EXTRAITS D'UNE DEMANDE DE PROPOSITION DU
MINISTERE DE L'INDUSTRIE ET DU COMMERCE

Your file / Votre référence

Our file / Notre référence 43/500-18

Le 17 janvier 1977

Ernst & Ernst
1080 Côte du Beaver Hall
Pièce 1010
Montréal, P. Qué.
H2Z 1R3

Messieurs,

Les firmes de consultants suivantes ont été convoquées à cette rencontre du 18 janvier 1977 au bureau régional de Montréal de notre ministère:

Drouin Paquin & Associés Ltée
Ernst & Ernst
Ingesco Inc.
Peat Marwick & Associés
Simpson Schwab Ltée

Cette rencontre a pour but de présenter simultanément aux firmes ci-haut mentionnées les: but, méthodologie, termes de référence et contraintes d'une étude du marché du hockey et du patin en général aux Etats-Unis et en Europe occidentale incluant les pays scandinaves.

Les cinq firmes de consultants ont été sélectionnées pour leur compétence reconnue et leur connaissance de l'industrie de la chaussure.

But

Le but de cette étude est de déterminer les perspectives d'avenir pour le marché du hockey sur glace, des patins, des lames de patin ainsi que de l'équipement nécessaire pour ce sport. Ces résultats permettront d'évaluer l'accroissement possible des exportations de produits canadiens et d'élaborer une stratégie dans ce sens.

Méthodologie

La firme de conseillers qui sera choisie ainsi que les sociétés qu'elle voudra s'adjoindre aura la compétence nécessaire pour mener à bien l'étude selon les termes de référence indiqués plus bas et devra être en mesure de présenter des recommandations quant à la marche à suivre pour tirer avantage des opportunités qui seront identifiées.

La Division du cuir et de la chaussure de notre ministère servira d'agent de liaison pour l'obtention de renseignements et de statistiques précis que la firme de conseiller désirera obtenir des différents postes commerciaux canadiens.

Le rapport pourra être soumis dans l'une des deux langues officielles du Canada selon le gré de la firme qui effectuera le travail.

Termes de référence

1. Evolution internationale des produits de hockey et des technologies employées.
2. Evolution du marché.
 - a) Statistiques sur le nombre de patinoires intérieures existantes et sur celles construites au cours des cinq dernières années.
 - b) Croissance approximative du nombre de joueurs de hockey.
3. Evolution de la concurrence en termes de nouveaux produits et d'acceptation de nouvelles technologies.
4. Evaluation de la position relative des produits canadiens en quantité et en prix par rapport au volume des ventes dans chaque pays ainsi que du degré de développement technologique.
 - a) Statistiques de production, d'importation et d'exportation dans les pays sélectionnés.
 - b) Pénétration des produits canadiens et étrangers sur ces marchés.
 - c) Provenance des produits concurrentiels.
5. Pronostics de croissance du marché et de la concurrence dans les différents pays.
 - a) Augmentation anticipée de la production concurrentielle.
 - b) Augmentation possible de l'activité sportive vers le hockey (politiques gouvernementales etc.).
6. Recommandations quant à la marche à suivre pour améliorer la position canadienne sur les marchés étudiés.

WHAT'S NEW

Face Masks

Effective immediately face masks and internal mouth pieces become mandatory for all AHAUS youth hockey players except Junior A and B players on teams that play to a paid gate.

The following equipment meets the United States standards and more will be coming along rapidly.

The CCM Total Head Protection Package includes for 76-77, a new wire face mask.

The wire mask is shown here with the CCM ProStandard Helmet and Lower Face Protector. CCM also offers an Eye and Face Shield of space age material. A newly printed guide now provides complete and accurate directions for proper fitting of CCM equipment.

All CCM equipment has been thoroughly researched and field-tested for safety and confidence. CCM advises, however, that their \$5,000 insurance policy covers only the Helmet, Eye Shield and Lower Face Protector.

For complete information on the CCM Total Head Protection Package and new Wire Mask circle number 18 on the Information Request Card.

Cooper's new HM50 and HM50 JR masks are designed to meet future A.S.T.M. and C.S.A. standards for full facial protection.

This new design completely eliminates the possibility of a stick blade penetrating to the face. There is 35% more wire on these new models, all nylon coated, and a total of 32 separate welds for greater strength. The HM50 and HM50 JR feature a moulded foam chin cup and new restraining side clips that prevent the mask from being driven against the face.

For complete information on Cooper's wire hockey mask, circle number 205 on the Information Request Card.

Safe-T-Gard's Model no. 440 and no. 440A combination shield/wire frame facemask features excellent visibility and maximum protection. The combination design provides for air circulation inside the mask which prevents fogging and heat buildup.

Another feature is the low replacement cost of the shield (under \$4.00). The entire wire frame is vinyl coated and the chin pad is constructed of thick medical foam.

The no. 440 ("flip-up" attachment) and no. 440A (rigid attachment) attach easily to any CSA approved helmet. As a bonus introductory offer, Safe-T-Gard is including a free intra-oral mouthguard with each facemask.

