# The Government of Canada at your service

In hundreds of ways the Government of Canada is at your service in the Atlantic Provinces.

The federal government administers Family Allowance and Unemployment Insurance programs. It shares the cost of education and health services with the provinces. Its programs range from managing our national parks to providing help for farmers and for people in business. The federal government is working to meet the needs of Canadians in countless different ways.

This guide attempts to present the main types of services offered by the federal government to all Canadians and tells how you can gain access to them in the Atlantic Provinces. These services have been grouped by themes that correspond to particular needs and activities. For instance, if you would like information on programs dealing with environmental protection, look under the heading *The Environment*. Should you want information regarding employment, the sections entitled *Work and Careers in the Government of Canada* may be of interest to you.

The list of services in this guide does not pretend to be exhaustive and programs may change from time to time. You are encouraged to obtain more detailed information from federal government regional offices in the Atlantic Provinces or from the federal information services listed at the end of this publication. Information officers working with individual government departments will be able to assist you and provide you with the information requested. In addition, you may wish to order

some of the other publications that tell about Canadian government programs and services in general. These are described on page 91.

The federal government is here to serve you.

# Government Reorganization

In January, 1982, the Government of Canada announced plans to increase the federal capacity to assist Canadians in all regions to take better advantage of major economic and employment opportunities.

This involves an extensive reorganization of federal departments and agencies to provide a government-wide focus on regional economic development and the promotion of export trade.

For example, parts of the existing departments of Industry, Trade and Commerce and Regional Economic Expansion will be incorporated into a new Department of Regional Industrial Expansion. The Trade Commissioner Service and its operations abroad become the responsibility of the Department of External Affairs.

However, virtually all of the programs and services described in this booklet will continue to be available to Canadians. The names and addresses of some of the departments and agencies involved in the reorganization may change following publication of this booklet. Please consult your local telephone directory for Government of Canada listings.

## Well-being

Ensuring the well-being of all Canadians is a prime concern of the Government of Canada. Our health and safety are protected by laws regulating the quality of the foods we eat, the products we use and the services we require. Monthly payments help mothers provide for the immediate needs of their children. As well, the services available to senior citizens have increased to better ensure their well-being.

Following are descriptions of some of the national programs and services that help to promote the well-being of Canadians.

## **Consumer Aid**

All of us are consumers . . . from the four-year-old buying a chocolate bar to the young couple purchasing a television set.

A most important role of the federal government is to protect the interests of the consumer. This protection is in the form of laws that have been developed by many government departments.

Whether at the bank, the gas station, the supermarket or at home, these laws are working to protect you. Legislation ensures that a bank will not fold up in the night and disappear with your life savings; measuring devices on service station gas pumps are checked for accuracy; the quality, packaging and labelling of food come under close scrutiny, and potentially hazardous products must bear a warning on the label that indicates if the product is flammable, poisonous, explosive or corrosive. In addition, items such as baby rattles, hockey helmets and artificial fireplace logs are tested for safety.

This determination to protect the consumer can best be appreciated when one considers that each year approximately 1.5 million inspections are carried out by government inspectors.

Despite these efforts, you may find yourself faced with a problem resulting from the purchase

of goods and/or services. If you are receiving little co-operation from the vendor, you can seek help from a neighbourhood store-front consumer help office, a consumers' association (consult your telephone directory), or contact:

or consult your telephone directory for the Consumer Services office nearest you.

This department also has many interesting pamphlets and brochures available on such subjects as appliance energy consumption, labelling on products and mail-order buying. Of particular interest to parents might be *Packaging to protect your child*, *Curiosity and the toy*, and *Car seats keep kids safe*. If you would like to receive these pamphlets or request information on other subjects, write to the address above.

## **Motor Vehicle Recalls**

Transport Canada establishes and enforces safety standards for new motor vehicles sold in Canada. Periodic motor vehicle recalls result when vehicle components are found not to meet departmental standards. Consumer complaints about safety-related vehicle defects should be directed to:

---

**Road and Motor Vehicle  
Traffic Safety  
Transport Canada  
27th Floor, Tower C  
Place de Ville  
Ottawa, Canada  
K1A 0N5**

---

## **Seat Belts**

Seat belts have been proven to save lives, yet less than half of all Canadian drivers use them regularly. Transport Canada's Motor Vehicle Traffic Safety Branch conducts research on seat belt usage and also sets standards for infant carriers and child restraints sold in Canada. For publications on these subjects, you may contact the branch at the address above or one of the following:

### **Health Promotion**

An increasing number of Canadians are aware that personal habits can mean the difference between illness and good health. The Health Promotion Directorate's main objective is to encourage and assist Canadians to adopt ways of life that will enhance their physical, mental and social well-being and thus prevent illness. This includes program activities in such areas as nutrition, self-care and personal health practices, family life and child development, and the abuse of alcohol, tobacco, drugs and other harmful substances. Contact with the public, community and voluntary organizations and the provinces is maintained through regional offices located across the country. Through the Health Promotion Contribution Program, the directorate supports the development of projects involving community health, resource development, training and skill development.

For more information, please write to:

---

**Health Promotion Directorate  
Health and Welfare Canada  
Atlantic Regional Office  
5409 Rainnie Drive  
Halifax, Nova Scotia

---

### **Food Basics**

If you belong to a community group and are interested in giving a presentation on how to get better value for your food dollar, or if you are a teacher and would like to teach your students to shop wisely, you may be interested in a kit called *Food Basics*. As well as containing written information on shopping and nutrition, the kit includes a slide show.

For more information, contact:

**Consumer Services  
Consumer and Corporate  
Affairs Canada  
Ottawa, Canada  
K1A 0C9**

---

or consult your telephone directory for the Consumer Services office nearest you.

### **Family Allowances**

If you are a parent or a legal guardian and you are a Canadian citizen, a landed immigrant or a non-immigrant who has paid income tax for not less than a year, you may have the right to receive a monthly Family Allowance payment from

the federal government. This payment is usually made to the mother for children under the age of 18 who reside in Canada. The allowance will be paid under certain prescribed circumstances to Canadians living abroad.

The government has provided for annual increases in the allowance in accordance with increases in the cost of living. The Family Allowance is taxable as income.

In addition to the Family Allowance, you can receive an annual benefit for each child, based on family income.

Application forms can be obtained from any post office or hospital. If you wish to obtain additional information, write to:

or consult your telephone directory for the district office nearest you.

#### **Day Care Centres**

If you are interested in obtaining facts on day care centres, the federal government can assist you by providing information through the National Day Care Information Centre.

This centre acts as a clearing house for available material on day care and early childhood development and gives persons and groups the opportunity to exchange ideas and information. A series of pamphlets, information kits, fact sheets and newsletters are available.

For more information and/or brochures and pamphlets, write to:

---

---

## **Services for Senior Citizens**

As Canadians, senior citizens can benefit from the numerous programs and services that the federal government offers to all citizens. In addition to these, there are other programs that exist specifically to meet the economic and social needs of senior citizens.

### **Old Age Security Benefits**

All persons 65 or over, who are Canadian citizens or legal residents and who meet the resi-

dence requirements, are entitled to an Old Age Security pension.

The amount of the pension is tied to the consumer price index, with adjustments taking place every three months. However, if the cost of living drops, the amount of the pension will not be reduced. The pension is not paid automatically — you must apply for it.

You may also be entitled to a Guaranteed Income Supplement. This is a monthly payment added to your Old Age Security pension, provided you have little or no income other than your pension. Your spouse's income will be taken into consideration when the amount of the supplement is calculated.

Your spouse may receive a Spouse's Allowance if he or she is between 60 and 65 years of age and your combined incomes do not exceed a specified amount. The conditions for acceptance are the same as for Old Age Security benefits.

For more information or application forms, write to:

### **Canada Pension Plan**

The Canada Pension Plan (CPP) is a compulsory, contributory, social insurance program designed to help people in Canada build a better future for themselves and their families. The plan provides retirement, disability and survivors' benefits. The CPP applies to most of Canada's labour force. A few types of employment are not covered, and your CPP office can give you details on these exceptions.

You are entitled to a retirement pension if, at any time during your career, you made the required contributions to the CPP in at least one calendar year.

You can apply for this pension when you reach 65, whether you retire or not. Or, you may elect to contribute to the plan until you are 70 if this will increase the amount of your eventual CPP pension. At that time you may take steps to start collecting your pension since you can no longer contribute. You may wish to obtain advice on your best course of action from your CPP office when your 65th birthday approaches.

If you become disabled before 65 and have contributed for the minimum qualifying period, you can receive a pension for yourself and your dependants until you recover. If someone who has contributed to CPP for the minimum qualifying period dies, a lump-sum death benefit will be paid to the estate and the contributor's spouse will receive a pension subject to certain conditions. In addition, children of the contributor will be paid benefits until they reach the age of 18 or up to 25 if they continue to attend school full-time.

The CPP provides that the pension credits earned by one or both spouses during their years of marriage may be divided equally between them if the marriage ends in divorce or legal

annulment on or after  
January 1, 1978.

The minimum qualifying period  
differs according to the type of  
pension. Again, your CPP office  
can provide complete details.

All pensions and benefits are  
adjusted annually to reflect  
increases in the cost of living.  
You are entitled to benefits  
whether or not you live in  
Canada after your retirement.

International agreements on  
social security between Canada  
and other countries permit the  
co-ordination of the Old Age  
Security and Canada Pension  
Plan programs with the social  
security programs of those other  
countries. These agreements  
permit persons who have resided  
or worked in another country to  
combine their pension credits in  
both countries to meet minimum  
eligibility conditions set by  
either country.

nearest you.

#### **Unemployment Insurance at 65**

When you reach age 65, you are  
no longer required to pay Unem-  
ployment Insurance premiums,  
and you are no longer eligible to  
collect regular Unemployment  
Insurance benefits. If you con-  
tinue to work, your employer is  
obliged to stop deducting Unem-  
ployment Insurance premiums  
from your salary as of the first  
month after your 65th birthday.

There is a special one-time benefit available at age 65 to anyone who has worked and paid Unemployment Insurance premiums for at least 20 weeks in the previous year. However, this benefit is not paid automatically; you must apply for it.

Details are included in the pamphlet, *UI and you: when you reach 65*, which is available along with application forms from all Canada Employment Centres.

### **New Horizons**

New Horizons is a program intended for senior citizens who want to participate more actively in community life.

With federal government cash grants and a minimum of red tape, projects embracing a wide range of activities have been made possible. Some projects already undertaken fall under the following categories: activity or drop-in centres, community services, crafts and hobbies, historical, cultural and educational activities, information services, sports and recreation.

To be eligible for a grant, you must belong to a group with no fewer than 10 volunteers who serve as directors of the project. The majority of the directors must be retired from the labour force, and be prepared to take charge of the direction and management of the project.

