concise numerical summary of pupils, teachers, institutions, and costs for the year may be given as follows:

	Number of Institutions	Number of Pupils	Number of Teachers	Expenditure
(1) Provincially controlled schools—				\$
(a) Ordinary day. (b) Technical day. (c) Technical evening. (d) Normal schools. (e) Blind and deaf.	136	2,137,810 56,320 121,437 7,956 1,785	$65,248 \\ 2,017 \\ 3,178 \\ 490 \\ 300*$	144,748,823
(2) Privately-controlled schools— (a) Ordinary day (b) Business training	816 179	95,083 22,827	5,657 607	7,187,000 (estimated)
(3) Dominion Indian Schools	352	16,415	500*	2,754,395
(4) Universities and Colleges— (a) Preparatory (b) University grade (c) Others	54† 153 10†	19,845 41,168 22,101	1,423 4,788	24,011,289
Totals	32,637	2,542,747	84,208	178,701,507

^{*}Approximate. †Including only affiliated schools that are not enumerated in (b).

Schools under the management of the provincial Departments of Education, i.e., (1) above, including as they do the ordinary schools of general education, a rapidly growing number of technical and vocational schools, the normal schools for teacher training, and most of the special schools such as those for the blind and deaf, serve 90 per cent of the total enrolment. The present chapter is mainly concerned with this group.

Elementary, secondary and business training schools outside of the provincial systems, i.e., under the control of private individuals, institutions, or corporations—(2) above—include about five per cent of the total. These are reviewed from the Dominion standpoint in Chapter II, as also are the federal government's Dominion wide chain of schools for the native Indian

The fourth and last group is composed of the institutions of higher education, their attendance being swelled by preparatory and extension classes in many of them to include over three per cent of the aggregate. Chapter III is devoted to them.

THE PROVINCIALLY CONTROLLED SCHOOLS

The common experience of all provinces in the year under review was a continued multiplication of older pupils. In the two years 1929-31 the number of pupils 16 years of age or older increased by 39·5 p.c. in the prairie provinces, and those in high school grades by 24·2 p.c. while the total number of pupils increased less than 2 p.c. Had it not been for this disproportionate increase in older pupils the two years would have witnessed a decline in the number at school on the prairies. As it was, the complete enrolment increased by 9,184, the secondary grade enrolment by 13,873. The tendency was less pronounced in other provinces, but nevertheless quite strong. The Maritimes had an increase of 9·6 p.c. in pupils over 16 years of age, as compared with 2·5 p.c. in their total increase. Quebec for the latest two year period recorded had an increase of 14·3 p.c. in the older pupils, and of 3·2 p.c. in all.

There is no doubt that the disproportionate increase in older pupils, to which attention has for several years been directed in the Annual Surveys of Education, has in the last few years been particularly strengthened by the difficulty of the teen age children in finding employment. Data on unemployment from the census of 1931 indicate that boys at the ages at which they usually begin work, are experiencing unemployment much more widely than older men and women, when their relative position as a group is compared with their position in 1921. Other records bear testimony of the same kind. It is a commonplace that the amount of delinquency

and misdemeanour bears a relation to idleness; and in the years 1929-30 the convictions of boys, between the ages 16 and 20, for crimes and other indictable offences were 91 p.c. higher than five years earlier, while the increase in crime among the whole population in the same period was only 57 p.c. This delinquency record of the older children is bad enough, but very probably would have been worse had not so many more of them been kept under the eye of a teacher.

The multiplication of older pupils has in many cases proved a strain on available accommodation, for it was not possible generally to anticipate such unwieldy increases. And the fact that they have come at a time when municipal and provincial treasuries find revenues shrinking and abnormal expenditure such as that for unemployment relief, etc., bulking large, has made the problem doubly difficult. There is plenty of evidence that the statistics of 1931 are too early to reveal anywhere near the full effect of the depression factors. Teachers' salaries remained fairly normal in 1931. As compared with the years immediately preceding, some of the provinces show slight gains in the average salary paid, others slight losses. But for the school year 1932, and still more as regards salary contracts for the year beginning in the fall of 1932, it seems certain that cuts have been general enough to reduce the average salary considerably in both years. It is a further repetition of past experience that in periods of depression a drop in wages and salaries comes about more slowly than the decline in prices and volume of production. Conversely, it is as well known that the return of normal salaries after the drop is to be expected much later than normal business activity. It is the latter prospect that is particularly disconcerting to the teachers, after the effective efforts that have been made in the last decade to improve the professional and permanency status of teaching through retirement plans, and other means. The common expression of opinion seems to have been that general reductions of teachers' salaries was a regretful necessity. They were frequently considered underpaid in normal times, when their remuneration and place in the community was compared with other occupations. As a basis for opinions on this point it may be well to show summarily the average salary of teachers in different provinces and under different circumstances in the year under review,—i.e., before reductions became general.

It may be noted incidentally that there is very little difference between the salaries paid to men and women in rural schools,—less than 10 p.c. as a rule. The same is true as regards the relation between male and female teachers with lower grade certificates, and tends to be the same for those who have little or no experience. But the salary advantage of the men increases as the grade of certificate and length of experience rises. That is, considering their remuneration only, there is considerably more encouragement for men to remain in the profession and to improve their standing than there is for women. The men who raise their certificates and continue teaching long enough to secure places in urban schools enjoy a salary advantage over the women of more than 50 per cent on the average.

It seems not unlikely that salary reductions have been more severe in rural than in urban schools, especially in the prairie provinces where crop conditions and prices have so reduced the farmers' incomes. In these provinces in 1931 the salary of city and town teachers was about 40

per cent higher than country teachers'. In addition to farm conditions there is another reason why rural salaries are likely to be cut more. In small schools the teacher's salary constitutes about 60 per cent of the district's school budget, while in cities, salaries generally require only 40-odd per cent of the money raised for schools in a year. Hence the large district is likely to have considerably greater possibility of reducing expenditure without reducing the pay of the teacher.

Another considerable difference in the financing of urban and rural school districts is in the proportion of their income received from provincial and municipal sources respectively. On the average about 15 per cent of the money spent on the publicly-controlled schools comes from the provincial treasury, the balance from local sources. But the tendency is for the larger and financially stronger municipalities to be more self-supporting in the matter of schools, and for the smaller rural districts to receive more help from the Province. A uniform cut in provincial grants is accordingly likely to be more severely felt by the smaller districts, simply because the grant there constitutes a larger portion of the school budget.

Since the matter of school grants has been receiving attention, as the result of the need felt in provincial finance for economy, the following table from data compiled by the Finance Branch of the Bureau of Statistics, will be of interest to educationists. It shows the rate at which expenditures of the nine provincial governments have increased for different services in the past fifteen years, as well as the relative importance of the different services as measured by their cost to provincial treasuries.

	Expend	Per cent Increase,			
	1916	1931	1931 over 1916		
	\$	\$	\$	\$

Agriculture and Forests	2,798,751	4,803,040	6,972,380		325.8

The table shows that ordinary expenditures on the whole have increased 254·4 per cent in the last fifteen years. Compared with this, provincial money spent on education has increased 246·0 p.c., so that its appropriations are now a slightly smaller part of the whole than formerly. In 1916 education was second in importance among the broad divisions into which expenditures are classified here, being exceeded only by the cost of public buildings, roads and works. Now it is also exceeded by interest on provincial indebtedness. Another informative comparison provided by the table is that between the cost of education and what might be called other social services. Expenditure for health and hospitals has grown a little faster than for education, while an expenditure of a similar amount for charitable purposes has grown from a relatively small sum in 1916, due mainly to the introduction of mothers' allowances and old age pensions' schemes in most of the provinces. Much the smallest increases are in the appropriations for civil government and for legal administration. Compared to these the increase in the amount taken for education is considerably bigger, but compared to the increase in other branches of expenditure, education is substantially below the average.

THE CENSUS OF 1931 ON SCHOOL ATTENDANCE

The decennial census of 1931, like those of previous decades, obtained a record of the number of the population attending school. For obvious reasons the census figures do not correspond with the reports of the provincial Departments of Education,—e.g., due to the inclusion of Indians, private school and college students, etc., in addition to the students of provincial schools. In the case of the latter the census reports only those living and in each province on June 1, while the teachers' reports include all who have attended at any time during the year, etc. The census returns, however, provide a broad basis for comparison of one decade with another. At the

time the present report goes to press only a part of the census information for 1931 has been tabulated. But the following table shows the remarkable increase of ten years in most of the provinces in the proportion of children and young people at school. For Canada as a whole, the population between the ages of 5 and 24 increased $19 \cdot 59$ p.c. while the number at school increased $25 \cdot 82$ p.c. In the provinces of Prince Edward Island and Nova Scotia where there was no increase in the young population, the number at school increased $6 \cdot 9$ p.c. and $10 \cdot 24$ p.c. respectively. In New Brunswick the school percentage increase was $12 \cdot 89$ per cent in excess of the percentage increase in the number of children, in Ontario $9 \cdot 91$ per cent, Manitoba $4 \cdot 22$ per cent, Saskatchewan $9 \cdot 72$ per cent, Alberta, $9 \cdot 67$ per cent, while British Columbia and Quebec showed little change. More than half of the gain in the Dominion as a whole seems to have been made by the girls, though there is considerable variation in this respect as between provinces.

In addition to the increase shown above in the proportion of young people attending school, there is a pronounced increase in every province since 1921 in the average length of time spent at school in a year. The census is taken on June 1, and asks how many months the child has attended school since September 1, in the preceding year. The maximum possible is nine months. Classifying the replys in three groups, as below, i.e., those who were 7-9 months at school, those who were 4-6 months at school, and those who attended less than four months, it is found that the proportion of the whole attending 7-9 months was $94\cdot6$ per cent in 1931 where it had been only $87\cdot96$ per cent in 1921. Those attending 4-6 months fell from $7\cdot8$ per cent to $3\cdot21$ per cent, and the short time group from $4\cdot24$ per cent to $2\cdot19$ per cent.

In 1921 Quebec was found to have a higher proportion of its school children in the group attending 7-9 months than any other province, and the smallest proportion attending shorter periods. In 1931 there is much less variation among the provinces than ten years ago, four of the others showing percentages very similar to Quebec's, and all having over 90 p.c. in the 7-9 months group, except one that is very close. The provinces showing the biggest gains in the 7-9 months group in the ten years were New Brunswick, Prince Edward Island, Saskatchewan and Alberta. Part of the gain in the last two is no doubt due to the fact that many school districts that formerly closed for two months in the winter, now operate the regular school year.

Judged by the months' standard, there is very little difference between the regularity of attendance of boys and girls. For the Dominion as a whole it is the same. Within provinces there are small variations, but they are much less significant than the variations of the foregoing table showing the proportions of the young population at school, male and female. There is, however, a considerable difference between rural and urban areas in the matter of regularity, and the table below shows this:

		Percentage of Those at School in 1921 and 1931 who attended the Number of Months hereunder

It will be seen from the table that much the greater part of the improvement in regularity of attendance was in rural parts. In 1921 only 81·31 per cent of rural school children attended as much as seven of the nine months; in 1931-91·54 per cent did. The urban children in this attendance category increased from 94·75 per cent to 97·23 per cent. The urban figure was so high in 1921, of course, as not to permit of as much improvement as took place in rural areas. The highest urban percentages are now to be found in Alberta and New Brunswick with 98·43 per cent and 98·27 per cent respectively, though there is but little variation, all of the provinces being over 95 per cent. The term "rural" has not quite the same significance in different provinces, especially in British Columbia, where it includes "rural municipalities" or suburban areas such as would be recorded "urban" in other provinces. British Columbia's rural percentage exceeds all others, partly for this reason, no doubt. Ontario follows, though Alberta, Saskatchewan, and Quebec are only very slightly less. Even in such provinces as the last mentioned there is considerable variation in the type of settlement represented by the term "rural," children of rural areas in the prairie provinces probably being considerably farther from a school on the average than those of other provinces, due to the larger size of farms.

THE CENSUS OF 1931 ON LITERACY

In addition to the data on school attendance the decennial census records for every person whether he or she can read and write. In compiling the facts on this point, the population under the age of five years is neglected, and for certain comparisons all under ten years are omitted. The

table presented below shows that the proportions of the population over 5 years of age able to read and write have increased since 1921 in every province. Much the most rapid increases have been in the four western provinces, where the percentage who can read and write, in spite of the large immigrant element in the population, is now for the first time equal to the percentage in the five older provinces as a unit. The remarkable gain of literacy in the North West Territories, too, is worthy of note,—from 10.03 per cent to 34.91 per cent.

In all except the Prairie Provinces the literacy of females exceeds that of males, though in British Columbia there is very little difference. The excess female illiteracy in the western provinces is mainly attributable to their foreign born residents. In the Dominion as a whole the

percentage for females is 92.84 p.c., for men 91.88 p.c.

The present situation marks a considerable advance over the opening of the present century. At the 1901 census 82.88 per cent of those over 5 years could read and write, whereas the present proportion, as stated, is 92.34 per cent. A distinction can not yet be made for 1931 between Canadian born, other British born, and foreign born, but in 1921 their respective proportions able to read and write were 89.04 per cent, 98.53 per cent and 86.12 per cent, the two latter having an advantage by including only a few children, whereas the Canadian born group includes many (say between 5 and 8 years) who had not gone to school long enough to be able to read and write.

CHAPTER II.—NON-PROVINCIAL SCHOOLS AND EDUCATIONAL ASSOCIATIONS

Under the terms of the British North America Act, education in Canada is primarily a matter of provincial administration, and a governmental Department of Education in each province has under its immediate jurisdiction a system of schools—schools of general education, technical and vocational schools, special schools for those unable to take the ordinary instruction, and teacher-training schools—which in the aggregate, as observed in Chapter I, include 90 per cent of the enrolment in all institutions of learning. But outside of these provincial school systems from the administrative standpoint, though necessarily related to them closely, are important groups of schools and educational activities. These fall naturally into two groups: (1) Those controlled by the Dominion Government; (2) Those that are immediately controlled by private individuals or corporations (though, of course, ultimately thay may be either encouraged or restrained by the provincial governments). This second group includes schools not supported by public funds, the publication of school periodicals, and the activities of various voluntary educational associations.

The present chapter is concerned with these two groups.

A. THE DOMINION GOVERNMENT

Indian Schools.—From the time of the formation of the Dominion the federal government has been charged with the education of the native Indian children, and has maintained a system of schools for them quite distinct from the provincially-controlled schools. They are administered by the Department of Indian Affairs at Ottawa. The census of the Department in 1929 showed 108,012 Indians in Canada, and in 1931 there were 16,415 children attending school, of whom 7,831 were accommodated in 80 boarding schools and 8,584 in 272 non-residential schools. There were schools in every province and in the Yukon and North-West Territories.

In the operation of the schools, especially the residential schools, the Department enjoys the close co-operation of different churches. The cost per pupil in the boarding schools is between four and five times as great in in the small schools, but they enable a greater diversity of instruction to be given, including training in household science for the girls and in agriculture and certain trades for the boys. The schools are everywhere accessible without cost to the Indians. Comparatively few of the children go beyond the elementary grades, but the proportion in advance of the fourth grade has doubled in the last twelve years, probably due largely to compulsory attendance since 1919 of all physically-fit between the ages of seven and fifteen. In 1931 the compulsory attendance age limit was raised to sixteen years. The following table shows summarily the increasing importance that the Indian schools have assumed in the last fifty years.

Year	Number of Schools	Enrolment	Average daily attendance	Percentage in daily attendance	Decennial increases (p.c.) in average attendance
1881 1891 1901 1911 1921 1931	114 268 290 324 326 352	4.126 7,554 9,576 11,190 12,558 16,415	2,088 4,194 6,117 6,763 8,074 12,231	$50 \cdot 60$ $55 \cdot 52$ $63 \cdot 88$ $60 \cdot 44$ $64 \cdot 29$ $74 \cdot 51$	100.86 45.85 10.56 19.38 51.48

The general programs of studies followed are those of the provincial Departments of Education, with special emphasis on care of the health, language, and vocational subjects. All schools are inspected frequently by officers of the Department of Indian Affairs, and provincial school inspectors visit all classrooms except in New Brunswick and British Columbia, where there are special Indian School Inspectors. Practically all of the residential schools are under the oversight of a physician, and in most cases there is a resident nurse. Pupils in the non-residential schools are examined by agency physicians and travelling nurses. The most promising and industrious among the graduates of the Indian schools are assisted financially in continuing their education elsewhere, or in establishing homes, 260 having received such assistance in 1931. In addition, over 200 Indian children were supported in orphanages and schools for white children. For more complete data, see the tables of Part II.

Northwest Territories.—There is no public school system in the Northwest Territories, but grants for educational purposes are made by the Department of the Interior of Canada to the Roman Catholic and Anglican Churches, both of which maintain schools for white, Indian and

xvii

50479-в

Eskimo children in connection with their missions. The Roman Catholic Church operates three boarding schools and four non-residential schools; the Anglican Church one and four, respectively. In addition to these, provision was made for the holding of classes for children temporarily gathered in the vicinity of any point where there is a mission.

Grants in Aid of Technical Education.—Several times in the past two decades the Dominion has come to the assistance of the provinces in providing money to encourage a greater diversity of instruction in their schools. In 1913 the Agricultural Instruction Act was passed, distributing \$10,000,000 in ten years among the provinces for the advancement of agricultural education. In 1919 a similar sum was voted for the improvement of technical education, on condition that the provinces themselves each spend an additional amount equivalent to its share; in 1929 the original time limit of ten years in which the provinces might qualify for their grants was extended five years, as Ontario was the only one that had earned the full portion to which it was entitled under the Act of 1919. Finally, in 1931, an annual sum of \$750,000 for fifteen years was voted for the same purpose, so the interest of the Central Government in the field of technical education seems likely to continue for a considerable period.

In 1929, the last year in which all the provinces were drawing grants, there were 121,252 pupils in schools receiving aid from the Dominion-45,617 in day courses, 73,877 in evening classes, and 1,447 by correspondence. In 1930-31 only five provinces received grants—the three Maritimes, Manitoba, and Saskatchewan—the other four provinces having previously received all of their share of the \$10,000,000 provided by the Act of 1919.

The Technical Education Acts have been administered in the Department of Labour at

Ottawa, by the Technical Education Branch. An Annual Report of the Branch reviews the work of the schools assisted by its grants, and several monographs have been issued on various subjects in the field of vocational and industrial training. The work assisted includes prevocational or junior high school courses; commercial, homemaking, applied art, and industrial courses in high schools; part-time classes for apprentices and employed adolescents; short-term courses for adult workers; evening classes for adults; and correspondence instruction.

Military, Physical and Cadet Training.—For a full review of the activities that come under this heading the Annual Report of the Department of National Defence should be consulted. Details of the Royal Military College at Kingston, where 200 gentlemen cadets are annually taken in training are included in the present report with the chapter and statistical section on higher education. A variety of short term training courses is given to members of the permanent and non-premanent active militia, and to airmen at various centres. The amount expended by the Department in 1930-31 on the encouragement of physical training and cadet services was \$500,000. Over 11,000 teachers and normal school students attended courses provided in physical education and 6,128 received certificates of proficiency. Cadet corps enrolled 131,985 boys, three leading features of training being first aid, signalling and miniature rifle practice. The Department of Marine conducts short courses in navigation at six Canadian cities. It also conducts examinations for Masters' and Mates', and Radiotelegraphic operators' certificates.