For complete information on the Safe-T-Gard facemask, circle number 15 on the Information Request Card.

Hartzell Custom Products new Saf-T-Shield and Full Face Shield are made of super tough mar-resistant Lexan Polycarbonate. Lexan is so strong and clear it is the same material used on NASA helmets to protect astronauts.

And Hartzell Hockey Shields are now available with a free \$5,000 loss-of-sight insurance policy.

Saf-T-Shield and Full Face Shield feature the finest in optical qualities. Since these shields are as clear as glass, there is no optical distortion. Hartzell Hockey Shields are not affected by temperature extremes. They will not become brittle when cold, or warp with heat.

Both the Saf-T-Shield and Full Face Shield can be easily mounted to any size hockey helmet (all mounting hardware included).

Hartzell's Saf-T-Shield assures maximum protection for eyes, nose, cheek bones and upper face. The Full Face Shield protects the entire face.

For more information contact, Tom Hendricks, Hartzell Custom Products, 2516 Wabash Ave., St. Paul, Minnesota, 55114. Or, circle number 19 on the Information Request Card.

Pro-tec pioneered the concept of full face protection for all hockey players.

Twelve years ago, Pro-tec, Inc., began intense research in design and testing for strength in actual playing conditions. Pro-tec insures the very best in full face protection and reliability.

No one else can match their record and research in product development over the years. In fact, most of Pro-tec's own research and testing for hockey faceguards has been supplied to the ASTM for use in developing the new standards.

Pro-tec face guards fit *all* helmets *easily*. And Pro-tec guarantees that their face guards will pass the ASTM test standards.

PTH-1000

Pro-tec is the original full face protector for all hockey players. It took twelve years to develop Pro-tec under rigorous testing in laboratories, by doctors, and under actual playing conditions. Pro-tec fits all helmets, affords you maximum protection while not hindering vision, breathing or movement and since Pro-tec faceguards are made of wire, not plastic, they will not fog or scratch as is so common with many of the competitive plastic protectors. If you ask for faceguards by any other name you've really said a mouthful.

PTH-100G

The Pro-tec goalie faceguard offers the best possible protection while providing the same benefits of the PTH-1000. A special feature on the Goalie is a clip-on removable throat guard, shown in the picture above.

The Pro-tec factory in Chicago has more experience making face guards than any other in the world. They can guarantee delivery despite the tremendous demand. Pro-tec cannot be matched in production capacity and quality.

For complete information on Pro-tec face guards write Pro-tec, Inc., 532 Industry Drive, Tukwila, Washington 98188. Or, circle number 14 on the Information Request Card.

The ACRO-MATIC Face Guard protects the eyes, nose and jaw simultaneously with advanced design one piece construction.

One piece construction means strength, simplicity and protection. Hockey stick or stick blade penetration is impossible when the face guard is properly mounted on the helmet.

The ACRO-MATIC Face Guard provides unique, uninterrupted visibility. This polycarbonate Face Guard is optically polished in the visual area and meets standards proposed by the ASTM and AHAUS for a zero power lens.

The ACRO-MATIC Face Guard is supplied with a unique one piece chin protector to prevent face guard from hitting upon impact. And it comes complete with mounting holes, screws and rubber-like molded washers to provide adequate ventilation and proper fit.

For complete information on the ACRO-MATIC Face Guard contact ACRO-MATIC Plastics Corp., 11 Jytek Park, Leominster, MA 01453. Or, circle number 20 on the Information Request Card.

Everett Enterprises offers a complete selection of face protectors for the 1976-77 season.

The people at Everett are doing things today that will stop the injuries of tomorrow.

Everett's Dewlex face protector is an innovative Lexan shield with an attached wire mouth guard. The mar resistant Lexan is optically correct and vented for fog-free vision. It has been tested to stop an equivalent force to that of a puck traveling in excess of 150 mph. The attached mouth guard is made with coated wire and is padded for full protection. The Dewlex face protector fits all

approved helmets.

Everett's all new wire mask is dynamically designed *not* to hinder vision. Strong, durable wire is coated to prevent corrosion. And a fantastic chin pad for added protection.

Everett also offers a wire mask with a Lexan insert . . . the ultimate in protection and visibility. It's a combination of strong, durable wire for maximum strength and perfect air-flow mounted with a mar-resistant Lexan insert at eye level for unobstructed vision. Also, chin pad for added protection.

Everett presents the goal tender's dream with the revolutionary Everett goal mask. It's a super combination of Lexan for perfect wire-free protective view with wire lower facial protection for perfect air flow.

For information on Everett's complete line of face protectors, write Everett Enterprises, P.O. Box 399, 42 South Avenue, Natick, Mass. 01760. Or, circle number 17 on the Information Request Card.