If you have a project in mind or would like more information, contact:

### **Reduced Travel Fares**

Under the rate structures authorized by the Canadian Transport Commission, senior citizens (65 and older) can travel in Canada at reduced fares.

Discounts are offered by a number of airlines and by Via Rail Canada. The reduction is approximately 25 per cent on domestic flights, and reservations can be made in advance. (At some periods of the year even greater discounts are available to the general public). For travel by rail, the discount is about 33 per cent.

Since the policy on fare reductions may change periodically, it is best to check with your nearest airline or Via Rail office, or a travel agent when planning your trip.

## **Services for Veterans**

In recognition of their contributions, the Government of Canada provides many important services to veterans of our Armed Forces and their families. These services include the War Veterans Allowance and the Civilian War Allowances. As a recipient of either of these allowances you may also receive medical coverage, which includes drugs, dental care and eye glasses. Additional assistance may be awarded for emergencies or unexpected contingencies.

Training assistance and counselling for veterans experiencing problems of adjustment to changing social and economic conditions are also available.

## **Production of Food and Non-Food Items**

All of us have no doubt read or heard of a tragedy resulting from food poisoning or the use of a particular drug.

One aim of the federal government is to eliminate health hazards so Canadians can live in a healthy physical environment and have access to safe and effective health support products. Through regular inspections of establishments and examination of products, the government attempts to ensure that industry complies with federal standards concerning the production of foods, drugs, cosmetics, medical devices and radiation-emitting devices.

You can help by advising federal officials if you feel the safety of a product is questionable.

---

## **Welfare Grants**

To promote improvements in welfare services and self-help activities, the government provides financial assistance, consultation, information and advice to governmental and non-governmental agencies, including citizens' organizations, for short-term research and other project activities. Funds are also available to individuals for advanced studies in social work. Some research activities that have been funded by the government include new projects directed toward the aged, separation counselling and rehabilitation programs.

National Welfare Grants  
Health and Welfare Canada  
Brooke Claxton Building  
Tunney's Pasture  
Ottawa, Canada  
K1A 1B5**

---

## **Other Social Programs**

All provinces and territories have programs that provide for social assistance to persons in need and their dependants. In addition to items of basic need, assistance may include items of special need, non-insured health care services and care in homes for those requiring special care. Provision is made for social welfare services such as home-maker services, day care, community development, counselling and rehabilitation. Provinces and territories are responsible for the administration of their programs.

The federal government's role is of a consultative and financial nature and, through the Canada Assistance Plan, it contributes approximately 50 per cent of the costs of providing assistance and welfare services to eligible persons. The federal government also shares in the costs of providing a comprehensive vocational rehabilitation program for persons who are unable, because of a physical or mental disability, to pursue a regular gainful occupation. It is called the Vocational Rehabilitation of Disabled Persons.

## **Human Rights**

If you believe you have been discriminated against by a federal government department or agency or an employer under federal jurisdiction, the Canadian Human Rights Commission can help. Discrimination is prohibited on the following grounds: race, national or ethnic origin, colour, religion, age, sex, marital status, the fact that a person was convicted of an offence for which a pardon has been granted and, where employment is involved, the fact that a person has a physical handicap.

To receive more information or to lodge a complaint, contact:

---

**Canadian Human Rights  
Commission  
P.O. Box 3545  
Halifax South Postal Station  
Halifax, Nova Scotia  
B3J 3J2**

---

or you may call collect (902)  
426-8380.

“Visual Ear” number for hearing impaired: call collect (613)  
996-5211.

## **Publications: Matters Relating to Welfare**

Many matters relating to the welfare of Canadians are covered in publications available from the National Council of Welfare. These include the following topics: the economic and social problems faced by one-parent families, children living in poverty and the consequences for their health, education and life prospects, nutritional needs of infants, children and pregnant women, and an examination of the way in which Canada's newspapers cover the subject of poverty.

To receive publications on the above-mentioned subjects or if you would like a list of other available publications, write to:

---

**National Council of Welfare  
Health and Welfare Canada  
Brooke Claxton Building  
Tunney's Pasture  
Ottawa, Canada  
K1A 0K9**

---

## **Search and Rescue**

A fishing vessel is in trouble. An aircraft is missing en route to its destination. A pleasure boater is overdue. A survey party in the Far North has not been heard from for two weeks.

The National Search and Rescue (SAR) service is ready to go into action in cases like these. It is co-ordinated by the Department of National Defence (DND) with help from the Department of Fisheries and Oceans (DFO) and the Canadian Coast Guard (CCG).

As well, there is the Canadian Marine Rescue Auxiliary, made up of some 1,000 volunteer fishermen and recreational boaters who respond to distress calls and offer their services as part of the SAR co-ordinated service.

For more information, write to:

**Office of Information**  
**Department of National Defence**  
**FMO**  
**Halifax, Nova Scotia**  
**B3K 2X0**

---

## **Northern Programs**

Indian and Northern Affairs Canada is responsible for administering federal statutes respecting the Northwest Territories and Yukon Territory, and for co-ordinating federal activities north of 60 degrees latitude, particularly those concerning northern resource development, the administration of Indian and Inuit affairs, and the protection of the northern environment.

For additional information, write to:

## **Economic Development**

The Government of Canada is committed to promoting economic development in every region of the country, and to ensuring that all Canadians share in the benefits. This commitment is reflected in a host of services offered to business concerns, large and small, in programs that span the horizon from assistance for farmers and fishermen to the upgrading of the country's transportation system, the development of natural resources and the search for expanded markets abroad. Some of those federal programs and services are described briefly in this section.

## **Services for Employers**

### **Canada Employment Centres**

Approximately 500 Canada Employment Centres (CECs) across the country can assist in your search for qualified personnel. You can submit a list of vacant positions with a brief job description of each, and a CEC representative will direct candidates with the appropriate qualifications to you.

Also at the CEC, the National Job Bank, through its unique telephone-computer combination, can give you rapid access to qualified workers from coast to coast and the Metropolitan Order Processing System (MOPS) can provide you with immediate city-wide information about available skilled workers.

After you hire your staff, the CEC will help set up training programs for them. Reimbursement for direct training costs and trainee wages is available through the Canada Manpower Industrial Training Program. Representatives can also provide you with up-to-date facts and figures on the job market as well as help you plan future staff needs and cope with change.

There are many brochures and pamphlets available that may be of interest to you. These include *Canada Manpower Training Program*, *Canada Manpower Industrial Training Program*, *Critical Trade Skills Training*, *What employers can expect*

*from employment counsellors and Helping Employers Build a Future with People.* They can be obtained from your local CEC or by writing to one of the following addresses:

## **Helping Business and Industry**

The development, expansion and productivity of domestic manufacturing and processing industries are necessary to economic development. Recognizing this, the government concerns itself with providing consultative services, relevant information, and, under certain circumstances, financial assistance to small businesses as well as large.

### **Counselling Assistance**

The federal government provides management counselling to the owners and managers of businesses, particularly those of small size, to enable them to receive sound business advice at nominal cost. Through the Counselling Assistance to Small Enterprises (CASE) program, you can discuss your particular problems and look into new ideas with retired business per-

sons acting as management consultants. For more information on this program, contact:

---

The Department of Industry, Trade and Commerce has incentive and development programs designed to help the Canadian business community gain a competitive edge in the world marketplace.

The department's entire staff, with 11 regional offices and 90 posts in 64 countries, is available to you through the regional offices or the Business Centre in Ottawa.

It serves as a central point of contact for business people seeking information about the whole range of business-oriented federal programs and services. There is not room to describe them all here but two for which you may like to seek additional information are the Small Business Loans Act and the Enterprise Development Program.

The centre produces and distributes a monthly *New Products Bulletin*, which informs Canadian industry of licensing and joint venture opportunities.

The *Doing Business in Canada* series is updated, published and distributed by the Business Centre. Titles in this series are:

- *The Business Environment*
- *Forms of Business Organization*
- *Canadian Customs Duties*
- *Taxation — Income, Business, Property*
- *Taxation — Sales, Excise, Commodity*
- *Labour Legislation*
- *Construction and Equipment Standards*
- *Federal Incentives to Industry*
- *Patents, Trade Marks, Industrial Designs and Copyrights*
- *Financing Canadian Industries.*

You can reach the centre by calling Zenith 0-3200, a toll-free number available from 9 a.m. to 5 p.m. in every Canadian time zone, from Monday to Friday, or you can write to:

### **Enterprise Development Incentives**

The overall objective of the Department of Industry, Trade

and Commerce Enterprise Development Program (EDP) is to assist the growth of the manufacturing and processing sectors of the Canadian economy by providing aid to select firms to make them more viable and internationally competitive.

EDP fosters innovation in the design and development of new or improved products or processes and thus assists companies in adjusting to changing competitive circumstances. The program focuses on small and medium-sized companies prepared to take on relatively high risk projects that appear viable and promise attractive rates of return. EDP can make contributions up to 75 per cent of eligible costs.

For further information on the Enterprise Development Program or other special assistance programs such as Defence Industry Productivity Program (DIPP), Machinery Program (MACH), Fashion Design Assistance Program (FDAP), Cost Recoverable Technical Assistance Program (CRTA), and Micro-electronics Support Program (MSP), please contact:

### **Statistics**

Statistics Canada is the country's largest producer and distributor of statistical data, providing information on almost every type of economic and social activity in Canada. Much of the basic data collection work required to produce these figures is directed from Statistics Canada's regional offices.

Through local Advisory Services staff, Statistics Canada can provide the general public and persons in business, government, the

news media, labour organizations and educational institutions with a variety of user services, many of which are provided on a cost-recovery basis and involve a nominal charge. The user services include answering requests for statistical data, taking orders for all Statistics Canada publications, providing visitors with study areas and copying facilities, distributing booklets on finding and using statistics, and advising on all aspects of information gathering.

If it should be inconvenient to contact the local office, users may be able to refer to Statistics Canada publications at the local public library or an educational library in the area.

## **Federal Business Development Bank (FBDB)**

FBDB offers management counselling which supplements such services as may be available in the private sector. Its purpose is to assist owners and managers of business enterprises, particularly smaller ones, in improving their methods of doing business at a moderate cost.

FBDB offers management counselling which supplements such services as may be available in the private sector. Its purpose is to assist owners and managers of business enterprises, particularly smaller ones, in improving their methods of doing business at a moderate cost.

FBDB also offers an inquiry and referral service geared specifically to the needs of small businesses. Also available from the FBDB is a series of booklets called *Minding Your Own Business*, covering many aspects of small business management, *Small Business News*, a quarterly bulletin on business developments and *Profits*, a business newspaper published periodically.

