22. Average Monthly Payments
23. OAS - Monthly Average Number of Beneficiaries by Rate
24. GIS - Monthly Average Number of Beneficiaries by Payment based on Marital Status
25. ALW - Monthly Average Number of Beneficiaries by Payment based on Marital Status

Fiscal Year

26. Monthly Average Number of Beneficiaries
27. Net Payments
28. Average Payments
29. OAS - Monthly Average Number of Beneficiaries by Rate
30. GIS - Monthly Average Number of Beneficiaries by Payment based on Marital Status
31. ALW - Monthly Average of Number Beneficiaries by Payment based on Marital Status
32. Number of Beneficiaries by Gender and by Age

CALCULATIONS

- A. CPP: Calculation of Retirement Pensions
- B. CPP: Contribution Rates
- C. CPP: Calculation of Maximum Amount of New Benefits
- D. OAS: Calculation of New Benefits
- E. GIS & ALW: Calculation of Income Reduction and Cut-Off Point
 - E.1 GIS Single
 - E.2 GIS Married - Pensioner
 - E.3 GIS Married - Non-Pensioner
 - E.4 GIS Married - an Allowance Recipient
 - E.5 ALW - Regular
 - E.6 ALWS - Survivor

INTRODUCTION

This document provides annual statistics on Canada Pension Plan (CPP) and Old Age Security (OAS) benefits payments and associated number of beneficiaries.

The statistical tables presented in this bulletin are based on CPP and OAS administrative data. Corresponding monthly statistics are available in the publication entitled “Monthly Statistics Bulletin – Canada Pension Plan, Old Age Security”.

The Annual CPP and OAS Stats Book and the Monthly Statistical Bulletin are both available on the Government of Canada web site at the following link: [Government of Canada Publications](#)

Selected tables from this document are available on the Open Government Platform of Canada at:
[Statistics related to the Old Age Security Program and the Canada Pension Plan - Canada.ca](#)

For data on the Québec Pension Plan (QPP), please visit the Retraite Québec website:
[Retraite Québec - Régime de rentes \(gouv.qc.ca\)](#)

INTRODUCTION

Ce document présente des statistiques annuelles sur les paiements et le nombre de bénéficiaires des prestations du Régime de pensions du Canada (RPC) et de la Sécurité de la vieillesse (SV).

Les tableaux statistiques présentés dans ce livre proviennent des données administratives du RPC et de la SV. Les statistiques mensuelles correspondantes sont disponibles dans la publication intitulée " Le bulletin statistique mensuel - Régime de pensions du Canada, Sécurité de la vieillesse ".

Le livre sur les statistiques annuelles et le Bulletin statistique mensuel et sont tous deux disponibles sur le site web du Gouvernement du Canada suivant :
[Publication du gouvernement du Canada](#)

Certains tableaux de ce document sont disponibles sur le site des données ouvertes :
[Statistiques concernant le programme de la Sécurité de la vieillesse et le Régime de pensions du Canada - Canada.ca](#)

Pour les données relative au Régime de rentes du Québec (RRQ), veuillez consulter le site de Retraite Québec:
[Retraite Québec - Régime de rentes \(gouv.qc.ca\)](#)

NOTES

- (1) In order to ensure client confidentiality, an 'X' has been placed where the number of beneficiaries receiving a particular benefit is equal to or below 9. In order to avoid residual disclosure, an 'X' has also been placed where the next lowest number of beneficiaries was found, which may be below, equal to, or above 9. The same approach was used for the associated payment amounts, including the averages if applicable.
- (2) Information on calculating CPP and OAS benefits is available in Tabs A to E of this document.
- (3) The CPP Post-Retirement benefit (PRB) was introduced in 2013. One beneficiary may have up to 11 PRBs, as each year of contributions made when receiving the Retirement pension generates a new PRB. Tables in this document do not present the number of PRB beneficiaries, but the total number of benefits they receive.

NOTES

- (1) Afin de protéger les renseignements personnels des bénéficiaires, un " X " a été placé dans le cas où le nombre de bénéficiaires recevant une prestation est égal ou inférieur à 9. Afin d'éviter la divulgation par recoupements, un " X " a aussi été mis au nombre suivant de bénéficiaires le moins élevé, lequel peut être inférieur, égal ou supérieur à 9. La même approche a été utilisée pour les montants de paiements qui y sont associés ou les moyennes, si applicables.
- (2) Des renseignements sur le calcul des prestations de la SV et du RPC sont disponibles dans les onglets A à E de ce document.
- (3) La prestation après-retraite (PAR) du RPC a été instaurée en 2013. Un bénéficiaire peut avoir jusqu'à 11 PAR, car chaque année de cotisations faite en touchant une Pension de retraite génère une nouvelle PAR. Les tableaux du présent document ne présentent pas le nombre de bénéficiaires de la PAR, mais le nombre total de prestations qui leur sont versées.

(1) Numbers from 1990-2010 were revised.

(2) Data since 1980 can be found on this page:

[The CPP & OAS stats book](#)

(3) This table reflects the number of benefits.

A beneficiary can receive more than one Post-Retirement Benefit.