Sherbrooke Sporting Goods Inc. of Worcester, Massachusetts, with manufacturing facilities in St. Jean, Quebec, is introducing a revolutionary new face mask for goalies, according to Mike Solod, President. This goalie mask, made of specially treated wire with an exclusive protective coating, was designed to give the ultimate in performance and durability. This innovative mask for goaltenders is lighter than the conventional plastic shield and gives unequalled strength with no chance of shattering or distortion of the view. Because the mask has been designed to offer maximum vision with the full protection of wire, the goaltender will be able to speed up his reaction time.

Sherbrooke's newly designed wire mask attaches to Sherbrooke's CSA-approved helmet made of high impact plastic with shock absorbent padding and 22 air vents which create Sherbrooke's excellent ventilating system. The helmet is adjustable from 6 3/4 to 7 3/4 and comes in seven colors: white, black, blue, red, green, gold and maroon.

In order to give maximum protection to the goalie, a full length foam-padded chin guard attaches directly to the wire mask and helmet.

The wire mask with guard can be bought separately and will conform to most CSA-approved helmets.

For further information, contact Sherbrooke Sporting Goods Inc., 60 Ellsworth Street, Box 1004, Worcester, MA 01614. Or, circle number 21 on the Information Request Card.

What's New - Face Masks

The Jofa Facecage (Model No. 252 Sr, Model No. 255 Jr.) has been the result of 12 years of design-development and design-improvement at Jofa AB in Malung, Sweden.

For the past five years, the stringent requirements of the Swedish Ice Hockey Federation on the manufacture of ice hockey equipment in Sweden exceeds the design criteria that exists in the North American market.

The cage wire is made of string-strung stainless steel with a design criteria of 360,000 lbs. per square inch. The cage-to-helmet mount locations, in addition to the vinyl covered chin fitting, offers a substantial impact resistance and absorption away from the point of impact. In addition, the helmet chin strap loops through the cage strap to prevent movement and maintain the cage position relative to the face.

Effective immediately face masks and internal mouth pieces become mandatory for all AHAUS youth hockey players except Junior A and B players on teams that play to a paid gate.

The facecage, in compliance with the Swedish Ice Hockey Federation, is required to meet the following standards: The facecage is exposed to temperatures varying from -20°F to +158°F over a period of 200 hours. Upon removal from the temperature chamber and within 30 seconds from removal, the facecage is placed on a head pattern where a mass of 10 lbs. is dropped a distance of 10 ft. on three frontal points of the cage. Subsequent to each impact test, a deformation measurement is taken which cannot exceed 3mm at any of the three points. In addition, the size of each open section cannot be larger than 500mm (1.97") which prevents the entrance of a hockey stick blade.

For complete information on the Jofa Facecage write Jofa, Volvo of America Corporation, Recreational Products Division, Rockleigh, N.J. 07647. Or, Circle Number 206 on the Information Request Card.

The SV-1W is the ultimate in full facial protection. The designers of the SV-1W have combined the best of two worlds. They made a vinyl coated steel frame shield, and then placed a shatter-proof Lexan piece in the visual area. They went to great detail to close up the wire part of the shield so there could be no penetration. The eye insert is placed in such a position so as to virtually eliminate any fog or heat build-up that might occur. The Lexan insert is uniquely fastened to the metal frame, no rivets or screws to come loose. The Lexan insert can be easily replaced when necessary.

The radius of the shield allows it to be readily installed on all major helmets being sold on the market today. One of the main features besides superior vision and over-all facial protection, is that the makers of this shield supply a padded cup football chin strap that stabilizes the shield and helmet on the player. This shield comes in both Junior and Senior models to insure proper fit for all wearers.

The SV-1W is designed to give both players and the parents security from severe eye and facial injuries.

With full facial protection becoming mandatory this coming Fall for most youngsters, MGS has developed a new revolutionary product that merits investigation. This shield is available in both the United States and Canada.

HOCKEY MATE

Hockey-Mate International[®], Limited

The Beginning of A New
Chapter In the Training
of Ice Hockey Players

Registered service mark of **Hockey-Mate International Limited, Montreal, Que., Canada**

USES OF THE HOCKEY-MATE

TRAINING FOR THE GOALTENDER

The goaltender can practice with the machine anytime during the year, either indoors (on a rink or in a gymnasium) or outdoors.

The puck can be shot at speeds which can be varied from 35 miles per hour to 100 miles per hour (56 to 160 km per hour).

An exceptionally useful characteristic of the Hockey-Mate is that pucks are shot out randomly, the goaltender will not be able to predict at what height or location the next 48 pucks will be coming at him.

The Hockey-Mate can also be adjusted to permit the goaltender to work on his weaknesses. If, for example, he has trouble with pucks high on his glove side or low on his stick side, Hockey-Mate can shoot repeatedly time after time at the same place with a high degree of accuracy.

HOCKEYMATE CAN ALSO BE USED BY OTHER MEMBERS OF THE HOCKEY TEAM

1. Practicing tip-ins from different angles and at different speeds.
2. Players can practice receiving passes in a full stride or in a stopped position from different places on the ice, then shooting or passing the puck accurately without stopping it.

