## INTRODUCTION

This directory lists Canadian manufacturers of commercial fishing equipment and includes a product list and an alphabetical company list.

The date of the latest response from each company is shown on the company record. If the company is seriously exporting, an (E) follows the date.

Terms such as winches, haulers and gurdies have somewhat different meanings in different parts of the country. They are all translated as "treuils" in French and are listed here under the term winches. Typically, in the company records you will find the more specific "winches-pot haulers" as applicable.

Note that this directory covers commercial fishing equipment only. General marine products, such as electronic and navigation equipment, boat components and accessories and commercial fishing boat builders, are covered in the Canadian Boat Building Industry Directory. As indicated in the text, some firms are listed in both directories.

If you know of a Canadian company making commercial fishing gear in Canada that is not listed in the directory, please give it one of the survey forms included at the end of this directory and suggest the form be filled out and mailed to the address indicated.

The following conversion factors and abbreviations have been used to convert company records to metric.

Conversion Factors	Imperial Units	Metric Units	Abbreviations
0.3048	x feet	' (ft.)	= metres m
2.54	x inches	" (in.)	= centimetres cm
0.453592	x pounds	lb.	= kilograms kg
28.3495	x ounces (avdp)	oz.	= grams g
0.907184	x tons (short)		= tonnes t
4.5457	x gallons (Brit)	gal.	= litres L
0.7457	x horsepower	h.p.	= kilowatts kW
1.05506	x British thermal units	BTU	= kilojoules kJ
28.32	x cubic feet	cu.ft.	= litres L