Penitentiary Education.—In each of the Dominion's six penitentiaries one or more teachers are included on the regular staffs to provide the essentials of an elementary education to those in custody, while numerous agricultural and trade instructors are employed. Of a total of 3,714 inmates in 1931, 484 were under 20 years of age, and 1,710 between the ages of 20 and 30. Penitentiary pupils frequently take the Departmental examinations of the various provincial governments.

Division of Child Welfare.—The Department of Pensions and National Health has included a Division of Child Welfare since 1920, which, among other activities co-operates with provincial Departments of Education in connection with the promotion of school hygiene, medical and dental inspection of schools, provision of school nurses, the training of children needing special care, and the instruction of teachers-in-training in normal schools on principles and methods of preventive medicine and of child hygiene and welfare. For a full account of the activities of the Division, the Annual Report of the Department should be obtained.

Miscellaneous Grants.—There are various grants made by the Dominion to organizations directly or indirectly connected with education, but which are not administered by the Federal Government. Among such may be mentioned those to the Canadian Council of Child Welfare, the Victorian Order of Nurses, etc.

Dominion Bureau of Statistics.—In 1919 an Education Branch was established in the Dominion Bureau of Statistics as a result of a conference of representatives from the Provincial (Copies of the Proceedings of Departments of Education and the Dominion Government. (Copithis Conference are still obtainable from the Dominion Statistician.) Prior to that time there had been no organization for collecting and collating data on education for the Dominion as a whole, but the desirability of such an office had on frequent occasions been pointed out by educational bodies. In the Annual Surveys of Education that have since been published by the Bureau of Statistics, fundamental information on all the provincial school systems has been brought together, and from year to year, through the co-operation of the several Departments of Education, the uniformity and comparability of the information for different provinces has

been steadily increased. In order to obtain the additional and more comparable information several of the Provincial Departments collect reports from each of their schools or classrooms and forward them to the Bureau of Statistics for compilation.

Though the reports from schools of the provincial systems are in all cases collected through the Departments of Education, those from universities and colleges, and in most of the provinces those from private schools, associations, etc., are obtained from the individual sources directly

by the Bureau.

In addition to the Annual Survey of Education in Canada, separate bulletins or monographs are issued from time to time dealing with certain sections of the education field, e.g., "Illiteracy and School Attendance" as revealed in the census. Teachers, trustees, inspectors and others interested in education may be placed on the mailing list by communicating with the Dominion Statistician, Ottawa.

B. NON-GOVERNMENTAL EDUCATIONAL ACTIVITIES

PRIVATE SCHOOLS

Private elementary and secondary Schools in Canada (excepting Quebec) enrolled 33,973 students in 1931. The schools numbered 292, of which 66 were girls' schools, 52 were boys' schools and 174 were mixed. Almost a third of the pupils lived in residence. Of the total there were 19,890 in elementary grades, 11,223 in secondary grades, and 2,860 others, most of whom were doing special work at the high school level. If the high school students in the preparatory departments of arts colleges are added, the number is raised from 11,223 to 16,143, which means that about 9 per cent of pupils following academic high school courses in the eight provinces are in private schools. The table below summarizes the information for individual provinces. Figures for Quebec are not available for 1931, but in 1930 there were in that province 524 private or independent schools, with 57,841 pupils.

	Number	Pu	pils		Grades		T 1
	Schools	Boys	Girls	Elemen'y	Second'y	Special	Total
Prince Edward Island. Nova Scotja New Brunswick Ontario. Manitoba Saskatchewan Alberta. British Columbia	25 85 39 37	59 933 1,516 4,200 2,722 989 1,368 2,044	467 1,813 2,415 6,730 2,412 1,360 1,576 2,896	452 1,842 2,478 4,310 4,768 1,243 1,344 3,453	49 757 653 6,093 443 1,089 745	25 147 713 773 15 17 855 97	526 2,746 3,931 11,196 5,294 2,349 2,944 4,987
Total Schools	292 29	13,831 3,949	19,669 971	19,890	11,223 4,920	2,642	33,973 4,920

Note.—Where boys and girls, or elementary, secondary and special do not add to the total, the difference is those unspecified by sex or grade.

Attendance is more regular in private schools than in public, a natural consequence of the pupils being older, and many of them boarding at school. The average daily is 84 p.c. of the year's enrolment, where it is 77 per cent in public schools. By 20-day intervals they compare as follows:—

	Private	Public		Private	Public
Less than 20 days	1.49 2.01 2.60 2.86 2.60 3.24	$2 \cdot 47$ $4 \cdot 51$ $4 \cdot 20$ $3 \cdot 26$ $2 \cdot 78$ $4 \cdot 00$	120–139 days 140–159 " 160–179 " 180–199 " 200 days and over	$4 \cdot 40$ $9 \cdot 16$ $25 \cdot 59$ $38 \cdot 70$ $7 \cdot 35$	$4 \cdot 92$ $8 \cdot 73$ $21 \cdot 25$ $43 \cdot 02$ $0 \cdot 86$

A directory of private schools is published in this edition of the Annual Survey of Education, Part II. It shows the name and location of each school, the type of control, the work taught, and whether it is a boys' or girls' school.

Business Colleges.—Compared to preceding years, 1931 was an unsatisfactory one on the whole for private business and commercial schools. The number of their students dropped 21.6 per cent—from 29,120 in 1930 to 22,827 in 1931,—and it is frequently remarked by the school principals that their students saw little encouragement to continue their courses to completion due to prospects of employment being dull. The potential business college students appear too, to have been remaining longer at schools of general education where abnormal

increases for the year are reported in the higher grades. The ratio between day students and evening students remains about the same, approximately two to one. The table hereunder gives comparative figures of enrolment in the larger cities for the last two years:

	Total Enrolment		Night Classes		Day Classes	
	1930	1931	1930	1931	1930	1931
Prince Edward Island. Halifax, N.S Other Nova Scotia Saint John, N.B Other New Brunswick. Montreal, Que. Other Quebec. Toronto, Ont. Hamilton, Ont. Ottawa, Ont. London, Ont. Other Ontario. Winnipeg, Man. Other Manitoba. Regina, Sask. Saskatoon, Sask. Other Saskatchewan.	$ \begin{array}{c} 194 \\ 548 \\ 239 \\ 208 \\ 533 \\ 2,756 \\ 350 \\ 4,960 \\ 938 \\ 1,492 \\ 6,604 \\ 3,306 \\ 239 \\ 514 \\ 606 \\ 492 \\ \end{array} $	191 510 286 212 424 2,493 362 3,599 703 1,557 439 3,894 2,954 221 424 428 434	45 122 89 71 140 948 142 1,791 290 589 1,806 1,506 59 162 160 137	51 108 94 71 70 828 193 1,269 175 718 { 133 804 1,199 49 152 164 152	149 426 150 137 393 1,808 208 3,169 648 903 } 4,798 1,800 180 352 446 355	140 402 192 141 354 1,665 169 2,330 528 839 306 1,755 172 272 264

Total Canada	29,120	22,827	9,724	7,484	19,396	15,343

A directory of private business and commercial schools in Canada will be found in Part II. It gives the name and address of each school.

Other Private Schools.—Schools in the above groups constitute by far the two most numerous types of private schools. Other privately owned schools of a technical character—those giving instruction in telegraphy, barbering, motor mechanics, etc., are to be found in all of the larger cities. Correspondence schools also enroll considerable numbers in common school subjects as well as courses of a technical or professional character. (Previous reports have described the Frontier College.) Schools of music should also be mentioned, but statistics are not compiled for any of these.

SCHOOL PERIODICALS

The following list is published as a directory of magazines in Canada whose chief interest is in the field of education. Most of them are published either by corporations or teachers' associations, but for the sake of completeness those sponsored by Departments of Education are also included. The names of officers, except for possible inaccuracies, are as in the latter part of the calendar year 1932. The number of years a journal has been published is indicated by the volume it is in.

Journal of Education.—Being the supplement to the Report of the Superintendent of Education for Nova Scotia, published about five times per year. The medium of the Education Department's official notices. Published since 1866. Semi-annual before 1931, more frequently from 1931 on.

The Nova Scotia Teachers' Bulletin.—Official organ of the Nova Scotia Teachers' Union, Vol. 9. Bi-monthly except July and August. Editor, H. V. Corkum, Box 266, Mahone Bay, N.S.; Business Manager, John J. Oliver, Box 666, Yarmouth, N.S.

The Educational Review.—Official organ of the New Brunswick Teachers' Association and Prince Edward Island Teachers' Federation, Vol. 47. Monthly except July and August. Editor and Business Manager, Miss Jessie I. Lawson, 14 De Monts Street, Saint John West, N.B.

L'Enseignement Secondaire au Canada.—A monthly review issued by the Permanent Committee of Affiliated Institutions of Secondary Instruction, published jointly by Laval University and the University of Montreal. Managing Director, M. l'Abbé Arthur Maheux.

L'Enseignement Primaire.—The organ of Catholic primary schools of the province of Quebec. Monthly, Vol. 54. Editor, C. J. Magnan, Inspector-General of Catholic Normal Schools, 79 Chemin Ste-Foy, Quebec; Manager, P.O. Box 636, Upper Town, Quebec.

L'Ecole Canadienne.—Pedagogical review in which both languages are used. Official organ of the Montreal Catholic School Commission. Monthly. Eighth year of publication.—Librairie Beauchemin, Ltée., 430 St. Gabriel Street, Montreal, Quebec.

Technique.—The official organ of Quebec technical schools. An industrial review with some articles in each of the French and English languages in each issue. Published monthly, Vol. VIII. Printed by the printing section, Montreal Technical School. Director, Augustin Frigon, Polytechnic School, 1430 St. Denis St., Montreal.

The Educational Record of the Province of Quebec.—Quarterly journal in the interest of the Protestant schools of Quebec, and the medium through which the Proceedings of the Protestant Committee of the Council of Education are communicated, Vol. 51. Editor and Publisher, J. C. Sutherland, Inspector-General of Protestant Schools, Quebec.

The Teachers' Magazine of Quebec.—Official organ of the Provincial Association of Protestant Teachers of Quebec. Bi-monthly during school year, Vol. 15. Editor, Miss Isabel E. Brittain, 1431 Tower Avenue, Montreal; Business Manager, F. N. Stephen, 4272 Hampton Ave., Montreal.

The School.—A magazine devoted to Elementary and Secondary Education in Canada. Monthly except July and August, Vol. 21. Editorial Board, the Staff of the Ontario College of Education, University of Toronto, 371 Bloor St. W., Toronto 5; Managing Editor, W. E. Macpherson.

Ontario Secondary School Teachers' Federation Bulletin.—Bi-monthly except July and August, Vol. 13. Editor, E. A. Hardy, 124 Duplex Ave., Toronto 12.

The Educational Courier.—Official organ of The Federation of Women Teachers' Associations of Ontario, and The Ontario Public School Men Teachers' Federation. Bi-monthly except July and August, Vol. 3 as joint publication of the two associations. Editor, Miss H. E. Carr, 1139 Bay St., Toronto 5; Business Manager, J. E. Robertson, 16 St. Clair Gardens, Toronto.

School Progress.—"The School Executives' Magazine." First issue in September, 1932. Editor, H. F. Coles, 2 College St., Toronto.

The Canadian School Journal.—Official organ of the Ontario Educational Association, Vol. 10. Published monthly by the Ontario School Trustees' and Ratepayers' Association (one of the main departments of the O.E.A.). Editor, Samuel Farmer, Port Perry, Ontario.

The Canadian Teacher.—Published by the Educational Publishing Company, 36 Shuter St., Toronto. Every 19 days except July and August, beginning September 1, Vol. 37. Editor, Miss Louise R. Rourke.

The Ontario Home and School Review.—Published quarterly by the Ontario Federation of Home and School Associations. Executive Secretary-Treasurer, Mrs. H. Maltby, 101-A Bloor St. W., Toronto.

The Western School Journal.—Incorporating "A Bulletin of the Department of Education for Manitoba" and "A Bulletin of the Manitoba Educational Association." Monthly except July and August, Vol. 27. Editor, W. A. McIntyre, Principal of Winnipeg Normal School.

The Manitoba Teacher.—Official organ of the Manitoba Teachers' Federation. Monthly except July and August, Vol. 14. Editor, W. Sadler, 211 Belvidere St., St. James.

The Saskatchewan Teacher.—Official organ of the Saskatchewan Teachers' Alliance, Monthly, Vol. 7. Editor, A. E. Cooke, Battleford, Sask.

The Western Teacher.—"The modern classroom magazine." Lesson plans and outlines for elementary schools, Vol. 3. Published monthly by Western Extension College, Ltd., Educational Publishers, Saskatoon and Winnipeg.

The School Trustee.—Published monthly by the Saskatchewan School Trustees' Association. Vol. 3. Managing Editor, C. E. Little, K.C., 2 Victoria Park Building, Regina.

The Western Educator.—A magazine for classroom service, Vol. 7. Published monthly except July and August, by the Institute of Applied Art, Ltd., 10042-109th St., Edmonton.

The A.T.A. Magazine (official organ of the Alberta Teachers' Alliance, Inc.) and The A.S.T. Magazine (official organ of the Alberta School Trustees' Association) under one cover. Monthly, Vol. 13. Editor of the teachers' section, J. W. Barnett, Imperial Bank Building, Edmonton; Editor of the trustees' section, Mrs. A. H. Rogers, Fort Saskatchewan, Alta.

The B.C. Teacher.—Published on the 15th of each month except July and August by the British Columbia Teachers' Federation, Vol. 12. Managing Editor, Harry Charlesworth, Aldine House, 1300 Robson St., Vancouver.

The Public School Magazine.—A monthly magazine for school children, especially of Victoria and district, Vol. 15. Editor, Donald A. Fraser, North Ward School, Victoria. Discontinued in December 1931.

Parent-Teacher News.—Published by the British Columbia Parent-Teacher Federation. President, Mrs. A. E. Delmage, 1201 W. 8th Ave., Vancouver.

EDUCATIONAL ASSOCIATIONS

The list below is published as a directory of associations in Canada whose chief interest lies in the field of education. Those whose scope is Dominion-wide are listed first, then those of the Maritime Provinces, Quebec, Ontario and the Western Provinces, in order. The names of officers, except for possible inaccuracies, are as in the latter part of the calendar year 1932.

Dominion

The Canadian Education Association.—Founded in 1892 as Dominion Educational Association. Name changed to Canadian Education Association, with a new constitution, in 1918. Number of members, 100. President, Dr. J. T. Ross, Deputy Minister, Department of Education, Edmonton; Secretary, Dr. W. J. Karr, Department of Education, Toronto. Meeting in November 1929 at Montreal, the next to be in Toronto November 1933.

National Conference of Canadian Universities.—Founded 1911, membership, 29 universities and colleges and the National Research Council. Annual or biennial meetings. President 1932-33, President R. C. Wallace, University of Alberta, Edmonton; Secretary, Prof. W. A. Mackintosh, Queens University, Kingston. Last meeting was held May 1932 at Ottawa.

Canadian Teachers' Federation.—Founded 1920. Annual meeting in New Brunswick, July 1931. The 1932 meeting was postponed, and will be held in Regina, 1933. Secretary, M. J. Coldwell, 131 Connaught Crescent, Regina.

Canadian National Federation of Home and School Associations.—Founded July, 1927. Membership approximately 25,000. President, Dr. George W. Kerby, Mount Royal College, Calgary; Secretary, Mrs. A. M. Curtis, 514 Sunderland Ave., Calgary. First biennial meeting May, 1929, at Toronto; second July 1931, at Calgary; third to be held in Port Arthur, 1933.

National Council of Education,—Founded 1919. Secretary, Fred J. Ney, M.C., 411 Power Bldg., Winnipeg.

Overseas Education League.—Founded 1910. Organizer, Major F. J. Ney, 411 Power Bldg., Winnipeg. Among other activities, conducts annual tours to Great Britain and Continental Europe, for teachers and others.

League of the Empire, Canadian Branch.—Founded in London, England, in 1901. Later a Canadian Branch was formed with Principal Maurice Hutton of University College, Toronto (present address, 50 Prince Arthur Ave., Toronto) as Chairman, which office he still holds. Promotes inter-provincial and intra-Empire correspondence between school children, and exchange of teachers, mainly with London, England. Secretary, Miss F. M. Standish, Toronto.

Canadian Educational Guidance Movement.—Founded December 29, 1930. (Formerly the Canadian Collegiate Movement). Secretary, Herbert L. Troyer, 15 Joicey Blvd., Toronto 12.

Canadian School Trustees' Association.—Founded 1922. President, Samuel Farmer, Port Perry, Ontario; Secretary, M. A. Campbell, 18 Bloor St. W., Toronto. Last meeting was held in Montreal, November, 1930.

Association of Headmistresses of Canada.—First annual meeting in Montreal, March 1932. A constitution drawn up at a preliminary meeting in Toronto, December 1931, was adopted. Object of the association is to provide a medium of expression for girls' private secondary schools in Canada. President, Miss Marian Wood, Havergal College, Toronto; Secretary, Miss Edith M. Read, Branksome Hall, Toronto.

The New Education Fellowship.—Branches have been organized in Canadian cities from coast to coast, including Halifax, Montreal, Toronto, Winnipeg, Calgary, Vancouver and Victoria. Honorary Secretary, for Canada, Miss Marjorie Lord, 43 St. George St., Toronto 5, Ont.

Maritimes

Prince Edward Island Teachers' Federation.—Founded 1924 (continuing the P.E.I. Teachers' Union, previously known as the P.E.I. Teachers' Association, founded about 1880). Annual meetings held at Charlottetown in April. Membership, 514. President, Elmer Pineau, Tignish; Secretary, Miss Walsh, Queen Square School, Charlottetown.

Nova Scotia Teachers' Union.—Founded 1896. Re-organized 1920. President, S. I. Robinson, Halifax, N.S.; Secretary, Miss G. E. MacMinn, Truro, N.S. Last meeting was held March 1932 at Halifax.

Nova Scotia Headmasters' Association.—Founded 1930. Secretary, H. V. Corkum, Mahone Bay. Annual meetings are to be held at Halifax last week of Christmas holidays.

New Brunswick Teachers' Association.—Founded 1918. Membership, 1,036, May 1931. Last biennial meeting was held in Fredericton, June 1932. Secretary, C. T. Wetmore, Consolidated School, Rothesay, N.B.

The Teachers' Institute of New Brunswick.—Founded 1878. Number of members 950. President, Dr. A. S. McFarlane, Chief Superintendent of Education, Fredericton; Secretary, Dr. H. H. Hagerman, 123 Charlotte St., Fredericton, N.B. Last meeting was held June 28-30, 1932 in Fredericton, N.B.; the next meeting probably in Saint John, N.B., in June 1934.

Quebec

Provincial Association of Protestant Teachers of Quebec.—Founded 1864. Sixty-eight annual convention in Montreal, October, 1932. Membership about 1,700. President for 1931-32, Miss

Alice C. Dresser, St. Francis High School, Richmond; General Secretary, W. E. Black, 352 Lansdowne Ave., Westmount, Que.

High School Principals' Association of the Province of Quebec.—Founded 1927. Members, about 50. Meeting in Montreal, October 1931. Secretary, H. S. Cook, St. Lambert, Que.