(4) As of 1999, the average net payment for the death benefit was calculated as net payments divided by the number of benefits in pay.

(1) Les données de 1990-2010 ont été révisées.

(2) Les données depuis 1980 peuvent être trouvées sur cette page:

[Le livre sur les statistiques du RPC et de la SV](#)

(3) Ce tableau reflète le nombre de prestations.

Un prestataire peut recevoir plus d'une Prestation après-retraite.

(4) Depuis 1999, le versement moyen net pour la prestation de décès est calculé en utilisant les versements nets divisés par le nombre de prestations versées.

(1) Data since 1980 can be found on this page:

[The CPP & OAS stats book](#)

(2) Numbers from 2010-2011 were revised.

(3) This table reflects the number of benefits.

A beneficiary can receive more than one Post-Retirement Benefit.

(4) As of 1999, the average net payment for the death benefit was calculated as net payments divided by the number of benefits in pay.

(1) Les données depuis 1980 peuvent être trouvées sur cette page:

[Le livre sur les statistiques du RPC et de la SV](#)

(2) Les données de 2010-2011 ont été révisées.

(3) Ce tableau reflète le nombre de prestations.

Un prestataire peut recevoir plus d'une Prestation après-retraite.

(4) Depuis 1999, le versement moyen net pour la prestation de décès est calculé en utilisant les versements nets divisés par le nombre de prestations versées.

(1) Since 2011, the Canada Pension Plan Contributors Report uses a new methodology that better reflects the impact of contribution refunds on the number of contributors and amounts contributed. All historical tables containing data from 1966 to 2010 were revised. Therefore, results for those years do not align with the data published in reports prior to 2011.

- (2) Numbers from 2017 to 2021 were revised.
- (3) Due to rounding, figures may not add up to total shown.
- (4) Data since 1980 can be found on this page:

[The CPP & OAS stats book](#)

(1) À partir de 2011, le rapport sur les cotisants au Régime de pensions du Canada utilise une nouvelle méthodologie qui reflète mieux l'incidence des remboursements de cotisations sur le nombre de cotisants et les montants en dollars versés. Tous les tableaux historiques contenant des données de 1966 à 2010 ont été révisés. Par conséquent, les résultats pour ces années diffèrent des données publiées dans les rapports publiés avant 2011.

- (2) Les données de 2017 à 2021 ont été révisées.
- (3) Les chiffres étant arrondis, leur somme peut différer du total indiqué.
- (4) Les données depuis 1980 peuvent être trouvées sur cette page:

(1) The maximum amounts of new benefits contained in this table include the CPP enhancement that began in 2019. From 2019 onwards, these amounts relate only to new benefits for January.

(2) Data since 1980 can be found on this page:

[The CPP & OAS stats book](#)

(3) This amount is paid in addition to the Retirement pension until the age of 65.

(1) Les montants maximaux des nouvelles prestations incluent la bonification du RPC débutée en 2019. À partir de 2019, et sauf mention explicite, les montants maximaux concernent uniquement les nouvelles prestations versées en janvier.

(2) Les données depuis 1980 peuvent être trouvées sur cette page:

[Le livre sur les statistiques du RPC et de la SV](#)

(3) Ce montant est versé en plus de la Pension de retraite jusqu'à l'âge de 65 ans.

(1) Data since 1980 can be found on this page:

[The CPP & OAS stats book](#)

(2) Following the CPP enhancement in 2019, the base amount for the pension is no longer the main reference variable for calculating related benefits, and therefore, it is no longer provided.

(1) Les données depuis 1980 peuvent être trouvées sur cette page:

[Le livre sur les statistiques du RPC et de la SV](#)

(2) À la suite à la bonification du RPC en 2019, le montant de base des pensions n'est plus la principale variable de référence pour le calcul des prestations connexes, c'est pourquoi le montant n'est plus fourni.

(1) Data since 1980 can be found on this page:

[The CPP & OAS stats book](#)

(2) In response to the COVID-19 pandemic there was a temporary change in the process for renewing GIS and Allowance benefits that lowered the monthly number of GIS and Allowances recipients reported for the months of July to December 2020. In this table, the number of beneficiaries for GIS and the Allowances was adjusted to reflect the actual number of beneficiaries.

(3) Due to rounding, figures may not add up to total shown.

(1) Les données depuis 1980 peuvent être trouvées sur cette page:

[Le livre sur les statistiques du RPC et de la SV](#)

(2) En réponse à la pandémie de la COVID-19, un changement temporaire au processus de renouvellement des prestations du SRG et des Allocations a été mis en place, affectant le nombre de bénéficiaires rapportés de juillet à décembre 2020. Dans ce tableau, le nombre de bénéficiaires pour le SRG et les Allocations a été ajusté pour les mois de juillet à décembre 2020.

(3) Les chiffres étant arrondis, leur somme peut différer du total indiqué.

(2) In response to the COVID-19 pandemic there was a temporary change in the process for renewing GIS and Allowance benefits that lowered the monthly number of GIS and Allowances recipients reported for the months of July to December 2020. In this table, the number of beneficiaries for GIS and the Allowances was adjusted to reflect the actual number of beneficiaries.

