

# THE NIGHT BEFORE UNBOXING DAY

'Twas the night before Unboxing Day, when all through the house,  
Not a device was updating, not even a Bluetooth mouse.

New gifts were opened, unwrapped with care,

Waiting to be protected from cyber security scares.

**Unboxing Day** is a time to unwind and relax,  
And make sure threats don't slip through the cracks.

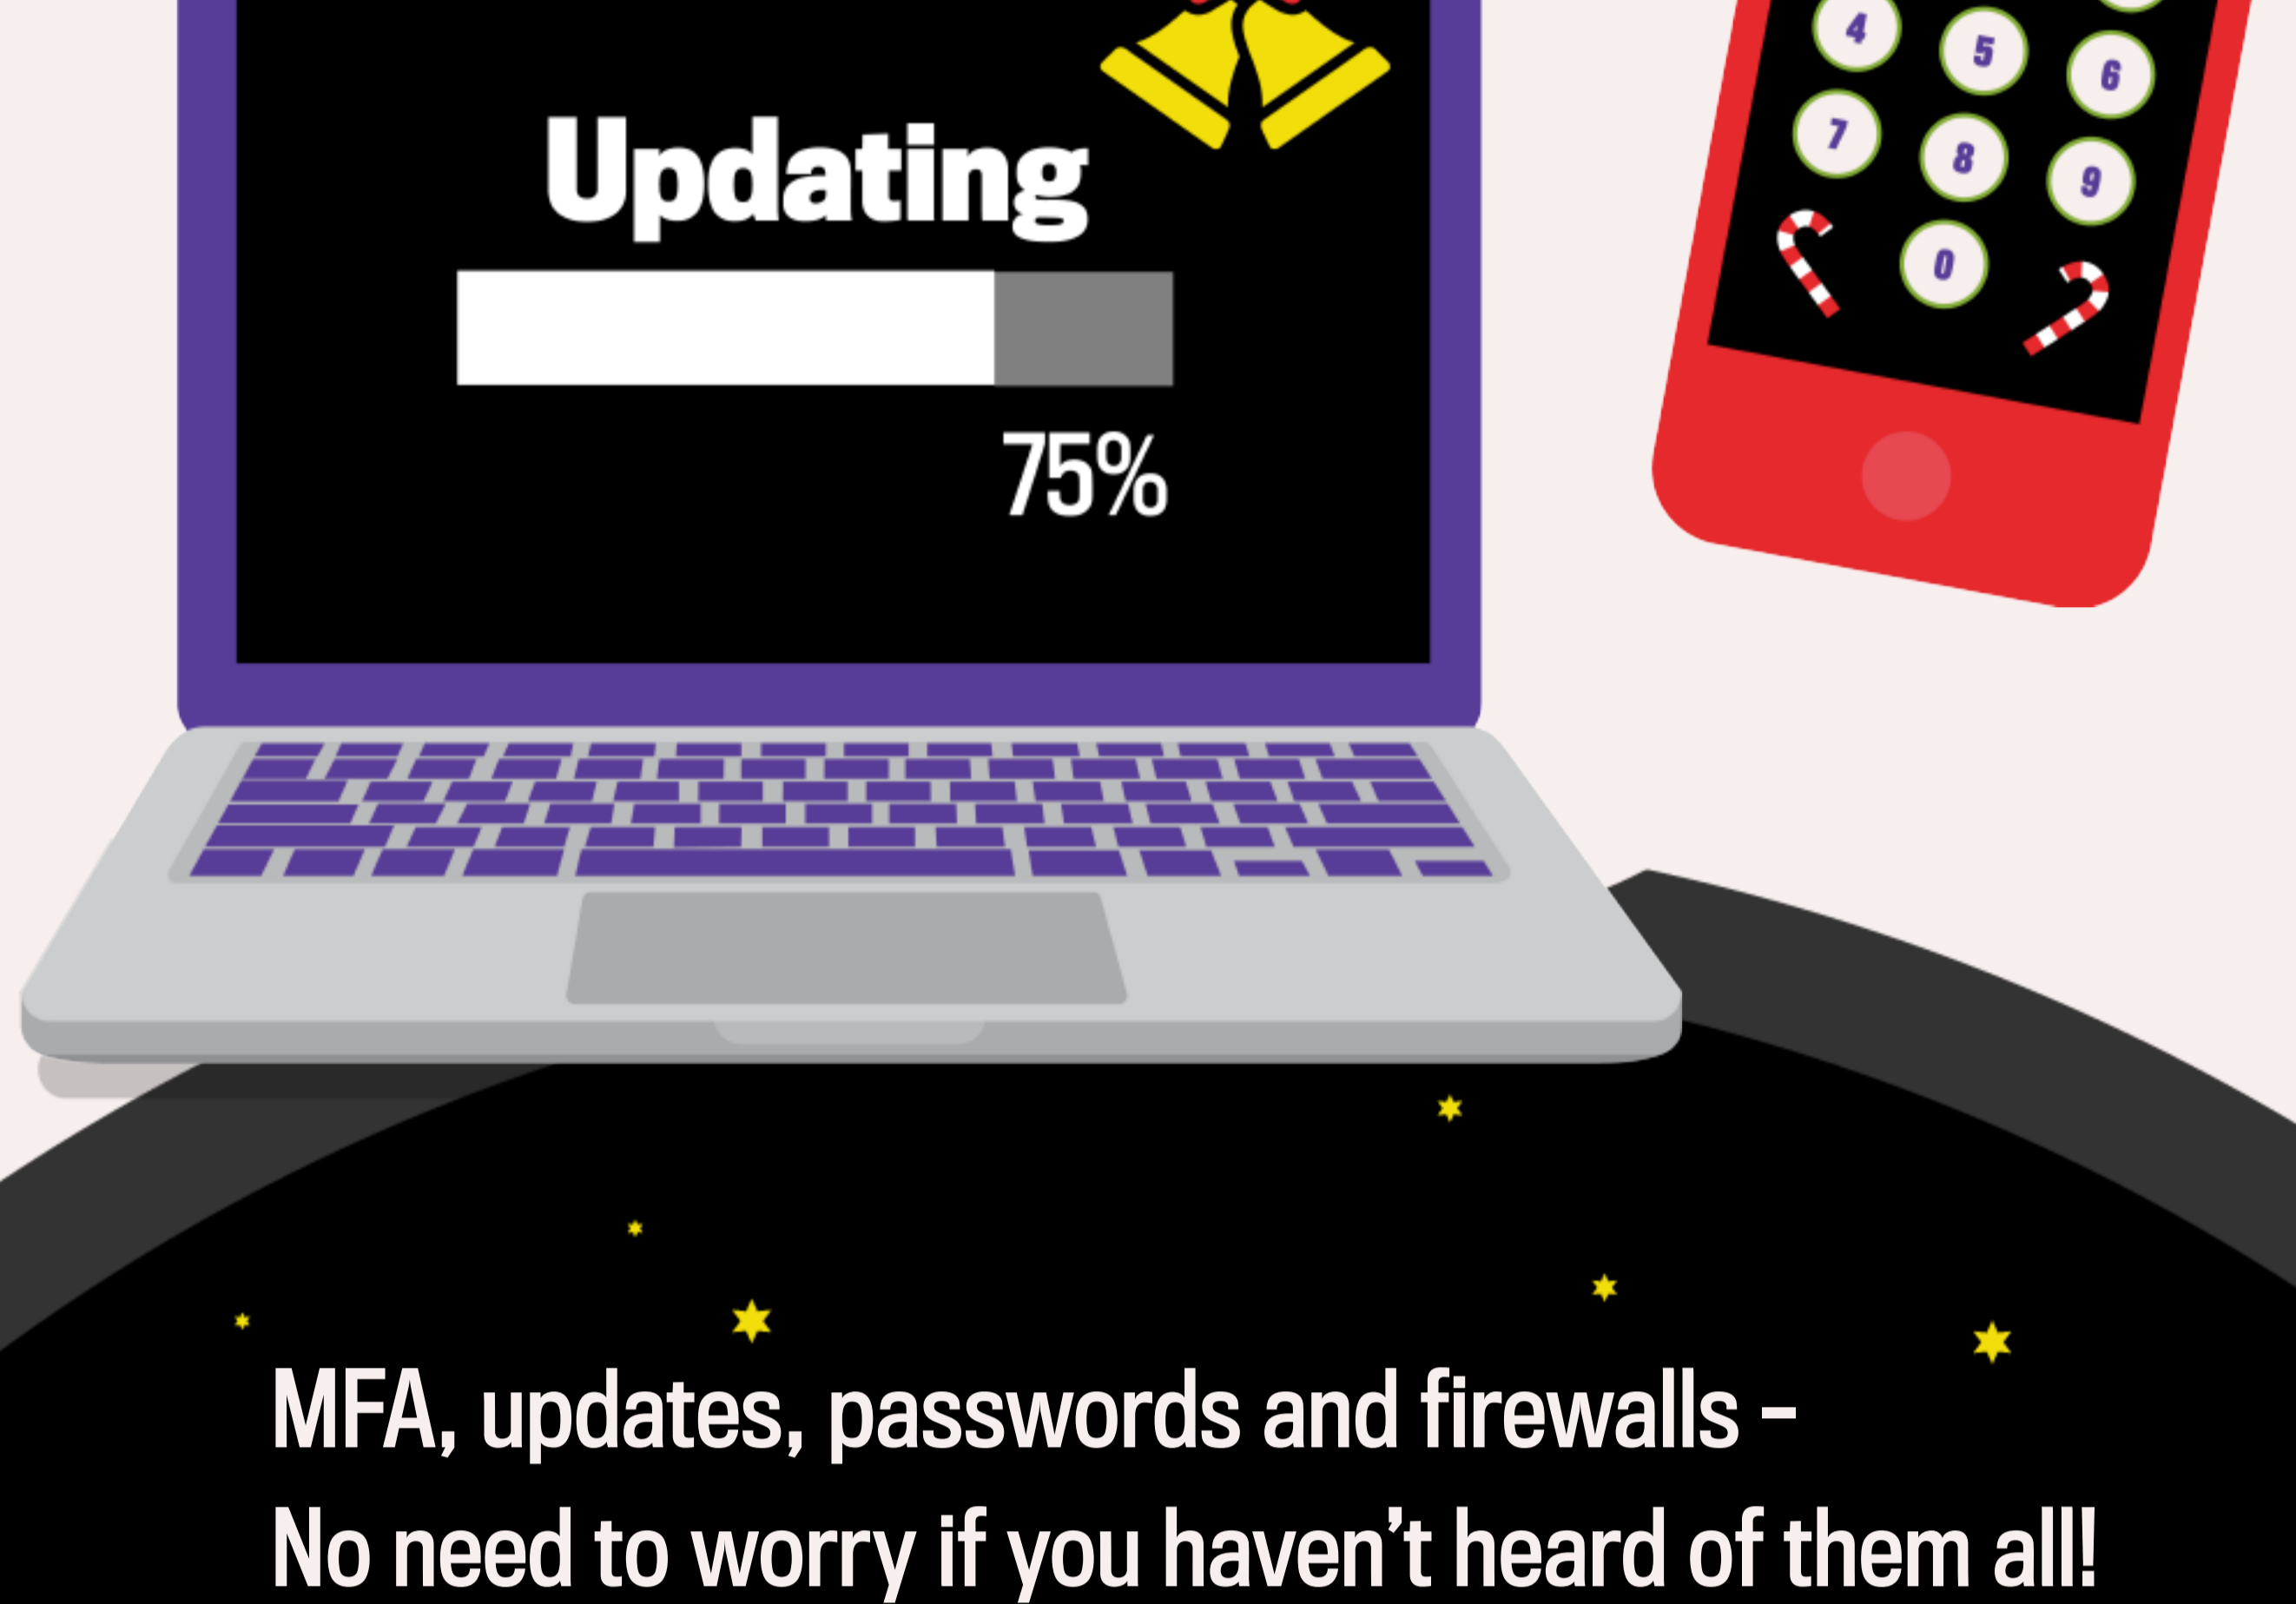

For a holiday season filled with electronic gifts given,  
Protecting your devices is part of cyber safe livin'!

We know things get busy, it's hard to remember  
To secure new devices. **So do it now, this December!**

Use this Unboxing Day to secure that laptop or phone,

Or smart device or tablet or even a drone!

MFA, updates, passwords and firewalls –

No need to worry if you haven't heard of them all!

Each of these things can keep your tech secure,

And **Get Cyber Safe** is here to help you make sure.

MFA stands for **multi-factor authentication**.  
Enable it wherever possible this winter vacation.

Add a layer of security to your accounts and devices.

When you use MFA, you can stay out of crisis!

**Updates** give your devices the latest software.

Set them to automatic to stay well prepared.

**Firewalls** and **VPNs** are tools you can use

To help give cyber criminals the cold winter blues.

Strong **passwords** are good, but **passphrases** are best.

They use multiple words and make scammers feel stressed.

Use a **password manager** to help you keep track.

Share these tips with friends and family – it's the gift that gives back!

Celebrate Unboxing Day, get the whole family involved,

Show cyber criminals that you're stronger than them all!

If you received a new device this holiday season,

Make sure to **Get Cyber Safe** (you have a very good reason!)