A convention of normal school principals is held every three years, the eighth at Quebec, September 1931. Conventions of regional and district school inspectors are held at occasional intervals. Teachers' conferences or journées pédagogiques have recently been organized by regional and district inspectors for each of the eighth school regions of the province. An annual conference of teachers in each region is held shortly after the opening of the fall term. The combined attendance in the fall of 1931 was approximately 7,650 teachers.

Local Associations of Catholic Teachers.—Though there is no province wide association of Catholic teachers, local circles holding regular meetings and discussions are quite numerous, some of the groups including a large number of teachers. The names of some associations follow:—(1) L'Association des Instituteurs Catholiques de la Circonscription de l'Ecole Normale Laval, Quebec City, President J. P. Garneau; Secretary, Charles Lever, Inspector of Schools, Ste. Anne des Monts. (2) Cercle pédagogique Desrosiers. Meets periodically during year at Jacques Cartier Normal School, Montreal. Assistant Secretary, Maurice Letour. (3) Alliance Catholique des Instituteurs de Montréal. (4) Institutrices de l'Alliance Catholique des Professeurs de Montréal. 24th reunion held in Le Plateau superior school, Feb. 1932. President Miss D. Racicot; Secretary, Miss M. G. Richard. (5) Association des Instituteurs de Trois Rivières. (6) Cercle Marguerite-Marie, Pedagogic circle of the lady teachers of Three Rivers. Organized in Sept. 1931. (7) Association des Instituteurs de Chicoutimi. (8) Cercle des Institutrices de Hull. Secretary, Miss Donalda Thibault. (9) Association des Institutrices Catholiques de Shawinigan Falls. Organized in the fall of 1931.

Ontario

Ontario Educational Association.—Founded in 1861. Annual meetings are held in Toronto Easter Week. President Malcolm MacBeth, Milverton; Secretary, A. E. Bryson, 44 Silverthorne Ave., Toronto 9.

Ontario Secondary School Teachers' Federation.—Founded in 1919. President, John Jeffries, 14 Oakmount Road, Toronto; Secretary, S. H. Henry, 226 Evelyn Ave., Toronto 9. Membership, about 3,500. Annual meetings held during Christmas vacation at Toronto.

The Associated High School Boards of the Province of Ontario.—First Annual Convention, Toronto, May 1932. President, J. G. Cornell, Scarboro; Secretary, Chas. G. Webster, 123 Guestville Ave., Toronto 9.

Federation of Women Teachers' Associations of Ontario.—Founded 1918. Membership, 4,000-5,000. President, Miss M. Burns, 42 Lorne Ave., Ottawa; Secretary, Miss H. E. Carr, 1139 Bay St., Toronto 5. Annual meetings held at Easter in Toronto.

The Ontario Public School Men Teachers' Federation.—Founded 1920. Active members, 1,076, Associate members, 376. President, C. Cook, 41 Willard Ave., Ottawa; Secretary, J. E. Robertson, 16 St. Clair Gardens, Toronto. Annual meetings held in Toronto during Easter week.

Ontario Federation of Home and School Associations.—Founded in 1919. There are about 300 local associations with an estimated membership of 20,000. President, Mrs. R. S. McLaughlin, Oshawa; Executive Secretary, Mrs. H. Maltby, 101-A Bloor St. W., Toronto 5.

Ontario Urban School Trustees' Association.—Founded 1919. Membership in all cities and towns in Ontario with a population over 5,000. President, H. L. Kerr, Toronto; Secretary, C. T. McBride, St. Catharines. The last annual meeting was held at Fort William, 1932; the next will be held at St. Catharines.

Western Ontario Secondary Schools' Association.—Founded 1921. Number of members, 55. Promotes interschool activities in all forms of athletics, debating and public speaking. President, W. H. Downey, The Hon. W. C. Kennedy Collegiate Institute, Windsor, Ont.; Secretary, Professor N. C. Hart, University of Western Ontario, London. Annual meetings held in May at the University of Western Ontario.

Workers' Educational Association of Ontario.—Organized in 1923. Secretary, Drummond Wren, 231 Simcoe Hall, University of Toronto, Toronto. For students in courses under its auspices see Part II.

Western

Manitoba Educational Association.—Founded 1905. Membership, about 2,000. President, Le Rév. Frère Joseph, Principal, Provencher Collegiate Institute, St. Boniface; Secretary, H. J. Russell, 255 Machray Ave., Winnipeg. Annual conventions are held at Easter in Winnipeg.

Manitoba School Trustees' Association.—Founded 1906. Membership 600-700. President, A. T. Hainsworth, Deloraine; Secretary, Robert Love, Melita, Manitoba. Annual conventions are held in February, but the 1932 meeting was not convened due to temporary economic conditions.

Manitoba Teachers' Federation.—Founded 1918. Number of members, 2,000-3,000. President, James Crossley, Minnedosa; Secretary, E. K. Marshall, 618 McIntyre Block, Winnipeg. Annual meetings are held Easter week in Winnipeg.

Saskatchewan Educational Association.—Founded 1908. Annual conventions Easter week, Saskatoon 1932. President, G. A. Brown, Normal School Principal, Moose Jaw; Secretary, J. Alex. McLeod, Provincial Normal School, Regina.

Saskatchewan Teachers' Alliance.—Founded 1916. Number of members 2,000-3,000. President, Miss H. F. Wolfe, Victoria Public School, Saskatoon; Secretary, A. E. Cooke, Battleford, Sask. Annual meetings held Easter week at Saskatoon in 1932.

Saskatchewan School Trustees' Association.—Founded 1915. President, R. H. Heane, Elbow, Sask.; Secretary, C. E. Little, K.C., 2 Victoria Park Bldg., Regina. Annual conventions are held in February, at Saskatoon in 1932. Attendance 400.

The Alberta Educational Association.—Founded 1910. Membership 1,000. President, G. A. Clayton, Edmonton; Secretary, C. E. Leppard, 123 Superior Ave., Calgary, Alta. Annual meetings are held Easter week, at Calgary in 1932, at Edmonton in 1933.

The Alberta Teachers' Alliance Inc.—Founded 1917. President, Principal M. W. Brock, Mount Royal School, Calgary; Secretary, J. W. Barnett, Imperial Bank Bldg., Edmonton, Alta. Annual meetings are held Easter week.

Alberta School Trustees' Association.—Founded 1907. Annual meetings are held in February, at Calgary in 1932. President, J. O. King, Raymond; Secretary, Mrs. A. H. Rogers, Fort Saskatchewan, Alberta.

The British Columbia Teachers' Federation.—Founded 1916. Membership 2,416. Annual conventions at Easter, in Vancouver in 1932. President, Clifton G. Brown, High School Principal, South Burnaby; General Secretary, Harry Charlesworth, Aldine House, 1300 Robson St., Vancouver.

British Columbia School Trustees' Association.—Founded 1905. Annual conventions. Secretary, Geo. A. Grant, 713 Pacific Building, Vancouver.

The British Columbia Parent-Teacher Federation.—The first local parent-teacher association in the province was organized in 1915. The provincial Federation was organized in 1923. Annual convention held in Vancouver, April, 1932. President, Mrs. A. E. Delmage, 1201 W-8th Avenue, Vancouver, B.C.

HEALTH AND WELFARE ORGANIZATIONS

The following organizations have all been described at some length in previous issues of this Report. Their work is directly connected with the work of the schools, but in a different manner to the associations listed above.

Canadian Junior Red Cross.—Membership at June, 1931, was 237,974 in 7,853 branches. The unit of organization is the classroom, each classroom being a branch. For statistics see Part II. National Headquarters, 410 Sherbourne St., Toronto 5.

Canadian Council on Child and Family Welfare.—Founded 1921. Seeks to act as a connecting link between the Child Welfare Division of the Department of Pensions and National Health and the Council's constituent bodies, and to act in close advisory relationship to the administrative health and welfare bodies of the Provincial Governments. Executive Director, Miss Charlotte Whitton, 245 Cooper St., Ottawa.

Canadian Association of Child Protection Officers.—Founded 1921. Membership, 46. Aims through study and discussion to secure uniformity in the laws relating to the protection and care of children, and in the methods of their administration and enforcement. Secretary, Judge Ethel MacLachlan, Juvenile Court, Regina, Sask.

Victorian Order of Nurses for Canada.—Founded 1897. Had 84 branches and 327 nurses on duty in 1931. See Part II for further data. Elizabeth L. Smellie, Chief Superintendent, Jackson Building, Ottawa.

Canadian Council of the Girl Guides' Association.—Founded in 1912. The unit of organization is the Company of Pack, details of the number of which, and of membership may be seen in Part II. General Secretary, Miss E. A. Riepert, 22 College St., Toronto.

The Boy Scouts' Association.—Originated 1907. Incorporated in Canada 1914. For details of the membership of the 58,500 boys in 1931, see Part II. Chief Executive Commissioner, John A. Stiles, Dominion Headquarters, 172 Wellington St., Ottawa.

CHAPTER III.—UNIVERSITIES AND COLLEGES

In dividing schools into two classes in Chapters I and II—those of the provincial systems and those outside of the provincial systems—the institutions of higher education were not included in either, for in their field provinces, religious denominations, professional societies, private individuals, etc., are all involved; and in any case all of the work of universities and colleges is probably better considered as a unit at the summit of the educational systems in the Dominion. In all of the provinces this is essentially true except in the French-speaking section of Quebec, where many of the colleges whose enrolment is included in the discussion below—the French "secondary" schools—have a high proportion of their students in courses that are in one sense parallel to the advanced grades in the provincial school system, as is explained elsewhere in this report

The table that appeared in Chapter III last year describing each university and college has been omitted this year for reasons of space. Each table in Part II gives data for all institutions in the Dominion giving instruction in courses that are the equivalent of at least two years in advance of matriculation. The affiliated colleges of each university are listed individually along with it. In 1931 there were 41,168 students of university standard reported,—28,960 men and 12,208 women—but the numerous preparatory and extension departments enrolled a further 36,450, making a total of 77,618, as compared with 73,515 in the preceding year.

Students of University Grade.—Of the 41,168 university grade students 39,127 were undergraduates, and all but 7,919 were doing a full year's work in attendance. There was an unusual increase over the preceding year due in the main, no doubt, to employment conditions. Similar increases were experienced by the high schools. The larger branches of study were affected as follows:

	1930	1931
Arts, Pure Science.	16,637	18, 187
Engineering and Applied Science	3,380	3,827
Medicine and Dentistry	3,230	3,353
Theology	2,083	2,192
Agriculture	956	1,277
Household Science.	807	995
Total, full-time undergraduates	30,359	32,783

The remaining 2,041 students of university grade were pursuing post-graduate courses,-1,250 of them devoting their full time to these advanced studies. The largest graduate schools are at McGill University and the University of Toronto, but the western provincial universities enroll important numbers. Due to the different organization of faculties in the University of Montreal and Laval University it is difficult to compare the number of "graduate" students in these with the number in the others. In the sense that the term "graduate" is used in this report, it means the number proceeding to a higher degree in a feculty or department in which they it means the number proceeding to a higher degree in a faculty or department in which they already hold a bachelor's degree. All students in Montreal and Laval proceeding to the professional courses of Law, Medicine, Theology, etc., must first have completed the baccalaureate

Students not of University Grade.—Many of the colleges conduct preparatory or high school courses at which there were 17,982 in full-time attendance. Still others offered courses in agriculture, household science, music, etc., for which unmatriculated students were allowed to register. These had 2,154 students attending the full year, and in conjunction with summer schools, evening classes and other part-time students had a further 16,314.

Finances.—Property value of the universities and colleges was \$168,190,000 of which \$45,-000,000 was in endowments or other interest bearing investment, and the balance in lands,

buildings and equipment.

Current expenses of the year amounted to \$20,079,000, while a further \$6,134,000 was spent for new buildings, etc., on capital account. The largest sum in the latter category was that of the University of Montreal for the erection of its new central building. Capital expenditures in excess of half a million dollars were also made by each of Manitoba, Queen's, Toronto and Victoria Universities. The heavy expenditures of McMaster in establishing itself at Hamilton belong to the preceding year.

The revenue from investments was \$2,581,000, from government grants \$5,896,000, from tuition fees \$3,655,935, from other sources \$7,062,000 including gifts and fees for board and lodging where they were given. Government grants fell from \$7,413,000 in the preceding year, and have been further reduced in 1932. Revenue from investments was down slightly, that from fees up considerably, as follows:

Source	1930	1931
	\$	\$
Investments. Government Grants. Tuition Fees. Other Sources.	2,667,250 7,413,270 3,261,754 6,947,962	2,581,423 5,895,794 3,655,935 7,061,873
Total Receipts	20,300,236	19, 195, 025

From the standpoint of financial support there are at least three distinct classes of institution. First there are those that rely on grants from provincial treasuries for their upkeep. Six of the provinces have such universities and the remaining three have colleges in this class. Secondly, there are the institutions such as Dalhousie, McGill and McMaster Universities, to cite a few, that rely for their support on endowments, and do not receive provincial grants. Thirdly, there are colleges either operated or controlled by religious denominations, which do not receive provincial assistance, and which may not have a financial endowment sufficient to carry them. These may have another type of endowment,—in men, so to speak, like the University of Ottawa and other Catholic Colleges conducted by religious orders. Since salaries are commonly only nominal in these schools, expenses are comparatively low per pupil accommodated. The other section of the third group—mainly Protestant theological and Arts Colleges—commonly rely on church contributions where their financial endowments are inadequate.

CHAPTER IV.—REVIEW OF ALL EDUCATIONAL INSTITUTIONS BY PROVINCES

Each of the preceding chapters discusses a part of the educational field from the standpoint of the Dominion as a whole. Chapter IV reviews all of the educational institutions for each province separately. This is done under similar headings for each province, each heading having to do with a different class of educational institution. (1) The first and largest group is the publicly-controlled schools of general education. (2) A second heading is devoted to technical and vocational schools under provincial control, as these represent the largest group supplementing the work of the ordinary schools. (3) There remain, however, certain special schools or classes for children unable to attend the ordinary schools, such as those for blind, deaf, invalid, psychopathic or delinquent children, and correspondence courses and other facilities for children out of reach of a school. These too, are generally provided by the provincial governments. They are discussed under a third heading. (4) Institutions where teachers are trained represent a fourth distinct group. They include the provincial normal schools and Departmental summer schools. The university summer schools and the regular university training courses for teachers, though they overlap with the fifth group, are also here mentioned. (5) To complete the general view of each province's system it is necessary to look at the institutions of higher education—the universities and colleges, but they are described at greater length in Chapter III. (6) Finally there remains to be noted the work of schools not included in the publicly-controlled group but similarly engaged in giving the fundamentals of a general or technical education. Among private schools of a technical character, however, information is only obtained from those giving a business or commercial training—the largest group.

PRINCE EDWARD ISLAND

During the school year ending in 1931 the number of pupils and students in all educational institutions in Prince Edward Island was 19,910. These were distributed as follows: 17,506 in public elementary and secondary schools; 380 in Prince of Wales College; 1,140 in agricultural and technical courses; 167 in St. Dunstan's University; 10 in the schools for the blind and deaf in Halifax, N.S.; 526 in private elementary and secondary schools; 291 in business colleges, and 34 in Indian schools. In addition, there were about 200 residents of the province attending Canadian universities and colleges outside the province. These bring the total to about 20,100.

Ordinary Schools under Public Control.—In the public elementary and secondary schools the average daily attendance was 7,322 in one-room schools and 5,389 in graded schools, or a total of 12,721. The percentages of the year's enrolment in average daily attendance were: primary (one-room), 68·0; graded, 80·0; all schools, 72·6 which compares with 70·6 in the previous year. As in other provinces, high school or continuation work is not confined to high school rooms, but may even be taken in the one-room school if the teacher is qualified to teach it. In these various schools throughout the province, pupils proceed as far as grade ten, at the end of which they may take the examination for admission to Prince of Wales College and Normal School, a provincially controlled institution. The ordinary schools in Prince Edward Island do not teach an "eleventh" grade, as in other provinces.

Teacher Training and Higher Education.—By following the course in Prince of Wales College for one year (which consists of professional as well as academic training) a student may obtain a teacher's certificate, either second or third class, depending on his rank at examination. By continuing for a second year at the College the student may obtain a first class teacher's certificate, or (as a result of the College's affiliation with certain universities outside of the province) may qualify for admission to the second or third year of an Arts course. The enrolment in 1931 was 126 males and 254 females. In comparison with these figures the teaching staff of the provincial school system consisted of 148 men and 480 women. As noted above, about 200 students from Prince Edward Island, most of them probably graduates of Prince of Wales College, were registered in universities outside of the province, and in addition many of the Prince Edward Island teachers attend summer schools in Nova Scotia and New Brunswick.

St. Dunstan's University, a Roman Catholic institution for young men offering preparatory

St. Dunstan's University, a Roman Catholic institution for young men offering preparatory and commercial courses, as well as a full course in Arts (for which Laval University at Quebec grants the degrees to graduating students), had 89 in courses of high school grade and 78 of university grade.

Technical and Vocational Courses.—Night courses for day workers were not offered in 1931. Day courses at Charlottetown included 872 in agricultural courses conducted through the ordinary schools, 112 in woodworking and drawing, 52 in home economics and 56 in dairying short courses, 48 in a commercial course offered to students having completed grade ten.

Private Elementary and Secondary Schools.—Five schools reported 526 pupils, 452 of whom were in elementary grades.

NOVA SCOTIA

During the school year ending in 1931 Nova Scotia had in all institutions an aggregate of 133,052. This enrolment included 115,511 in ordinary general schools; 256 regular and 426 summer students in Normal College and 598 in the Departmental Summer School at Halifax; 8,445 in technical courses, not including students of university standard; 346 in preparatory courses; 2,270 in courses of university standard, and 304 in other courses (exclusive of secondary correspondence courses from the Technical College) in the universities and colleges; 2,746 in private elementary and secondary schools; 796 in private business colleges; 173 in schools for the blind and deaf exclusive of pupils from outside the province, and 409 in Indian schools.

Public Schools of General Education.—Of the enrolment of 115,511 in ordinary day schools (Grades I to XII) 61,433 were in 2,044 rural and village schools and 54,078 in 1,187 town and city schools. The average daily attendance was 87,418 or 75.6 per cent of the enrolment, again somewhat higher than in the year preceding. The increase in the number in secondary grades was again proportionately greater than in all grades combined, the total for 1931 being 13,852. The number of teachers was 3,484 of whom 331 were men. The Annual Report of the Superintendent of Education notes an increase in the proportion of men entering the teaching profession, and a tendency toward greater permanency of tenure, attributing much of it to the pensions scheme introduced three years earlier. The average salary for all teachers was \$754 in 1931 (rural and village \$556, urban \$1,085) as compared with \$741 the year before, and \$669 in 1926. Licences of the higher classes increased by 186 in the year, and those of the lower classes decreased by 150.

Special Schools.—The provincial School for the Deaf at Halifax had 69 pupils from Nova Scotia and almost an equal number from Prince Edward Island, Newfoundland and New Bruns-The School for the Blind had 165 pupils, of whom 108 belonged to Nova Scotia.

In 1927, school boards in all sections having fifteen or more retarded children of school age, were required to provide auxiliary classes. Classes have been organized in Halifax, Yarmouth and Sydney and preliminary surveys have been made in other towns.

Among other special facilities, correspondence courses introduced in 1930, and the Halifax

Industrial School for minor delinquents should be mentioned.