EXAMPLES OF USE OF THE HOCKEY-MATE PUCK SHOOTER

Shooting the puck at a particular place — if, for example, the goaltender's weakness is his stick side.

Puck being shot at random

Machine makes 48 passes to Player "A" at an interval of 5 seconds, who practices shooting the puck without stopping it.

TIP-INS, from different angles

Defenseman practicing stopping the puck, traveling around the boards and shooting it immediately toward the goal.

Two machines can be used shooting alternately

BASEBALL HAS ITS PITCHING MACHINE

TENNIS HAS ITS BALL-BOY MACHINE

NOW HOCKEY HAS ITS SHOOTING MACHINE
THE HOCKEY-MATE

HOCKEY-MATE'S CHARACTERISTICS

1. Holds 48 pucks.
2. Completely portable.
3. Automatic firing with adjustable time intervals.
4. Shoots the puck with a high degree of accuracy.
5. Will shoot to one position or in a random pattern on net automatically.
6. Adjustable speed from 35 MPH to 100 MPH (56 to 160 Km/H).
7. Battery operated.
8. Can be run on 115 volts.
9. Warning light to indicate when puck is about to be shot.
10. Rugged construction: minimum of moving parts.
11. Dimensions: 30" high (76cm) – 27" wide (68.5cm) – 40" long (102cm).

FOR THE BOOK

"Training with the Hockey-Mate the Professional Way"

Send \$5.95 plus \$0.50 postage and this book will show you over 70 different ways on how to use the Hockey-Mate for the training of goaltenders, forwards, defencemen and team practice alike.

Plus

How to run a goalie tournament.

TIP SHEET #103

U.S. HOCKEY/ARENA BIZ
brings the market place to you

1442. Richard F. Hess, 6 Prospect Dr., Brookfield, CT 06804
writes:

"I have been asked by the Town of Brookfield's Park and Recreation Commission to plan and organize the development and construction of a multi-purpose recreational facility. One of the items planned into the facility is an ice skating rink.

"At the present time we are in the initial stages of developing our thoughts and a target cost. It would be extremely advantageous to us to have the "Specification and Technical File" you describe in the February, 1977 (Volume 5, Number 2) issue of my copy of Hockey and Arena Biz.

"Thanking you for your consideration in this matter."

1443. On February 11th, we received a letter from Howard Morris, Athletic Director, Oregon Tech Athletic Department, Oretech Post Office, Klamath Falls, OR 97601 503/882-6321 ext. 432 saying:

"I am interested in obtaining any information or back issues that you might have of Hockey & Arena Biz that would help us sell the idea of an ice arena.

"One very positive thing that we have in our favor is a College President who comes from Michigan and has a keen interest in Ice Sports."

On the last TIP SHEET #102, February 14, 1977 item # 1440 is from the President Mr. Morris is talking about.

We have sent Mr. Morris back issues that will be of interest to him.

1444. "Bethel, Connecticut is doing a feasibility study" reports Gary Simone, Director of Parks & Recreation, Town Hall, Library Place, Bethel, CT 06801.
1445. William Chisholm, Simsbury Youth Hockey Assoc., 1 Crestview Rd., Tariffville, CT 06081 203/658-7801 reports "we are in the talking stage only".
1446. "Operational" reports Fred R. Mahr, President, Torch Lake Multi-Education Services, Inc., 429 Hecla St., Lake Linden, MI 49945 906/296-0140
1447. Bob LaVerdiere, Rink Manager, The Alford Arena At UMO Havasu Pine Forest Ave., Orono, ME 04473 reports, "We opened on February 6th, 1977".
1448. "Star Lake, New York is in the talking stage" reports David St. Louis, Coach, Clifton-Fine Hockey Assoc., Box 242, Star Lake, NY 13690
1449. Michael A. Stuart, 120 S. Walnut St., Birdsboro, PA 19508 writes, "I have been advising in the planning stages of the Reading-Berks Ice Arena, Inc. probably to be constructed during 1977.

The reports of facilities being constructed and under consideration continue at a strong pace. Some are in the initial stages, some are progressing right along. By establishing your own follow-up systems you can have a continuing means of keeping in touch with these leads.

1450. "Design and Planning stages" reports Bruce Gollnick, Superintendent of Parks, Monmouth County Park System, Box 326, Lincroft, NJ 07738 201/842-4000.
1451. "Rockaway, New Jersey is in the fund raising stage" writes Fred Daniel, Coordinator, Morris Hills Hockey Club, 26 Mohawk Ave., Rockaway, NJ 07866 201/627-5231.
1452. Frank Krupit writes, "I have just recently gotten this idea to begin a year round hockey skating rink" for more information contact Mr. Krupit, 1325 E. 19th St., Brooklyn, NY 11230 212/376-8845.
1453. Robert G. Graff, Consultant, Noreline Recreational Products, 23 Lenox Place, Freeport, NY 11520 reports "proposals".
1454. "Thinking stage" reports Theodore Gallis, 5901 N. Cicero Ave., Suite 400, Chicago, IL 60008.

