ISBN 0-662-15382-0  
ISBN 0-662-15381-2 (set)

## Foreword

-----

The Canadian Chemical Register is a definitive reference source for chemicals manufactured in Canada. Published in collaboration with the Statistics and Information Committee of The Canadian Chemical Producer's Association, and with the co-operation of Canadian chemical manufacturers, the Register provides industry and governments with a periodic benchmark of Canadian chemical industry progress, expressed in terms of the number of chemical producers, the diversity of chemical substances and the locations of chemical manufacture.

The Register is published in two volumes, in both official languages. Volume I is an alphabetical listing of chemical manufacturers and the chemicals (elements or compounds listed by common, chemical or chemical class name) produced by each manufacturer. Volume II is an alphabetical listing of chemicals accompanied by the names of producers and manufacturing locations.

The chemical substances listed are understood to be manufactured in Canada by means that involve one or more chemical reaction steps and/or a chemical separation process (i.e., fractionation, solvent extraction, crystallization, etc.) Minerals, such as limestone and talc, that are subjected only to processes of comminution and classification have been excluded.

All chemicals listed are offered for merchant sale unless otherwise qualified under the "Status" heading to be an "intermediate" or a chemical produced for "captive" consumption. The term "reagent" denotes fine chemicals or chemicals of high purity produced in laboratory quantities.

The Canadian Chemical Register was compiled during 1986, however, a large number of entries were confirmed early in 1987. An indication of how current a company's listing is can be determined from the Revision Date shown in Volume I.

**ACTOL CHEMICALS LIMITED**

6 Route 132  
Delson, QUE  
JOL 1G0

Revision Date: 86-5

Tel.No.: (514) 632-2200

	<u>Status</u>	<u>Plant Site</u>
AMMONIUM ACETATE, AQUEOUS		Delson, QUE
METHYL ACETATE		Delson, QUE