If you would like to receive these booklets or more information on the FBDB Small Business Information Service, write:

## **Regional Development Subsidies**

Economic wealth and natural resources have not been spread evenly across our country. This has resulted in regional disparity which is of real concern to the

federal government. To generate balanced economic growth and more employment opportunities in all regions of Canada, the government offers incentives to business and industry to undertake projects in designated slow-growth regions. These areas comprise the Atlantic provinces, the Northwest Territories, the Yukon, Manitoba, Saskatchewan, parts of Ontario, Alberta and British Columbia and most of the province of Quebec.

If you are establishing new manufacturing or processing facilities or expanding or modernizing an existing plant in a slow-growth area, you may be eligible for a cash grant or loan guarantee. You don't have to be big to qualify—a project with capital costs as low as \$5,000 may be eligible if it creates at least five new jobs. Projects approved have included small feed mills, large steel mills, and plants to process lobster and frozen French fries.

## **Markets Abroad**

It's not really difficult to sell your products in foreign markets. In fact, it is probably much easier than most Canadian business owners think. The government, through its many programs and services, can help you find the easiest ways to cash in on export opportunities.

## **Promotional Projects**

Participation in trade fairs is one way of promoting your product in overseas markets. The government sponsors and organizes such participation by Canadian firms and can provide complete exhibition services that include the design, construction and operation of the exhibition booth, the cost of which is shared with the participants.

## **Export Market Development**

If you have a project that you cannot undertake without financial assistance, you may be eligible for subsidies from the federal government through the Program for Export Market Development (PEMD). This program encourages and helps Canadian companies to enter new export markets and to undertake additional export development. Incentives are in the form of financial contributions where there is a need to share the risk.

Contributions are repayable only if export sales are achieved.

## **Trade Commissioner Service**

The Trade Commissioner Service strives to promote Canadian exports and to protect Canadian commercial interests abroad. As well, it can provide you with information on a country's economy, markets and credit system. In 1981 the service's network of 91 offices in 67 coun-

tries responded to 118,282 export inquiries and received 26,000 Canadian visitors.

### **Information**

The government's trade promotion programs are open to all Canadian companies, large and small, that have export capability and are interested in expanding their markets. If you would like additional information on these programs as well as other services related to participating in markets abroad, contact:

### **Agricultural Services**

Agriculture Canada offers a number of services to farmers and processors. The goal is to help provide a dependable supply of safe, nutritious food at reasonable prices while ensuring equitable returns to producers and processors.

### **Farm Credit Corporation Canada**

The federal government established the Farm Credit Corporation Canada (FCC) to help Canadian farmers, and those wishing to become farmers, purchase, develop and maintain sound farm businesses. Assistance is provided in the form of long-term mortgage credit.

Loans may be made to farmers individually or jointly and to farming corporations or co-operative farm associations.

The maximum loan to a single farm business is \$200,000 when there is one qualifying applicant and \$400,000 when there is more than one qualifying applicant. A borrower may take a maximum of 30 years to repay a loan and the interest rate set when the loan is made does not change during the life of the loan.

Loan funds may be used to purchase farm land, erect farm buildings, purchase farm equipment and breeding stock, pay debts or for any purpose that will promote the efficient operation of the farm.

An application for a loan should be made at your local FCC office. For the name and location of the credit advisor in your area, please write to one of the following addresses:

### **Agricultural Stabilization Board**

The federal government, by statute, has provided for price stabilization to help the farmer realize a fair return for both his work and his financial investment. It also seeks to maintain a balance between the market price and the cost of supplies and services to the farmer.

The government ensures the support of prices for nine commodities: cattle, pigs, sheep, industrial milk and cream, corn, soybeans, oats and barley. The support prices represent 90 per cent of the average market price during the previous five years and are indexed according to fluctuating production costs. Other products can be "designated" at the discretion of Agriculture Canada.

More information is available from:

---

**Agricultural Stabilization Board  
Sir John Carling Building  
Ottawa, Canada  
K1A 0C5**

---

### **Crop Insurance**

With assistance from the Government of Canada, all-risk crop insurance is available to farmers in all 10 provinces to protect them from losses caused by natural hazards such as hail, drought, grasshoppers or a killing frost. The federal government makes financial contributions to all crop insurance plans that are approved and administered by the provinces. Depending on the terms of the agreement signed with individual provinces, the federal government pays 25 per cent of the premium and 50 per cent of the administration costs, or 50 per cent of the premium if the province pays all of the administration cost. Farmers pay 50 per cent of the premium. It is up to the individual farmers to decide whether they want their crops insured.

For more information, contact your provincial department of agriculture or write to:

---

**Crop Insurance  
Crop Production Division  
Agriculture Canada  
Sir John Carling Building  
Ottawa, Canada  
K1A 0C5**

---

### **Livestock Feed Board of Canada**

Most of the country's feed grain is produced on the Prairies, and, of course, much of it is consumed in that region as well. But Eastern Canada and British

Columbia also have important livestock and poultry industries. Quebec, for example, is the leading province in production of pork. Dairy herds in Quebec produce nearly 50 per cent of all Canada's milk, and the province's farmers rely heavily on supplies of feed grain from other parts of the country.

That's where the feed board comes in, helping to pay the cost of transportation and storage of Western feed grains and Ontario feed corn, as part of a program designed to ensure that adequate supplies are available, at prices that are fairly balanced in Eastern Canada and British Columbia.

Under an agreement with Ontario and Quebec some of the money previously used for transporting feed has been committed instead to development of storage and handling facilities and feed grain production capacity, including the establishment of facilities on individual farms.

The federal government has spent about \$25 million in Quebec and another \$15 million in Ontario since 1976 under the agreement. The feed board's program helps livestock and poultry producers in Eastern Ontario, parts of Quebec, the Atlantic region and British Columbia to plan their operations in advance, knowing there will be feed supplies on hand at competitive prices. For the producer of feed grains, the pro-

gram helps to stabilize both markets and prices.

For more information, write to:

---

**Livestock Feed Board  
of Canada  
Room 400  
5180 Queen Mary Road  
Montreal, Quebec  
H3X 3T4**

---

### **Agri-Food Development**

Agri-Food Development offices have been established in each province by Agriculture Canada. These offices maintain a close contact with provincial governments and non-governmental organizations. The Agri-Food Development personnel help to ensure that Agriculture Canada's programs are responsive to local needs and potential. They work with regional officials to develop an agriculture and food strategy for each province.

---

### **Food Production and Inspection**

The Food Production and Inspection Branch of Agriculture Canada is responsible for health of animals and the inspec-

tion and grading of livestock, meat, poultry, dairy products, fruits and vegetables. Federal scientists direct extensive research into animal disease; there are control programs to eliminate infectious ailments among animals and to prevent infected animals coming in from foreign countries. Federal veterinary agents and agrologists in the field advise and assist farmers. The production development arm of the branch generally promotes more efficient animal and crop production, helping producers to gain a better return on their investment. The branch is also responsible for controlling plant diseases, inspection and grading of seeds, and regulating the use of fertilizers, pesticides and herbicides.

Additional information is available by writing to:

---

**Food Production and  
Inspection Branch  
Agriculture Canada  
Atlantic Regional Office  
Terminal Plaza Building  
1222 Main Street

E1C 8P6**

---

#### **Agricultural Fairs and Exhibitions**

Agricultural societies can receive contributions from the federal government for approved fairs and exhibitions.

These monies may be used to defray the judges' honoraria,

cover the cost of certain rural youth activities, pay for approved property improvements, and serve as prize money for livestock competitions.

For more information, write to:

---

**Animal Production Division  
Agriculture Canada  
Sir John Carling Building

---

#### **Marketing Services**

Agriculture Canada also provides various daily, weekly and monthly market information services to the public. Up-to-date market information is available by calling (613) 995-5880.

Agriculture Canada offers producers advance payments for storable crops, and provides construction assistance for certain grain elevator construction programs. Through the Fruit and Vegetable Storage Construction Financial Assistance Program, funds are available to expand cold storage facilities for horticultural products.

---

## Research

At 50 research establishments across Canada, more than 700 Agriculture Canada scientists are at work on the current and future problems of the agriculture and food industry. Research carried out covers every aspect of the industry and in many ways has been responsible for developing Canada's position as a major food producer and exporter.

---

## Publications

Agriculture Canada offers many publications containing useful information of interest not only to farmers but also to the general public.

The farmer may like to consult those publications concerned with:

- farm management
- crop and livestock production
- market reports.

Publications useful in and around the home cover such topics as:

- canning fruits and vegetables
- freezing foods
- preparation of meat
- growing trees in Canadian gardens.

If you would like a list of available publications, Agriculture Canada will be happy to send you one. Write to:

---

**Communications Branch  
Agriculture Canada  
Sir John Carling Building  
Ottawa, Canada  
K1A 0C7**

---

and ask for publication 5103, *Publications for Farm and Home*.

## Fisheries

In the past, Canadian fishermen have enjoyed an enviable freedom to fish wherever and whatever they wished, in waters teeming with fish in seemingly endless abundance.

However, massive fishing operations by foreign fleets, particularly off the Atlantic coast, had serious effects on the Canadian fishing industry. The fish stocks were exploited so intensively that some species were severely threatened.

With the introduction by Canada in 1977 of 200-mile exclusive fishing zones off both East and West coasts, the federal government has been in a position to manage the coastal fisheries in a much more effective manner. Foreign fishing has been drastically cut back and conservation measures imposed to allow depleted fish stocks to recover.

## **Services for Fishermen**

In addition to efforts to increase the amount of fish available for harvesting and ensure equitable sharing of the resource among competing users, the federal government offers a number of services for the direct benefit of fishermen.

These include the Fisheries Improvement Loans, a government-backed program to assist fishermen who wish to purchase new vessels or make improvements to ones they already own; a fishing vessel construction subsidy program to give financial aid to fishermen who qualify under certain criteria, and a government-operated low-cost vessel insurance plan for fishermen.

Under the Fisheries Development Act, the Department of Fisheries and Oceans initiates various programs to improve the efficiency and profitability of the fishing industry, such as demonstrating improved catching gear and methods, more efficient storage and refrigeration of the catch, and better processing methods in the shore plants.

On the marketing side, the department is actively engaged in promoting the consumption of fish by such means as cooking demonstrations and development of new recipes, and is aggressively seeking market opportunities for Canadian fish products abroad.

The Fisheries Prices Support Board develops price stabilization programs designed to protect fishermen against sharp declines in fish prices, and consequent loss in income due to causes beyond their control.

For information on other services offered by the federal government, consult your telephone directory for the Fisheries and Oceans office in your area, or write to:

## Work

An important aspect of our daily life is work. Work represents both an individual's livelihood and the overall productivity and prosperity of the Canadian economy. The federal government recognizes this by offering many services and programs to the employed, the unemployed and the employer.