1455. 'L'Anse, Michigan is planning' reports Fred Biekkola, President, L'Anse Hockey Assoc., 315 Broad, L'Anse, MI 49946 906/524-6319.
1456. Joe French, President, Crookston Hockey, 204 Gold Terrace Dr., Crookston, MN 56716 218/281-4488 reports "just starting".
1457. "Arena in operation but uncompleted" reports Aleca Ruddell, Whatcom Sports Arena, 1801 W. Bakerview Rd., Bellingham, WA 98225 206/676-8222.

You have until March 22nd to have your copy in for April U.S. HOCKEY/ARENA BIZ. This will be a well read issue because of its editorial significance. This assures you that your advertisement receives strong attention.

1458. "Conceptual plans" reports Peter Milner, Superintendent, Yellowknife Parks & Recreation, Box 580, Yellowknife, Canada
1459. "Still in the planning stages" reports Eric Stroud, Coach, Ricker College Bulldogs, Ricker College, Houlton, ME 04730 207/532-6644.
1460. Mr. Arlo Jennings, President, Jennings & Jennings, P.O. Box 5877, Asheville, NC 28803 704/684-3269 or 704/667-7643 writes, "the second stage of planning".
1461. Ray Lindquist, 1907 Kendawa Dr., Ft. Wayne, IN 46815 phoned the other day saying "he has begun discussion with officials of New Haven, Indiana concerning construction of an indoor ice facility on a 48 acre city park site. Needs information on financing and construction."
1462. "Great Falls, Montana is planning - have land (30 acres)" reports Donald P. Blumfield, President, Blumfield, Inc., 908 Central Ave., Great Falls, MT 59401 406/761-4520.
1463. Andrew Laszlo, Jr., Executive Director, Billings Amateur Hockey League, Box 1111, Bozeman, MT 59715 406/587-4276 reports "we are planning".
1464. John Van Clapp, Administration V.P., Winston Salem Amateur Hockey Assoc., 1510 Woods Rd., #109, Winston Salem, NC 27106 919/722-9990 reports "planning stage for coming season".
1465. "Planning" writes Richard D. Samrk, President, Pro's Edge Sports, Inc., 16030 Interlake N, Seattle, WA 98133 206/546-3746

Hockey management is an all year responsibility. The end of the major 1976-1977 playing season signifies the beginning of 1977-1978 year. Uniforms and equipment to be inventoried and repaired. New uniforms and equipment to be purchased.

Facilities to be built and completed for fall. Remodeling, repair, replacement to be started now.

1466. Robert J. Page, President, Peninsula Open Hockey League, 18 Southwind Dr., Hampton, VA 23669 reports "gathering information and costs to present to potential investors".
1467. "We are planning" reports John Foens, Director of Recreation, City of Cedar Rapids, 2000 Mt. Vernon Rd., SE., Cedar Rapids, IA 52403 319/398-5065.
1468. Jim Wilson, Coach, Lommis-Chaffee School, Windsor, CT 06095 reports "plans being made to build this summer".
1469. "Planning stage" reports William G. Helstrom, Principia College, Elsau, IL 62028.
1470. Mrs. Verna Elenbaas, Treasurer, Cheboygan Hockey Assoc., 411 E. Seymour, Cheboygan, MI 49721 616/627-9784 writes "we are in the planning stage".
1471. "Waddington, New York is planning" writes Joseph E. Moore, Business Manager, Waddington Minor Hockey, Inc., W. St. Lawrence Ave., Waddington, NY 13694 315/388-7887.
1472. "Annapolis, Maryland is thinking" so writes Thomas R. Hogan, Rt. 10 Box 65, Annapolis, MD 21401 301/757-3416.
1473. "Planning" reports Douglas Klein, President, Connetquot Hockey Club, P.O. Box 64, Oakdale, NY 11769 516/567-0633.

"Financing Ice and Multi-Purpose Facilities"
- the major feature in April U.S. HOCKEY/ARENA BIZ

is the most thorough article on this ever-key subject we have published.

1474. "Planning stage" writes N. Lee, Owner, 15920 Haynes St., Van Nuys, CA 91406 213/994-6938.

1475. Thomas J. McAvoy, Professor of Engineering, University of Massachusetts, Goessmann Laboratory, Amherst, MA 01003 413/545-0276 writes, "I have a class studying ways of improving a local rink. The University is also considering a rink".
1476. James M. Manguso, General Manager, Oceanside Ice Arena, P.O. Box 'L' Tempe, AZ 85281 602/947-2470 requests information on ceiling tile.
1477. "Plans are being planned now" reports Al Massaro, President, Thunder Bay Hornets Hockey Club, 310 E. Mary St., Thunder Bay, Ontario, Canada 807/622-7594.
1478. "Casper, Wyoming is planning" reports Bob Markle, V.P., Casper Amateur Hockey Assoc., 1516 S. Chestnut, Casper, WY 82601 307/234-4009
1479. James L. Case, President, Watertown Hockey Assoc., 809 Holcomb, Watertown, NY 13601 315/788-0107 reports "planning".
1480. Robert T. Biggs, V.P., Multi-Galleries, Ltd., 3721 Red Bird Circle, Roanoke, VA 24018 writes "talking and exploration".
1481. "Outdoor hockey rink only" reports J.B. Whitmore, Rink Advisor, Alaska Methodist University, Anchorage, AK 99504 907/277-4369.
1482. "Feasibility and city approval" for further details contact E.A. Eagan, President, New Britain Youth Hockey, 117 A. Brittany Farms Rd., New Britain, CT 06053.