(3) Due to rounding, figures may not add up to total shown.

A. CANADA PENSION PLAN – CALCULATION OF RETIREMENT PENSIONS

Description	Variable name	Formula
Year's Maximum Pensionable Earnings	YMPE _t	= YMPE _{t-1(not rounded)} x $\frac{(\text{wage measure July}_{t-2} \text{ to June}_{t-1})/12}{(\text{wage measure July}_{t-3} \text{ to June}_{t-2})/12}$ Where: <ul style="list-style-type: none"> t = one year
Year's Additional Maximum Pensionable Earnings	YAMPE _t	= $\begin{cases} 1.07 \times \text{YMPE}_t, & \text{if } t = 2024 \\ 1.14 \times \text{YMPE}_t, & \text{if } t \geq 2025 \end{cases}$ (If the amount calculated is not a multiple of \$100, the YAMPE _t is the amount that is the next multiple of \$100 below that amount)
Average YMPE	AYMPE _t	= (YMPE _t + YMPE _{t-1} + YMPE _{t-2} + YMPE _{t-3} + YMPE _{t-4})/5 (rounded to the nearest dollar)
Year's Basic Exemption	YBE _t	= \$3,500 (constant since 1996)
Maximum Contributory Earnings (Base and 1 st Additional contribution)	MCE _t	= YMPE _t – YBE _t
Additional Maximum Contributory Earnings (2 nd Additional contribution)	MCE2 _t	= YAMPE _t – YMPE _t
Pensionable Earnings (Base and 1 st Additional contribution)	PE _t	= $\begin{cases} \text{MIN}(\text{Earnings}_t, \text{YMPE}_t), & \text{if } \text{Earnings}_t > \text{YBE}_t \\ 0, & \text{if } \text{Earnings}_t \leq \text{YBE}_t \end{cases}$
Additional Pensionable Earnings (2 nd Additional contribution)	PE2 _t	= $\begin{cases} \text{MIN}(\text{Earnings} - \text{YMPE}_t, \text{YAMPE}_t), & \text{if } \text{Earnings}_t > \text{YMPE}_t \\ 0, & \text{if } \text{Earnings}_t \leq \text{YMPE}_t \end{cases}$
Base Contributions	Cb _t	= MCE _t x CRb
<ul style="list-style-type: none"> Base contribution rate 	CRb	= 4.95% (since 2003)
1st Additional Contributions	C1 _t	= MCE _t x CR1 x β _t
<ul style="list-style-type: none"> 1st additional contribution rate 	CR1	= 1.0%
<ul style="list-style-type: none"> 1st additional phase-in factor in years 2019-2023, respectively 	β _t	= 15% in 2019; 30% in 2020; 50% in 2021; 75% in 2022 and 100% in 2023 (see next tabC)
2 nd Additional Contributions	C2 _t	= MCE2 _t x CR2

• 2 nd additional contribution rate	CR2	= 2.0%
Number of months included in the contributory period for a year	NMC_t	
First Year of the Contributory Period for the Base	FYCP	= 1/1/1966 or age 18 if later
First Year of the Contributory Period for the 1 st Additional Portion of the pension	FYCP1	= 1/1/2019 or age 18 if later
First Year of the Contributory Period for the 2 nd Additional Portion of the pension	FYCP2	= 1/1/2024 or age 18 if later
Total Number of Months of valid contributions in the base contributory period (minimum of 120 *)	TNMC	
Ratio reflecting total annual adjusted pensionable earnings, used to calculate the base portion of the pension	F*	$\frac{\sum_{t=FYCP}^{Year\ of\ retirement} NMC_t \times \frac{PE_t^{**}}{YMPE_t}}{TNMC - TNMC \times 0.17 \text{ (rounded up)}}^*$
Ratio reflecting total annual adjusted pensionable earnings, used to calculate the 1 st additional portion of the pension	F1	$= \frac{\sum_{t=FYCP1}^{Year\ of\ retirement} NMC_t \times \frac{PE_t^{***}}{YMPE_t} \times (\beta_t)}{480}$
Ratio reflecting total annual adjusted pensionable earnings, used to calculate the 2 nd additional portion of the pension	F2	$= \frac{\sum_{t=FYCP2}^{Year\ of\ retirement} NMC_t \times \frac{PE_{2t}}{YMPE_t}}{480}$
Monthly Retirement Pension (at 65*)	MRP*	= [F x 1/12 x 0.25 x AYMPE _{Year of ret.}] + [F1 x 1/12 x 0.0833 x AYMPE _{Year of ret.}] + [F2 x 1/12 x 0.3333 x (YAMPE-AYMPE) _{Year of ret.}]
Consumer Price Index	CPI	
Pension Index	PI_t	= (CPI _i)/12 Where: • i = November _{t-2} to October _{t-1} (rounded to 1 decimal place)
Variation in Pension Index	VPI_t	= PI_t / PI_{t-1} (rounded to 3 decimal places)
Escalation of benefits already in pay and escalation of flat rates		= Benefits _{t-1} (or flat rate _{t-1}) x VPI_t (rounded to 2 decimal places)

Source: *Canada Pension Plan Act and Regulations.*

Notes:

(*): For simplification, the calculations on this page concern the retirement pension at age 65 and assume that: TNMC and F are not affected by any drop-out other than the general drop-out; and that F1 and F2 are not affected by any drop-ins.