## **Workers and Jobs**

### **Canada Employment Centres (Employment Services)**

There is a cross-country network of approximately 500 CECs offering both employers and workers a wide variety of programs and services. These include information on available jobs, counselling for job-seekers regarding employment and related matters, including how to look for a job, counselling for the disadvantaged and special need groups, aptitude testing, specialized services to students, and intensive efforts to help Unemployment Insurance (UI) claimants find employment. The typical CEC has a Job Information Centre (JIC) where workers can make job choices from openly displayed job cards or listings and then contact a counsellor. Since a majority of workers want only information about job vacancies, this concept of self-service has now become an integral part of the CEC operation.

Canada Employment Centres are linked together through the National Job Bank, a unique telephone-computer combination, which provides employers with rapid access to qualified personnel across Canada and provides workers with up-to-the-minute information on job openings coast-to-coast.

In addition to the rapid matching of workers and jobs, the job bank is an excellent source of

labour market information. It is also capable of producing specialized job listings that could bring employers and workers together within a particular trade or profession.

CECs can also provide, in several of Canada's largest metropolitan centres, immediate city-wide job information through the computerized Metropolitan Order Processing System (MOPS).

### **Creating Jobs**

The federal government operates programs designed to encourage potential employers to create jobs and thus reduce the number of unemployed.

The Local Employment Assistance Program (LEAP) supports projects that create employment for people who would otherwise be unlikely to find work. LEAP projects, which can be funded for up to three and one-half years, should raise the level of work skills of socially disadvantaged and chronically unemployed people.

The Summer Youth Employment Program is a two-stream program involving federal departments and agencies, as well as the private sector and voluntary organizations. Details can be obtained from all CECs and CECs for Students.

The New Technology Employment Program offers young people qualified in technical

areas the opportunity to use their skills to advance the development and application of new technology. This program is designed to provide jobs for post-secondary graduates trained in scientific and technical areas who are unemployed, to develop innovations in manufacturing and in the application of conservation and alternate energy techniques and programs, and to support small scale entrepreneurial initiatives in these areas.

Small private sector firms, individuals, associations, research institutes and community organizations creating additional employment in approved activities will be eligible for a contribution of three-quarters of wages paid (up to \$1,250) for up to 12 months.

To be eligible to work under this program, a person must be a post-secondary school graduate in a scientific or technical field, have recently entered the labour force and been unable to find work in his or her discipline.

The Program for the Employment-Disadvantaged is a major experimental program of wage subsidies to help the private sector hire physically and mentally handicapped persons and others who are at a serious disadvantage in securing employment.

There are three phases to the assistance offered employers. In the first phase of up to 13 weeks

duration, the program will pay 85 per cent of gross wages for all eligible workers. In the second phase, the wages of handicapped persons can be subsidized at 50 per cent for up to 26 weeks. In the third phase, the wages of handicapped employees can be subsidized at 25 per cent for up to 26 weeks, and for other employment-disadvantaged at 25 per cent for up to 13 weeks.

In addition to the wage subsidy, up to \$5,000 per business establishment may be provided for restructuring the workplace or toward the cost of acquiring special equipment to accommodate handicapped workers. A further \$100 per worker may be available for the purchase of protective clothing.

Canada Community Development Projects is a program designed to support local organizations in the development and management of activities that will create short-term employment opportunities.

Proposals for this program should demonstrate that they will create new jobs at the time of highest unemployment in the area in which they operate and the activities undertaken should provide employment in specific types of activity generally supportive of national and regional priorities.

Criteria for the program may vary from year to year and potential sponsors should inquire at their local Canada Employ-

ment Centre for full details. Applications are generally solicited in late summer and early fall.

The Canada Community Services Projects (CCSP) program supports organizations that create jobs, particularly for women, natives, young people and the disabled, in established non-profit organizations. The program aims to help organizations provide needed community services such as day care, community health care, crisis and information services, and home care services. Organizations may apply for funding for periods of up to one, two or three years. Proposals for more than one year will be subject to a diminishing funding formula (66 and 33 per cent of first-year support in years two and three). Persons in jobs supported by the program are referred by CECs and will have been unemployed and actively seeking work for eight weeks.

The Outreach Program funds projects that extend employment services to remote communities and to people with particular difficulty finding and keeping jobs, including those returning to the work force after prolonged periods of absence, natives, disabled persons, prison inmates, ex-inmates and older workers. Outreach projects are initiated by CEC managers and are developed in conjunction with local community groups, which sponsor the projects. Outreach

project workers develop innovative and effective ways to improve the job prospects of unemployed and disadvantaged men and women.

These are just some of the programs developed by the federal government to increase employment opportunities. Contact your local CEC for information on other job-creation programs.

### **Mobility of Workers**

The government wants to ensure that workers whose skills are not needed in their home areas can respond to job opportunities in other parts of the country.

People who are under-employed, unemployed or about to become unemployed may be eligible for financial assistance, through the Canada Manpower Mobility Program, when they travel in search of employment, accept temporary work elsewhere or relocate for permanent jobs.

Assistance covering some of the costs of travel is also available to persons attending a Canada Manpower Training Program course at a school located outside their home area.

### **Manpower Training Program**

The objective of the Canada Manpower Training Program is to help adults acquire the skills needed for better-paying, steadier and more satisfying jobs, and to provide the skilled workers needed by Canadian employers. The government supports training in two ways. The first

approach is to purchase institutional training courses from colleges and vocational schools, most of which are operated by provincial authorities. Enrolment is through CECs. Full-time trainees receive a training allowance or Unemployment Insurance (UI) benefits and may be eligible for commuting or living-away-from-home allowances. The second approach is to enter into a contract with an employer to assist in the training of employees. Under such contracts, the Canada Manpower Industrial Training Program reimburses the employer for the direct cost of training and for a portion of trainee wages.

### **Training of Women in Non-Traditional Jobs**

To help women enter occupations traditionally dominated by men, employers are reimbursed 75 per cent of the wages paid the women while they are being trained for non-traditional jobs. These include such occupations as sheet-metal work and aircraft fabrication and assembly.

Women can take advantage of pre-trades training courses that provide the opportunity to choose from a wide variety of trades for which further training and job prospects exist.

There are also introductory courses for occupations that are traditionally male-dominated. Spaces are reserved for women in skilled trades training courses under the Canada Manpower

Training Program and goals are set for the number of women to be trained by employers under the Canada Manpower Industrial Training Program.

### **Canada Employment Centres (Unemployment Insurance)**

Most workers in Canada are covered by Unemployment Insurance. When they are temporarily out of work, people have the right to apply for UI benefits to help pay the bills and buy the things they need.

Unemployment Insurance benefits are not automatic. To qualify, you must have worked a certain number of weeks and you must be looking for another job. The number of weeks of insurable employment one needs varies from 10 to 14 weeks depending on the rate of unemployment in the region in which you normally live. These weeks must fall in the last 52 weeks or since the start of your last claim for benefits. This is called your qualifying period.

There are additional requirements for some UI claimants. Generally, people who apply for the second time in 52 weeks may have to work up to six weeks longer than those claiming for the first time. The number of extra weeks required would depend on how many weeks of UI benefits they received the first time. People who enter the labour force for the first time or after an absence of more than one year would also have to work

longer before getting UI—either 20 weeks in the last year or 10 to 14 weeks in the last year *plus* 14 weeks the year before.

Special benefits differ. To apply for benefits when you are sick or injured, pregnant or reach age 65, you must have worked in insurable employment for 20 weeks in your qualifying period.

There are many brochures available on the subject of Unemployment Insurance. These include *How Unemployment Insurance works for you* (covering the total UI program), *UI and you: when you reach 65*, and *If you don't agree* (about appeals).

### **Social Insurance Number**

When you apply for a job, a potential employer will ask if you have a Social Insurance Number (SIN). If you don't have one, visit your local Canada Employment Centre to complete the application form.

You must provide documentary proof of your identity as a Canadian citizen or a permanent resident. If you are a Canadian citizen, you would submit, for example, your birth certificate or a certified copy of it and one other piece of identification, which could be your driver's licence, passport or baptismal certificate. A permanent resident (landed immigrant) should submit, for example, his or her Canadian immigration identification record and one other piece of identification.

Because the Canada Employment and Immigration Commission cannot be responsible for the safety of original documents sent through the mail, you are encouraged to bring them in yourself.

The booklet entitled *How do you apply for a Social Insurance Number* can provide you with all the information you will need to apply.

### **Additional Information**

There are many brochures and pamphlets, some of which have been mentioned above, that provide more detailed information. These can be obtained from your local CEC or by writing to one of the following addresses:

## **Labour Canada**

This federal department administers the Canada Labour Code, which covers employment in international and interprovincial transport (railways, trucking, pipelines, ferries, tunnels, bridges, marine transport and other related services), air transport and airports, broadcasting, telephone, banks, grain elevators, uranium mines and certain Crown corporations. Generally, all other related enterprises are under provincial or territorial jurisdiction. Across Canada, labour affairs officers and health and safety officers are ready to

assist Canadians who are employed in fields that come under federal jurisdiction. These officers also carry out inspections to protect the health and well-being of such employees. And Labour Canada's mediation and conciliation service provides experts to assist in the collective bargaining process in industries under federal jurisdiction. The arbitration services branch appoints, where required, arbitrators to settle disputes.

Labour Canada also offers a wide range of information and education services to all Canadians. The department collects and publishes statistics on wages, collective bargaining, strikes and lockouts and working conditions across Canada. Other publications include studies, booklets, bibliographies and periodicals that deal with interests such as women in the work force, quality of working life, occupational safety and health, federal-provincial and international labour relations and conditions of work.

You may obtain a copy of the department's publications catalogue by writing to:

## Energy

Canadians are in the extremely fortunate position of being self-sufficient in energy. Nonetheless, we must be careful to ensure maximum efficiency in consuming the energy we have. The federal government is involved in promoting a number of programs designed to save energy and help Canadians better understand the importance of managing well the energy we use every day.

## **National Energy Program**

The management of our energy resources is of vital concern to all Canadians. The Government of Canada is carrying out its energy management responsibilities through the National Energy Program, which has three major objectives:

- energy security, particularly self-sufficiency in oil by 1990
- increased opportunity for Canadians to participate in the oil and gas industry
- fair sharing and fair prices for governments, industry, and consumers.

This section takes a brief look at some of the main components of the National Energy Program.

### **The Consumer Home Energy Management Package**

Canadians are fortunate to have energy resources in such abundance. We export uranium, coal, natural gas and electricity. However, some of the oil we need must be imported from an uncertain world market.

To help in achieving the objective of oil self-sufficiency by 1990, Canadians have been encouraged to reduce their use of energy and especially their use of oil.

The federal government offers a complete package of services to

help Canadians use less energy, convert off-oil, and save money.

The package includes the following:

- the Ener\$ave Advisory Service
- the Canadian Home Insulation Program (CHIP)
- the Canada Oil Substitution Program (COSP)
- free publications.

