THE SERVICE ECONOMY:  
A SELECTIVE BIBLIOGRAPHY

Service Industries Branch  
Industry, Trade and Commerce/  
Regional Economic Expansion

September 16, 1983

## FOREWORD

This is a select bibliographic reference list of literature dealing with the service economy. Historically, little information has been available on this topic, reflecting the fact that services role in the economy was not well understood. However, its contribution to employment and GNP is increasingly being recognized as integral to economic growth and subsequently literature dealing with services is burgeoning. It should be noted that the following is an initial attempt to capture a useful listing of available material. Comments may be made to the Service Industries Branch, ITC/REE at (613) 995-8107.
