Calendar Year 1964

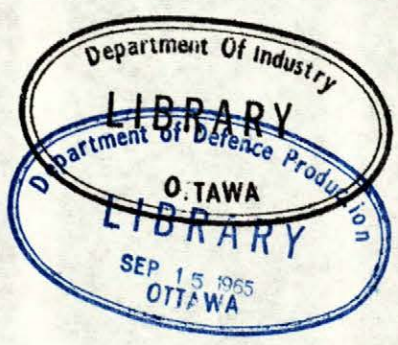

VOLUME 1

DEPARTMENT OF INDUSTRY • MAY 1965

CANADA'S DUTIABLE IMPORTS  
classified by  
Tariff Item, Country and Commodity  
Calendar Year 1964  
Volume I

DEPARTMENT OF INDUSTRY  
MAY 1, 1965

## FOREWORD

This is the first of two volumes which set out estimates of Canada's imports for consumption of dutiable items, in the calendar year 1964, along the lines of the Customs Tariff. It has been compiled in the General Services Branch of the Department of Defence Production, at the request of the Program Advisory Group of the Department of Industry, with the assistance of the Department of Finance, the Department of National Revenue and the Dominion Bureau of Statistics.

This volume contains explanatory notes and references, but its main content is a detailed table of statistics of dutiable imports classified by tariff item, country and commodity class. Tariff items 1 to 435B, inclusive, are shown on pages 1 to 263.

## EXPLANATORY NOTES

### (1) Sources and methods

Statistics of imports are based upon declarations of importers (import entries) as subsequently checked by Customs officials. The estimates of this study are derived from a sample of approximately 10 per cent of these documents for the calendar year 1964, stratified by port of entry so as to ensure adequate representation of goods from various countries. Country and commodity data are obtained from the Trade of Canada statistics. Tariff item data are calculated by weighting these according to the information obtained from the sample.

### (2) Tariff items

Tariff items are shown in the following table as an alphanumerical code and it will be necessary, therefore, for the reader to refer to the Customs Tariff for an authoritative description of the goods comprehended by each item. Moreover, for the purposes of the study, each tariff sub-item or extract has been treated as a separate tariff item. This method was necessary to the compilation procedures and is further justified by the fact that different duty rates and commodity descriptions can be adequately identified only at this level of detail.

The method of numbering tariff items varies slightly from that used by the Customs Tariff itself although little difficulty need be encountered by the reader. Firstly, subscripts shown in the original as small letters have arabic numerals substituted in this study (e.g. 445C01 in this study is read as 445C (i) in the Customs Tariff). Secondly, multiple extracts to tariff items are numbered seriatim in this study whereas in the original Customs Tariff extracts are not numbered. Moreover, all extracts have been listed at the end of Volume II. Those which refer to items in this volume, are enumerated as follows:

X023	Preparations of cocoa or chocolate, n.o.p., and confectionery, coated with or containing chocolate
X043A 01	Dried whey, dried skim milk, and dried buttermilk for animal or poultry feeds
X043A 02	Powdered milk, n.o.p.
X071B 01	White clover seed
X071B 02	Sweet clover seed
X071B 03	Common white clover seed
X073	Field seeds, n.o.p.
X089 05	Tomato paste
X090A	Soya bean flour n.o.p.
X090B	Prepared horseradish
X090D	Pate de foie with truffles
X105E 01	Melons, pickled or preserved in salt, brine, oil, or any other manner
X105E 02	Pineapples, pickled or preserved in salt, brine, oil, or any other manner
X142 01	Tobacco, unmanufactured, unstemmed, when imported by cigar manufacturers for use in the manufacture of cigars
X142 02	Tobacco, unmanufactured, stemmed, when imported by cigar manufacturers for use in the manufacture of cigars