Judging by all the nearly 150 leads sent to you since the December 17th TIP SHEET #98, there is a great deal of serious planning going on. April is an important time for you to reach those aiming for fall opening and renovating.

1483. "Portsmouth, Ohio is planning" writes J.E. Devine, Director, Public Service Dept., 55 Maryann St., Portsmouth, OH 45662 614/354-7766.
1484. Melvin J. Jacobowitz, Attorney, Investment Group, 407 Lincoln Rd., Miami Beach, FL 33139 305/534-8271 reports "investment group being formed".
1485. "Improvements" reports H.R. Dewling, Manager, P.O. Box 992, St. John's, Newfoundland, Canada.
1486. "Planning" writes Tommy Dee Products, Inc., President, 135 Cedar Grove Ave., Staten Island, NY 10306.

1487. J. Campbell, President, Campbell-Evans, Ltd., 40 Dundalk Dr., #56,
Scarborough, Ontario, Canada reports "planning".

ANNEXE 4,1.2

EVOLUTION DU HOCKEY AUX ETATS-UNIS

Vous trouverez ci-après le nombre d'équipes inscrites à l'AHAUS (Amateur Hockey Association of the United States) pour la saison écoulée. En réalité, le nombre d'équipes inscrites dépasse les chiffres figurant au tableau, parce que le Minnesota a inscrit quelques-unes de ses équipes selon l'association à laquelle elles appartenaient. Par exemple, une municipalité comme celle de Richfield est inscrite sous la rubrique Richfield Hockey Association, sans préciser le nombre d'équipes faisant partie de cette association. C'est la raison pour laquelle le Minnesota accuse une diminution du nombre de ses équipes de hockey, alors qu'en réalité, ce nombre s'accroît.

Evolution des équipes actives inscrites à l'Amateur Hockey Association of the United States:

1963-64	1,933
1964-65	2,241
1965-66	2,654
1966-67	3,231
1967-68	3,626
1968-69	3,802
1969-70	4,255
1970-71	5,465
1971-72	7,015
1972-73	9,112
1973-74	10,298
1974-75	10,844
1975-76	10,685

ANNEXE 4.1.3.1

REPARTITION GEOGRAPHIQUE DES EQUIPES ET DES JOUEURS
DE HOCKEY INSCRITS AUX ETATS-UNIS, EN 1973-1974

EVOLUTION DU HOCKEY AUX ETATS-UNIS

Etude portant sur les joueurs actifs dans le hockey amateur durant l'année 1973-1974: Nous avons mené cette étude aussi soigneusement que possible, en employant des gens de différentes régions des Etats-Unis pour nous aider à vérifier l'exactitude des renseignements recueillis. Les joueurs appartenaient à des équipes enregistrées ou à des équipes collégiales ou universitaires qui ont disputé au moins 25 matchs durant l'année.

<u>Nevada</u>	4,760		
		-----	303,080

Au cours de l'année écoulée, il y avait 220 équipes collégiales et universitaires inscrites à la NCAA et 394 équipes inscrites, affiliées à des écoles secondaires ou à des écoles préparatoires. Leur nombre était beaucoup plus élevé, surtout dans la catégorie des écoles secondaires, mais celles qui figurent ici sont les plus actives.

Pour l'année dernière, on évalue à 500,000 le nombre de joueurs de hockey très actifs ou passablement actifs. Il y a également une légion d'autres personnes qui s'occupent de hockey. Selon différentes études, de 30 à 60 millions d'Américains ont des patins.

AUTRES FACTEURS D'UNE CROISSANCE ELEVEE, OUTRE L'IMPORTANCE DEMOGRAPHIQUE ET LES NIVEAUX DES REVENUS

Outre les raisons souvent citées de développement de l'équipement de divertissement, au cours des années 70, chaque sport possède des caractéristiques propres qui peuvent faire augmenter les ventes d'équipement à un rythme supérieur à la normale, durant la présente décennie.

Détermination des facteurs de croissance élevée, pour

Government Funding for Ice Facilities

Here are two programs that might help certain communities who wish to construct an ice facility. This type of financing might be more difficult than some other routes. How closely your local officials watch and know the Washington scene will determine your chances for success.

How often is it suggested that federal funds should be sought for an ice facility? No doubt many who have been involved in raising funds for a community facility have wondered if "Uncle Sam" might be willing to help.

