C. P. EDWARDS, Esq.,  
Deputy Minister,  
Department of Transport,  
Ottawa, Ont.

SIR—I have the honour to submit the Seventeenth Annual Report on Navigation Conditions on the Hudson Bay Route from the Atlantic Seaboard to the Port of Churchill. This report covers the season of navigation, 1945.

The report is compiled from information received from the Hudson's Bay Company Vessel R.M.S. *Nascopie*, the National Harbours Board, and the Meteorological and Radio Services of the Department of Transport.

Yours respectfully,

W. A. RUSH,  
*Controller of Radio.*

DEPARTMENT OF TRANSPORT,  
OTTAWA, February 18, 1946.

## CONTENTS

## SEVENTEENTH ANNUAL REPORT

### Navigation Conditions on the Hudson Bay Route from the Atlantic Seaboard to the Port of Churchill Season of Navigation, 1945

#### Synopsis of Report

#### OPENING OF NAVIGATION

The change from winter conditions extended, as usual, over a period of several weeks and during that time the quantity and state of drifting ice varied from day to day according to the influence of winds and currents.

The dates of the final disappearance of ice from the vicinity of the reporting stations were as follows:—

*Hudson Strait, East End*

Resolution Island.....July 10

*Hudson Strait, Central*

Cape Hopes Advance.....July 21

*Hudson Strait, West End*

Nottingham Island.....July 23

*Hudson Strait, General*—The R.M.S. *Nascopie* on her annual voyage into Hudson Bay and adjacent straits during the months of July, August and September reported that, on the whole, the weather throughout the voyage was favourable, ice conditions were heavy, but with favourable winds good progress was made.

The C.G.S. *N. B. McLean* encountered fog and numerous bergs throughout the season of navigation and also heavy snow storms in the early part of September.

*Hudson Bay*

Churchill.....July 16

Chesterfield Inlet.....July 18

Port Harrison.....July 3

#### CLOSE OF NAVIGATION

*Hudson Bay*

Chesterfield Inlet.—Reported the bay frozen over on November 7.

This ice moved out on the following day however, and it was not until November 12 that the bay froze over and remained frozen.

Churchill—On October 31 reported River and Bay full of drift ice and on November 26 Bay frozen to horizon.

Port Harrison—Reported December 1 that Bay was open except for small amount of shore ice.

*Hudson Strait*

Nottingham Island—Reported cove frozen over on November 13, scattered ice to horizon on November 19 and fields of drifting floe ice on November 24. There was still some open water visible at the end of November.

Cape Hopes Advance—On November 21 a drifting field of loose packed ice with many large patches of open water was reported. The open water was noticeably smaller on November 27 and by November 29 ice was observed to be close packed to the horizon.

Resolution Island—Reported no ice except for drift and bergs, until after November 30.

### FOXE CHANNEL ICE

The R.M.S. *Nascopie*, on the way from Southampton Island to Wolstenholme August 22, mentions Foxe Channel ice to the north. This is the only mention of Foxe Channel ice as no survey was made in 1945.

### FOG

The number of days on which fog was reported were as follows:—

—	July	Aug.	Sept.	Oct.	Nov.	Totals	
						1945	1944
Resolution.....	23	24	12	10	0	69	52
Cape Hopes Advance.....	18	15	6	6	4	49	48
Nottingham Island.....	4	9	5	0	2	20	36
Churchill.....	5	6	3	1	2	15	17
Chesterfield.....	1	1	1	2	1	6	11
Port Harrison.....	9	12	3	3	0	27	31

### AIDS TO NAVIGATION

#### Radio

There are five radio direction finding stations on the Hudson Bay Route.

Detailed information regarding Radio Aids to Navigation will be found on page 52.

#### Hydrography

No survey was carried out this season. See page 13.

#### Lights

There were no additions to the lights, the numbers remaining at two watched and ten unwatched, a total of twelve lights, a list of which will be found on page 52.

#### Fog Signals

The explosive bomb signal which was installed at Resolution in 1935 is still in operation. It can be heard at a distance of between five and six miles and is fired at intervals of ten minutes on request by ships approaching Acadia Cove.