### **Ener\$ave Advisory Service**

“Ener\$ave” will help you reduce energy consumption in your home.

We will send you a questionnaire if you call or write to us. You then answer short questions on the basic characteristics of your home. We analyse the answers by computer and return the results by mail, showing how you can save.

To get advice by telephone, call our bilingual HEATLINE advisors. They give direct advice on what to do, what products and services to choose, and how to use them effectively.

To obtain a questionnaire or more information and advice, write to:

---

**The EnerSave Advisory Service  
Energy, Mines and Resources  
Canada  
588 Booth Street  
Ottawa, Canada  
K1A 0E4**

---

or call toll-free : 1-800-267-9563.

### **Two Grant Programs: CHIP and COSP**

To help you take the necessary steps that EnerSave has helped you to identify, EMR provides two assistance programs.

The Canadian Home Insulation Program provides taxable grants up to \$350 for the purchase of approved insulating materials, including weather-stripping, caulking and vapour barriers, as well as up to \$150 toward the cost of contract labour.

To determine if your home qualifies for a grant and to obtain more information, write to:

---

**CHIP  
P.O. Box 700  
Postal Station St. Laurent  
Montreal, Quebec  
H4L 5A8**

---

or call toll-free: 1-800-442-9771.

The Canada Oil Substitution Program is designed to encourage homeowners and small businesses to convert their heating systems from oil to other sources of energy. COSP provides taxable grants covering 50 per cent of the conversion costs to a max-

imum of \$800 per unit. To be eligible, the new heating systems should reduce the building's reliance on oil by at least 50 per cent. A new solar system need only provide one-third of the building's heating requirements.

If you are considering propane, wood, solar or other energy forms, you should contact the office of the Department of Energy, Mines and Resources in your province or you may write to:

---

**Energy, Mines and Resources  
Canada  
580 Booth Street  
Ottawa, Canada  
K1A 0E4**

---

## **Publications**

The Government of Canada offers free publications that explain how you can conserve energy. Titles include *Keeping the Heat In*, *The Billpayer's Guide to Heating Systems*, and *The Car Economy Book*.

To obtain these publications or for more information, write:

---

**EnerSave  
Conservation and Renewable  
Energy Branch  
Energy, Mines and Resources  
Canada  
588 Booth Street  
Ottawa, Canada  
K1A 0E4**

---

or call toll-free: 1-800-267-9563.

## **Renewable Energy**

The Government of Canada has announced several programs to promote renewable sources of energy, and to stimulate research and development in the field of renewable energy.

At present, renewable energy, excluding hydro-electricity, represents 3.1 per cent of the primary energy consumed in Canada. The federal government's goal is to double this by 1990.

An important example of renewable energy in Canada is "biomass," which includes vegetables, grain, peat, trees, and forest, farm and municipal waste. Biomass can be burned to produce steam, or processed to produce liquid fuel, gas and other sources of energy.

In Canada, wastes from forest industries offer the best opportunities to increase biomass energy use. Under the Forest Industry Renewable Energy Program (FIRE), a federal program established in 1978 to encourage the use of biomass fuels, industry has received \$44.1 million in grants from the Government of Canada. These projects displace the equivalent of more than 790,000 cubic metres of oil per year by using wood waste as fuel.

This program is so successful that it was expanded in October 1980 and now provides civic organizations and all industries

with up to 20 per cent of the capital costs of eligible equipment for the use of forest, municipal, and agricultural waste, or peat. For further information, write to the following address:

---

**FIRE Program Secretariat  
Conservation and Renewable  
Energy Branch  
Energy, Mines and Resources  
Canada  
580 Booth Street  
Ottawa, Canada  
K1A 0E4**

---

## **Some Other Energy- Management Programs**

The Government of Canada is taking these other steps to secure oil self-sufficiency:

- an oil pricing policy that provides strong incentives to the petroleum industry to find and develop *new* sources of oil
- measures to encourage Canadianization of the oil industry with the goal of at least 50 per cent Canadian ownership by 1990
- help to make natural gas available to more Canadians
- a new Crown corporation, Canertech, will promote the commercial production of renewable energy and energy conservation products and services

- a taxable grant of \$400 for each commercial vehicle, such as taxis, trucks, or farm vehicles, converted to run on propane or purchased with a propane system
- a \$20-million fund to help Canadian municipalities, in co-operation with the provinces, conserve energy and create employment.

For more information about Canada's National Energy Program, contact:

---

**Communications Branch  
Energy, Mines and Resources  
Canada  
580 Booth Street  
Ottawa, Canada  
K1A 0E4**

---

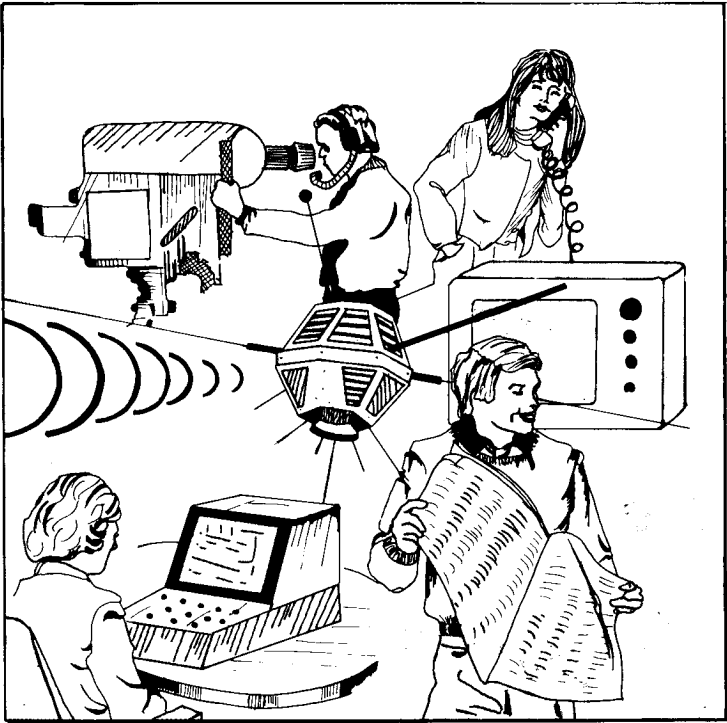

## **Fuel Economy Guide**

Transport Canada provides consumers with fuel economy data on all new cars and light trucks sold in Canada. You may obtain a copy of the *Fuel Economy Guide* from participating new car dealers or by writing to:

---

**Public Affairs  
Transport Canada  
21st Floor, Tower C  
Place de Ville  
Ottawa, Canada  
K1A 0N5**

---

## Communications

Canada is a big country, so it stands to reason that Canadians have had to become pioneers in communications. The Government of Canada helps Canadians communicate in many ways. National radio and TV networks broadcast in English and French, in Indian and Inuit languages and, by short wave, Canada speaks to the world in 11 languages. The federal government is actively involved in the development of exciting new communications technology to serve the people of Canada.

## Satellites

Canadians living in remote areas will soon be able to pick up a new multi-channel television and radio service relayed to them via the Canadian-owned and operated Anik satellite system. The new service will provide additional radio and television channels in both official languages and include nearly the full range of programming available in large cities.

But, first, someone in these communities has to apply for licences to operate satellite-receiving earth stations and to distribute these signals to their communities. The federal government has developed a streamlined procedure for processing applications as speedily as possible.

The federal government also provides applicants with information on licensing, general advice on technical alternatives and guidance in completing application forms.

## Videotex Technology

In the near future, Canadians may be able to shop, bank, send and receive electronic mail, search data bases across the country and publish their own electronic information—all without leaving their homes. These new possibilities have opened up because federal government researchers have developed Telidon, a new videotex tech-

nology, which through the addition of a tiny computer terminal and a keypad, can convert the TV in your living room into a new, fully interactive home entertainment and information centre.

Telidon, an all-Canadian technology now widely acknowledged as superior to any videotex system in the world, is being tested in field trials across Canada, as well as in Venezuela. The giant U.S. telecommunications carrier, American Telephone and Telegraph, has announced that Telidon will serve as its North American standard.

By 1983, it is predicted that Telidon terminals will sell for about \$300.

If you would like brochures or more information on the services mentioned here, write to one of the following addresses:

## Television Reception

When you've been looking forward to relaxing with your favorite television program it's annoying to find that your TV set is acting up.

The federal government has a brochure, *For better television reception*, that can help you to improve the quality of your picture. It discusses different types of antennas and how to install and use them effectively. Copies are available from the Department of Communications addresses which follow.

## General Radio Service

Thousands of Canadians now own General Radio Service (GRS) radios, more popularly known as Citizen Band (CB) radios. More and more frequently, these radios are being used for many communications purposes.

A booklet called *Information and Licence Application Form (Citizens Band-CB)* has been prepared to help users get the best results from General Radio Service. It contains information that is especially useful if you are considering buying or operating a two-way GRS radio. As a licence is required to operate the radio, a licence application form and temporary permit are attached. For copies of these brochures and additional information, write to one of the following addresses:

## Canada Post Corporation

The transformation, on October 16, 1981, of the Post Office department into a Crown corporation entails a number of changes. However, Canadians can count on their postal service to continue to improve and to extend its services in light of developments in the field of communications.

Many customers, especially in smaller localities, find that wicket clerks and postmasters can be "information officers" for all federal government programs and services, in addition to providing their regular service. In these communities, citizens are able to obtain information on passports, Unemployment Insurance, old age pensions, Family Allowances, health and welfare

services, and other important matters through their post office.

Each year the Canada Post Corporation issues a series of stamps commemorating famous persons or important events in the history of our country.

## The Environment

We are becoming increasingly aware of our environment, which includes not only our immediate surroundings but also the forests, inland waters, lands and wildlife of our vast country. The federal government provides support and leadership in the conservation and preservation of our environment.

## **Environmental Protection**

### **Pollution**

Strict laws protect our environment. The federal government works closely with provincial agencies and industry on measures to control sources of pollution in air and water. The use of toxic substances comes under close supervision, and scientific studies are undertaken on methods of disposing of toxic wastes. Research is being carried out to assess the acid rain problem and to develop appropriate control strategies. Federal experts are also active on projects to clean up pollution where it exists. And since there is always a risk of environmental disaster occurring, there is a cleanup team on the alert 24 hours a day to face any emergency.

### **Forests**

Canada's forests cover 3.5 million square kilometres from the Pacific to the Atlantic. Forestry is Canada's biggest industry.

The federal government leads forest research in silviculture, forest management, protection, environmental factors and energy from forest biomass, (i.e., forest waste products). It also supports and assists the provinces and industry in forest management and development. Federal policies and activities affecting forestry are coordinated through the Federal Forestry Sector Strategy Com-

mittee headed by the Canadian Forestry Service. Exchange of technical information with other countries is part of the federal role in international relations.