Two programs are described here, that might help certain communities who wish to construct an ice facility.

The first step for the community group wishing to obtain federal funding for an ice facility is to establish a strong working relationship with those local officials who are directly involved with grants applications and administration. The knowledge and resources of these people in your community will often determine your chances for receiving money.

State officials, U.S. Representatives and Senators (as well as their staff people) can also help. Some states have agencies that serve as clearinghouses for information about state and federal aids to communities. This is another possible avenue of investigation.

Preparing an application for a federal grant requires considerable skill. There are at least three prominent dangers in this process: 1) Often the proposed project must be described in a specific manner, highlighting certain uses over others in order to meet the criteria of the agency granting the funds. 2) Sometimes the project itself must be modified to meet the criteria. 3) The greatest danger of all is that, to get the money before it all disappears to other communities, you must begin pre-application procedures before any criteria on the allocation of funds have been published.

Land and Water Conservation Fund

The Bureau of Outdoor Recreation administers the Land and Water Conservation Fund which provides matching grants to State and local units of government for the acquisition and development of public outdoor and certain

indoor recreation areas and facilities. To be eligible for assistance, projects must be in accord with the statewide comprehensive outdoor recreation plan, be sponsored by a governmental agency, and meet other State and Federal requirements.

What is the Land and Water Conservation Fund Act? It is an Act established to provide funds to increase outdoor recreation opportunities for the American people. The program provides for (1) acquisition of lands for federally administered recreation areas; and (2) matching grants for State recreation planning and State as well as local land acquisition and development.

Land and Water Conservation Fund revenues are derived from the sale of Federal surplus real property, the Federal motorboat fuels tax, and Outer Continental Shelf mineral receipts.

To be eligible for assistance, projects must be in accord with the statewide comprehensive outdoor recreation plan, be sponsored by a governmental agency, and meet other State and Federal requirements.

Unfortunately, Fund assistance may not be used to provide areas and facilities needed to meet the basic physical education and athletic program requirements of a school. However, the Bureau encourages the creation of multipurpose recreation areas which will be available for coordinated use by the general public and by public schools, including colleges and universities, as an effective means of meeting local outdoor recreation needs. Assistance from the Land and Water Conservation Fund program may be provided for projects located on school grounds provided that adequate arrangements are made for use by the general public.

Persons interested in obtaining funds through the

Land and Water Conservation Fund, must first contact the state agency responsible for administering the Fund program at the State level for further information and details on application procedures if appropriate.

Before applying for financial assistance from the Fund, an applicant must file a "notice of intention" with the State or areawide clearinghouse established in accordance with the Federal Office of Management and Budget Circular A-95. The notice must be forwarded as early as possible and must include a description of the proposed project and other information needed to permit the clearinghouse to circulate the notice to others interested in the proposal. The completed application must also be submitted for clearinghouse review prior to any further action. Additional information on clearinghouse review procedures can be obtained from the Bureau of Outdoor Recreation Regional Offices.

Projects eligible for funding may vary from skating facilities to swimming pool complexes, and from inner city mini-parks to complete State parks.

The purpose of this "notice of intention" is to provide area planning agencies with control over the public projects in any given area. The Federal government wants to make sure that it is not funding two identical projects next door to each other.

Project proposals must be submitted to the appropriate Bureau of Outdoor Recreation Regional Office through the State agency (or individual) authorized to represent the State for purposes of the Land and Water Conservation Fund Act. Grants are made to the State through the State Liaison Officer, often referred to as the SLO. The SLO has the initial responsibility of determining project eligibility and priority for Fund assistance. For the name and address of the person or agency in your State, contact your Bureau of Outdoor Recreation Regional Office.

Indoor facilities now eligible

Until recently, indoor facilities have been ineligible for assistance under the Fund program. However, on September 28, 1976 the President signed Public Law 94-422 which amended the Land and Water Conservation Fund Act to allow each State to use up to 10 percent of its annual apportionment to shelter swimming pools and ice rinks (Section 6(e) (2)). Such sheltered facilities may be funded in areas where the severity of the climate and increased public use justifies the use of such funds. Criteria for making these determinations have not yet been formulated.

About 60% of the total Fund provides grants to States and, through States, to their political subdivisions (cities, counties, towns, etc.) for the acquisition and development of public outdoor recreation areas and facilities. Project grants must be matched by not less than an equal amount of non-Federal funds.

For a State or its political subdivisions to receive grants from the Fund, the State must develop a comprehensive outdoor recreation plan, and update and refine it on a continuing basis. The Fund provides matching planning grants and technical assistance to States to help develop and update comprehensive outdoor recreation plans. The

plan identifies capital investment priorities for acquiring, developing, and protecting all types of outdoor recreation resources within a State; it assures continuing opportunity for local units of government and private citizens to take part in their State's outdoor recreation and environmental planning programs; and it provides a practical tool for coordinating all State outdoor recreation and environmental conservation programs.