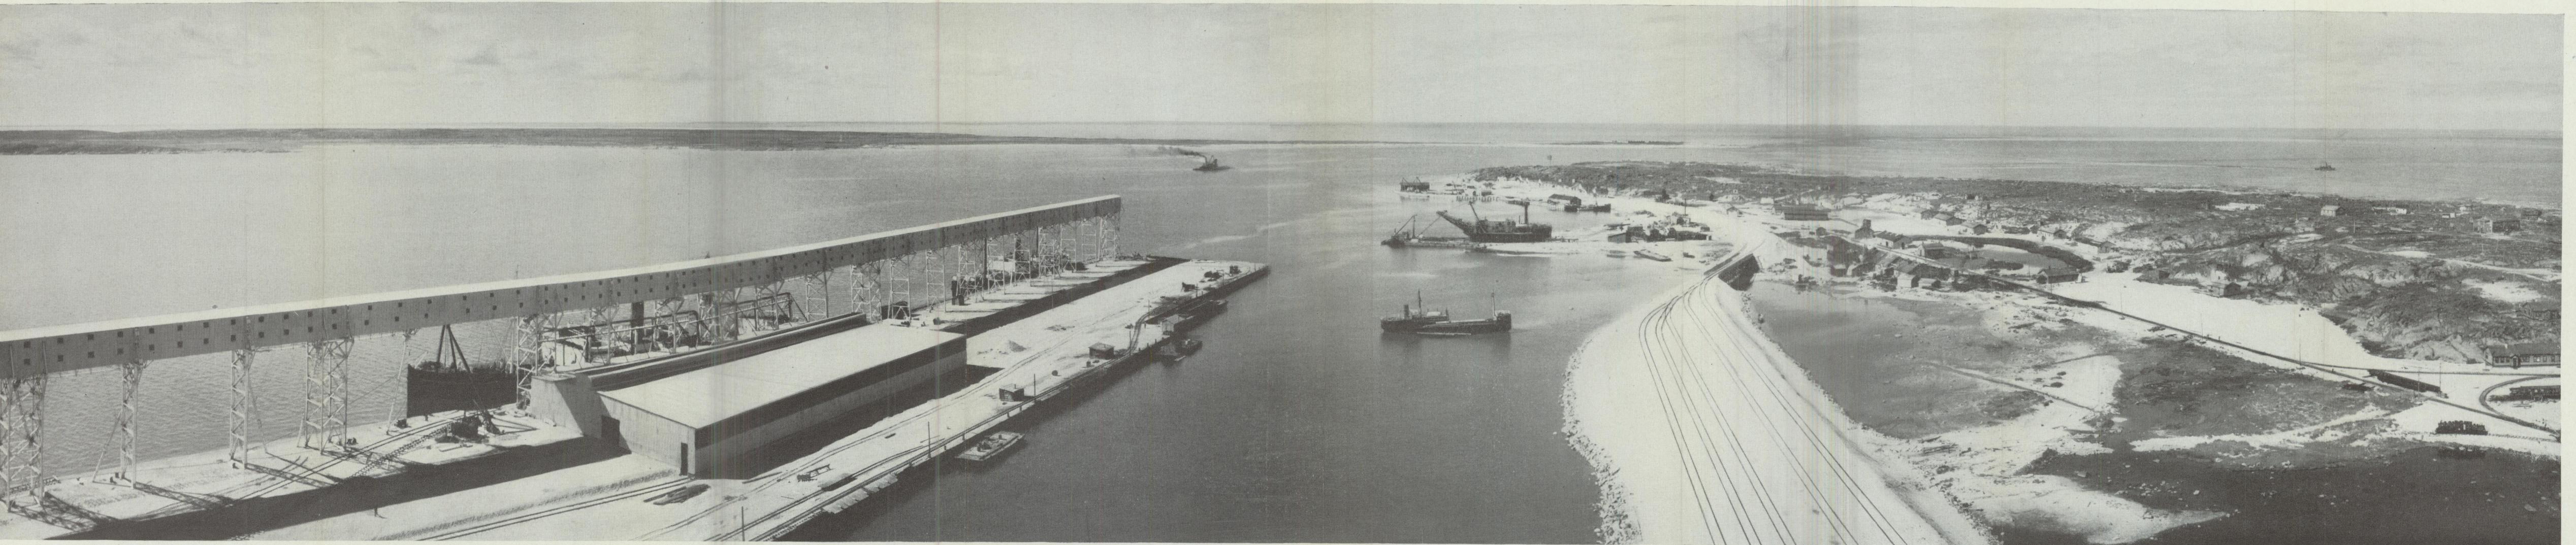

### SHIPPING

Owing to war-time restrictions the movements of vessels using the Hudson Bay route were not reported.