Teacher Training Schools.—In training at the Provincial Normal College's winter session there were 20 men and 236 girls, at the summer session 53 and 373. Courses in education are offered to Arts students in Acadia, Dalhousie and St. Francis Xavier universities, and the number of graduates of the year who had qualified for teaching licences was 43, over half of whom were men. For several years past the Department of Education has offered summer improvement courses in teaching methods, etc., at Halifax. Almost 600 attended in 1931. In addition St. Francis Xavier, Mount St. Vincent and St. Mary's College conduct summer schools in university

Technical and Vocational Classes.—No city in Nova Scotia had yet established a day technical school of secondary grade, though such a project was under serious consideration in both Halifax and Sydney. Short term or part-time day classes in the Provincial Technical College, Agricultural College, College of Art and Halifax Industrial School reached 3,577 women and girls and 58 men. The figures include the full-time class of 21 at the College of Art. Evening coal-mining classes, which have been conducted for many years, were held in 16 centres and were attended by 669. Other evening technical classes in 13 centres enrolled 908 males and 1,090 females, while 2,207 were reached by correspondence courses.

Universities and Colleges.—There are twelve universities or colleges in Nova Scotia, ten of which grant degrees. For statistics see Part 11, Section 3 of this Report.

Private Schools of General Education.—Sixteen schools in this category, with an enrolment of 2,746, report 1,842 pupils in elementary grades, 757 in secondary grades, and most of the remaining 147 taking special or commercial subjects of high school grade. The total of 2,746 represents about 2.5 per cent of the province's enrolment in general schools. Beyond these, seven business training schools reported 796 pupils.

NEW BRUNSWICK

During the school year 1930-31 the number enrolled in all educational institutions in New Brunswick was 97,802, including 87,160 in ordinary day schools; 3,487 in technical schools; 310 in the Normal School; 320 in Indian schools; 73 in schools for the blind and deaf in Halifax, N.S.; 636 in private business colleges; 3,931 in private elementary and secondary schools; 615 in preparatory college courses and 1,266 of university grade.

Publicly Controlled Ordinary Day Schools.—Of the enrolment of 87,160 in ordinary day schools, 81,984 attended during the first term ended December 31, and 82,412 during the second term ended June 30. The enrolment during the first term consisted of 40,419 boys and 41,565 girls; during the second term, 41,149 boys and 41,263 girls. Increase is again shown in the proportion of boys and decrease in the proportion of girls in the second term or the winter and spring months, until they are now practically equal. The 87,160 pupils enrolled for the year attended a grand total of 13,334,605, while the schools were in operation an average of 192 days. From this it is deduced that 67,805 attended daily, or an average of 77.8 per cent of the enrolment. The attendance of twenty-day periods may be seen in Table 4. The chief secondary schools in New Brunswick are the "grammar schools," situated in county towns and free to all pupils of high school grade in the county. They had 2,410 pupils in grades IX to XII in 1931. Next come the "superior schools," free to all pupils in Grade VII and upwards in the parish where the school is situated. Their high school grade pupils numbered 1,441. Other schools doing high school work had 883 pupils, making a total for the province of 4,734 reported in secondary grades. To this figure the 1,483 in full-time courses at the province's technical schools (see below) should be added, as well as the 653 pupils reported in the secondary grades of private schools, and most of the 713 reported as taking special subjects in private schools, in calculating the province's total post-elementary enrolment.

Special Schools.—Most of the deaf and blind children from New Brunswick are supported in the Nova Scotia schools at Halifax, where there were 41 blind and 36 deaf with permanent residence in New Brunswick.

Teacher Training Schools.—A new provincial normal school building at Fredericton was opened at the beginning of the year to replace the one destroyed by fire. The enrolment for the year was 40 young men and 270 young women, about 300 being the maximum of students allowed to enter on training in a single year. Of these, 132 were training for first class certificates, 160 for second class, and 18 for third.

Among the graduating class at Mount Allison University 5 received teaching certificates from Nova Scotia. The annual summer school at Mount Allison was attended by 229, the

summer session at the University of New Brunswick by 34.

Technical and Vocational Schools.—The first day vocational school of secondary grade in the province was opened at Woodstock in 1919. There were eight in 1931 with a full-time enrolment of 1,415, and a part-time class of 28. The courses most generally offered are prevocational, home economics and commercial, but art, pulp and paper-making and other industrial courses are also given in some schools. In addition, a winter course of three months was given to garagemen in the St. John School, and evening technical courses in nine centres were attended by 2,004 individuals, 944 male and 1,060 female.

Universities and Colleges.—There are four autonomous degree-granting institutions in New Brunswick and no affiliated colleges. For statistics of the work in each see Part II of this Report, Section 3.

Private Elementary and Secondary Schools.—Schools under private control are a more important factor in the New Brunswick educational system than in any of the other provinces except Quebec and British Columbia. The majority of them are convent schools, and their enrolment of 3,931 represents 4 per cent of the total number of pupils in schools of general education. About half, or 1,874 pupils, live in school residences. Since the advanced grades in these schools claim a much higher proportion of the students than in the publicly-controlled, they are a relatively more important factor in New Brunswick secondary education than are similar schools in other provinces.

QUEBEC

Ordinary Day Schools.—The term "ordinary day schools" as used in this report for all the provinces includes in Quebec nursery, primary elementary, primary complementary, primary superior, Protestant intermediate and high schools. In the publicly-controlled part of this group—those under the control of school commissions (majority schools) or trustee boards (minority schools)—there were 525,843 pupils; in those independently controlled, 57,841. Of the total of 583,684 the number in Catholic denominational schools was 507,484, in Protestant 76,200. The percentage of attendance for all schools was 81·2. There were 3,730 in nursery schools.

The complete course in the Protestant schools of this group—elementary, intermediate and high schools—consists of eleven grades (seven of which are considered elementary and four secondary) and leads to admission to the provincial Protestant normal school for professional training, or to matricultaion to McGill or Bishop's University, similar to the elementary and secondary schools of other provinces. The number of the 76,200 in the upper four or high school grades was 10,538 or about 14 per cent. Teachers in Protestant schools were 2,328 women,

325 men.

The work of the Catholic schools in this group (primary elementary, primary complementary, and primary superior) is divided into twelve "years," some of which require more than a year to complete. The first of these "years" is termed the "preparatory" year; the next six constitute the "elementary" course, are called the "first" to "sixth" years respectively and correspond in a general way to the eight elementary grades in other provinces. The "seventh" and "eighth" years constitute the "complementary" or continuation course and correspond to high school grades in other provinces. The superior primary years—called the "ninth" to "eleventh" respectively were first introduced in the year under review. Of the total of 507,484 in Catholic primary schools, 474,210 were in the preparatory and elementary course, 20,703 in the complementary, and 2,348 in the superior. Those who obtain teaching licences without attendance at the normal schools have generally completed their training in the "complementary" course. (Those who attend normal schools do so in place of taking the complementary course, as the normal school course extends over two or more years according to the class of certificate desired.) The complementary and superior course, however, does not lead to university matriculation as

do high school courses. The preparation for university studies in the University of Laval and the University of Montreal is given in another group of schools, comprised chiefly of affiliated classical colleges, little seminaries and convents, and independent classical schools. In the elementary and complementary schools there were 14,892 female and 3,426 male teachers. Over 40 per cent of the former were nuns and over 70 per cent of the latter were in religious orders.

Institutions of Secondary and Higher Education.—In the Protestant school system of Quebec the secondary or university preparatory schools are the high schools, and their enrolment is included under the preceding heading. In the Catholic system they are a separate group of schools, as already stated. Most of them in addition to offering the equivalent of the upper elementary and high school grades in other provinces, teach also work of post-matriculation or regions of the state of the secondary of the school grades in other provinces, teach also work of post-matriculation or regions of the secondary university standard. In fact, all Arts courses in the province (except in McGill and Bjshop's Universities) are given in these "secondary" institutions. Those that are affiliated to the Universities of Montreal and Laval constitute the faculties of Arts in these universities. Due to this direct and intimate connection of the Catholic "secondary" schools with the universities they are included in the statistical tables of this report on Higher Education. Their inclusion

makes a total of 30,936 in the university and college section for Quebec.

Of the 30,936, 4,805 are in Bishop's and McGill, the English-speaking institutions, including the latter's three affiliated theological colleges and Macdonald College of Agriculture. The remaining 26,131 are distributed as follows: 10,444 men and boys in classical colleges and little seminaries affiliated to the two French Universities, of whom 2,738 were in the last four years, or Arts course; 9,128 girls in affiliated convents, and other secondary schools; 1,423 men in independent, unaffiliated classical and theological schools. The remaining 5,156 were in the faculties of the Universities of Montreal and Laval, and their affiliated professional colleges—such as Ste. Anne de la Pocatiere and Oka Agricultural, Commercial Academy and School of Higher Commercial Studies, Polytechnic School, and Institute of Pedagogy.

Teacher Training Schools.—There were seventeen Catholic Normal Schools for girls and two for boys, with 200 boys and 1,688 girls attending. On entering the normal school from the primary elementary school, an elementary teaching diploma may be obtained in two years, or a superior diploma in three years. In some of the schools a fourth year has recently been added leading to a supplementary diploma. About 1,400 of the pupils were in the first two years, 374 in the third and 48 in the fourth. The Superior Normal School in Laval University for graduates enrolled 20 men. Pedagogical training for graduates of the French Universities is now offered in Montreal, by the Institute of Pedagogy at Marguerite Bourgeoys College for young ladies, and at St. George's Institute of Pedagogy founded in 1930 for young men. Both of these pedagogical colleges are affiliated to the University of Montreal. The work of the former, in addition to a regular class of 45, has expanded to include a large attendance in vacation, evening, Saturday and correspondence courses for teachers.

The Protestant Normal School had an attendance of 11 males and 160 females. At Bishop's University there were 15 in the education course for graduates and 22 of the McGill graduating class qualified for diplomas. In 1931 the graduate work at Bishop's was offered at a summer session, and summer courses for elementary teachers were introduced at Macdonald College with

an attendance of 155.

Technical Schools.—There are day technical schools for boys, giving diversified industrial training in courses ranging from one to four years in length at Montreal, Quebec, Three Rivers, Shawinigan Falls, Hull, Lachine and Beauceville. Their students in 1931 numbered 1,341. At Montreal and Quebec there are schools of Fine Art giving, in addition to courses in drawing, painting and design, a six-year course in architecture. Further day technical courses for boys are given at the Rimouski Intermediate Agricultural School, St. Hyacinthe Dairy School, Bertinian School, School, School, Bertinian School, Sch thierville Forest Rangers' School, La Tuque College, etc., in addition to such institutions as the Polytechnic School included under higher education in this report. Home economics courses in Montreal and Quebec, subsidized under the Technical Education Act had 3,972 pupils.

Evening technical courses are widely held throughout the province—schools of arts and trades at 28 centres, commercial courses in Montreal and Quebec, dress-making schools at 55 centres, housekeeping schools at 165. The total enrolment in courses subsidized by the Dominion Government was 7,724 in day classes and 13,654 in evening, but in addition to these there were the housekeeping and dressmaking evening classes, just mentioned, that are not subsidized, with

an attendance of about 35,000, as well as some day classes.

Special Schools.—Among the schools for the benefit of those unable to attend the ordinary schools are two in Montreal for the blind—one each for the French- and English-speaking residents of the province. They were attended by 163 pupils. There are also three schools for deafmutes, two Catholic and one Protestant, with 603 pupils. These schools are subsidized, but not wholly conducted by the Provincial Government as in the other provinces.

The school for feeble-minded near Quebec city had 486 under its care, 288 boys and 198 Two hundred and eight of the pupils were under the age of 14, the others older. Both

French- and English-speaking pupils were accommodated.

Private Schools.—These are included in the discussion of "ordinary day schools" above, where they are termed "independent" schools. They are relatively much more numerous than in any of the other provinces, accounting for about 10 per cent of the enrolment in the "primary" schools of the province. The highest proportion of "independent" or private schools in any of the other provinces is only about 4 per cent—New Brunswick, Prince Edward Island and British Columbia. But whereas the private schools of other provinces are not subsidized by the provincial government, something like half of those in Quebec are.

ONTARIO

During the school year last reported (calendar year 1930 for "public" and "separate" schools; school year 1930-31 for other schools), the total number attending educational institutions in Ontario was 869,872. These included 727,342 in ordinary day schools under public control, including public, separate, continuation, high schools and collegiate institutes; 29,470 in full time day and 3,225 in part time day technical schools, 47,440 in evening technical schools; 7,316 in night elementary and high schools; 1,666 in normal schools and the vocational teacher-training school; 4,296 in Indian schools; 439 in schools for the blind and deaf; 10,192 in private business colleges; 11,196 in private elementary and high schools; 2,440 in preparatory courses in universities and colleges, 16,419 in courses of university grade, and 11,656 in other courses.

Ordinary Publicly Controlled Schools.—Apart from the evening elementary schools in 20 centres which had 4,043 pupils, the elementary schools in Ontario are of three kinds—"public" or undenominational, Roman Catholic "separate", and Protestant "separate." Of the last group there are only five in the province and statistics include them with the "public" schools. There were 6,403 schools in the first group with 548,874 pupils, 761 in the second group with 109,661 pupils. The Catholic separate schools are on the average one and two-thirds times as large as the "public," as a result of a much higher proportion of them being urban. Though the great part of the work of both groups of schools is confined to the eight elementary grades, 1,316 of them teach the equivalent of high school work in what are termed "fifth classes." percentage of the elementary schools' enrolment in average daily attendance was 72.7. The average number of pupils to a public school teacher was 38, to a separate school teacher almost 43—a further reflection of the greater rural element in the former class. Sixteen per cent of the "public" teachers were men, seven per cent of the separate. The cost of public schools was \$33,360,170 of which \$3,396,681 came from legislative grants; separate schools cost \$4,591,804 of which \$356,818 came from grants. The proportion of school expenditure met by grants is much

smaller in urban than in rural sections. In addition to the elementary schools there are the secondary schools confining their work to the high school grades. They are the "continuation schools," "high schools" and "collegiate institutes." Fundamentally, each class of school teaches the same work, the chief distinction

among them being in size and teaching facilities—with the result that the secondary schools in the cities and larger towns are generally ranked as collegiate institutes, in the smaller towns as high schools, and in villages or small centres as continuation schools. There were 65 collegiate high schools, and in villages or small centres as continuation schools. There were 65 collegiate institutes and 142 high schools with 58,768 pupils, 221 continuation schools with 10,039. These enrolment figures are for a specified day in the year—the last school day in May—not the aggregate enrolment for the year. The average number of teachers in a continuation school was two, and 12.5 per cent were university graduates; the average number in high schools and collegiates was ten, and 90.1 per cent were graduates. The average salary of the one group was \$1,513, of the other \$2,370. In the larger schools practically 50 per cent of the pupils were boys, in the smaller only 42 per cent. Expenditure in support of high schools and collegiates was \$10,191,484 of which \$472,654 came from legislative grants; continuation schools cost \$1,276,921 of which \$228,673 was received from grants. In addition to the day pupils, there were 3,273 in evening

high school classes in 25 cities and towns.

Vocational and Technical Schools.—There are now 62 day technical schools in Ontario offering full-time courses for which the completion of elementary grades is prerequisite. Of the total enrolment of 32,695 some 15,000 were taking commercial or business training. In the evening enrolment about a third of the 47,440 were taking commercial courses. Two other widely enrolment about a third of the 47,440 were taking commercial courses. offered types of instruction in both day and evening schools are domestic or household science, and art courses, and training for a variety of industries and trades is given, especially in the larger centres. Evening classes in English for "New Canadians" had 4,777 enrolled. Girls outnumber boys in full-time classes, there being 16,891 of them to 15,804 boys. But more than half of those in evening classes are men and boys.

Men occupy the majority of teaching positions in the technical schools—792 as compared with 540 women in day schools, and 1,054 against 593 women in evening schools. Gross expenditure for technical education was \$8,692,355, of which \$1,144,052 came from legislative grants.

Special Schools and Classes.—Among the provisions made by the Ontario Department of Education for children unable to attend the ordinary schools are auxiliary classes for subnormal and handicapped children. Some attention has been given to these in the reviews of the last two years.

In addition to auxiliary classes there are the Ontario School for the Blind at Brantford where there were 134 pupils, and the Ontario School for the Deaf at Belleville with 356 pupils. More than a third of the blind pupils come from Manitoba, Saskatchewan and Alberta and are

supported by those provinces.

For several years, travelling schools have been maintained in the northern part of the province by equipping railway coaches as school rooms and having them stop periodically at points along the line to give instruction in settlements where there is no permanent school. Five such travelling school cars are now in operation.

Correspondence courses for children living out of reach of a school were inaugurated in 1926. The enrolment in 1931 reached 1,200 and instruction was provided in all of the elementary grades.

A Boys' Training School is conducted at Bowmanville for minor delinquents, and at four other points in the province there are Industrial Schools (residential) for neglected and dependent

children.

Teacher Training Schools.—Technical teachers are trained at Hamilton in the special College for the purpose. Teachers for the English-speaking public and separate schools are trained in seven normal schools at Toronto, Ottawa, Hamilton, London, Stratford, Peterborough and North Bay, where there were 1,475 students. Teachers for schools attended by French-speaking pupils are trained in three model schools at Sandwich, Sturgeon Falls and Embrun, attended by 12 young men and 57 young ladies, and in the university of Ottawa Normal School where attendance grew since its foundation three years earlier to 2 boys and 78 girls. Teachers for the High Schools and collegiates are trained in the College of Education of the University of Toronto.

Summer improvement courses for teachers are very widely held in Ontario. Courses under the auspices of the Department of Education in the summer of 1931 enrolled 4,594 teachers and

Summer improvement courses for teachers are very widely held in Ontario. Courses under the auspices of the Department of Education in the summer of 1931 enrolled 4,594 teachers and 34 school nurses. Most of the courses last five weeks. In addition Queen's University, the University of Ottawa, the University of Toronto, the University of Western Ontario, and Mc-Master University conduct summer sessions at which a high proportion of the attendance is

teachers.

Universities and Colleges.—There are five university units in Ontario—McMaster at Hamilton, Queen's at Kingston, Western at London, the University of Toronto (with Victoria, Trinity, St. Michael's, Knox and Wycliffe in federation), and the University of Ottawa. French is the chief language of instruction at the last mentioned. Each of the last three has several affiliated colleges, and in addition to affiliated colleges, there are such important units as the Royal Military College, Osgoode Hall Law School, several Roman Catholic seminaries, etc. For a full list and statistics, see Section 3 of Part II.

Private Schools.—The number in elementary and secondary schools, privately controlled, was 11,196, or less than 2 per cent of the enrolment in schools of general education, but many of the schools represented have been long established and are widely known. Private business and commercial schools operate in all the larger centres of population and report 7,093 in day classes, 3,099 in evening classes.

MANITOBA

During the school year ending in 1931, the enrolment in the educational institutions of Manitoba was 177,019 distributed as follows: 153,553 in ordinary day schools; 7,087 in technical schools; 570 in normal schools; 2,346 in Indian schools; 111 in schools for the deaf and blind; 5,294 in private elementary and secondary schools; 3,175 in private business colleges; 706 in preparatory courses in colleges; 3,311 in courses of university standard at the University and affiliated colleges; 866 in other courses at these institutions of higher education.