(**): Highest 83% of the up to 564 monthly pensionable earnings of the individual. That is, excluding a number of months with lowest earnings corresponding to $17\% \times \text{TNMC (rounded up)}$ - [Act. Sect. 48].

(***): 480 highest monthly first additional pensionable earnings in the contributory period when there are more than 480 months of pensionable earnings. Months beyond the 480 with the highest earnings are excluded.

C. CANADA PENSION PLAN - CALCULATION OF MAXIMUM AMOUNT OF NEW BENEFITS

Benefit & portion	Variable	Calculation
Retirement pension (at 65)	RTR	= RTRb + RTR1 + RTR2
<ul style="list-style-type: none"> Base portion of Retirement pension (at 65) 	RTRb	= $(AYMPE_t \times 0.25) / 12$ Where: <ul style="list-style-type: none"> t is the year of retirement benefit onset
<ul style="list-style-type: none"> 1st additional portion of Retirement pension (at 65) 	RTR1	$= \frac{\sum_{m = FMCP \text{ of the 1st add.}}^{\text{Month of benefit onset} - 1} (AYMPE_m \times \beta_m) / 12}{480} \times 0.0833$ Where: <ul style="list-style-type: none"> m is month FMCP is the first month of the contributory period β_m is the 1st additional phase-in factor in month m
<ul style="list-style-type: none"> 2nd additional portion of Retirement pension (at 65) 	RTR2	$= \frac{\sum_{m = FMCP \text{ of the 2nd add.}}^{\text{Month of benefit onset} - 1} (YAMPE_m / YMPE_m - 1) \times AYMPE_m / 12}{480} \times 0.3333$ Where: <ul style="list-style-type: none"> m is month FMCP is the first month of the contributory period
Post-retirement benefit (at age 65)	PRB	$= 1/40 \times (RTRb_t) + 1/(480) \times AYMPE_t \times (\beta_{t-1} \times 0.0833) + 1/(480) \times AYMPE_t \times (YAMPE_t / YMPE_{t-1} - 1) \times 0.3333,$ Where: <ul style="list-style-type: none"> t is the year of post-retirement benefit onset
Disability pension	DSB	$= (RTR \times 0.75) + FRD$ Which is equal to: $(DSBb + DSB1 + DSB2) + FRD$
<ul style="list-style-type: none"> Base portion of Disability pension 	DSBb	= RTRb x 0.75
<ul style="list-style-type: none"> 1st additional portion of Disability pension 	DSB1	= RTR1 x 0.75

<ul style="list-style-type: none"> 2nd additional portion of Disability pension 	DSB2	= RTR2 x 0.75
<ul style="list-style-type: none"> Disability flat rate portion 	FRD	$= FRD_{(t-1)} \times VPI_t$ Where: <ul style="list-style-type: none"> t-1 is the previous year of benefit onset VPI_t is the variation in Pension Index (see Table B)
Post-retirement disability benefit	PRD	= FRD
Survivor's pension – under 65	SVR	$= (RTR \times 0.375) + FRS$ Which is equal to: $= (SVR_b + SVR1 + SVR2) + FRS$
<ul style="list-style-type: none"> Base portion of the Survivor's pension – under 65 	SVR _b	= RTR _b x 0.375
<ul style="list-style-type: none"> 1st additional portion of the Survivor's pension – under 65 	SVR1	= RTR1 x 0.375
<ul style="list-style-type: none"> 2nd additional portion of the Survivor's pension – under 65 	SVR2	= RTR2 x 0.375
<ul style="list-style-type: none"> Flat rate portion of the Survivor's pension – under 65 	FRS	$= FRS_{(t-1)} \times VPI_t$ Where: <ul style="list-style-type: none"> t is the year of benefit onset VPI_t is the variation in Pension Index (see Table B)
Survivor's pension – 65 and over	SVR65	$= RTR \times 0.60$ Which is equal to: $= SVR65_b + SVR65_1 + SVR65_2$
<ul style="list-style-type: none"> Base portion of the Survivor's pension – 65 and over 	SVR65 _b	= RTR _b x 0.60