No incident of note occurred during the season and navigation proceeded normally.

W. A. RUSH,

Controller of Radio.

PANORAMA CHURCHILL—Taken from top of Warehouse of Elevator, Aug. 14, 1933—Taken by M. Sauer, Jr.

C.G.S. *N. B. McLEAN*, CAPTAIN C. A. CARON, MASTER,  
VOYAGE TO HUDSON BAY AND STRAIT, 1945

EXTRACTS FROM MASTER'S REPORT

The C.G.S. *N. B. McLean* arrived at Resolution Island on August 10 and dropped anchor in Acadia Cove at 7 p.m., after an uneventful passage from Quebec. Some fog was encountered along the coast of Labrador and again as we approached Resolution Island, aside from this, the weather in general was fair.

From August 10 to August 17 we remained at Resolution Island, landing goods, boating fresh water, painting and repairing entrance beacon.

On August 17 left Acadia Cove, Resolution Island, at 3.00 p.m. and proceeded to Cape Hopes Advance. Anchoring off the Cape we landed the radio personnel, provisions, coal and gasoline and at 9.30 a.m. on August 22 we left for Wakeham Bay.

Between August 22 and August 24 all provisions, mail and fuel were landed at Wakeham Bay mission, after which we proceeded to the head of the bay to boat fresh water.

Left Wakeham Bay on August 31 for Cape Hopes Advance, arriving there at 6.00 a.m. September 1, we commenced landing the remaining coal and gasoline we had on board for this station. By 4.00 p.m. all cargo was ashore and the crew was sent to help clear all goods from the beach.

Leaving Cape Hopes Advance at 4.00 a.m. September 2 we proceeded towards Big Island. At 11.00 a.m. we altered course for Charles Island due to thick snow. Visibility became so poor, however, that we were forced to return on course 080 true at slow ahead. On September 3 at 2.00 a.m., with snow moderating, we changed course to 300 true for Charles Island. At 10.15 a.m. we anchored inside Foreman Island using both anchors with 90 fathoms chain on each. At the time, there was a moderate north east gale blowing and the snow was increasing.

September 4 the wind decreased somewhat and at 4.00 p.m. a boat was sent ashore to light Charles Island east end. This accomplished, the boat returned back on board at 5.30 p.m.

We remained at anchor that night and at 7.00 a.m. September 5 left for Charles Island west end, where an attempt was made to light the beacon. The attempt was unsuccessful however, as there was too much surf running. Leaving Charles Island, the *N. B. McLean* proceeded to Eric Cove anchoring there at 5.00 p.m. we remained for the night taking on fresh vegetables and mail for the various stations.

September 6 left Eric Cove at 4.00 a.m. and proceeded to Nottingham Island. On arrival Nottingham Island, radio personnel, fresh provisions, coal and gasoline were landed. September 7, with all cargo landed, we remained at anchor so that Doctor Hastings could check on the health of the eskimos and on the radio station fresh water supply. At noon on September 8 a fresh south wind came up so proceeded to Eric Cove for shelter while awaiting the completion of station work. Left Eric Cove for Nottingham Island on September 11 and took on board all returning personnel.

We left Nottingham Island at 9.00 p.m. for Charles Island west end arriving there at 10.00 a.m. September 12. There was too much sea running to attempt a landing so headed for Sugluk where we anchored at noon. The *N. B. McLean* remained at Sugluk until September 30 awaiting orders. While at Sugluk all fresh water tanks were filled and minor repairs to the ship were made by the crew.

Left Sugluk at daylight on September 30 and proceeded to Wakeham Bay. We anchored at the head of the Bay at 6.30 p.m. October 1 where Brother Paradis, O.M.I., was taken aboard. While at anchor, orders were received to proceed back to Quebec. We were forced to wait for better weather conditions however, as landing conditions at Cape Hopes Advance were unfavourable at the time.

On October 4 left Wakeham Bay at 3.45 p.m. for Cape Hopes Advance arriving at 6.50 a.m. On October 5, landed goods and mail and took on returning personnel. At noon we left for Resolution Island.