Public Elementary and Secondary Schools.—The 153,553 pupils were accommodated in 2,034 school-houses with 4,304 class rooms. In addition to city schools confining their work entirely to the elementary grades, and small schools that may have a few pupils in advance of grade eight, there are the "intermediate" schools, "high schools," "junior high schools," "collegiate departments" and "collegiate institutes." "Intermediate schools," of which there are 121, have as a rule three or four teachers, one of whom devotes his time to the teaching of high school work. They are generally village schools. "High schools," like the intermediate schools are usually housed in the same building as the elementary classrooms, but are generally the schools of larger villages and towns, having two teachers for the high school grades. There are 48 of these. The "junior high schools," where the upper elementary and first secondary grades are taught, are 14 in number and all situated in Winnipeg. "Collegiate departments" is the classification of the high schools in 13 towns where 3 teachers are engaged in secondary work. The largest secondary schools are the "collegiate institutes," of which there are 22.

Outside of Winnipeg, more than a third of the schools maintaining one or more recomplex.

Outside of Winnipeg, more than a third of the schools maintaining one or more rooms for high school work are "consolidated" schools. That is, the town or village school district and neighbouring rural districts have been consolidated into a single district and conveyance to school is provided for children living outside of the town. There are now 108 such consolidations in

Manitoba—a greater number than in any other two provinces combined.

The City of Winnipeg is a very weighty element in the provincial school system, well over one-third of all pupils being in schools of the city and its suburbs. The smaller cities, towns and villages combined have about half as many, making somewhat more than half of the province's total enrolment in urban schools. Of the remainder in rural schools about two-thirds are in schools of one room, one-third in larger schools. The proportion of the year's enrolment in average daily attendance in all schools was 78·6 per cent, and the proportion in high school grades was 11·9 per cent, a marked increase over the previous year. The teaching staff of the province's 2,034 schools numbered 4,427—881 men and 3,546 women.

Normal Schools.—Manitoba is now the only province in which a university teacher-training department is not maintained, but a special class for university graduates is conducted at the Winnipeg Normal School, in which the attendance in 1931 was 50. There are three other

normal schools—at Brandon, Manitou and Dauphin. The total attendance for the year was 570. The summer school held annually at the Manitoba Agricultural College under the joint auspices of the University and the Department of Education had an attendance of 954.

Special Schools.—The provincial School for the Deaf at Winnipeg had 178 pupils, almost half of whom were from Saskatchewan and Alberta. Most of Manitoba's blind children are sent to the Ontario school. Two sight-saving classes are conducted in a Winnipeg school. Winnipeg also has eighteen classes for children who are subnormal mentally.

An industrial Training School is maintained at Portage la Prairie, with over one hundred juvenile delinquents in residence, practically all between the ages of twelve and seventeen.

About one-fourth of the boys come from Alberta, the remainder from Manitoba.

Correspondence courses of the Department were continued in the subjects of the elementary schools.

Technical and Vocational Schools.—The first full-time day industrial school in the province was conducted in Brandon in 1930. Its work was confined to auto mechanics, and a three-winter course was projected. In Winnipeg full-time technical courses are mainly confined to commercial training. These are given in the city's collegiate institutes, and junior high schools, where attendance in commercial classes was 3,249, other 97. But in the upper elementary and high school grades, especially in the junior high schools, a number of periods are devoted weekly to vocational subjects with shop practice.

Evening technical courses at Winnipeg's collegiate institutes have been popular for many Two of these have been equipped for technical instruction since they were first opened years. Almost 2,000 attended some thirty different trades courses at these three institutions. Evening "Canadianization" classes in four of the city's schools attracted 687 others. The Winnipeg School of Art had 184 students. Evening classes are maintained outside of the pro-

vincial capital only at The Pas.

Institutions of Higher Education.—Higher education in Manitoba is centralized in the provincial university as in each of the four western provinces. The University of Manitoba is situated at Winnipeg, as also are its three affiliated arts colleges representing the United, Anglican and Roman Catholic (in St. Boniface) churches. Though all of the university faculties' buildings, except agriculture, have been in the heart of the city, the erection of new quarters on the site of the Agricultural College, a few miles to the south of Winnipeg, was begun in 1930 and carried forward in 1931-32. This is intended to be ultimately the permanent location of accommodation for most of the classes.

Private Schools.—Elementary and secondary schools not supported by public funds numbered 39 and reported 5,294 pupils, or about 3 per cent of the enrolment in schools of general education. Private business and commercial schools taught 1,927 in day courses and 1,248 in evening classes.

SASKATCHEWAN

During the school year ending 1931 the enrolment in all educational institutions in Saskatchewan was 245,194, distributed as follows: 230,492 in ordinary schools under public control; 3,287 in technical day and evening schools; 1,252 in normal schools; 2,072 in Indian schools; 62 in schools for the blind and deaf situated in other provinces; 1,286 in private business colleges; 2,349 in private elementary and secondary schools; 1,000 in preparatory courses in the university and colleges; 2,687 in courses of university grade, and 707 in other courses conducted by the university and colleges.

Publicly-controlled Elementary and Secondary Schools.—The agricultural character of the province is reflected in its school enrolment. Well over 50 per cent of the 230,492 pupils are in rural schools, and since there are no large cities, the proportion of the remainder in town and village schools is more than twice as large as in cities. There are "separate" or denominational schools in Saskatchewan—23 Roman Catholic and five Protestant in a total of 4,917 school districts, but statistically they are included with the other schools. The number of consolidated schools stood at forty from 1923 to 1931, when one was added. The number of secondary schools —"collegiate institutes" and "high schools"—was 19 and had an attendance of 8,942, or slightly less than one-third of all pupils of high school grade in the province. Rural schools had 7,485 pupils in these grades. The remainder of high school pupils were in town and village graded schools, where instruction was divided between elementary and secondary work. In the last two years there has been an increase of 26.5 per cent in the number of secondary grade pupils, while the total school enrolment of the province has risen only 1.2 per cent.

Special Schools.—Deaf children have been in the past supported in schools for such in other provinces, mainly in the Manitoba school, but a new school for them was built at Saskatoon in

1931. Most of the blind are sent to the Ontario school.

The Government Correspondence School serves delicate and crippled children whose health as well as normal children out of reach of a school. Work does not permit them to go to school, as well as normal children out of reach of a school. Work is confined to the elementary grades, and the number receiving instruction in 1930 was 617. In September, 1930, the Department of Education inaugurated high school correspondence courses and during the year 5,750 enrolled. Over 4,900 of these were in attendance at rural schools, the object of the courses in this case being to assist the teacher in providing high school courses, where she is able to devote only a small part of her time to the advanced pupils.

Teacher Training Schools.—There are Normal Schools in Saskatchewan at Regina, Moose Jaw and Saskatoon. They had 1,252 students, of whom 656 were training for first-class certificates and the remainder for second-class. This contrasts sharply with the situation just six years ago, when training for third-class certificates was given at six other centres, and in the total normal school attendance of 1,702 only 285 were first-class, 609 second-class, and 808 third-class. The College of Education in the University of Saskatchewan, established two years earlier, had 51 graduates training for high-school certificates. The University, in co-operation with the Department of Education, conducts a summer school at Saskatoon, where the attendance in 1931 was 697.

Technical and Vocational Schools.—Each of the province's three most populous cities has built and equipped a new technical school since 1929—the Regina school opening in 1930, the Saskatoon and Moose Jaw schools in 1931. Some technical courses were previously offered, both day and evening, in these three centres, but the work is being expanded with the new accommodation. The full-time day enrolment for the year under consideration was 1,211 in commercial courses and 146 in motor mechanics. A much wider variety of subjects was taught in evening classes, attended by 1,908 persons. Other instruction of a technical character, particularly agricultural, is given in short courses by the provincial university.

University and Colleges.—Higher education in the province centres mainly in the University of Saskatchewan. It has three affiliated theological colleges at Saskatoon, one at Regina; and six affiliated denominational junior colleges giving instruction in the university curriculum up to second year Arts—three at Regina, one at Outlook, one at Moose Jaw and one at Muenster. In the chief French-speaking section of the province, at Gravelbourg, there is the Collège Mathieu for boys, giving instruction in the Arts course of the University of Ottawa.

Private Schools.—Private elementary and secondary schools numbering 37 reported 2,349 pupils, of whom 1,089 were in high school grades. Business colleges in nine towns or cities had 1,286 students—818 in day courses.

ALBERTA

During the school year ending in 1931 the enrolment in all educational institutions in Alberta was 179,664. These were distributed as follows: 165,786 in publicly-controlled elementary and high schools; 4,460 in day and evening technical schools, 961 in normal schools; 1,582 in Indian schools; 56 in schools for the deaf and blind situated in other provinces; 1,629 in private business colleges; 2,944 in private elementary and secondary schools; 422 in preparatory courses in colleges; 1,688 in courses of university grade at the university and colleges, and 136 others.

Publicly Controlled Elementary and Secondary Schools.—The 165,786 in these schools were accommodated in 3,348 schools, 2,877 of which had only one room. The remaining 471 had 2,747 class-rooms, so more than half of the classrooms were presided over by teachers who were responsible for teaching all the subjects of the curriculum and all of the grades in the school. The total number of administrative units or school districts was 3,647. Provision exists for publicly-controlled denominational schools in Alberta, and the above total includes two Protestant "separate" schools, and several Roman Catholic. It includes also 63 consolidated school districts which had been organized from 202 smaller units previously existing. In the number of its consolidations Alberta is second only to Manitoba. There are 16 rural high-school districts, all of which have come into existence in recent years. They are the result of rural districts combining to provide high school facilities for their older pupils, 75 small districts having combined to support the 16 high schools.

having combined to support the 16 high schools.

About 14 · 4 per cent of the 165,786 pupils were in high school grades. Many of these pupils were, of course, receiving their instruction from teachers whose time was divided between elementary and secondary grades. Schools where the full time of one teacher was devoted to the high-school grades numbered 120; of two teachers, 38; of three teachers, 17; of four or more, 33. Altogether these 208 schools employed 524 teachers. In the last two years the increase in high school grade enrolment has accounted for 4,833 pupils, whereas the increase in

total enrolment has been only 4,561.

Technical and Vocational Schools.—The commercial high schools in Edmonton, Calgary and Lethbridge had a full-time enrolment in 1931 of 1,219. Other day courses of a prevocational or technical character in the first two cities had 805 pupils. The Provincial Institute of Technology and Art at Calgary had 625 full-time students in a wide variety of industrial classes—electrical, mining, engineering, telegraphic, welding, tractor, drafting, art, dressmaking, millinery, etc. The Institute is affiliated with the University of Alberta, and is under the direction of the Department of Education.

Evening classes at the Provincial Institute had 372 students in courses similar to those of the day, with aeronautics, radio, etc., added. Other evening classes in Calgary reached 523, in

Edmonton 621, and in ten other centres 295.

Teacher Training Schools.—The provincial normal schools at Calgary, Camrose, and Edmonton had 961 students in attendance. Loans to normal school students are made by the Department of Education to assist them in financing their courses. More than half of the students took advantage of this arrangement in 1931, the average loan being \$345.

The newly-created School of Education in the University of Alberta completed its second year with twenty students trained for high school positions. The Summer School held at the University jointly by it and the Department had 707 students.

Special Classes.—Enrolment in correspondence courses offered by the Department of Education to pupils in territory where schools have not been organized doubled in 1931. During 1931 the Department made provisions for the education of 74 deaf children and 19 blind in schools for such pupils in Manitoba, Ontario, Quebec and British Columbia at a cost to the Department of \$45,705. In seven classes for sub-normals in Edmonton and Calgary there were 109 pupils. Departmental grants to these classes amounted to \$6,570.

The University and Colleges.—Higher education facilities centre mainly in the provincial university and affiliated colleges in Edmonton. In 1931-32 Mount Royal College at Calgary, under the control of the United Church, became affiliated to the University and its work was extended to include the second year of the Arts course.

Private Schools.—Thirty private elementary and high schools had 2,944 pupils. Five business colleges had 1,629 pupils of whom 960 were in day classes.

BRITISH COLUMBIA

During the school year ending in 1931 the enrolment in the educational institutions of British Columbia was 141,733 distributed as follows: 113,914 in publicly controlled elementary and high schools; 5,856 in day, and 7,468 in evening technical schools; 456 in the normal schools, and 162 in the Departmental summer school; 3,438 in Indian schools; 85 in schools for the blind and deaf; 2,067 in private business colleges; 4,987 in private elementary and secondary schools; 2,443 in courses of university grade at the university and colleges, and 1,018 in other courses.

Publicly-Controlled Elementary and High Schools.—The "enrolment" of 113,914 in these schools in British Columbia is computed differently to the enrolment in the schools of other provinces where the common procedure is for each school to report the number that have attended at any time during the year, and for these totals to be added to get the provincial enrolment. In this way a pupil who has moved from one district to another during the year may be reported by two schools, but in British Columbia duplications of this kind are recorded and eliminated in the figure quoted above as total enrolment. When this figure is used in conjunction with the average daily attendance to calculate the percentage of attendance, as is done in Part II, Table 1C, it gives 87·2 per cent, a figure somewhat higher than would be the case if the term "enrolment" meant the same as in other provincial.

Ment" meant the same as in other provinces.

Of the 113,914 there were 16,197 in high schools; 5,810 in junior high schools, almost all in cities; 734 in "superior" schools, mainly in rural districts; and 91,173 in elementary schools. A division of the enrolment as among city, town, village and rural schools is not made as in most of the other provinces, but a division is made on the basis of the type of administrative school unit. In the schools of city municipalities of which there were 34 (all purely urban municipal school units in British Columbia are termed "cities"), there were 69,616 enrolled; in the schools of rural municipal school districts there were 21,941 (though most of these were in the schools of settlements that would be considered "urban" as the term is used in Manitoba and Saskatchewan, for instance); in "rural" schools (meaning schools outside of municipal school districts, both rural and urban) there were the remaining 22,357 pupils.

British Columbia is the only province, except Quebec, where the administrative unit for

British Columbia is the only province, except Quebec, where the administrative unit for school purposes in *rural* areas is frequently the municipality. In all of the provinces the administrative unit in *cities* is, of course, commonly the entire municipality. In British Columbia there are 24 rural municipal school districts. Manitoba has one such district. Consolidation in the prairie provinces, however, has enlarged the administrative school unit in the 200-odd localities in which it has occurred.

Apart from the 34 city and 24 rural municipal districts there were 751 individual rural school districts. Of these, 172 were classed as "regularly organized" and 579 as "assisted." In the municipal districts provincial grants are paid to the school boards; in rural districts the payments are made direct to the teacher, and amount on the average in regularly organized districts to about one-half of her salary—while in assisted districts the teacher receives her entire salary from this source. The average salary received by elementary teachers in cities in 1931 was \$1,547, in rural municipalities \$1,261, in regularly organized rural districts \$1,135, in assisted districts \$1,091.

Special Schools.—Of the enrolment of 85 in the provincial school for the deaf and blind at Vancouver (included with the above) 21 were blind, 64 deaf, several coming from Alberta and Saskatchewan and being supported by the Education Departments in those provinces. High school correspondence classes in 1931, the second year that they were offered by the Department of Education, had 1,055 students. The cost to the Department per pupil enrolled was \$27 for the year. Correspondence courses in subjects of the elementary grades have been given for a number of years, and served 681 pupils in 1931.

Technical and Vocational Schools.—Students in day vocational classes in 13 municipalities numbered 5,856, practically all of whom are included in the high school enrolment quoted above. There were 3,053 in commercial high schools and 2,803 in other technical schools.

50479-c1

Evening technical classes were held in 41 centres and enrolled 7,167, of whom 3,899 were in Vancouver and 863 in Victoria. In the former city 69 different subjects were taught, in the latter 34, and smaller numbers in the smaller centres ranging down to a single class of a dozen members. Training classes for technical teachers were attended by 166. Correspondence courses reached

Teacher Training Schools.—The provincial normal schools at Vancouver and Victoria had 116 men and 340 girls in attendance—290 of whom were training for first class certificates, 166 for second class. In the course of the Education Department of the provincial university there were 70 graduates training for teachers' certificates. Two summer schools are held in the province, one by the Department of Education at Victoria and Vancouver, the other by the University. The first had 162 students, the other had 455.

The University and Colleges.—Higher education centres in the University of British Columbia at Vancouver, though it does not offer instruction in some professional faculties, including law, medicine, and pharmacy. Training in law and medicine must be obtained outside the province, and instruction in pharmacy is given in an independent school. There is a provincially controlled junior college in Victoria for the convenience of residents of Vancouver Island. are two affiliated theological colleges in Vancouver.

Private Schools.—Private elementary and high schools in British Columbia to the number of 54 report 4,987 pupils, or over 4 per cent of the province's total enrolment in schools of the kind. Private business training schools had 1,482 in day classes and 585 in night classes.

YUKON

Schools for White Children.—The Superintendent of Schools for the Yukon Territory reports that there were six schools in operation in 1931, giving employment to twelve teachers. There were 242 pupils enrolled, three-fourths of whom attended more than 150 days. The schools are located at Dawson, Whitehorse, Mayo, Keno and Carcross. Matriculation subjects were taught in Dawson and Whitehorse and 52 of the pupils were in Grades IX, X and XI. Examinations for these pupils of the high school grades are conducted under the Ontario Department of Education, while those in the elementary grades follow the course of study used in Alberta schools.

The average salary paid to teachers was \$2,358. Eight of the teachers had Alberta certifi-

cates, one British Columbia, one Saskatchewan, one Quebec, and one English. Five were

women.

APPENDIX I.—PROVINCIAL LEGISLATION ON EDUCATION, 1931

Prince Edward Island

The Teachers' Superannuation Act is Chapter 8 of the 1931 statutes of Prince Edward Island. It introduces a pension scheme for the teachers of the province, as seven of the other provinces had done in preceding years, the seventh being Saskatchewan in 1930. The Act is to be administered by a Commission of five members attached to the Department of Education. The Superistered by a Commission of five members attached to the Department of Education. annuation Fund is to consist of (a) a compulsory contribution of two and one-half per cent of each teacher's salary, until forty years' teaching is completed, such contributions to be deducted by the Department of Education from the amount of grant payable by it to the teacher, and (b) such contributions from the Provincial Treasury as are required (in addition to the teachers' contributions) to provide for the superannuation allowances payable. Pensions are payable after fifteen years teaching (if two-thirds of it is within the province) in the case of incapacity, otherwise after thirty years of teaching. The minimum pension payable is to be \$365 per year, and the maximum \$1,000, except in the case of the teaching staff of Prince of Wales College and Normal School, and other teachers or supervisors whose salary for at least twenty years has been entirely paid by the Provincial Government and whose contributions have been 3½ p.c. instead

A teacher leaving the profession after three years service, but before becoming eligible for pension, is entitled to have all contributions returned except those made in the first year. For

more detailed provisions the Act should be consulted.

Nova Scotia

The Education Act is amended by Chapters 25 and 26 of 1931. There are several alterations in addition to those mentioned below, but the following may be noted.

Special grants payable under section 64 of the Act to mechanic and domestic science departments, to art and music classes, and classes for retarded pupils, are extended now to pre-vocational education of pupils in advance of Grade VI, and to junior high schools were the latter may be established as separate institutions. And section 69, which prescribes the manner in which the Municipal School Fund shall be apportioned among the different schools, is amended to enable federated rural high school departments under specified conditions to obtain a larger share.