X164 01	Wines, of fresh grape, except sparkling wines, imported in barrels or in bottles from 24 to 34 p.c. proof spirits
X164 02	Wines, of fresh grape, not sparkling, from 34 to 36 p.c. proof spirits
X166	Acetone and Amyl Acetate
X192	Electric Insulating Pressboard, n.o.p.
X197	Electric Cable Insulating Paper, n.o.p.
X198	Pots or boxes of pulp or pulpboard for growing plants
X199 01	Matches of paper
X199 02	Artificial flowers of paper
X208T 01	Permanganate of potash
X208T 02	Mono-glyceride emulsifiers
X208T 03	Wollastonite
X208T 04	Cobalt metal, in lumps, powder, ingots, blocks or bars
X213	Vinegar
X216	Chromium Trioxide, dihydroxydiphenal sulphones monobutyl phenylphenol sodium monosulfonate, phenol sulphonic acid and stannous sulphate imported for use in the production of tin plate
X220A 01	Hydrolized animal matter for use as retarder for calcined gypsum
X252	Manufactures of pumice or pumice stone
X265A	Menhaden Oil
X288	Red Clay Flower Pots, not glazed, painted nor otherwise decorated
X289	Baths, bathtubs, urinals, sinks and laundry tubs of earthenware, cement, clay or other material, n.o.p.
X314 01	Plumbago flakes
X314 02	Plumbago, ground, and manufactures of
X349A	Copper Beryllium Alloys
X350	Copper Beryllium Alloys
X362C	Cigar and Cigarette Lighters, n.o.p.
X368	Clocks, other than alarm clocks, not being electric
X402A 01	Woven or welded wire fencing, of iron or steel, coated or not
X402A 02	Wire cloth or wire netting, of iron or steel, coated or not.
X410L	Inserts of Tungsten Carbide for Rock Drills

X427 01	Inserts of tungsten carbide for rock drills, when imported by manufacturers
X427 02	Parts, not including moulds, for concrete block-making machines
X428E	Diesel and semi-diesel engines of 500 horsepower or less and complete parts thereof n.o.p.
X429G	Razors and complete parts thereof, n.o.p.
X431D	Slide rules

### (3) Countries

Seventeen countries are provided for separately in this study with appropriate sub-totals. Separate sub-totals are shown also for the European Free Trade Association and the European Economic Community. All other countries have been aggregated and designated simply as "Other". In the printing of these word descriptions the following abbreviations have been used:

EFTA	.. European Free Trade Association
EEC	.. European Economic Community
Belg-Lux	.. Belgium and Luxembourg
Germany W	.. Federal Republic of Germany
Nethrlnds	.. Netherlands
Rep So Afr	.. Republic of South Africa
U Kingdom	.. United Kingdom
U States	.. United States

In trade statistics, generally, imports are shown against the country from which the goods were first directed to Canada, except for goods of Central or South American origin consigned to Canada from the United States which are allocated to the country of origin. The estimates in each country category of this study reflect this practice.

### (4) Values

The declared values shown in this report are derived from "Trade of Canada - Imports". These estimates, therefore, are of the value as determined for customs duty. The Customs Act generally requires the valuation of goods f.o.b. point of shipment in the country of export, but in a few cases involving specific rates of duty c.i.f. values may in fact be reported by importers, and may or may not be revised in these statistics. In the case of goods on which dumping duty has been collected the amount of dumping duty paid is excluded from the declared value. (Where sight entries are involved the normal increase in value associated with later customs revision is not included).

The value of duty paid as estimated in the study includes the value of dumping duty, if any, with such other duties as are appropriate to the item. These estimates of duty paid, however, may not be precisely related to the declared value figures (at an ad valorem rate for instance) since the duty may have been calculated on a revised "fair market" value.

### (5) Commodities

Commodity classes are shown in the following table both as an abbreviated word description and as a 5 digit numerical class code. The description identifies the type of merchandise imported in the nomenclature of the standard commodity classification used by the Trade of Canada statistics of imports. Word descriptions are abbreviated to fit the available space in the table but complete nomenclature may be obtained by the reader from the "Import Statistical Classification Manual" published by the Dominion Bureau of Statistics (Catalogue No. 12-524). The abbreviation "n.e.s." means "not elsewhere specified".

(6) Coverage

This study covers imports subject to duty which have entered at the national frontier either into Customs warehouses or directly after payment of duty into the domestic economy. As of January 1, 1964, Canada's trade statistics are compiled on the "General Trade" basis which records imports as the goods enter into the control of the national government. Direct transit goods, which enter the national territory in order to pass to some other country, and, of course, all "free" imports are excluded.

The bulk of transactions valued at less than \$ 200 have been ignored. The effect of this omission on tariff and commodity detail is not thought to be significant. Moreover, only the United States and Austria have an above average proportion of small value shipments for the twelve months of 1964. (2.0 and 2.2 per cent., respectively, compared with the all country average of 1.6 per cent of total imports).

(7) Miscellaneous

(a) Systematic rounding of values has been used in this study. Hence, wherever blanks occur in the columns for declared value or duty collected, the actual figure if shown would be under \$ 500. Values of \$ 500 and over have been rounded to \$1 thousand.

(b) Three tariff items are listed among the extracts at the end of Volume 2: X092; X092-01; and X092-02. These should be 92-10; 92-11; and 92-12, respectively, and read in the same context as they would otherwise appear on page 38 of volume 1.