October 6 at 6.10 a.m. anchored in Acadia Cove, Resolution Island, where we took on returning personnel and landed mail and fresh provisions. At 3.30 p.m., after waiting for the tide to rise, we left for Quebec. At Midnight our position was Latitude 60.16° N., Longitude 62.35° W.

October 7, ship underway, making average speed of 12 knots, weather overcast, wind south and south west, sea smooth. Midnight position was Latitude 56.21° N., Longitude 57.50° W.

At midnight on October 10 we passed Father Point, thus completing a very successful season of navigation in the Hudson Bay and Strait.

#### ICE CONDITIONS

On our way north to the Hudson Strait we passed our first berg when nearing Belle Isle, S.W., from then onward to Roundhill the occasional berg was sighted on either side of our track. From Roundhill to Bull-Dog Rock there were many bergs sighted. Few bergs were sighted north of Bull-Dog to 60 miles east of Cape Chidley.

On entering Hudson Strait a few bergs were seen, but we were in fog and the actual number of bergs was undetermined. The fog cleared as we neared Acadia Cove, at which time there were twelve bergs in sight.

On a track two miles south of Resolution to ten miles off Cape Hopes Advance many bergs were sighted. On August 17 while at anchor off Cape Hopes Advance, many bergs were sighted drifting by, one berg was grounded at Cape Hopes Advance landing and there were many growlers seen in the vicinity of Diana Bay.

Proceeding from Cape Hopes Advance to Wakeham Bay on August 22 many bergs and growlers were seen. One large berg was grounded Latitude 61.33° N., Longitude 70.42° W. Our soundings, at the time, were 90 fathoms.

On September 2 while proceeding from Cape Hopes Advance to Big Island many growlers and bergs of various sizes were sighted. On the following day no ice was sighted between Charles Island and Eric Cove. On September 8, while proceeding from Nottingham to Eric Cove, we passed through scattered ice and growlers while 12 miles south of Nottingham Island. This ice, presumably from Foxe Channel, extended three miles to the south and as far east and west as one could see.

On October 5 growlers were sighted drifting out of Diana Bay and as we proceeded towards Resolution Island six bergs were seen before darkness. Upon arrival at Resolution Island twelve bergs of fair size were within sight and a large one was grounded in the western entrance to Acadia Cove. Leaving Acadia Cove we passed four bergs on our way to Cape Chidley. Four other bergs were sighted on October 7 but after passing Cape Mugford no more ice was seen as we made our way south.

**RADIO**

All radio stations were in operation this season and rendered valuable assistance to navigation. Their service to this vessel consisted of handling messages and giving bearings. The bearings given us were very accurate.

**HYDROGRAPHIC SURVEY**

No survey was carried out this season.

**LIGHTS AND AIDS TO NAVIGATION**

Lights put in operation were Wales Island on August 28, Charles Island East End, September 4, and Nottingham Island, September 6. Resolution Island and Cape Hopes Advance lights were in operation upon our arrival at the Strait. Two attempts were made to light Charles Island West End and one attempt to light Big Island but we were unable to on account of weather and sea conditions. The other lights were cancelled by Ottawa.

C. A. CARON,

R.M.S. *NASCOPIE*, CAPTAIN T. F. SMELLIE, O.B.E., MASTER,  
VOYAGE TO HUDSON BAY AND STRAIT, 1945

We sailed from Montreal at 10 a.m. on July 7 and passed Father Point at 2 p.m. on July 8, after a fine clear run down the St. Lawrence River.

No bergs were sighted in the Straits of Belle Isle, the weather was fine and clear, which enabled us to reach Cartwright, Lab., at 6 p.m. on July 11.

Work was carried on throughout the night and cargo scows and ship's motor-boat taken on board, sailing at 6 a.m. July 12.

Several bergs were sighted on the run down the Labrador but no floe ice was sighted until we arrived off Resolution Island at 10 p.m. July 14.

Loose open field ice was worked through from Resolution to Lake Harbour, where we arrived at 7 p.m. on July 15. Discharging was commenced as soon as the tide permitted and all supplies were landed, fur returns loaded, and we sailed from Lake Harbour at 6 a.m. July 17.

Heavy close-packed field ice was met off Big Island where the ship was locked in the ice for 3 hours; upon the turn of the tide the ice loosened up and we were able to proceed through loose ice. Passing between Charles Island and the mainland, we encountered fog, which caused a slight delay, and we arrived at Sugluk at 11.00 a.m. on July 18. Supplies were landed and returns loaded in good time which enabled us to leave at 4 a.m. on July 19.