New Brunswick

There were no Acts in 1931 affecting the general schools in New Brunswick. \$25,000 was approved by Chapter X for the completion of the new Forestry and Mineralogy building and library of the *University of New Brunswick*, for which \$300,000 had previously been voted. Chapters 30 and 49 make some changes in the constitution of the University, e.g., the Chief Superintendent of Education is no longer to be ex-officio President of the University, which

office is to be filled by separate appointment of the Government.

Chapter 69 grants permission to the City of Saint John to issue forty-year debentures for the construction of a new high school in place of the customary twenty-five year debentures.

Quebec

The Education Act is amended in several details regarding the local administration of schools: alteration of school municipality boundaries, school tax exemptions, manner of collecting monthly fees, requirements of secretary-treasurer's office, etc., by Chapter 60 of 1930-31.

The same Act provides for the recognition of the scholasticates of teaching brothers in the province as normal schools, though it is not contemplated that all regulations as to admission of pupils, etc., applicable to established normal schools shall apply to the scholasticates. The Annual Report of the Superintendent of Education for 1930-31 states that nine scholasticates have been recognized under this provision. Provision is also made for the issue by normal schools of a diploma qualifying to teach the new superior course of three years added to the primary school curriculum in 1929-30.

The scholasticates recognized as normal schools are as follows: Brothers of Christian Instruction at Pointe du Lac, and Laprairie; Brothers of Christian Schools at Laval des Rapides and St. Foye near Quebec; Marist Brothers at Iberville; Holy Cross Brothers at Côte des Neiges; Brothers of St. Gabriel at Sault aux Récollets; Clerics of St. Viateur at Outremont (and a second under construction at Rigaud); Brothers of the Sacred Heart at St. Hyacinthe. Commenting on the innovation, the Superintendent's Report says: "Still enjoying the privilege of being able to teach without diploma, our Brothers willingly offer to submit to the general law and have their competence decided by an official jury whose chairman ex officio is the Superintendent. This act is greatly to their credit and will add to the confidence which their past services deserve."

xxxvii

Montreal and Quebec City Schools.—Chapter 61 authorizes the Roman Catholic School Commission of Quebec City to raise \$530,000 by new debentures to meet the balance of a matured obligation, \$350,000 for new schools, and a further \$100,000 temporarily.

Chapter 62 authorizes the Montreal Catholic School Commission to issue debentures to the value of \$3,000,000 to provide schools, sites, playgrounds, residences for religious teachers, and to meet maturing obligations. The Act also authorizes the Commission to establish special schools for handicapped children, and provides for the annexation of the town of Montreal West for school purposes to the territory under the control of the Montreal City Catholic School Commission.

Chapter 63 ratifies the agreement that was reached between the Jewish and Protestant communities in Montreal and Outremont for the education of Jewish children. (See Review of Legislation in the Annual Survey of Education 1930, for the nature of the dispute.) The Jewish School Commission, constituted in the preceding year, continued in existence but arranged for the continued education of children of their faith in the Protestant schools for a further period of at least five years, but on a financial basis considered by the Protestant Board more equitable than that previously existing. For details of the arrangement the Act should be consulted. Chapter 61 of 1930, which provided for a possible system of strictly Jewish schools in the province, comparable to the existing Catholic and Protestant systems, was repealed, and the Board of Jewish Commissioners that was appointed in Montreal under the Act continued in existence as an executive body only, for the purpose of carrying out the agreement with the Protestant Board.

For the latest arrangements for the distribution of the cost of educating Montreal children who are not Roman Catholics, Protestants or Jews, Chapter 64 of 1930-31 should be consulted.

Chapter 65 is an Act respecting Protestant school taxes in the town of Dorval Island, while Chapters 173, 174 and 175 relate to the parishes of Ste. Foy, Notre-Dame-du-Mont-Carmel, and St. Etienne-des-Gres respectively. Chapter 66 incorporates the Roman Catholic School Commission of Three Rivers, and defines its powers and duties as a corporate body.

Classical Colleges.—Provincial subsidies payable to classical colleges are raised from \$265,000 to \$315,000 by Chapters 67 and 68, and the amount payable for Protestant schools under the same Act (R.S.Q. 1925, C. 134) is correspondingly raised from \$45,000 to \$55,000.

Special Schools.—The Polytechnic School of Montreal is authorized by Chapter 69 to contract a loan of \$500,000 to consolidate its debt, the loan to be guaranteed by the Province. Chapter 70 grants certain tax exemptions and other financial assistance to Les Ecoles Ménageres Provinciales. Chapter 147 gives more extensive powers re financing, etc., to the Commercial College at St. Cesaire. Chapter 12 authorizes an annual grant of \$25,000 to the Conservatoire National de Musique at Montreal.

Ontario

The School Law Amendments of 1931 are set out in Chapter 71. As they affect the public schools they deal with provisions for non-resident pupils, and for both public and high schools they encourage the provision of playground and gymnasium facilities. What the cost of county pupils in high and continuation schools is to include is further defined. The high school year is in future to be considered one of two terms instead of three. Provision is made for the establishment of joint vocational school districts, consisting of two or more municipalities. This is to enable vocational schools to be introduced in cases where a single district does not feel capable of supporting one alone. The schools would be managed by a Board on which each of the co-operating municipalities would have three members.

The McMaster University property on Bloor Street in Toronto becomes the property of the province by Chapter 72. The main building on the property has since been occupied by the Economics and Social Science Departments of the University of Toronto.

The Industrial Schools Act is amended at length by Chapter 73. Provision is made for the appointment by the Government of an Industrial Schools Advisory Board for the province, the Board to consist of three members appointed for two-year terms and charged with defining the courses to be provided, obtaining past records of children committed to the schools, designating the type of school in which each child should be placed and the type of instruction suited to his intelligence, recommending conditions of possible parole and time of return to his or her parents.

The Ontario Training Schools Act, 1931, replaces the previous Boys' Welfare Home and School Acts, and provides for the establishment of training schools for boys and girls, who have been minor offenders or delinquents. The boys' school established at Bowmanville under the previous Act, changes its name from "Welfare Home" to "Training School" and comes under the operation of the new Act. Every child admitted becomes a ward of the school until he becomes of age, unless otherwise arranged by the Minister. The Ontario Training Schools Board is to consist of fifteen members and is intended to act in a rather more strictly advisory capacity than the Industrial School Board, above mentioned than the Industrial School Board, above mentioned.

Manitoba

The Public Schools Act, which was revised and brought up to date in 1930, is amended by Chapters 41 and 42 of 1931. The changes seem mainly to introduce more specific terminology in some sections, except that the types of sinking fund investment that may be made by the Winnipeg School District are defined. It is of interest to enumerate these as at least partially illustrative of the types generally purchased by school boards: (a) bonds, stocks, bills or debentures, or other securities of the Dominion of Canada or of any province, county, city, town, village, rural municipality, local improvement district, school district, telephone company; (b) any promissory notes or debentures or other form of indebtedness of the city of Winnipeg; (c) any security the principal and interest of which is guaranteed by the Dominion of Canada or by any province thereof; (d) securities of the Greater Winnipeg Water District. The most striking feature of the list is the predominance of the purchasable obligations of public bodies (probably somewhat more so than the average in other cities), and at the same time the wide range of these that is permissible.

The School Attendance Act is amended by Chapter 44, by making it obligatory for every school principal except in cities, to report to the Department of Education monthly, the name, age, and address of each pupil reported to the school attendance officer.

Local or private Acts affect the election of trustees in St. James Municipality, incorporate Riverbend School for Girls (a new private school in Winnipeg under the control of the United Church) and vest the assets of St. John's College Ladies' School in the Archbishop of Rupert's Land.

Saskatchewan

The School Act is amended by Chapter 52. (1) Forms for the nomination and acceptance of trustees are prescribed, and some other details of administrative procedure. (2) Several changes facilitate medical and dental inspection of children. (3) It was previously permissible to use French as the chief language of instruction during the first year at school, but henceforth the use of French in the first year is to be confined to giving instruction in it where desired for one hour daily as in the case of the other elementary grades. About 3 per cent of rural pupils and 4 per cent of urban receive daily instruction in French under this provision throughout the Saskatchewan elementary school course. (4) The minimum number of days that all schools may operate in a year is raised from 185 to 200. (5) For the purposes of computing the teacher's salary, 200 days of teaching will in future be considered a full year in place of 210 as formerly. (6) Teachers 'contracts with trustee boards may not be prematurely terminated in future without the party instrumental in terminating the agreement giving notice, with reasons, to the Minister. And the party receiving notice may, within fifteen days, request the Minister to appoint a board of reference to inquire into the circumstances, the board to consist of three persons, one nominated by the trustees but not from among their members, one by the teacher, and an inspector of schools by the Minister. The board, with the Minister's approval, may order the reinstatement of the teacher until the end of the current school term. (7) The fees charged non-resident pupils may be varied with the grades. (8) If the board of any district uses the funds of the district to pay a teacher for teaching a language other than those prescribed, outside of school hours, or pays part of a teacher's regular salary for the same kind of service, any two ratepayers may recover as a debt for the school district from the members of the board the funds so used.

The School Assessment Act is amended by Chapter 53. The Minister is empowered to order an extension of time for carrying out provisions under the Act. With the Minister's consent, a school board may compromise the claim of the district for arrears of taxes on transferred lands. For other changes the Act should be consulted.

Teachers' Superannuation Fund.—Chapter 54 alters the basis of contribution of the Provincial Treasury to the Fund. Instead of being a specified proportion it will be all residual requirements beyond what the teachers have contributed, and the accrued interest thereon.

Alberta

The School Act is consolidated and amended by Chapter 32 of 1931, and the School Assessment Act likewise by Chapter 33 with a view to simplifying the making of assessments and levying of taxes, and of making the Act conform with other provincial statutes dealing with the levying and collection of taxes.

Trade Schools, privately-controlled.—Chapter 41 is an Act to regulate schools purporting to teach trades such as barbering, hairdressing, automobile mechanics, building trades, etc. In future every such school must be registered with the Minister and subject to inspection by him. If inspection finds the school insufficiently provided with the means of instruction, or that the charges made for the instruction given are unreasonable, or that regulations with reference to advertising are not observed, the certificate of registration is liable to be cancelled, and the school thereby forced to cease operation. The Act further empowers the Government to prescribe the minimum number of hours instruction which shall constitute any trade course and the maximum fees chargeable for it, and to prohibit the use of misleading advertising relating to any such school.

British Columbia

The Public Schools Act is subjected to changes in Chapter 53. Some of these are as follows: (1) A regularly organized rural school district as well as an assisted rural district may now operate

with six pupils only in average attendance, whereas, the former was previously required to have eight pupils. A high school must have at least ten pupils and a superior school must have at least six pupils in average attendance in high school grades in order to maintain their status. (2) Rural school districts may be united, or their boundaries altered, or union high-school districts formed, on application of the trustee boards concerned in future without a majority vote of the ratepayers as was formerly necessary. (3) The School Text Book Branch is given power to sell through book-sellers and stationers. (4) Permission is given to admit with a charge for tuition, children from other provinces to the school for the deaf and blind. (5) The Council of Public Instruction is empowered to grant from provincial funds, scholarships for admission to the provincial normal schools and university, and to students in attendance at the latter. (6) A new basis of provincial grants is projected, to become effective in September, 1932. The grants will be based on a Departmental schedule of teachers' salaries, and the ability of the district to support a school, with a view to effecting a more equitable distribution of school costs. They will still be payable to school boards in municipal school districts and elsewhere directly to teachers. For details of the scheme the Act should be consulted. (7) The amendments introduced in 1930 relating to aid in relief of owners of farm lands and wild lands are repealed. (8) Boards are empowered to admit children six months before they become six years old, but they are not to be obliged to admit a child in Grade I more than two weeks after the reclassification is made at the beginning of a term. (9) Several sections deal with non-resident pupils. (10) The standards of school accommodation are again altered, i.e., the number of pupils per teacher allowable. (11)

The constitution of the commission appointed to administer the Education of Soldiers'

Dependent Children Act is changed by Chapter 19.

The Board of Governors of the *University of British Columbia* is empowered by Chapter 66 to determine the number of students that may in its opinion, having regard to the funds available, be accommodated; to make regulations for limiting the number of students; and to choose the manner of selecting students when the number has to be restricted.

APPENDIX II.—CENSUS DIVISIONS IN THE FOUR WESTERN PROVINCES.

In Table III of Part II certain data are given for areas within each province. In the five most easterly provinces these intra-provincial areas are counties. In the four western provinces, since there are no units of area corresponding to counties, the census gives data for areas termed "census divisions" which remain the same from census to census. The Province of Manitoba is divided into 16 such divisions, Saskatchewan 18, Alberta 17, British Columbia 10. The Survey of Education adopts these areas for the purpose of giving information for sectional parts of the province, as also does the Annual Report on Vital Statistics, etc. of the Dominion Bureau of Statistics. The following pages indicate the area included in each census division, and the accompanying maps for the three Prairie Provinces, in addition to showing the location of all schools, show the boundaries of each division, though it has been necessary to omit a part of the most northerly division in each. This, however, leaves out less than a dozen schools in the three provinces combined.

MANITOBA

Division No. 1 comprises the municipalities of Birch River (1), Hanover (2), La Broquerie (3), Piney (4), Ste. Anne (5), Sprague (6), Stuartburn (7), Tache (8); Unorganized parts East of the Principal Meridian between townships 3 and 10 (9).

Division No. 2 comprises the municipalities of De Salaberry (1), Franklin (2), Montcalm (3), Morris (4), Rhineland (5), Roland (6), Stanley (7), Thompson (8); Indian Reserves—Roseau Band; Towns—Emerson, Morden, Morris; Villages—Gretna, Plum Coulee, Winkler.

Division No. 3 comprises the municipalities of Argyle (1), Lorne (2), Louise (3), Pembina (4), Riverside (5), Roblin (6), Strathcona (7), Turtle Mountain (8); Indian Reserves—Swan Lake; Town—Killarney; Villages—Manitou, Pilot Mound.

Division No. 4 comprises the municipalities of Albert (1), Arthur (2), Brenda (3), Cameron (4), Edward (5), Morton (6), Whitewater (7), Winchester (8); Towns—Boissevain, Deloraine, Hartney, Melita; Village—Napinka.

Division No. 5 comprises the municipalities of Brokenhead (1), Fort Alexander (2), Kildonan East (3), Lac du Bonnet (4), St. Clements (5), St. Paul East (6), Springfield (7), Victoria Beach (8), Whitemouth (9); Unorganized parts East of the Principal Meridian between townships 9 and 21 (10); Indian Reserves—Fort Alexander, Brokenhead; Towns—Beauséjour, Transcona; Village—Lyall.

Division No. 6 comprises the municipalities of Cartier (1), Charleswood (2), Dufferin (3), Fort Garry (4), Grey (5), Macdonald (6), Portage la Prairie (7), Ritchot (8), St. Vital (9); Indian Reserves—Long Plain, Sioux Village; Cities—Portage la Prairie, St. Boniface, Winnipeg; Towns—Carman, Tuxedo.

Division No. 7 comprises the municipalities of Cornwallis (1), Cypress North (2), Cypress South (3), Elton (4), Norfolk North (5), Norfolk South (6), Oakland (7), Victoria (8); Indian Reserves—Indian Gardens; City—Branden; Town—Carberry; Village—Wawanesa.

Division No. 8 comprises the municipalities of Daly (1), Glenwood (2), Pipestone (3), Sifton (4), Wallace (5), Whitehead (6), Woodworth (7); Indian Reserves—Oak Lake, Oak River; Towns—Oak Lake, Rivers, Souris, Virden; Village—Elkhorn.

Division No. 9 comprises the municipalities of Assiniboia (1), Kildonan West (2), Rockwood (3), Rosser (4), St. Andrews (5), St. Francois Xavier (6), St. James (7), St. Paul West (8), Woodlands (9); Towns—Selkirk, Stonewall, Winnipeg Beach.

Division No. 10 comprises the municipalities of Glenella (1), Lakeview (2), Langford (3), Lansdowne (4), McCreary (5), Rosedale (6), Westbourne (7); Indian Reserves—Lake View; Towns—Gladstone, Neepawa.

Division No. 11 comprises the municipalities of Archie (1), Birtle (2), Blanshard (3), Clanwilliam (4), Ellice (5), Hamiota (6), Harrison (7), Miniota (8), Minto (9), Odanah (10), Saskatchewan (11), Shoal Lake (12); Strathclair (13); Indian Reserves—Bird Tail, Rolling River, Keeseekoowenins; Towns—Birtle, Minnedosa, Rapid City; Villages—Foxwarren, Hamiota, Shoal Lake.

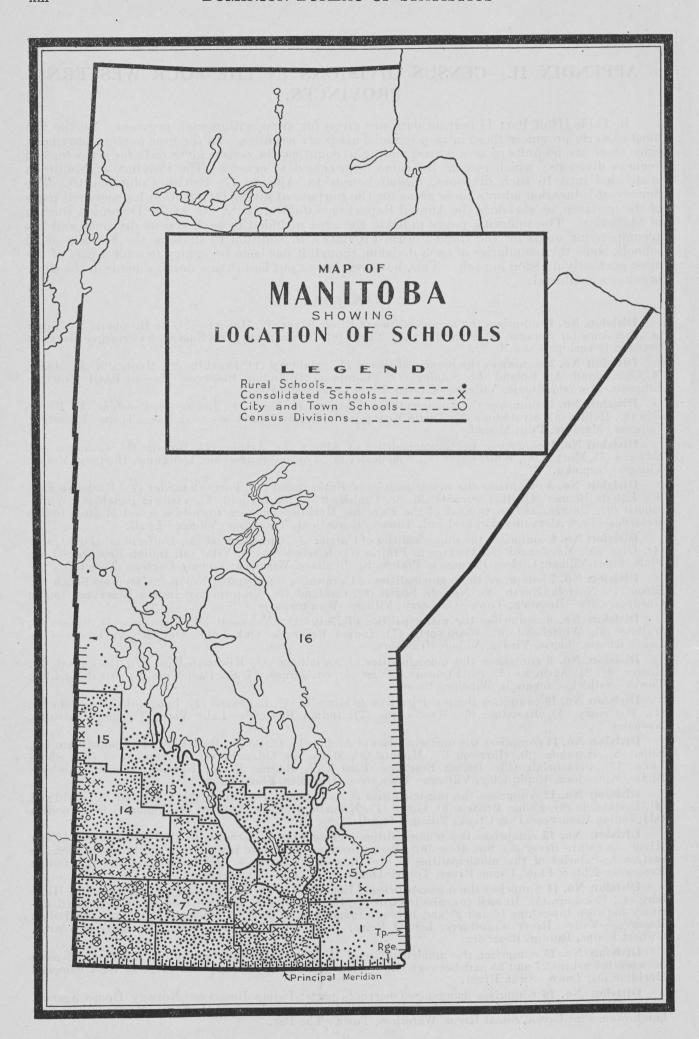

Division No. 12 comprises the municipalities of Armstrong (1), Bifrost (2), Chatfield (3), Coldwell (4), Ericksdale (5), Fisher Branch (6), Gimli (7), Kreuzburg (8), St. Laurent (9), Siglunes (10), Woodlea (11); Indian Reserves—Dog Creek; Village—Gimli.