Fact sheets, brochures and pamphlets are available on such subjects as maple sugar production, careers in forestry, conservation, tree species, fire and the spruce budworm.

### **Land Use**

The federal government is concerned about the rapid loss of agricultural lands and, looking to the future, has developed a method of projecting the demand for agricultural land and the availability of land to satisfy that need.

Other areas of interest shared with the provincial governments are the distribution of land suitable for outdoor recreation, the demand and availability of land for such uses as forestry, the amount of despoiled land and the conversion of land for urban uses.

### **Inland Waters**

The federal government plans and participates, with the provinces, in water management programs and policies. Concerns include water quality and quantity, floods and flood control, water research, industrial and agricultural use of water, and water resources planning.

## **Publications and Information**

If you would like more information as well as interesting publications on pollution, land use, protection of forests and protection of inland waters, or if you would like to know about other environment-related programs and services, write to:

---

### **Wildlife**

Any massive changes in the environment that affect wildlife must eventually affect man. An important concern of the federal government is the preservation of our wildlife — everything from migratory birds and the endangered peregrine falcons to wood bison and polar bears.

Through the Canadian Wildlife Service (CWS), the government protects and manages migratory birds under international treaty and participates in many other wildlife research and management projects.

These projects include studying and compiling data on the distribution, migration habits, food sources and diseases of birds and animals. Surveys are made of breeding grounds in an attempt to maintain optimum popula-

tions of migratory game birds. National Wildlife Areas have been created to provide safe breeding, feeding and resting places for migratory birds and other wildlife. The CWS conducts research into the effects of human activities on wildlife, and on finding ways to harmonize the uses of wildlife and other resources; it also advises farmers on ways of preventing damage by waterfowl to cereal crops.

In addition, the CWS, with the provinces and territories, sets annual hunting season dates and bag limits for migratory game birds.

The Canadian Wildlife Service also publishes a wide range of technical and general information pamphlets and has sponsored feature-length films on wildlife and the service's activities. For information concerning films, contact the National Film Board office in your area. Information on the Canadian Wildlife Service can be obtained by writing to:

### **Fish Habitats**

A good indicator of the state of health of a lake or river is whether there are fish swimming around. Often it is the unthinking action of man that kills off

fish stocks, such as dumping fill on spawning grounds or marshes, building dams that reduce the flow of water, or removing sand or gravel from beaches or stream beds.

Through its Habitat Management Branch, the Department of Fisheries and Oceans acts to protect the areas where fish breed and grow by means of public information programs, consultation with developers and, if necessary, through court action under the provisions of the Fisheries Act.

The most recent threat to fish survival is acid rain—airborne pollution from sources in Canada and the United States—which has already brought death to scores of lakes in central Canada. Fisheries and environmental scientists are embarking on extensive research programs to support efforts that will curb the further spread of damage to our natural resources from the scourge of acid rain.

If you would like more information on how you can help protect the fisheries for present and future generations, write to the appropriate address:

### **The Weather**

Meteorological stations across Canada provide public weather forecasts through radio, television and newspapers. In some major cities, Weather Radio offers forecasts and information on special FM channels.

Forecasts are based on information gathered many times each day by weather observers and meteorologists all over the country. In addition to preparing forecasts for the general public, the Atmospheric Environment Service of Environment Canada issues special forecasts for aviation, agriculture, forestry, offshore fisheries, pleasure-boaters, marine transport and highway services.

If you are travelling or moving to a different region, you can obtain information on the climate of that region by writing to:

## Youth

The federal government, recognizing that the young people of today are the potential leaders of tomorrow, has created challenging, interesting programs to help them know Canada and Canadians better, as well as knowing themselves.

(See also: Careers in the Government of Canada—  
Summer Assignments for Students; Work—Creating  
Jobs)

## **Student Loans**

The Canada Student Loans Program (CSLP) provides loans to full-time students, who establish a need for financial help, to assist them in meeting the cost of studies at the post-secondary level of education so that all qualified students may have the opportunity to fulfil their educational potential.

If you receive a loan under this program and complete the proper documents, the federal government will pay the interest on the loan during the time you remain in full-time study and for six months after.

Although the program is financed by the federal government, applications for aid are processed by provincial and territorial authorities. For more information consult your provincial department of education or write to:

## **Open House Canada**

Open House Canada helps young Canadians to discover other parts of their country and to get to know their fellow citizens from diverse backgrounds through reciprocal visits between "twin" groups.

Open House Canada pays travel costs between home communities for participants aged 14 to 22, or for those enrolled in post-secondary education, and for accompanying adult escorts. Each group hosts the other in turn, providing accommodation and meals for a minimum five-day stay. A program of educational activities is organized by the hosts to familiarize visitors with the history, government, economic life and sociocultural composition of the host community.

If you or your group would like more information on this opportunity to experience another part of Canada, write to:

## **Katimavik**

Would you accept the opportunity to discover Canada, to learn more about yourself, to take on tough physical challenges, to become more aware of your environment? Katimavik is making the offer.

Katimavik, an Inuit word for "meeting place," is a national youth service funded by the federal government. Its objectives are to serve Canadian communities, to aid in the personal development of its participants, to encourage environmental awareness and to provide opportunities for a greater understanding of our country.

The program runs for nine months and involves groups of 33 participants assigned to three successive projects (one of which is in a francophone environment) in three different provinces where they spend approximately three months each.

Projects are developed in cooperation with local communities and might involve such activities as environmental clean-up, trail-cutting, improvement of recreational facilities, aiding the elderly and handicapped, and working with children and youth in day care or recreation centres.

In addition there are cultural and educational aspects that include structured and informal learning, ranging from language and interpersonal skills needed

for intensive group living to crafts, basic manual skills and research into the historical and cultural heritage of the area.

Also available to candidates is a three-month military option that involves learning and participating in a program sponsored by the Department of National Defence.

If you are between 17 and 21, single and a Canadian citizen or resident and would like to share in the collective effort of a group of dedicated young Canadians, more information is available from:

---

**Katimavik

---

## **Young Athletes**

Young Canadians are continually demonstrating their ability, potential and determination in amateur sports. The federal government works with the appropriate national sports governing bodies to offer encouragement and attempts to upgrade the quality and scope of Canadian participation in the following ways: providing funds for the development of quality coaching, financing travel expenses for athletes attending training camps, assisting individual ath-

letes in meeting their training needs, providing money for travel and accommodation expenses for athletes participating in sports championships and offering direct financial assistance to ensure that promising Canadian athletes can continue their education and still concentrate on their training and competitive programs.

B3J 1H6**

---

## **Travel Bargains**

Travelling from Victoria to St. John's could cost less than you think. Fare structures authorized by the Canadian Transport Commission permit the country's airlines and Via Rail to offer a wide variety of reduced fares.

For example, students between the ages of 12 and 21 can take advantage of a 40-per cent reduction on most domestic airline flights, except during peak travel periods. Seats cannot be reserved, but the savings may well be worth the time spent waiting on standby. Keep in

mind also that at some periods of the year even greater discounts are available to the general public.

Since the policy on fare reductions may change from time to time, it's best to check with your nearest airline or Via Rail office, or consult a travel agent.

## Arts and Culture

The arts symbolize our intellectual wealth and creative imagination, and reflect the many facets of our cultural heritage as can be seen in the works of our painters, sculptors, actors and actresses, musicians, composers, dancers and film-makers. The federal government, through numerous programs, encourages the preservation and enhancement of our multicultural character and the growth and development of artistic and creative skills.

## **National Policies In Support of the Arts**

National programs supporting culture and the arts are designed to give all regions of Canada an equal chance to develop and express themselves. The federal government's arts and culture sector does research on the state of the arts across the country and helps the Minister of Communications develop national policies concerning cultural activities, museums and the national heritage.

The sector also promotes co-operation between federal cultural agencies so they may meet common cultural objectives and implement programs aimed at both the private and public sectors. Policies involve promotion of the arts, financial planning for the arts community, and indirect as well as direct subsidization of the arts.

In December 1980, the Minister of Communications announced a special program of cultural initiatives that will disburse \$39.6 million to the arts community over the next three years to improve public access to our culture and to meet the immediate financial and management needs of the artistic community.

---

## **Assistance for the Arts**

A musician will tell you that music is the truest form of expression. The writer will make the same claim for literature, and the artist and photographer will praise their respective arts. The Canada Council, which is the federal organization responsible for supporting the arts, covers all these forms of expression.

The Canada Council encourages and promotes the study, enjoyment and production of works in the arts—music, dance, opera, theatre, film, the visual arts, video, photography and literature.

Grants are offered in all these fields to professional artists, persons whose work is essential to the professional arts, professional arts organizations and arts support services.

Explorations is a program of the Canada Council designed to assist individuals, groups and organizations, inside or outside the professional arts, with imaginative, well-conceived projects in the broad field of culture.

A multi-disciplinary program, Explorations offers support for innovative projects that seek to address new needs or investigate new directions in the arts.

A variety of awards and prizes is available such as the Governor General's Literary Awards, Children's Literature prizes, translation prizes, the Canada-Belgium and Canada-Australia Literary Prizes and the Jules Léger Prize for New Chamber Music, to mention just a few.

A range of publications describing the Canada Council's programs and services may be obtained by writing to:

or by calling toll-free 1-800-267-8282.

## **Assistance to Groups**

Recognizing Canada's multicultural heritage, the federal government provides encouragement and financial assistance through a number of programs that pro-

mote the preservation and sharing of our many cultures, and helps bring mutual appreciation and understanding to all Canadians.

Basically these programs support and encourage communities in the development of their cultural heritage, help members of all cultural groups to gain acceptance and overcome barriers to full participation in Canadian society, and promote and encourage creative encounters among all Canadian cultural groups.

Assistance and encouragement is also provided to organizations dedicated to improving the status of women, to native citizens and to voluntary organizations.

The federal government also helps our two official language groups to make use of their language and thus enables them to contribute to Canadian society in areas where they constitute minorities. Grants are available for projects and activities that meet this objective. Grants and/or bursaries are also available to help teachers improve their language skills and to help post-secondary students continue their studies or take a total immersion course in their second official language.

For more information on these and other programs, contact:

## **Canadian Broadcasting Corporation (CBC)**

The publicly-owned CBC provides a balanced service of information and entertainment for people of all ages, interests and tastes. Programming includes news, public affairs, drama,

music, sports, documentaries, children's programs, and consumer affairs.

CBC national services include English and French television networks, English and French radio networks, FM stereo radio services in both languages and English and French parliamentary television networks distributed through cable systems. In the Far North, CBC's northern radio and TV services provide network programming in English and French, and special programs in the languages of the Indian and Inuit residents.