Between Sugluk and Cape Dorset heavy field ice was passed through off Salisbury Island and Cape Dorset Post was reached at 5.30 p.m. July 19.

Fine weather favoured us at Cape Dorset, supplies were landed and returns loaded in good time, which enabled us to leave at 6 a.m. on July 21. Between Cape Dorset and Wolstenholme heavy open field ice was passed through, the weather was fine and clear, which enabled us to reach Wolstenholme at 6 p.m. July 21.

Good weather prevailed at Wolstenholme; supplies being landed and returns loaded, we left for Cape Smith at 4 p.m. July 22.

After leaving Wolstenholme, fog was encountered to Cape Smith where we arrived at 11.30 a.m. on July 23. Whilst here a strong northerly wind was blowing and the sea was smooth. All supplies were landed, returns loaded and we sailed at 8 p.m. July 24.

Between Cape Smith and Port Harrison patches of fog were passed through but no ice was sighted. Harrison was reached at 6 a.m. July 26. Fine weather prevailed during our stay at Harrison; our stay was longer than usual because no overtime was worked. According to the Post Manager the natives of Harrison will only work from 8 a.m. to 6 p.m. with one hour off for lunch. This is our first experience in not working overtime. We consider it uncalled for, when they only have to work 3 hours for 3 nights once in 365 days. However, discharging was completed and returns loaded and we left at noon on July 30.

Between Port Harrison and Churchill dense fog was encountered, and time was lost in heavy close packed ice and foggy weather. From the time we left the ice to the time of arrival at Churchill was only 4 hours, which means the ice on August 1 was only 40 miles 60 degrees from Churchill. We arrived at Churchill at 3 p.m. on August 2.

Discharging returns and loading supplies was commenced immediately upon arrival. Bunkering was commenced on August 6 and completed August 10, having loaded 823 long tons of bunker coal. Heavy rains with a S.E. gale suspended loading operations on the 11th and 12th August, which delayed our sailing until 8 p.m. August 13.

Between Churchill and Chesterfield a few ice floes were sighted but none passed through. We anchored at Chesterfield on August 15 at noon. During our stay at Chesterfield fine weather prevailed and all supplies were landed at noon on August 18, and we sailed at 3 p.m. the same day.

Between Chesterfield and Southampton Island we had a fine run and anchored off the post at 6 p.m. Sunday August 19. Supplies were landed at the air base and Company's post. Returns were loaded also from both these places and we sailed at 6 a.m. on August 21.

Between Southampton Island and Wolstenholme the weather was fine and the Fox Channel ice was sighted to the north of our track. Wolstenholme (2nd call) was reached at 5.30 a.m. on August 22. Supplies were landed, also mail for southern Baffin Island posts and we sailed at 9 p.m. the same day.

Between Wolstenholme and Pond's Inlet, fine weather prevailed. Numerous ice bergs were passed, ice fields between Cape Mercy and River Clyde were passed through and fog delayed our progress owing to numerous bergs. However, Pond's Inlet was reached at 7 a.m. on August 30. Weather fine, supplies landed and returns loaded. All completed, enabled us to sail at noon on August 31.

The weather being fine and clear I decided to pass through Navy Board Inlet where we found numerous bergs but little floe ice and entered Lancaster Sound at 10 p.m. the same day. From Navy Board Inlet to Prince Regent Inlet heavy scattered field ice was passed through and upon entering Prince Regent Inlet we found the floes of shore ice unbroken. The wind being easterly a clear passage close to shore enabled us to make good progress and later to pass over to Fury Point on the Western shore.

From Fury Point the floes were heavy and some covered an area of 5 square miles, which we continued circling and finally reached the vicinity of Fort Ross. We anchored 3 miles from Fort Ross owing to darkness. In the morning we found Fort Ross Bay clear of ice and anchored off the post at 7 a.m. on September 3. Supplies were landed and returns loaded as quickly as possible.

Leaving Fort Ross at 7 a.m. on September 4, the wind had changed to strong N.W. This wind blew the huge ice floes off the western shore which enabled us to navigate close inshore with virtually a clear passage for 150 miles.

Upon reaching Lancaster Sound and off Cape Leopold, the ship was stopped—a service held and a wreath dropped overboard—all to commemorate the 100th Anniversary of the loss of Sir John Franklin.