Division No. 13 comprises the municipalities of Dauphin (1), Ethelbert (2), Lawrence (3), Mossy River (4), Ochre River (5), Ste. Rose (6); Unorganized parts north of township 20 and lying between the eastern boundaries of the municipalities of Ste. Rose and Lawrence, and Lake Manitoba (7); Indian Reserves—Ebb & Flow, Crane River; Town—Dauphin; Village—Winnipegosis.

Division No. 14 comprises the municipalities of Boulton (1), Gilbert Plains (2), Grandview (3), Hillsburg (4), Rossburn (5), Russell (6), Shellmouth (7), Shell River (8), Silver Creek (9); Unorganized territory between townships 18 and 23 and between ranges 16 and 26 West Principal Meridian (10); Indian Reserves—Valley River, Gamblers, Lizard Point; Towns—Grandview, Russell; Villages—Binscarth, Gilbert Plains, Roblin, Rossburn.

Division No. 15 comprises the municipalities of Minitonas (1), Swan River (2); Unorganized parts between townships 27 and 35 and between the western provincial boundary and range 23 West Principal Meridian (3); Town—Swan River.

Division No. 16 comprises unorganized northern parts; Indian Reserves—Norway House Agency, Fisher River Agency, Pas Agency, Black River, Hollow Water, Fairford, Lake St. Martin, Little Saskatchewan, Pine Creek, Shoal River, Waterhen; Town—The Pas.

SASKATCHEWAN

Division No. 1 comprises the municipalities of Argyle (1), Mount Pleasant (2), Enniskillen (3), Coal fields (4), Estevan (5), Storthoaks (31), Reciprocity (32), Moose Creek (33), Browning (34), Benson (35), Antler (61), Moose Mountain (63), Brock (64), Tecumseh (65), Maryfield (91), Walpole (92), Wawken (93), Hazelwood (94), Golden West (95), Indian Reserve —Moose Mountain; Towns—Alameda, Arcola, Carlyle, Carnduff, Estevan, Oxbow; Villages—Antler, Bienfait, Carrievale, Fairlight, Forget, Frobisher, Gainsborough, Glen Ewen, Heward, Kennedy, Kisbey, Lampman, Manor, Maryfield, North Portal, Redvers, Roche Percée, Stoughton, Wauchope, Wawota.

Division No. 2 comprises the municipalities of Cambria (6), Souris Valley (7), Lake Alma, (8), Surprise Valley (9), Happy Valley (10), Cymri (36), Lomond (37), Laurier (38), The Gap (39), Bengough (40), Griffin (66), Weyburn (67), Brokenshell (68), Norton (69), Key West (70), Fillmore (96), Wellington (97), Scott (98), Caledonia (99), Elmsthorpe (100); City—Weyburn; Towns—Milestone, Ogema, Radville, Yellowgrass; Villages—Amulet, Avonlea, Bengough, Bromhead, Ceylon, Colgate, Creelman, Fillmore, Forward, Goodwater, Griffin, Halbrite, Horizon, Khedive, Lang, Macoun, McTaggart, Midale, Osage, Pangman, Tribune, Truax, Tyvan.

Division No. 3 comprises the municipalities of Hart Butte (11), Poplar Valley (12), Willow Bunch (42), Waverley (44), Mankota (45), Glen McPherson (46), Excel (71), Lake of the Rivers (72), Stonehenge (73), Wood River (74), Pinto Creek (75), Auvergne (76), Terrell (101), Lake Johnston (102), Sutton (103), Gravelbourg (104), Glen Bain (105), Whiska Creek (106); Unorganized Territorial Units 13, 14, 15, 16, 43; Indian Reserve—Wood Mountain; Towns—Assiniboia, Gravelbourg; Villages—Aneroid, Ardill, Congress, Ettington, Expanse, Hazenmore, Kincaid, Lafleche, Limerick, Mazenod, Meyronne, Mitchellton, Mossbank, Neville, Palmir, Ponteix, Readlyn, Spring Valley, Vanguard, Vantage, Verwood, Viceroy, Woodrow.

Division No. 4 comprises the municipalities of Lone Tree (18), Frontier (19), White Valley (49), Reno (51), Wise Creek (77), Grassy Creek (78), Arlington (79), Lac Pelletier (107), Bone Creek (108), Carmichael (109), Piapot (110), Maple Creek (111); Unorganized Territorial Units 17, 20, 21, 22, 47, 48, 50, 52, 80, 81, 82, 112; Towns—Eastend, Maple Creek, Shaunavon; Villages—Admiral, Cadillac, Carmichael, Consul, Dollard, Hatton, Piapot, Robsart, Scotsguard, Vidora.

Division No. 5 comprises the municipalities of Moosomin (121), Martin (122), Silverwood (123), Kingsley (124), Chester (125), Rocanville (151), Spy Hill (152), Willowdale (153), Elcapo (154), Wolseley (155), Langenburg (181), Fertile Belt (183), Grayson (184), McLeod (185), Churchbridge (211), Saltcoats (213), Cana (214), Stanley (215); Indian Reserve—Crooked Lake Agency; Towns—Bredenbury, Broadview, Fleming, Grenfell, Lemberg, Melville, Moosomin, Saltcoats, Wapella, Whitewood, Wolseley; Villages—Atwater, Bangor, Birmingham, Churchbridge, Dubuc, Duff, Esterhazy, Fenwood, Glenavon, Goodeve, Grayson, Killaly, Kipling, Langenburg, MacNutt, Neudorf, Otthon, Rocanville, Spy Hill, Stockholm, Summerberry, Tantallon, Waldron, Welwyn, Windthorst.

Division No. 6 comprises the municipalities of Montmartre (126), Francis (127), Lajord (128), Bratt's Lake (129), Redburn (130), Indian Head (156), South Qu'Appelle (157), Edenwold (158), Sherwood (159), Pense (160), Abernethy (186), North Qu'Appelle (187), Lumsden (189), Dufferin (190), Tullymet (216), Lipton (217), Cupar (218), Longlaketon (219), McKillop (220), Sarnia (221); Indian Reserves—Qu'Appelle Agency, Assiniboine Agency, File Hill Agency; City—Regina; Towns—Balgonie, Francis, Indian Head, Lumsden, Qu'Appelle, Rouleau, Sintaluta, Strasbourg; Villages—Abernethy, Balcarres, Belle Plaine, Bethune, Briercrest, B-Say-Tab, Bulyea, Chamberlain, Craven, Cupar, Dilke, Disley, Drinkwater, Dysart, Earl Grey, Edenwold, Findlater, Fort Qu'Appelle, Grand Coulee, Holdfast, Kendal, Kronau, Lebret, Lipton, Markinch, McLean, Montmartre, North Regina, Odessa, Pense, Penzance, Pilot Butte, Regina Beach, Sedley, Silton, Southey, Vibank, Wilcox.

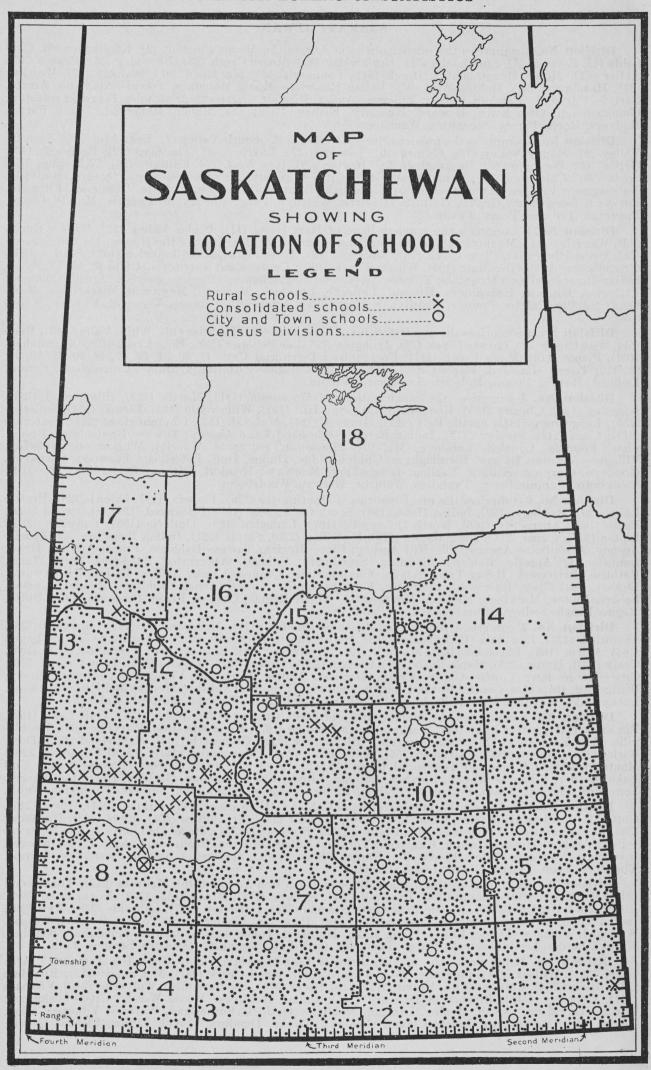

Division No. 7 comprises the municipalities of Baildon (131), Hillsborough (132), Rodgers (133), Shamrock (134), Lawtonia (135), Coulee (136), Moose Jaw (161), Caron (162), Wheatlands (163), Chaplin (164), Morse (165), Excelsior (166), Marquis (191), Eyebrow (193), Enfield (194), Vermilion Hills (195), Craik (222), Huron (223), Maple Bush (224), Canaan (225), Victory (226), Coteau (255), King George (256); City—Moose Jaw; Towns—Caron, Craik, Herbert, Morse, Mortlach; Villages—Aylesbury, Birsay, Bridgeford, Brownlee, Central Butte, Chaplin, Dunblane, Ernfold, Eyebrow, Hodgeville, Keeler, Lawson, Lucky Lake, Marquis, Mawer, Parkbeg, Riverhurst, Rush Lake, Tugaske, Tuxford, Waldeck.

¹ Figures for 1 (a) and 1 (b) in Quebec are for 1929-30; for 1 (a) in Ont., except secondary schools, are for calendar year 1930; all others are for 1930-31.

² Includes 242 in the Yukon in 1 (a), 379 in the Yukon and N.W.T. in 6, and 13,953 in population.

³ There are some duplicates, impossible to separate, between 1 (a) and 2 (a), in the four western provinces.

⁴ Includes 7,316 in non-technical night schools, in Ont., and 31,494 in non-subsidized evening domestic science courses in Outloop.

in Quebec.
⁵ Includes also 598 in the Departmental summer schools for teachers in N.S., 4,626 in Ont., and 162 in B.C., not held at universities or colleges.

6 Includes also 1 (b) in Quebec and Alberta, and 2 (a) in Ontario and British Columbia.

* Estimated on same basis as in previous reports.

† These students are entered according to province of residence. There are schools in five provinces.

Les chiffres pour 1 (a) et 1 (b) de Québec se rapportent à 1929-30; ceux 1 (a) de l'Ontario, sauf ceux des écoles secondaires, à l'année civile 1930; tous les autres sont pour 1930-31.
Y compris 242 dans le Yukon en 1 (a), 379 dans le Yukon et les territoires du N.-O. en 6, et 13,953 en population.
Il y a quelques duplicata, impossible de distinguer entre 1 (a) et 2 (a) dans les quatres provinces de l'Ouest.
Y compris 7,316 dans les écoles du soir non techniques de l'Ont., du Qué., 31,494 cours du soir non subventionnées de science ménagère.
Y compris aussi 598 dans les écoles départementales pour instituteurs en N.-E., 4,626 en Ont., et 162 en C.B., cours qui ne sont pas donnés aux universités ou collèges.
Y inclus 1 (b) dans le Qué. et l'Alta, et 2 (a) dans l'Ont., et la C.-B.
Estimé selon les rapports précédents.
Les étudiants sont entrés selon la province domiciliaire. Cinq provinces ont de telles écoles.

¹ Including all the students of the Technical College except those following regular degree courses.

² Calculated from the total attendance First Term (5,417,076·5); Second Term (7,917,528·5); average number of days school was open First Term (79) and average number days school was open Second Term (113). This gives a total days attendance during the year of 13,344,605 and an average number of days school was open of 192, from which the average daily attendance is seen to be 69,451.

¹ Comprenant tous les élèves du collège technique excepté les étudiants suivant les cours réguliers.

2 Calculé sur la fréquentation totale du premier terme (5,417,076·5); second terme (7,917 528·5). Nombre moyen de jours de classe dans le premier terme, 79, et dans le second terme, 113, Ceci donne une fréquentation totale de 13,334,605 pour l'année, et 192 jours de classe avec une fréquentation moyenne de 69,451 par jour.

General Note.—The age figures in tables 3 and 4 are from the census of 1931. The School enrolment figures for each province are those of the provincial school reports, though determination of the number in each county or census division except in Prince Edward Island and Nova Scotia has generally been done in the Bureau of Statistics. New Brunswick figures include vocational schools which are not added in the provincial totals. Quebec figures include only "primary" schools, and not classical colleges and technical schools, but city figures include kindergartens. The provincial statistics are given for electoral divisions. The counties differing from these are marked with an asterisk. In these the enrolment has been estimated. Ontario figures simply constitute the addition of the enrolment shown in the provincial report in different types of schools. The secondary grade enrolment does not include pupils of elementary schools in "fifth classes" who number 6,618. Manitoba, Saskatchewan and Alberta figures are compiled from individual school returns, the last by a special effort of the Alberta Department of Education. For British Columbia the provincial enrolment in each division is calculated from the number reported at school in each division by the census of 1931.

For British Columbia the provincial enrolment in each division is calculated from the number reported at school in each division by the census of 1931.

Note Générale.—Les chiffres quant à l'âge des tableaux 3 et 4 sont ceux du recensement de 1931. Les chiffres de l'inscription pour chaque province sont ceux des rapports provinciaux bien que la détermination du nombre dans chaque comté ou division de recensement, sauf pour l'Île du Prince-Edouard et la Nouvelle-Ecosse, ait en partie été faite par le Bureau Fédéral de la Statistique. Les chiffres du Nouveau-Brunswick comprennent les écoles industrielles, lesquelles ne figurent pas dans les totaux provinciaux. Les chiffres du Québec comprennent seulement les écoles primaires, et non les collèges classiques et les écoles techniques, mais les chiffres des villes comprennent les écoles maternelles. Les chiffres de l'Ontario constituent sont données pour les circonscriptions électorales. Les comtés différant de ceux-ci sont marqués d'un astérisque. Ceux de l'inscription ont été estimés. Les chiffres de l'Ontario constituent simplement l'addition de l'inscription indiquée dans le rapport provincial des divers types d'écoles. L'inscription du degré secondaire ne tient pas compte des élèves des écoles élémentaires de "cinquième classe" au nombre de 6,618. Les chiffres de Manitoba, de Saskatchewan et d'Alberta sont la compilation des rapports de chaque école, les derniers sont dus à un effort spécial du département de l'Instruction Publique. Pour la Colombie Britannique, l'inscription provinciale dans chaque division est calculée d'après le nombre déclaré à l'école de chaque division par le recensement de 1931.

7.—Comparative Table of the Distribution of Pupils by Grades in Publicity Controlled Schools in the Different Provinces during the year 1931 or the latest year reported. 7.—Tableau comparatif de la répartition des élèves dans les écoles publiquement contrôlées des différentes provinces, par degrés, pendant l'année 1931, ou l'année la plus rapprochée.

Note on Grades.—The elementary schools course in Ontario cities is now one of seven years only, though the entrace to high school is shown as Grade VIII in the table below. As is evident from the figures a majority of the pupils do not spend two years in Grade III and IV (Form II.) On the other hand, Grade XI (Lower School) commonly requires two years now though shown as a single grade. The tendency has been toward a seven-five grade division between the elementary and secondary schools. In Quebec Protestant schools the elementary grades are in reality also limited to seven. Grade VIII is considered a secondary year, thus making the high school course for junior matriculation one of four years as in Ontario. Many of the New Brunswick pupils shown in Grade VIII are also doing work of high school grade. University matriculation in all provinces is represented by the Grade XI column. Grade XII is in effect a post graduate high school year and is equivalent to the first year at a university. The table below omits data for Quebec Catholic schools. Figures of their enrolment by years are given in a sup-

plementary table on the next page.

Nota.—Le cours de l'école élémentaire des cités de l'Ontario est actuellement de sept ans seulement, bien que l'entrance au High School soit indiquée comme degré VIII dans le tableau ci-dessous. Les chiffres démontrent qu'une majorité des élèves ne passent pas deux années dans le degré III et IV (2ième forme.) D'autre part, le degré XI (Lower School) requiert généralement deux années, bien qu'il soit indiqué comme dégre unique. La tendance est vers une division de degré cinq-sept entre les écoles élémentaires et secondaires. En Québec, les degrés élémentaires des écoles protestantes sont en réalité aussi limités à sept. Le degré VIII est considéré une année secondaire, portant ainsi le cours de lycée pour immatriculation junior à quatre ans comme en Ontario. Plusieurs des élèves du Nouveau-Brunswick indiqués au degré VIII font aussi du degré de lycée. L'immatriculation d'université, dans toutes les provinces, est représentée par la colonne du degré XII est en réalité une année post-graduée et équivaut à la première année d'université. Le tableau ci-dessous ne contient pas les données pour les écoles catholiques du Québec, les chiffres d'inscription de cette province sont donnés dans un tableau supplémentaire à la page qui suit.

¹Not including 380 more advanced pupils in P.W.C. ² These include 98,089 pupils who were in elementary schools before mid-summer but entered Secondary Schools after. In a sense they are duplicates arising from the fact that the Statistics of Public and Separate Schools and those of Secondary Schools overlap six months. 3 Preparatory—Kindergarten and Kindergarten Primary in Ontario, "Preparatory" in Quebec. 4 Including private schools.

1 Ne comprend pas 380 élèves plus avancés au Prince of Wales College. 2 Comprenant 98,089 élèves qui étaient dans les écoles élémentaires avant les vacances d'été, et sont ensuite entrés à l'école secondaire. Dans un sens, ce sont des duplicata dans les statistiques des écoles publiques et séparées d'une part et les écoles secondaires de l'autre, parce qu'il y a chevauchement de six mois dans le terme scolaire. 3 Préparatoire, les écoles maternelles et les jardins d'enfance dans l'Ontario, préparatoire dans Québec. 4 Comprenant les écoles privées.

Note on Quebec Catholic Schools.—This table is supplementary to the one on the preceding page which gives the corresponding information for Quebec Protestant schools and the schools of other provinces. It may be seen in the table that the elementary course in the Catholic schools, in addition to one preparatory year in which special emphasis is placed on moral and practical training, consists of six years. These seven years correspond in a general way to the elementary grades in other provinces which as noted on the preceding page, are in some cases seven and in other cases eight in number. Next follow two complementary or continuation years which are the equivalent of high school grades as that term is used in other provinces. These two years are taken by students preparing for teachers' diplomas by examination from the provincial Board of Examiners, and correspond closely to the first two years of the course in the normal schools. The last three years, or superior course, were added to the curriculum of the Catholic schools for the first time in the year 1929–30. The instruction is a continuation of that given in the complementary course and is intended to prepare young people for commercial and industrial positions and for adminssion to special higher schools such as the Polytechnic school, and School for Higher Commercial Studies. Throughout the complementary and superior courses emphasis is placed on practical training. These courses do not offer classical studies in preparation for university entrance as do the High Schools of other provinces. This is done in the classical colleges, etc., which are the genuine secondary schools of the Catholic system. In this report their statistics are included in the University and College Section.