<ul style="list-style-type: none"> 1st additional portion of the Survivor's pension – 65 and over 	SVR65_1	= RTR1 x 0.60
<ul style="list-style-type: none"> 2nd additional portion of the Survivor's pension – 65 and over 	SVR65_2	= RTR2 x 0.60
Combined benefit – Disability & Survivor	CDS	= CDSb + CDS1 + CDS2
<ul style="list-style-type: none"> Base portion of the Combined Disability & Survivor benefit 	CDSb	= RTRb x 0.75
<ul style="list-style-type: none"> 1st additional portion of the Combined Disability & Survivor benefit 	CDS1	= (RTR1 x 0.75) + (SVR1 x 0.60)
<ul style="list-style-type: none"> 2nd additional portion of the Combined Disability & Survivor benefit 	CDS2	= (RTR2 x 0.75) + (SVR2 x 0.60)
Combined benefit – Retirement & Survivor (at 65)	CRS	= CRSb + CRS1 + CRS2
<ul style="list-style-type: none"> Base portion of the combined Retirement & Survivor benefit (at 65) 	CRSb	= RTRb
<ul style="list-style-type: none"> 1st additional portion of the combined Retirement & Survivor benefit (at 65) 	CRS1	= RTR1 + (SVR65_1 x 0.60)
<ul style="list-style-type: none"> 2nd additional portion of the combined Retirement & Survivor benefit (at 65) 	CRS2	= RTR2 + (SVR65_1 x 0.60)
Children of disabled contributors benefit and Children of deceased contributors benefit	DCC	$= DCC_{(t-1)} \times VPI_t$ Where: <ul style="list-style-type: none"> t is the year of benefit onset VPI_t is the variation in Pension Index (see Table B)
Death benefit (one time payment)	DTH	= \$2,500

Source: *Canada Pension Plan Act and Regulations*

Notes:

- All the formulae on this page account for both phases of changes of the CPP Enhancement, where the first phase became effective January 1, 2019, and the second phase became effective January 1, 2024. As a result, maximum monthly benefits may include a base portion, a first additional portion and a second additional portion.
- The maximum monthly retirement pension at age 65 is for a pension beginning in January. However, as the monthly first and second additional portions accumulate every month that follows, the maximum retirement pension for new beneficiaries continues to increase over the year.
- Final figures are rounded to 2 decimals.
- Since the CPP enhancement became effective on January 1, 2019, the 1st additional replacement rate equals 8.33%. Due to the gradual phase-in of the CPP enhancement, the 1st additional phase-in factors β_m equal 15% in 2019; 30% in 2020; 50% in 2021; 75% in 2022 and 100% in 2023.
- The maximum combined Survivor & Disability benefit uses the 1st and 2nd additional earnings-related portions of the Survivor's pension (under 65) because the Disability pension is paid only to people below age 65. If the survivor were aged 65 or over, he or she would be in receipt of the retirement pension.

D. OLD AGE SECURITY - CALCULATION OF NEW BENEFITS

Rate April t = Rate January t	x	$\frac{\text{Monthly Average CPI November } t-1 \text{ to January } t}{\text{Monthly Average CPI August } t-1 \text{ to October } t-1}$
Rate July t = Rate April t	x	$\frac{\text{Monthly Average CPI February } t \text{ to April } t}{\text{Monthly Average CPI November } t-1 \text{ to January } t}$
Rate October t = Rate July t	x	$\frac{\text{Monthly Average CPI May } t \text{ to July } t}{\text{Monthly Average CPI February } t \text{ to April } t}$
Rate January $t+1$ = Rate October t	x	$\frac{\text{Monthly Average CPI August } t \text{ to October } t}{\text{Monthly Average CPI May } t \text{ to July } t}$

OAS pension (age 75 and over) = OAS pension (age 65 to 74) X 1.1

t = current year

Note: Monthly Average CPI rounded to 1 decimal.

Ratios of CPI rounded to 3 decimals.

Rates rounded to the cent.

Source: *Old Age Security Act*.

E. THE GUARANTEED INCOME SUPPLEMENT (GIS), THE ALLOWANCES (ALWs) AND THE TOP-UPS CALCULATION OF INCOME REDUCTION AND CUT-OFF POINT

Reduction point: Level of income where the GIS, the ALW or the top-ups start being paid at a different rate. Generally, this point corresponds to the exemption point.

Cut-off point: Level of income where the GIS, the ALW the top-ups ceases to be paid and then equals zero.

E.1 GIS SINGLE

Paid to an OAS pensioner who does not have a spouse or a common-law partner.

Under the reduction point, which is at \$24.00 of annual income, the GIS is paid at the maximum single rate. The GIS is paid at a partial rate from \$24.00 of annual income to the cut-off point, where the GIS becomes zero.

To calculate the cut-off point, the monthly GIS at the maximum single rate (excluding the top-up amount) is rounded up to the next dollar value and then multiplied by 2 and by 12 (to get an annual figure). The multiplication by 2 corresponds to a reduction rate of 50% in the GIS.

E.g. for July 2024:

Reduction point= \$24.00

GIS maximum single rate = \$1,072.93 - \$166.20 = \$906.73 (rounded up) = \$907.00

Cut-off point = \$907.00 x 2 x 12 = \$21,768.00

Additional Amount (GIS top-up):

Under the reduction point, which is \$2,000.00 of annual income plus \$48.00, the GIS top-up is paid at the maximum single rate. The top-up is then paid at a partial rate from \$2,048.00 of annual income to the cut-off point, where the top-up becomes zero.

To calculate the cut-off point for the GIS top-up, the monthly GIS top-up at the maximum single rate is rounded up to the next dollar value and then multiplied by 4 and by 12 (to get an annual figure) and added to \$2,000.00. The multiplication by 4 corresponds to a 25% reduction in the GIS top-up.