After this ceremony we proceeded on our voyage to Arctic Bay. Upon arriving off Admiralty Inlet, we found the entrance blocked with old and new ice. This was forced and we entered Admiralty Inlet where we found a few scattered ice fields. Arctic Bay post was reached at 10.30 a.m. on September 6 and the landing of supplies was immediately commenced. Fine weather continued during our stay.

We left Arctic Bay at 5 a.m. on September 8 and anchored off the Police Barracks at Dundas Harbour at 6 p.m. the same day.

The landing of supplies was immediately commenced and all were landed by 6 p.m. on September 9. Sailing from Dundas at 8 p.m. on September 9, we crossed Lancaster Sound during the night and entered Navy Board Inlet at 3 a.m. on September 10. Although when passing through here going north there was very little field ice, on our southern trip the Inlet was packed in places practically from shore to shore.

After leaving Navy Board Inlet we found several bergs in Pond's Inlet, but no field ice. We anchored off the post at Pond's Inlet at 2.45 p.m. on September 10.

All work being accomplished, we left Pond's Inlet at 6 a.m. on September 11 and arrived at Clyde River at 8 a.m. on September 12. Hundreds of bergs were sighted between Pond's and Clyde. Supplies now landed and returns on board, we left Clyde at 10.30 a.m. on September 13 for Pangnirtung.

No field ice was sighted until we passed Cape Mercy at the entrance to Cumberland Gulf where the ice floes were numerous and heavy until we reached a position 40 miles from Pangnirtung. We arrived at Pangnirtung at 6 p.m. September 15.

During our stay at Pangnirtung, the weather was fine which enabled both the ship's crew and natives to make good progress in handling the supplies and returns. Everything landed and returns loaded, we left Pangnirtung at 6 a.m. on September 18.

Between Pangnirtung and Clyde we had a strong N.W. gale with a heavy fall of snow, also fog when approaching the island outside of Cartwright, which was reached at 5 p.m. on September 21.

During the night of September 21 the crew were preparing for hauling out the cargo scows (2) and ship's motorboat at early morning high tide. All boats on shore were hauled out by 9 a.m. and we sailed at 10.30 a.m. for Montreal.

Between Cartwright and Montreal strong winds and fog were encountered. Father Point was not seen owing to fog and the pilot was taken on board by signals. The passage up the St. Lawrence was without incident and we arrived and berthed in Montreal at 9.30 a.m. on September 26.

On the whole, the weather throughout the voyage was favourable, ice conditions were heavy, but with favourable winds good progress was made.

T. F. SMELLIE,  
*Master.*

## Hydrographic Information

The Hydrographic and Map Service, Surveys and Engineering Branch, Department of Mines and Resources, publishes a series of navigation charts and also a volume of Sailing Directions covering the Hudson Bay Route. These are kept up to date and added to from time to time as new information becomes available.

The "Tide Tables for the Atlantic Coast of Canada," published by the Tidal and Current Survey Division of the same Service, contain predictions for the port of Churchill and for Moosonee in James Bay. Tables in leaflet form are available for Port Nelson. Tidal differences for fourteen localities in Hudson Strait and for eight localities in James Bay afford the times of high and low waters in these areas. The time of the turn of the tidal streams in the southern offing of Resolution and Nottingham Islands, and information on the currents in Digges Sound is also given. The automatic tide gauge is kept in operation each season at Churchill for the extension of the tidal records by which the predictions are improved.

52

All stations maintain watch on 500 K/cs. (600 metres) and with the exception of Resolution island, take and transmit bearings on 375 K/cs. (800 metres) after communication has been established on 500 K/cs. (600 metres). Resolution Island takes bearings on 500 K/cs. (600 metres) and transmits bearings on 375 K/cs. (800 metres).

(a) All messages relative to navigation are handled free of charge. The six-cent per word coast charge applies to all other traffic. For forwarding charges beyond Churchill apply to any of above stations or see Canada Rate Sheet, International List of Coast and Ship Stations.

RADIO METEOROLOGICAL REPORTING STATION

Station	Call Sign	Calling Wave K/cs.   Metres	Working Wave			Position			Hours of Service	Coast Charge
			K/cs.	Metres	Latitude N.	Longitude W.				
Port Harrison.....	V A L	500	600	420	714	58° 27' 17"	78° 08' 20"	Keeps watch on 500 K/cs. (600 metres) for fifteen minute periods commencing at every odd hour from 7.00 a.m. to 7.00 p.m. E.S.T. inclusive, during season of navigation.	6c. per word See note (a) above.	