Nota sur les écoles catholiques du Québec et des autres provinces. On verra par ce tableau que le cours élémentaire des écoles catholiques, en plus d'une année plus spécialement consacrée à une formation morale et pratique, consiste de six années. Ces sept années correspondent, en somme, aux degrés élémentaires des autres provinces, lesquels comme on le souligne dans la page précédente, sont en certains cas de sept et dans d'autres de huit. Viennent ensuite deux années complémentaires ou de continuation qui équivalent aux degrés de lycée "high school" terme employé dans les autres provinces. Ces deux années sont suivies par les étudiants qui se préparent aux examens du Bureau provincial des Examinateurs pour certificat d'instituteur, et correspondent étroitement aux deux premières années de cours des écoles normales. Les trois dernières années, ou cours supérieur, ont été ajoutées au curriculum des écoles catholiques pour la première fois en 1929-30. L'enseignement fait suite à celui donné dans le cours complémentaire et prépare la jeunesse aux positions commerciales et industrielles et à l'admission à des écoles supérieurs spéciales comme l'Ecole polytechnique et l'Ecole des Hautes Etudes Commerciales. Dans les cours complémentaires et supérieurs on s'applique spécialement à une formation pratique. Ces cours ne contiennent pas les études classiques préparatoires à l'entrée à l'université comme catholique. Dans ce présent rapport, leurs statistiques sont comprises dans la section consacrée aux universités et aux collèges.

Pupils classified in the above table do not represent the full enrolment of the year, but the enrolment of a particular day—the last school day of May. The number thus recorded is 98,089 short of the year's enrolment in elementary schools, and an unknown number short of the year's secondary enrolment.

Les élèves qui figurent au tableau ci-dessus ne représentent pas l'entière inscription de l'année, mais l'inscription d'un jour particulier—le dernier jour scolaire de mai. Il manque donc à l'inscription des écoles élémentaires de l'année 98,089 et un nombre inconnu fait aussi défaut dans l'inscription secondaire.

SECONDARY EDUCATION—ENSEIGNEMENT SECONDAIRE

General Note:—Under Quebec are included more than the publicly controlled schools, for in the Catholic System, strictly speaking, all of the secondary schools (i.e., classical colleges, affiliated girls schools, and unaffiliated classical schools for boys) are outside of the provincially-controlled group of "primary" schools. The complementary course in the latter is secondary as that term is understood in other provinces, but is not called secondary within Quebec where the term designates the set of schools preparing students for matriculation to university professional courses, as opposed to the "primary" schools which give the general training required for teachers' certificates, admission to technical schools, etc. In the Protestant Schools of Quebec and in the provincial school systems of all other provinces both these types of training are given in the high school grades of the one set of schools. The normal Schools are also included below in Quebec as their courses last from two to four years, and provide general training the equivalent of the complementary course in the primary schools, plus teachers' professional training. (Some teachers obtain their training for a certificate in the ordinary primary schools, others in the normal schools).

Note generale:—En Québec, ne figurent pas uniquement les écoles publiques subventionnées, les institutions catholiques proprement dites confondent toutes les écoles secondaires (collèges classiques, collèges affiliés de filles et collèges non affiliés de garçons) et sont en dehors du groupe des "Ecoles primaires" sous le contrôle de la province. Le cours complémentaire de ce dernier groupe équivaut à secondaire, comme on l'entend dans d'autres provinces, mais n'est pas ainsi dénommé en Québec où le terme secondaire désigne les étudiants de l'Immatriculation aux cours universitaires, contrairement à "l'Ecole primaire" qui donne la culture requise pour le diplôme d'instituteur, l'admission à l'école technique, etc. Dans les écoles protestantes du Québec et dans les écoles publiques de toutes les autres provinces, ces deux genres de culture sont donnés dans les degrés de "high school" d'un seul groupe d'écoles. Les écoles normales sont aussi comp ises en Québec, ces cours durent de deux à quatre ans et procurent une culture équivalente au cours complémentaire des écoles primaires, en plus de la préparation professionnelle. Certains instituteurs se préparent à l'obtention du diplôme dans les écoles primaires ordinaires, autres que les écoles normales.

49.—Statistics of the different types of Schools doing work of High School Grade in each province, 1931 or latest year reported 49.—Types d'ecoles où l'on professe les matières secondaires dans chaque province du Canada, chiffres de 1931 ou du dernier rapport

52.—Ontario High Schools, Collegiate Institutes and Day Vocational Schools: Number of pupils by Subjects of Study, 1911-1931
52.—Ontario—Hautes écoles, Instituts Collégiaux et Ecoles professionnelles: Nombre d'élèves dans chaque matière d'enseignement, 1911-1931

¹ Includes only General Chemistry. ² Only Elementary Drawing of Vocational Art Subjects is included. The Regular Art Courses of the day vocational schools in 1931 included 33 Art Subjects. ³ Including only "Home Economics" and "General Woodwork" in the Day Vocational Schools. ⁴ In Day Vocational Schools other subjects in these schools excepting those that could be added to the similarly named subjects in the Collegiate Institutes and High Schools, are omitted. ⁵ High School course only. ⁶ Estimated in the case of Vocational Schools. ⁷ Business practice in Lower School.

¹ Eléments de la chimie seulement.
² Sont compris seulement les sujets de dessin élémentaire des écoles d'apprentissage. Les cours réguliers sur l'art donnés en 1931 dans les écoles professionnelles comportaient 33 sujets d'art.
³ Comprend seulement l'économie ménagère et le travail du bois dans les écoles d'apprentissage de jour.
⁴ Ecoles d'apprentissage; les autres matières enseignées dans ces écoles sont omises, à l'exception de celles également enseignées dans les instituts collégiaux et les "high schools".
⁵ Cours des "High School" seulement.
⁵ Estimatif dans le cas des écoles d'apprentissage.
¹ Pratique commerciale dans les écoles secondaires inférieures.

53.—Ontario—Continuation Schools: Number of pupils by subjects of Study 1911-1931
53.—Ontario—Ecoles de continuation: Nombre d'élèves dans chaque matière d'enseignement, 1911-1931

Divisions here refer to rank of successful candidates; in Matriculation and High School leaving examination; Division 1 requires a pass with 75 p.c. of the marks obtainable, with no subject below 50 p.c.

As on June 30.

Departmental examinations in this Grade discontinued.

Ces divisions sont selon le rang du candidat heureux aux examens d'immatriculation de haute école: la division 1, exige une moyenne de 75 p.c. et aucune matière au-dessous de 50 p.c.

Les 30 juin.

Les examens dans ce degré ont été interrompus.

¹ Includes the pupils of Continuation Schools, H.S. and Collegiate Inst. only. In 1930-31 in all secondary grades there were approximately 50,011 boys and 53,309 girls. These included full day vocational, public, and separate schools. The figures in the tables are confined to continuation, H.S. and Collegiate Inst. for comparative purposes. ² Approximately.

¹ Comprend seulement les élèves des écoles de continuation, des hautes écoles et des instituts collégiaux. En 1930-31 leur nombre était approximativement 50,011 garçons et 53,309 filles. Cela comprend les écoles publiques séparées et d'apprentissage. Les chiffres de ce tableau se bornent aux hautes écoles et aux instituts collégiaux pour fins de comparaison.

² Approximativement.

Welland	134	104	238	254	51	- 1	114	129	243 Welland.

^{*}This table does not include students in commercial courses in Quebec which, it will be noted, constitute the most numerous group in other provinces. In Quebec statistics they are included with the high schools, classical colleges, etc. Moreover, this table comes far short of demonstrating the full importance of technical or vocational training in Quebec on another ground. All of the work in the Catholic schools in advance of the elementary years (i.e. the five complementary, and superior years including about 25,000 pupils) has a strong vocational flavour. Apart from certain general subjects in these years which all take in common, optional subjects are grouped in four vocational sections, in one of which each pupil studies.

*Ce tableau ne comprend pas les étudiants des cours commerciaux en Québec lesquels, on le remarquera, constituent le groupe le plus nombreux dans les autres provinces. Dans les statistiques du Québec, ils sont confondus avec les lycées, les collèges classiques, etc. De plus, ce tableau est bien loin de faire ressortir toute l'importance de la culture technique ou industrielle du Québec. Tout le travail dans les écoles catholiques dans les avancées du cours élémentaire (disons les cinq années complémentaires et secondaires comprenant environ 25,000 élèves) porte une forte empreinte de culture industrielle. En dehors de certains sujets généraux en ces années, lesquels couvrent tous les sujets ordinaires, les sujets facultatifs sont groupés en quatre sections industrielles, chaque élève étudie dans une de ces sections. sections industrielles, chaque élève étudie dans une de ces sections.

Note.—The teachers classified in this table are about 250 short of the total employed in the province. Most of the unclassified are "classroom assistants", (of which there were over 100) and reserve teachers in the city schools.

Nota.—Il y a un écart d'environ 250 entre les instituteurs figurant dans ce tableau et le total de la province. La plupart des non classifiés sont des "sous-maîtres" (de ces derniers on en comptait plus de 100) et des instituteurs en réserve dans les écoles de cité.

¹ The lay teachers not classified by experience are those without certificates. And their salaries are not included in computing the average.

1 Les instituteurs laïques non classifiés selon la durée de leur carrière sont ceux qui ne possèdent pas de diplôme et leur traitement n'est pas compris dans la compilation de la moyenne.

2 In computing these averages the salaries of religious teachers in independent schools are not included. Those included number 1,960 brothers and priests, and 3,776 nums.

2 En computant ces moyennes, les traitements des instituteurs religieux des écoles indépendantes ne sont pas compris; parmi ceux-ci, on compte 1,960 frères et prêtres et 3,776 religieuses.

Note.—The total number of teachers in Manitoba in 1931 was 4,427 of whom 881 were men and 3,546 women. First class certificates numbered 1,406, second class 2,839, third class 72, specialists 85, permits 17, exchange teachers 8. The reports from which the above date were compiled were not received from 542 teachers.

Nota.—La totalité des instituteurs au Manitoba en 1931 était de 4,427, composée de 881 hommes et 3,546 femmes; dont 1,406 possédaient un diplôme de première classe, 2,839 un diplôme de deuxième classe, 72 de troisième classe, 85 de spécialiste, 17 un permis, 8 étaient des substituts. Les rapports qui ont servi de base aux données ci-dessus sont à l'exception de 542 instituteurs qui ont négligé de répondre à l'appel.

¹ In the column "University Graduate's" the students are either graduates who are taking a years's pedagogic training at the end of a Bachelors' course (as in Ont. and the four western provinces) or students who are taking courses to qualify for a teaching certificate concurrently with their Bachelor courses, as in N.S. & N.B. Under the headings First, Second and Third with that used in other provinces. Here the provincial terms are entered in brackets. The last column, "Special", includes those training for Kindergarten and Technical certificates

Dans la colonne "Universitaires" les étudiants sont ou des gradués qui suivent un cours de pédagogie d'une année à la fin du baccalauréat (comme en Ontario et dans les quatre provinces de l'Ouest) ou des étudiants qui suivent le cours pour l'obtention du diplôme d'enseignement, concurremment avec le baccalauréat, comme en Nouvelle-Ecosse et au Nouveau-Brunswick. Les rubriques "première, deuxième et troisième classe" respectivement comprennent les étudiants pour certificats d'enseignement, ainsi nommés dans les provinces, excepté la Nouvelle-spécial" comprend les étudiants pour certificats n'est pas la même que dans les autres provinces. Ici, les termes provinciaux sont inscrits entre parenthèses. La dernière colonne d'enseignement.

² Includes only those in the regular course of study and training. In addition there were 525 attending Saturday lectures in pedagogy, 20 taking instruction by correspondence, 125 in the normal course in drawing and painting, 125 in music, 64 in household science—(2) Ne comprend que les cours réguliers, d'étude et de formation, 525 ont assisté aux conférences pédagogiques du samedi; 20 ont suivi les cours par correspondance: 125 les cours de dessin et peinture; 125 de musique: 64 de science ménagère.

General Note.—Teacher training classes at the universities, except in Ontario, are first included in 1930, when in Nova Scotia they enrolled 55, New Brunswick 11, Quebec 80, Saskatchewan 21, Alberta 8, British Columbia 67.

1 The pronounced increase in 1924 marks the beginning of the summer Session at the Provincial Normal College.

2 In Prince Edward Island, and Quebec Catholic Normal Schools, academic training is given concurrently with professional, and the courses extend over two or three years. Hence enrolment figures of a year represent considerably more than the number expecting to receive teaching certificates in that year. Students in all of the other provinces are taking professional training primarily and may complete their courses for a teaching certificate within the year.

Normal College.

Note Générale.—Les classes de formation des instituteurs dans les universités, excepté dans l'Ontario ont été mentionnées pour la première fois dans la statistique de 1930, alors qu'il y a eu 55 inscriptions dans la Nouvelle-Ecosse, 11 dans le Nouveau-Brunswick, 80 dans le Québec, 21 dans la Saskatchewan, 8 dans l'Alberta, 67 dans la Colombie Britannique.

¹ Il y eut une augmentation remarquable d'inscriptions au début des cours d'été au Collège Normal Provincial.

² Dans les écoles normales catholiques de l'Ile du Prince-Edouard et celles du Québec, on donne des cours académiques concurremment avec les cours professionnels, la durée de ces cours étant de deux à trois ans. Le nombre d'inscriptions de l'année est donc beaucoup plus élevé que celui des aspirants au certificat d'enseignement en cette année. Les étudiants dans les autres provinces suivent tout d'abord les cours professionnels et peuvent compléter pendant l'année leurs études pour le certificat d'enseignement.

^{*} Honorary degrees: In Toronto 7 of the Doctors' degrees were honorary, in Queen's 14, in Ottawa 2, in Manitoba 3, in "other institutions" 14; in letters and science 4, in theology 30.

1 All degrees except those in theology granted by Dalhousie.
2 All degrees except those in theology entered under Toronto.
3 Medical, dental and veterinary doctors included in "backelor" column.

⁴ The licence in the French-speaking universities is the next degree in advance of bachelor, as the Master's degree is in the English speaking.

^{*} Degrés honoraires: Toronto, 7 doctorats honoraires; Queen's, 14; Ottawa, 2; Manitoba, 3; autres institutions, 14; doctorats ès sciences, 4; doctorats en théologie, 30.

¹ Tous conférés par Dalhousie, sauf les degrés en théologie.

² Tous les degrés excepté ceux en théologie, sous la rubrique Toronto.

³ Les docteurs en médecine, art dentaire et art vétérinaire sont compris sous la rubrique "bacheliers".

⁴ La licence que confèrent les universités de langue française équivaut au degrés supérieur à celui de bachelier, comme le diplôme de "maître" décerné par les universités de langue anglaise.

³ Medical, dental and veterinary doctors included in "bachelor" column.

⁴ The licence in the French-speaking universities is the next degree in advance of bachelor, as the Master's degree is in the English speaking.

⁵ To this figure should be added 2 men completing the six-year course in architecture in the écoles des beaux arts at Montreal and Quebec.

³ Les docteurs en médecine, art dentaire et art vétérinaire sont compris sous la tubrique "bacheliers".

⁴ La licence que confèrent les universités de langue française équivaut au degrés supérieur à celui de bachelier, comme le diplôme de "maître" décerné par les universités de langue anglaise.

⁵ Ajouter à ce chiffre 2 hommes qui sont à compléter le cours de sixième année en architecture aux écoles des Beaux Arts.

Note.—The different universities and colleges were asked to report the place of residence only of their intra-mural students of university grade at the full sessions. Some have given a record of other students as well. The extent to which this has been done may be seen by comparing this with the preceding tables.

1 Including all affiliated and annexed schools.

Nota.—Il a été demandé aux divers universités et collèges de faire connaître le lieu de résidence seulement de leurs étudiants intra-muraux, de degré universitaire à la session régulière. Quelques-uns ont donné un relevé de tous leurs étudiants sans distinction. On se rendra compte de cet écart en comparant ce tableau avec les précédents.

1 Comprend toutes les institutions affiliées et annexes.

^{*} Other than board and lodging. In a few cases this entry is not distinguishable from other sources, e.g. the classical colleges.

† Including board and lodging. For some of the colleges, e.g. Pine Hill, Huron, etc., there appears under this heading receipts for board and lodging of students who are not included in their enrolment but who are attending another institution.

Acadia's income includes \$83,716 as gifts.
Exclusive of figures for Mt. St. Vincent College.

^{*} Autre que pension et logement. Dans certains cas cette entrée n'est pas distincte d'autres sources, e.g. les cellèges classiques.

[†] Y compris pension et logement. Quelques collèges, ceux de Pine Hill, Huron, etc. font figurer ces dépenses sous l'en-tête recettes pour pension et logement des étudiants non compris dans leur inscription mais qui sont dans une autre institution.

Revenus comprenant \$83,716 en donations.
 Ne comprend pas les chiffres se rapportant à Mount St. Vincent College.

<sup>Reverts to Consolidated Revenue Account.
Included with lands, etc.
Does not include expenditure made on new buildings. For the University of</sup> Montreal this had amounted to \$2,202,152 at June 1931.

<sup>Retourne au compte des revenus consolidés.
Compris dans terrains, etc.
Ne comprend pas les déboursés effectués pour de nouvelles constructions. Pour l'Université de Montréal, au mois de juin 1931, il avait été dépensé \$2,202,152.</sup>

4. SCHOOLS NOT PROVINCIALLY CONTROLLED 4. ÉCOLES NON SOUS LE CONTRÔLE DE LA PROVINCE

110.—Private Elementary and Secondary Schools in Canada, 1932: Directory 110.-Ecoles privées élémentaires et secondaires au Canada, 1932

Note.—For independent or private schools in Quebec see "List of the School Municipalities and Schools and Teaching Staff" published annually by the Bureau of Statistics, Quebec.—In the present report some private schools teaching sec ondary grades are included in the list of universities and colleges, rather than below, on account of also teaching Arts classes— See Section III.

Nota.—Pour les écoles indépendantes ou privées du Québec, voir "Liste des municipalités scolaires, des écoles et du personnel enseignant" publiée tous les ans par le Bureau des Statistiques de Québec.—Dans le présent rapport, quelques écoles privées enseignant les degrés secondaires figurent dans la liste des universités et collèges, plutôt que ci-dessous, par ce qu'elles enseignent aussi les arts. Voir section III.

¹ Except Quebec, for which province data for private schools (called independent primary schools) are given together with data for publicly controlled schools in section I & II of this report. The number of such schools in Quebec is 524, teachers 3,740, enrolment 61,110.

² In British Columbia, the kindergartens reported in 1930 have been omitted in 1931.

¹ Sauf la province de Québec, où les données se rapportant aux écoles privées (désignées écoles primaires indépendantes) sont comprises avec celles qui se rapportent aux écoles sous le contrôle public et qui figurent aux sections I et II du présent rapport. Il y a 524 institutions de ce genre dans le Québec, le personnel enseignant s'y élève à 3,740 et le nombre d'inscriptions à 61,110.

² En Colombie Britannique, en 1931 les jardins de l'Enfance ont été omis.