E.g. for July 2024

Reduction point = \$2,000.00 + \$48.00 = \$2,048.00

Top-up maximum single rate = \$166.20 (rounded up) = \$167.00

Cut-off point = \$167.00 x 4 x 12 + \$2,000 = \$10,016.00

Source: *Old Age Security Act*.

**E. THE GUARANTEED INCOME SUPPLEMENT (GIS), THE ALLOWANCES (ALWs) AND THE TOP-UPS
CALCULATION OF INCOME REDUCTION AND CUT-OFF POINT**

E.2 GIS SPOUSE/Common-Law Partner of Someone Who Receives an OAS Pension (Married Rate)

Paid to a spouse or common-law partner of someone who receives an OAS pension.

Under the reduction point, which is at \$48.00 of annual combined income of the couple, the GIS is paid at the maximum married rate. The GIS is paid at a partial rate from \$48.00 of annual income to the cut-off point, where GIS becomes zero.

To calculate the cut-off point, the monthly GIS at the maximum married rate (excluding the top-up amount) is rounded up to the next dollar value and then multiplied by 4 and by 12 (to get an annual figure). The multiplication by 4 corresponds to a reduction rate of 25% per pensioner in GIS.

E.g. for July 2024:

Reduction point = \$48.00

GIS maximum married rate = \$645.84 - \$47.09 = \$598.75 (rounded up) = \$599.00

Cut-off point = \$599.00 x 4 x 12 = \$28,752.00

Additional Amount (GIS top-up):

Under the reduction point, which is \$4,000.00 of annual income plus \$96.00, the GIS top-up is paid at the maximum married rate. The top-up is then paid at a partial rate from \$4,096.00 of annual income to the cut-off point, where the top-up becomes zero.

To calculate the cut-off point for the GIS top-up, the monthly GIS top-up at the maximum married rate is rounded up to the next dollar value and then multiplied by 8 and by 12 (to get an annual figure) and added to \$4,000.00. The multiplication by 8 corresponds to a 12.5% reduction in the GIS top-up per pensioner.

E.g. for July 2024:

Reduction point = \$4,000.00 + \$96.00 = \$4,096.00

Top-up maximum married rate = \$47.09 (rounded up) = \$48.00

Cut-off point = \$48.00 x 8 x 12 + \$4,000.00 = \$8,608.00

Source: *Old Age Security Act*.

E. THE GUARANTEED INCOME SUPPLEMENT (GIS), THE ALLOWANCES (ALWs) AND THE TOP-UPS CALCULATION OF INCOME REDUCTION AND CUT-OFF POINT

E.3 GIS SPOUSE/Common Law-Partner of Someone Who Does Not Receive an OAS Pension

Paid to an OAS pensioner whose spouse or common-law partner does not receive an OAS pension.

The GIS is paid at the maximum single rate up to the reduction point, which corresponds to the equivalent of an annual OAS pension for the current month rounded to the highest multiple of 4 plus \$48.00. The GIS is paid at a partial rate from the reduction point to the cut-off point, where GIS becomes zero.

To calculate the reduction point, the maximum monthly amount of OAS for the current quarter is divided by 4 and rounded up to the next highest dollar. This amount is then multiplied by 4 and by 12 (to get an annual figure). This could correspond to a mock reduction rate of 100% in the annual OAS pension. The amount so obtained represents the lower limit of the last income bracket where the GIS is still paid at the maximum single rate. The amount of \$48.00 must be added to the final reduction point.

To calculate the cut-off point, the monthly GIS at the maximum single rate (excluding the top-up amount) is rounded up to the next dollar value and then multiplied by 4 and by 12 (to get an annual figure). The multiplication by 4 corresponds to a reduction rate of 25% in the GIS. Then, this is added to the reduction point.

E.g. for July 2024:

OAS maximum amount = $OAS/4 = \$718.33/4 = \179.58 (rounded up) = \$180.00

Reduction point = $(\$180.00 \times 4 \times 12) + \$48.00 = \$8,688.00$

GIS maximum single rate = $\$1,072.93 - \$166.20 = \$906.73$ (rounded up) = \$907.00

Cut-off point = $(\$907.00 \times 4 \times 12) + (\$180.00 \times 4 \times 12) = \$52,176.00$

Additional Amount (GIS top-up):

Under the reduction point, which is \$4,000.00 of annual income plus \$96.00, the GIS top-up is paid at the maximum single rate. The top-up is then paid at a partial rate from \$4,096.00 of annual income to the cut-off point, where the top-up becomes zero.

To calculate the cut-off point for the GIS top-up, the monthly GIS top-up at the maximum single rate is rounded up to the next dollar value and then multiplied by 8 and by 12 (to get an annual figure) and added to \$4,000.00. The multiplication by 8 corresponds to a 12.5% reduction in the GIS top-up.