## PATROL SHIP

Station	Call Sign	Calling Wave		Working Wave		Hours of Service	Remarks
		K/cs.	Metres	K/cs.	Metres		
C.G.S. N. B. McLean.....	C G S N	500	600	425	706	Continuous during season of navigation.	Normally this vessel patrols Hudson strait during the season of navigation. Information in regard to her position may be obtained from any Radio Station in the Strait.

## LIGHTS

Location	Position		Character	Elevation	Remarks
	Latitude N.	Longitude W.			
†Goodwin island, Button islands group.	60° 41' 31"	64° 40' 22"	Flashing.....	259 ft.	On unpainted wooden pole.
Resolution island.....	61° 18' 28"	64° 53' 16"	Flashing.....	129 ft.	White square, wooden lantern on wooden skeleton base. One flash every ten seconds.
Cape Hopes Advance.....	61° 05' 14"	69° 33' 23"	Fixed.....	270 ft.	On unpainted wooden pole.
Wales island.....	61° 51' 37"	71° 58' 19"	Flashing.....	150 ft.	On unpainted wooden pole.
†Ashe inlet.....	60° 31' 40"	70° 33' 27"	Flashing.....	191 ft.	On unpainted wooden pole.
†East end of Charles island.....	60° 36' 40"	73° 56' 09"	Flashing.....	150 ft.	On unpainted wooden pole.

C.G.S. *N. B. McLEAN*—HUDSON STRAIT PATROL SHIP  
GENERAL DIMENSIONS AND EQUIPMENT

---

The C.G.S. *N. B. McLean* is a twin-screw ice breaking steamer of 6,500 indicated horse-power and with the following leading dimensions:—

Length (B.P.).....	260 feet
Breadth (moulded).....	60 "
Depth (moulded).....	31 "
Gross tonnage.....	3,253 tons
Fuel oil capacity.....	1,596 "

The vessel is equipped with a patent towing winch furnished with both steel wire and manila towing hawsers, a powerful search light, two 7-ton derricks and two motor launches.

She also carries a diver and complete diving apparatus and the following salvage gear:—

- 1 Drake centrifugal pump, 10 inch.
- 1 Smart Turner centrifugal pump, 8 inch.
- 1 Duplex pump, 6 inch.

These pumps are completely equipped with flexible suction and discharge pipes, foot valves, siphons, etc., and all necessary auxiliaries.

One hundred and fifty feet of bronze flexible steam hose with connections, patching gear, shores, turnbuckles and all necessary tools are also provided.

The vessel is provided with a gyro compass and a recording echo sounder and radiotelegraph and radiotelephone apparatus are installed.

The *N. B. McLean* will be in Hudson Strait from the opening to the close of navigation each year and will maintain constant watch on 500 K/cs. (600 meters), call sign CGSN.

## GLOSSARY OF TERMS USED IN ICE NAVIGATION

---

- Floe.....A large mass of floating ice.
- Pan.....A small floe or piece of ice that can be forced aside or slewed.
- A field.....A large body of ice that may be seen around.
- Land floe.....Ice frozen fast to the shore.
- Packed ice.....Small pieces of ice closed together and held by the pressure of ice and currents.
- Ice blink.....A peculiar pale yellow reflection on the sky indicating the presence of ice in the distance.
- The ice pack.....A large body of solid ice extending across the whole sea and through which it is impossible to advance.
- Slack or open ice...Detached ice that can be worked through. Ice is said to be slackening when it begins to open up so as to be navigable.
- A lead.....A strip of navigable water opening into the pack.
- Hummocky ice.....Rough, uneven or thick ice.
- Slob.....Snow afloat and forming into ice.
- Water sky.....A dark or bluish appearance of the sky indicating open water beyond the ice pack.
- Rafting.....Occurs when two pans meet with force either by the action of winds or currents, the edges are broken off and either rise on top of or pass under the body of the other.
- Growler.....A more or less washed and rounded lump of ice which rolls about in the water; formed from broken-up bergs or detached pieces of heavy old Arctic floe ice.
- Collar ice.....The margin of ice frozen fast to an island or shore, presenting an abrupt wall against which the floating ice rises and falls with the tide.