The national broadcasting service gives continuing support to Canadian artists and performers through the broadcast of Canadian music, drama and poetry, the commissioning of special works, the sponsorship of talent competitions, and the presentation of Canadian films. It produces a variety of recordings, audiotapes and books from some of its program material.

## National Film Board (NFB)

The National Film Board was founded in 1939. Its purpose then, as now, was to inform Canadians about their own country and the world in which they live. The extension of this mandate, to inform the world about Canada, has made the NFB one of Canada's best-known cultural ambassadors.

Since its inception, the film board has produced over 4,000 French and English documentaries, and animated and feature films, which have been seen in every country where film is used. Film board productions have won over 2,000 international awards, including six Academy Awards. The first Oscar was given in 1941 to *Churchill's Island*. The most recent Oscar was won by the animated film *Every Child/Chaque enfant*, in 1980.

French and English language films are produced at a rate of approximately 200 each year and cover a wide variety of subjects: portraits of Canadian politicians, artists, historical fig-

ures and "personalities," and inquiries into a myriad of social issues. The NFB headquarters in Montreal is now complemented by six regional film production studios established to foster film-making talent across the country.

In addition to commercial distribution through theatres and television broadcasts, prints of NFB films and filmstrips are used extensively by schools, and by business and community groups. In Canada, films are available to individuals through a unique system of lending libraries. The NFB also provides photographic reproduction and display services to federal government departments through the Canadian Government Photo Centre in Ottawa. This facility also houses a bank of thousands of photographs and slides sold to private sector publishers and to the general public. The Still Photography Division, also in Ottawa, creates and circulates gallery exhibits of work by Canadian photographers.

There are 30 NFB offices across Canada. For further information please consult your telephone directory for the one nearest you, or write to:

### **National Museums of Canada**

This country's museums have a great deal to tell us about our shared history and the bonds that unite our diverse cultures. The National Museums of Canada has helped museums from coast to coast and, in the process, has created a network of

25 associate museums (including the four national museums in Ottawa) and 24 national exhibition centres.

The Atlantic Provinces have four associate museums—the New Brunswick Museum (Saint John), the Nova Scotia Museum (Halifax), Confederation Centre Art Gallery and Museum (Charlottetown), and the Newfoundland Museum (St. John's)—and seven national exhibition centres—Galerie Restigouche Gallery (Campbellton), Fredericton National Exhibition Centre, DesBrisay Museum/National Exhibition Centre (Bridgewater), the Firefighters' Museum of Nova Scotia and National Exhibition Centre (Yarmouth), Hector Centre Trust/National Exhibition Centre (Pictou), Eptek National Exhibition Centre (Summerside), and Mary March Regional Museum and National Exhibition Centre (Grand Falls).

The national museums reach out to all Canadians through traveling exhibitions, loans of artworks and artifacts, and educational activities in a variety of media. In addition, the National Museums of Canada administers a series of national programs, including a fleet of "museumobiles" that take exhibits into rural areas, a computerized national inventory of museum objects, the Canadian Conservation Institute, providing research, advice and skilled care to protect the national heritage,

an international exchange program, and technical and financial assistance to hundreds of qualifying institutions across the country.

For additional information on the National Museums of Canada, write to:

---

**National Museums of Canada

---

## **Public Archives**

The Public Archives contains a wealth of information on Canada relating to all aspects of Canadian life and to the development of the country from its beginnings to the present time. The Archives also provides suitable research facilities to make this material available to the public.

Some of the Archives' acquisitions are as follows: manuscript collections of statesmen and other distinguished citizens, 80,000 volumes on Canada and its history, about a million maps and plans pertaining to the discovery, the exploration, settlement, topography and geology of the country and documentary paintings, drawings and printed images relating to people, historical events, places and objects.

If you would like reasonably priced reproductions of material preserved in the Archives, or information regarding the services of the Public Archives, write to:

---

**Communication Services  
Public Archives of Canada  
395 Wellington Street  
Ottawa, Canada

---

## Recreation

For most of us, recreation is an important part of our lives. Not only is it just plain fun, but it also serves as an excellent antidote for stress. Whatever your favorite leisure activity, there's a good chance that services offered by the federal government can help make it more enjoyable.

## **Fitness**

The federal government, through Fitness and Amateur Sport, offers a number of services to Canadians. Consultative services are available to sport and recreation associations that promote a healthier, more beneficial lifestyle for all Canadians through fitness activities. National associations that encourage increased participation in physical recreation and raise the fitness level of Canadians may receive financial assistance.

For business and industry, fitness programs have been developed by Fitness Canada. These can be incorporated into the work environment to meet employee needs and conditions. A manual has been published covering all aspects of organizing and operating employee fitness programs.

There are fitness packages available for professionals and fitness group leaders. There are a number of fitness publications available to individuals as well.

For information on how to order these packages or for more information on services, write to:

---

## **Boating Safety**

Safety is as important to the weekend sailor as it is to the captain of a large oil tanker. The Canadian Coast Guard is responsible for marine search and rescue operations. It has craft of all sizes and types in various parts of the country to carry out these duties.

Since prevention is better than cure, Transport Canada publishes boating safety literature, including the *Canadian Coast Guard Boating Handbook*. Coast Guard personnel give presentations on boating safety at boat shows, marinas and fishing communities. The Coast

Guard has also formed the Canadian Marine Rescue Auxiliary, made up of volunteers who help provide boating safety information and take part in search and rescue operations.

## **Harbour Facilities**

"Any port in a storm" has become a well-worn cliché, but in any kind of weather mariners appreciate a port that has good facilities and ample berthing space.

The federal government has the responsibility for the upkeep and development of some 2,300 harbours, wharves, jetties and related facilities for the use of fishermen and recreational boaters across Canada. Among the major projects undertaken through the Small Craft Harbours Program of the Department of Fisheries and Oceans in recent years, was construction of a marina and yachting facilities at Kingston, Ontario, for the 1976 Olympic Games. The federal government also provides financial assistance in certain cases for the development of private marinas and tourist wharves.

### **Tide Tables**

If you are a commercial fisherman or just a weekend sailor, it is important to know the times of high and low tides if you are operating in tidal waters. From tables issued yearly by the Canadian Hydrographic Service, mariners can predict the height of the tide in a particular area at any time of the year. The same source produces current tables containing the times and rates of maximum flow of water each day for specific areas, as well as water level data for the Great Lakes system and elsewhere.

For more information, contact:

---

---

### **Aerial Photographs**

Would you like to have a reasonably priced aerial photograph of some specific feature such as a lake, landmark, house or the area in which you live? If so, mark the area of interest on a suitably scaled topographical map available from the Canada Map Office. Make a notation on the map to indicate the specific feature that should be visible in the photograph and send it to:

---

**National Air Photo Library  
Energy, Mines and Resources  
Canada**

**615 Booth Street  
Ottawa, Canada  
K1A 0E9**

---

## **Canada's National Parks**

In a world characterized by rapid technological advancement and industrialization, Canadians are learning that the quality of life we are seeking cannot be achieved through material success only.

We need special places that offer an alternative to the conformity of our surroundings—places in which we can relate to the natural world and which will, perhaps, remind us of our past.

We have these places. They are our national parks and national historic parks and sites, which are established and maintained for all Canadians by Parks Canada.

There are 28 national parks in Canada from Terra Nova on the east coast of Newfoundland to Pacific Rim on the west coast of Vancouver Island, from Point Pelee on the most southerly tip of mainland Canada to Auyuituq on Baffin Island inside the Arctic Circle. Whatever you prefer in terms of scenery, be it rugged coastal cliffs, calm glassy lakes, sandy beaches or snow-capped mountains, there is a

national park to accommodate your taste. Since 1955 more than 70 historic parks and major sites have been created and about 650 persons, places and events have been commemorated. Parks Canada turns back the clock to offer Canadians a look at people and places from our colourful past.

Pamphlets are available on all national parks and national historic parks and sites. These indicate the names and locations of the parks and provide information on activities and facilities available. Write to one of the following addresses:

---

**Parks Canada  
Atlantic Region  
Historic Properties  
Upper Water Street  
Halifax, Nova Scotia  
B3J 1S9**

**Parks Canada  
Ottawa, Canada  
K1A 1G2**

---

## Canadians Abroad

Whether you are travelling for pleasure or on business, the federal government attempts to ensure that your trip goes as smoothly as possible. The government also encourages Canadian participation in development programs abroad.

## Passports

Most countries require visitors to carry passports. To obtain yours you must first fill out an application form, available free of charge from post offices, travel agencies, customs or immigration offices, citizenship courts or regional passport offices. After you have filled in the required information, which must include the name of a guarantor who fulfils the conditions listed on the form, attach two photographs of yourself, your birth certificate or citizenship certificate and a certified cheque or money order for the required amount, and send it to one of the following addresses:

---

### NEW BRUNSWICK

**Regional Passport Office**  
**Suite 601, Kings Place**  
**440 King Street**  
**Fredericton, New Brunswick**  
**E3B 5H8**

### NOVA SCOTIA

**Regional Passport Office**  
**Barrington Tower**  
**Suite 1210**  
**Scotia Square**  
**Halifax, Nova Scotia**  
**B3J 1P3**

### NEWFOUNDLAND

**Regional Passport Office**  
**General Post Office Building**  
**4th Floor**  
**354 Water Street**  
**St. John's, Newfoundland**  
**A1C 1C4**

## OTTAWA

**Passport Office**  
**External Affairs Canada**  
**Lester B. Pearson Building**  
**125 Sussex Drive**  
**Ottawa, Canada**  
**K1A 0G3**

---

Because of the number of applications received, it is wise to apply for your passport well in advance of your proposed trip. Your passport is valid for five years beginning the day it is issued. It is not renewable. You must re-apply when the five-year period expires.

## Customs

Before leaving Canada, you might like to pick up the Customs and Excise booklet, *I Declare*. It will brief you on what you should know, when returning from abroad, to make your Canadian Customs clearance formalities as worry-free and easy as possible.

All customs offices, most travel agents, and international airports, can provide you with a copy of the booklet or you may write to:

---

**Regional Customs Office**  
**Revenue Canada**  
**5670 Spring Garden Road**  
**Halifax, Nova Scotia**  
**B3J 2Z8**

---

or consult your telephone directory for the office nearest you.

## **Immunization**

Depending on the country that you intend to visit, you may be required to be immunized against certain diseases. Health and Welfare Canada has a brochure, *A Guide For International Travellers*, that lists required and recommended immunization for different countries.

If you would like to receive the guide, write to:

---

**Medical Services Branch  
Health and Welfare Canada  
Jeanne-Mance Building  
Tunney's Pasture  
Ottawa, Canada  
K1A 0L3**

---

As immunization requirements change periodically, it would be advisable to contact your nearest health unit for possible changes.

## **Warm Climates**

If you are travelling to a warm climate, you may be interested in obtaining a pamphlet, *Staying Healthy in Warm Climates*, that includes information on immunization protection, heat disorders and insect-borne diseases and contains a list of fluids and foods that should be avoided.