E.g. for July 2024:

Reduction point: $\$4,000.00 + \$96.00 = \$4,096.00$

Top-up maximum single rate = \$166.20 (rounded up) = \$167.00

Cut-off point = $\$167.00 \times 8 \times 12 + \$4,000.00 = \$20,032.00$

E. THE GUARANTEED INCOME SUPPLEMENT (GIS), THE ALLOWANCES (ALWs) AND THE TOP-UPS CALCULATION OF INCOME REDUCTION AND CUT-OFF POINT

E.4 GIS SPOUSE/COMMON-LAW PARTNER OF SOMEONE WHO IS AN ALLOWANCE BENEFICIARY (MARRIED RATE)

Paid to a spouse or common-law partner of someone who receives an Allowance.

The GIS is paid at the maximum married rate up to the reduction point, which represents 4/3rds of the equivalent of an annual OAS pension for the current month rounded to the next highest multiple of 3, plus \$48.00. The GIS is paid at a partial rate from the reduction point to the cut-off point, where GIS becomes zero.

To calculate the reduction point, the maximum monthly amount of OAS for the current quarter is divided by 3 and rounded up to the next highest dollar value. Then, it is multiplied by 4 and by 12 (to get an annual figure). The division by 3 and the multiplication by 4 correspond to a mock reduction rate of 75% in OAS annual amount. The amount so obtained represents the lower limit of the last income bracket where the GIS is still paid at the maximum married rate. The amount of \$48.00 must be added to the final reduction point.

The cut-off point for the GIS benefit for the spouse/common-law partner of someone who receive an allowance is the same as the cut-off point for a GIS benefit of someone whose spouse is not receiving an OAS pension. For that reason, to calculate the cut-off point, the monthly GIS at the maximum single rate (excluding the top-up amount) is rounded up to the next dollar value and then multiplied by 4 and by 12 (to get an annual figure). The multiplication by 4 corresponds to a reduction rate of 25% in the GIS. Then, this is added to the reduction point for the GIS benefit for someone whose spouse is not receiving an OAS pension.

E.g. for July 2024:

OAS maximum amount = $OAS/3 = \$718.33/3 = \239.44 (rounded up) = \$240.00
Reduction point = $(\$240.00 \times 4 \times 12) + \$48.00 = \$11,568.00$

GIS maximum single rate = $\$1,072.93 - \$166.20 = \$906.73$ (rounded up) = \$907.00
Cut-off point = $(\$907.00 \times 4 \times 12) + (\$180.00 \times 4 \times 12) = \$52,176.00$

Additional Amount (GIS top-up):

Under the reduction point, which is \$4,000.00 of annual income plus \$96.00, the GIS top-up is paid at the maximum married rate. The top-up is then paid at a partial rate from \$4,096.00 of annual income to the cut-off point, where the top-up becomes zero.

To calculate the cut-off point for the GIS top-up, the monthly GIS top-up at the maximum married rate is rounded up to the next dollar value and then multiplied by 8 and by 12 (to get an annual figure) and added to \$4,000. The multiplication by 8 corresponds to a 12.5% reduction in the GIS top-up.

E.g. for July 2024:

Reduction point = $\$4,000.00 + \$96.00 = \$4,096.00$
Top-up maximum married rate = $\$47.09$ (rounded up) = \$48.00
Cut-off point = $\$48.00 \times 8 \times 12 + \$4,000.00 = \$8,608.00$

Source: *Old Age Security Act*.

E. THE GUARANTEED INCOME SUPPLEMENT (GIS), THE ALLOWANCES (ALWs) AND THE TOP-UPS CALCULATION OF INCOME REDUCTION AND CUT-OFF POINT

E.5 ALLOWANCE

The Allowance (ALW) is paid to the spouse/common-law partner aged 60 to 64 of someone who receives the GIS. The ALW is composed of two portions: the OAS equivalent portion, paid at the full rate, and the GIS equivalent portion, paid at the maximum married rate.

Under the reduction point, which is \$48.00 of annual combined income of the couple, the ALW is paid at the maximum rate. From \$48.00 of annual income to the first cut-off point, the OAS equivalent portion of ALW is paid at a partial rate while the GIS equivalent portion continues to be paid at the maximum married rate. Between the first cut-off point and the second reduction point, the OAS equivalent portion of ALW equals zero, while the GIS equivalent portion is still paid at full rate. From the second reduction point to the second cut-off point, the GIS equivalent portion is paid at a partial rate. At the second cut-off point, ALW equals zero.

To calculate the first cut-off point, the maximum monthly amount of OAS for the current quarter is divided by 3 and rounded up to the next highest dollar. Then, it is multiplied by 4 and by 12 (to get an annual figure). The division by 3 and the multiplication by 4 correspond to a reduction rate of 75% in the OAS equivalent portion. The amount so obtained represents the lower limit of the last income bracket where the OAS equivalent portion equals zero but the GIS equivalent portion is still paid at maximum married rate. This is the first cut-off point. The amount of \$48.00 must be added to find the second reduction point where the GIS portion begins to be reduced.

To calculate the second cut-off point (where the GIS equivalent portion becomes zero), the monthly GIS at the maximum married rate (excluding the top-up amount) is rounded up to the next dollar value and multiplied by 4 and by 12 (to get an annual figure). The multiplication by 4 corresponds to a reduction rate of 25% in the GIS portion. Then, it is added to the first cut-off point.

