

# About My CFIA – Your access to services online

*A convenient and secure way to do business with the CFIA*

At the Canadian Food Inspection Agency (CFIA), we've been designing digital by default online services to help you securely manage and track your requests—anywhere, anytime.

Signing up and creating a profile is a one-time process. This means that your profile, or that of your business, can be used for all future online service requests.

## What services are available?

Create a profile today so you can access a growing number of CFIA services including:

- Permissions (licences, permits, registrations, authorizations)
- Export certificates

## Is My CFIA right for you?

Whether you're an individual requesting a permit to bring your pet into Canada, a business applying for a registration or a business that imports or exports food, plants or animals, My CFIA provides you with convenient access to the digital services you need from the Agency.

Need certification or testing from a veterinarian or CFIA-approved laboratory? Alternative Service Providers (ASPs), such as accredited veterinarians or laboratories, can create an ASP profile in My CFIA. By signing up, ASPs will be able to electronically provide information or submit documentation required to support any service request made online.

To enrol and see what services are available, visit [www.inspection.gc.ca/MyCFIA](http://www.inspection.gc.ca/MyCFIA).