This pamphlet can be obtained by writing to:

---

**Medical Services Branch  
Health and Welfare Canada  
Jeanne-Mance Building  
Tunney's Pasture  
Ottawa, Canada  
K1A 0L3**

---

## **Assistance to Canadians Abroad**

If you're in a foreign country and you find yourself in need of assistance due to illness, an accident, theft of your money or some similar misfortune, don't hesitate to request help from the nearest Canadian diplomatic or consular office. Representatives of the Canadian government will give advice appropriate to the circumstances and they will do their best to provide you with the required services. If need be, they will also help you contact a doctor, hospital, lawyer or family back home. A word of warning: our government representatives cannot intervene in any country's legal proceedings in which you may be involved.

If you plan to reside in or visit a country for an extended period, it is recommended that you register at the Canadian diplomatic or consular post by visiting or writing the post after your arrival. This is particularly important if you are planning to visit or stay in a region in which political conditions are tense or unsettled.

If you should find yourself in an area where there are civil disturbances or natural disasters, contact the nearest Canadian post immediately.

There are more than 100 Canadian embassies and consulates around the world to serve you.

## **Airports**

If you're going abroad, you'll probably pass through one of Canada's major international airports. The federal government operates these airports and does everything possible to ensure that your trip gets off to a good start.

The government provides numerous safety-oriented services: air traffic control, airport security and maintenance, aircraft inspections, training standards for pilots, telecommunications and meteorological services. As well, competent personnel are available to aid travellers with small children and passengers who require special assistance.

In co-operation with other nations, the Canadian government ensures that international aviation standards are upheld; regardless of one's destination, passenger safety and well-being are of prime importance.

For more information on airports, write to one of the following addresses:

---

## **NEW BRUNSWICK**

**Public Affairs  
Transport Canada

## **Serving Overseas**

Service in a developing country may prove to be one of the most satisfying experiences of a lifetime.

Each year about 300 Canadians with special skills are recruited by the Canadian International Development Agency (CIDA) to carry out Canada's programs of

co-operation with countries in Asia, Africa, the Caribbean and Latin America, where people are trying to build a better life. CIDA also helps the United Nations, its institutions and other international agencies find qualified Canadians for their technical assistance missions.

Candidates should be Canadian citizens with sound professional training and at least five years of experience in a particular field. Specialists are needed in such areas as agriculture, agronomy, forestry, economics, financial management, health and many other fields.

If you would like to receive more specific information on this program, please write to:

---

**Human Resources Directorate  
Canadian International  
Development Agency  
11th Floor, Place du Centre  
200 Promenade du Portage  
Hull, Quebec  
K1A 0G4**

---

A number of non-governmental organizations that receive some funding from the federal government also seek volunteers for various overseas projects. For more information, write to:

---

**CUSO  
Atlantic Regional Co-Ordinator  
1546 Barrington Street  
4th Floor  
Halifax, Nova Scotia  
B3J 1Z3**

---

**Canadian Executive Service  
Overseas (CESO)  
Atlantic Regional Director  
YMCA Building  
752 Prince Street  
Truro, Nova Scotia  
B2N 1G9**

---

The World University Service of Canada (WUSC) often has openings for both volunteer workers and contract personnel in fields such as teaching, health, water resources and a variety of technical skills. WUSC has nearly 400 volunteers and contract workers in some 15 African countries.

For more information, write to:

---

**World University Service  
of Canada  
P.O. Box 3000, Station C  
Ottawa, Canada  
K1Y 4M8**

---

## Careers in the Government of Canada

To provide all of the services mentioned in this guide, the federal government must be able to rely on qualified personnel.

## **Public Service Commission**

You don't have to live in the National Capital Region to work in the federal public service; Canada's public servants are located not only in every major city across the country, but in most of the smaller communities as well. Financial administrators, truck drivers, nurses, lawyers, data processing experts, gardeners, auditors, clerical workers, engineers, lab technicians—in fact, practitioners of virtually every skill or profession in Canada—put their talents to use in carrying out the programs and policies of the federal government.

If you would like to pursue a career in the public service, job information and application forms are available at your nearest Canada Employment Centre and at all offices of the Public Service Commission of Canada. Application forms may also be obtained at most post offices. Applications, retained in an inventory, are considered when a departmental vacancy becomes available. When appropriate, the Public Service Commission of Canada advertises jobs in the careers or classified section of daily newspapers or professional journals. The commission has prepared audio cassettes and braille summary texts, which make public service career information accessible to visually impaired persons. These materials are available at Canada

Employment Centres, major libraries and educational institutions across Canada, and at all offices of the Public Service Commission.

Information on careers in the public service is available on all university and community college campuses. If you are about to receive a degree or diploma, consult your placement officer and ask to see the Public Service Commission's brochures and pamphlets. Recruitment of graduating university students is conducted through an annual competition that takes place in the fall. If you have any questions or need additional information, contact your nearest Public Service Commission office or write to one of the following addresses:

---

### **NEW BRUNSWICK**

**Public Service Commission  
of Canada  
860 Main Street, Suite 603  
Moncton, New Brunswick  
E1C 8M1**

### **NOVA SCOTIA**

**Public Service Commission  
of Canada  
Royal Bank Building, 4th Floor  
5161 George Street  
Halifax, Nova Scotia  
B3J 1M8**

## **PRINCE EDWARD ISLAND**

**Public Service Commission  
of Canada  
Confederation Court Mall  
3rd Floor  
134 Kent Street  
Charlottetown  
Prince Edward Island  
C1A 8R8**

## **NEWFOUNDLAND**

**Public Service Commission  
of Canada  
354 Water Street, 2nd Floor  
St. John's, Newfoundland  
A1A 1C4**

---

### **Foreign Service**

As a respected member of the world community, Canada engages in a broad range of international activities. These include diplomatic relations, trade activities, immigration services and the administration of cultural and information programs about Canada.

One government department offers careers abroad: External Affairs. Foreign Service officers are recruited through an annual competition that is co-ordinated by the Public Service Commission. This competition, which involves a written examination, takes place in the fall at centres located across Canada.

Candidates must be Canadian citizens, have a university education and an understanding of the Canadian environment and out-

look, be able to project a favourable image of Canada, be willing to accept rotational assignments anywhere in the world and know or be willing to learn Canada's other official language.

If you would like to be considered for a career in Canada's Foreign Service, visit your university placement office or nearest office of the Public Service Commission of Canada, in early September, to obtain the special booklet and application form. The competition closes in mid-October.

For general information on the Foreign Service, write to:

---

**Foreign Service Officer  
Recruitment  
Public Service Commission  
of Canada  
O.S.S.D., 18th floor  
300 Laurier Avenue West  
Ottawa, Canada  
K1A 0M7**

---

### **Summer Assignments for Students**

The Public Service Commission's Career-Oriented Summer Employment Program (COSEP) arranges challenging summer assignments for students every year. If you are a full-time student at a university, community college or technical institute and are continuing your studies in the fall, you are eligible for this program.

These summer jobs give you an opportunity to take a look at career possibilities that may be open to you after graduation and, equally important, potential employers in the federal government will have an opportunity to watch you work. The summer jobs are related to a variety of disciplines, particularly in the pure and applied sciences. COSEP assignments are available in many of the more than 70 federal departments and agencies.

If you would like more information on COSEP, contact the nearest office of the Public Service Commission of Canada.

## **Canadian Armed Forces**

The Canadian Armed Forces is a modern, highly mobile, unified force that provides many opportunities for young Canadians to learn specialized skills and apply them wherever they are needed in Canada or abroad, to achieve higher levels of skill in a specialized trade, to have access to advancement and increases in pay, and to accept additional responsibilities.

To be eligible, you must be over 17 years of age, have successfully completed a sound education, be a Canadian citizen, meet the Armed Forces medical standards and pass the Canadian Forces selection tests.

The Canadian Forces offer the following entry plans:

- Trades training—military and trades training in more than 60 trades
- Marine Engineering Technician Training Plan (METTP)—subsidized education at St. Lawrence College in Cornwall, Ontario
- Officer Candidate Training Plan (OCTP)—officer and military training for an operational career specialty
- Regular Officer Training Plan (ROTP)—subsidized military and university education
- Medical Officer Training Plan (MOTP)—up to 45 months subsidy at a medical school, including internship
- Dental Officer Training Plan (DOTP)—up to 45 months subsidy at a dental college
- Direct Entry Officer (DEO)—an entry plan for a graduate of a university, institute of technology, community college or a registered nurse.

For more information on opportunities in the Canadian Armed Forces, visit your nearest Canadian Forces Recruiting Centre, listed in the yellow pages under "Recruiting", or write to:

---

**The Director of  
Recruiting and Selection  
National Defence  
Headquarters  
Ottawa, Canada  
K1A 0K2**

---

## **Transport Canada**

Through its air and marine administrations, Transport Canada offers a wide variety of career opportunities for both men and women.

High school graduates can become radio operators, marine traffic regulators, air traffic controllers or ship's crew members. Training in most of these fields is given at the Transport Canada Training Institute in Cornwall, Ontario.

At its college in Sydney, Nova Scotia, the Canadian Coast Guard also provides training for high school graduates. Upon completing the three-year course, cadets graduate as navigation officers or marine engineers. They serve on Coast Guard ships, carrying out such duties as search and rescue, ice-breaking, maintaining aids to navigation or cleaning up oil spills.

Technical school graduates may pursue challenging careers as electronic or engineering technicians, while university engineering graduates will find many opportunities to use their skills.

For more information, contact one of the following addresses:

---

## **NEW BRUNSWICK**

**Public Affairs  
Transport Canada  
1081 Main Street  
P.O. Box 42  
Moncton, New Brunswick  
E1C 8K6**

## **NOVA SCOTIA**

---

High school graduates who wish to apply for training as Coast Guard navigation or engineering officers should contact:

---

**Canadian Coast Guard College  
P.O. Box 4500  
Sydney, Nova Scotia  
B1P 6L1**

---

## **Royal Canadian Mounted Police**

Narcotics control, the battle against organized crime, investigation of commercial crime—if these activities appeal to you, you may be interested in an exciting and rewarding career in law enforcement with the Royal Canadian Mounted Police.

To become a Regular Member Constable in the Royal Canadian Mounted Police you must meet the following requirements:

- be a Canadian citizen
- be 19 years of age (application may be made at age 18, but you will not be eligible for engagement until your 19th birthday)
- be physically and medically fit
- as a minimum, have successfully completed a secondary school education program
- hold a valid Canadian licence to operate a motor vehicle and have more than a minimal degree of driving proficiency
- be of good character
- be proficient in either official language.

For additional information or an application form, contact your nearest RCMP detachment or write to one of the addresses below.