E.g. for July 2024:

First reduction point = \$48.00
OAS maximum amount = $OAS/3 = \$718.33/3 = \239.44 (rounded up) = \$240.00
First cut-off point = $(\$240.00 \times 4 \times 12) = \$11,520.00$

Second reduction point = $\$11,520.00 + \$48.00 = \$11,568.00$

GIS maximum married rate = $\$645.84 - \$47.09 = \$598.75$ (rounded up) = \$599.00
Cut-off point = $(\$599.00 \times 4 \times 12) + (\$240.00 \times 4 \times 12) = \$40,272.00$

Additional Amount (ALW top-up):

Under the reduction point, which is \$4,000.00 of annual income plus \$96.00, the ALW top-up is paid at the maximum married rate. The top-up is then paid at a partial rate from \$4,096.00 of annual income to the cut-off point, where the top-up becomes zero.

To calculate the cut-off point for the ALW top-up, the monthly ALW top-up at the maximum married rate is rounded up to the next dollar value and then multiplied by 8 and by 12 (to get an annual figure) and added to \$4,000.00. The multiplication by 8 corresponds to a 12.5% reduction in the ALW top-up.

E.g. for July 2024:

Reduction point = $\$4,000.00 + \$96.00 = \$4,096.00$
Top-up maximum married rate = \$47.09 (rounded up) = \$48.00
Cut-off point = $\$48.00 \times 8 \times 12 + \$4,000.00 = \$8,608.00$

Source: *Old Age Security Act*.

E. THE GUARANTEED INCOME SUPPLEMENT (GIS), THE ALLOWANCES (ALWs) AND THE TOP-UPS CALCULATION OF INCOME REDUCTION AND CUT-OFF POINT

E.6 ALLOWANCE FOR THE SURVIVOR

The Allowance for the Survivor (ALWS) is paid to widowed persons who are between 60-64 years of age. The ALWS is composed of two portions: the OAS pension equivalent portion, paid at the full rate, and the supplement equivalent for the survivor portion.

Under the first reduction point, which is \$48.00 of annual income, the ALWS is paid at the maximum rate. From \$48.00 of annual income to the first cut-off point, the OAS equivalent portion of the ALWS is paid at a partial rate while the supplement equivalent for the survivor portion continues to be paid at the maximum rate. From the first cut-off point to the second reduction point, the OAS equivalent portion equals zero while the supplement equivalent for the survivor portion is paid at the full rate. From the second reduction point to the second cut-off point, the supplement equivalent for the survivor portion is paid at a partial rate. At the second cut-off point, ALWS equals zero.

To calculate the first cut-off point, the maximum monthly amount of OAS pension for the current quarter is divided by 3 and rounded up to the next highest dollar value. Then, it is multiplied by 4 and by 12 (to get an annual figure). The division by 3 and the multiplication by 4 correspond to a reduction rate of 75% in the OAS equivalent portion. The amount obtained represents the lower limit of the last income bracket where the OAS equivalent portion equals zero but the supplement equivalent for the survivor portion is still paid at the maximum rate. The amount of \$24.00 must be added to find the second reduction point where the supplement equivalent for the survivor portion begins to be reduced.

To calculate the second cut-off point (where the supplement equivalent for the survivor portion equals zero), the portion of supplement equivalent for the survivor (equal to the maximum ALWS rate less the maximum OAS and less the Top-up amount) is rounded up to the next dollar value and multiplied by 2 and by 12 (to get an annual figure). The multiplication by 2 corresponds to a reduction rate of 50% in the supplement equivalent for the survivor portion. Then, it is added to the first cut-off point.

E.g. for July 2024:

First reduction point = \$48.00
OAS maximum amount = $OAS/3 = \$718.33/3 = \239.44 (rounded up) = \$240.00
Cut-off point = $(\$240.00 \times 4 \times 12) = \$11,520.00$

Second reduction point = $\$11,520.00 + \$24.00 = \$11,544.00$

Portion of supplement equivalent for the survivor = $\$1,626.20 - \$718.33 - \$166.20 = \741.67 (rounded up) = \$742.00
Second cut-off point = $(\$742.00 \times 2 \times 12) + (\$240.00 \times 4 \times 12) = \$29,328.00$

Additional Amount (ALWS top-up):

Under the reduction point, which is \$2,000.00 of annual income plus \$48.00, the ALWS top-up is paid at the maximum single rate. The top-up is then paid at a partial rate from \$2,048.00 of annual income to the cut-off point, where the top-up becomes zero.

To calculate the cut-off point for the ALWS top-up, the monthly ALWS top-up at the maximum single rate is rounded up to the next dollar value and then multiplied by 4 and by 12 and added to \$2,000.00. The multiplication by 4 corresponds to a 25% reduction in the ALWS top-up.

E.g. for July 2024:

Reduction point = $\$2,000.00 + \$48.00 = \$2,048.00$
Top-up maximum single rate = \$166.20 (rounded up) = \$167.00
Cut-off point = $\$167.00 \times 4 \times 12 + \$2,000.00 = \$10,016.00$

Source: *Old Age Security Act*.