Projects in accord with the State comprehensive outdoor recreation needs identified in the plan are eligible for funding. They may vary from skating facilities to swimming pool complexes, and from inner city mini-parks to complete State parks. Assistance is available only for public projects. The participant (sponsoring State or local government agency) must agree to permanently dedicate projects to public recreation use, and assume responsibility for continuing operation and maintenance.

Public Works Employment Act

Another source of assistance is Title I of the Public Works Employment Act of 1976. This act authorizes grants to States or political subdivisions for local public works projects that will stimulate employment. The appropriate field office of the Economic Development Administration should be contacted for further information.

In addition to these possibilities, you may contact the Department of Health, Education and Welfare for information on any programs administered by that agency which may assist in the construction of athletic-education facilities.

They're Going Fiberglass

from
The Small Outdoor Rinks
—For Cost Savings
to
The Large Coliseums
—For Professional Uses

Tippmann FIBERGLASS Dasher Boards (NHL approved) improve and add dimension to the ever growing sport of hockey, with professional players relying more on accurate and consistent puck rebound (very characteristic of solid fiberglass dashers).

Fiberglass, being the strongest building material for its weight, enables easy and quick set-up and removal. Fiberglass requires very little maintenance as there is no wood or attached facing requiring painting or refastening.

High gloss and easy-to-clean fiberglass also resists the elements of weather and moisture.

CENTRES SPORTIFS (HOCKEY) ET RECREATIFS

Economic Development

Administration

The Public Works and Economic Development Assistance Act of 1965 provides financial assistance for construction of public facilities that encourage economic growth. Assistance is given only to those designated areas where unemployment is high. The project must deter unemployment and encourage long-term economic growth.

States and local units of government may receive loans or grants. Projects must be far enough through the planning stages that they can be started within 90 days of approval.

The EDA Public Works Impact Project is a similar program designed to provide immediate jobs for underemployed persons in designated project areas. The Impact Projects program is presently budgeted at \$15,000,000 annually. And some states are witnessing tremendous increases in the appropriations for their areas.

A smaller federal program sponsored by EDA is directed at the business community. These loans, too, are intended to encourage economic development in depressed regions.

The Land and Water

Conservation Fund

The Land and Water Conservation Fund administered by the Bureau of Outdoor Recreation is another likely source of Federal funding for ice rink construction. This program has been in existence for 13 years. Since 1968, the fund has been financed primarily by offshore oil and gas receipts. Starting this year, a portion of the appropriations may be used for the construction of indoor ice rinks and sheltered swimming pools.

As the fund was set up, 40% was slated for purchases of Federal park land, and 60% for matching grants to states for the purchase, development, or improvement of park lands.

In the fiscal year 1976, ending June 30, 1976, appropriations were \$397.5 million. Of this total, \$97.5 million were funds backlogged from previous appropriations. And at the end of the year there was still a backlog of \$150 million not disbursed.

New Legislation signed by President Ford on September 28, 1976, increases spending from \$300 million in the 1977, to \$600 million in 1978, \$750 million in 1979 and \$900 million in each year through the 1980's.

The increase in funding to states will enable them to accelerate their own basic park development plans. This means that use of the fund will be expanded — in most states — to include a wider range of athletic and recreational facilities. The Land and Water Conservation Fund could become a major source of funding for indoor rinks.

Congress has seen fit to make ice rink development possible under the increased appropriations. New this year is the provision that states where colder climates restrict outdoor recreation can use up to 10% of the funds they receive from the Land and Water Conservation Fund for sheltered swimming pools and indoor rinks, or for the construction of shelters over existing rinks or pools.

Still there is a catch to the use of these funds. States or localities must now move quickly to use the money that they receive during the year in which it is allocated. The recent legislation puts an end to the backlogging of funds by stipulating that any unused funds in the portion set aside for use by states would not be held over to the next year. Instead, these funds are to be reallocated into Federal park land acquisition programs.

In effect, states face the prospect of losing funds that are offered to them, if they do not move quickly. For the community that wishes to use the fund for construction of an ice rink, this means careful planning. The community must be ready to make application to the state agency immediately when the funds for the year become available. (The date could vary from state to state.)

Community Development Block Grants

The Block Grant program of the Community Development Act of 1974 consolidates a number of community development type programs for urban areas with a population of over 50,000.

The block grant program allows communities to divide up the grant among a broad number of community development projects. The purpose of the program is to allow communities to improve substandard housing, deteriorating facilities and neighborhoods. Monies from this program can be used for recreational facilities, but they cannot be centralized in nature. "Communities are restricted from constructing or rehabilitating public facilities for the conduct of government and certain community wide facilities, i.e., stadiums, sports arenas, cultural centers, central libraries, convention centers ..." For this reason an indoor ice rink would probably not receive funding under this program, but construction of outdoor rinks might be accepted.

Still, the program is a major one. Appropriations for fiscal year 1975 were \$1,855,008,000; for 1976, \$2,750,000,000; for 1977, and estimated \$3,248,000,000. Regulations on the use of funds have varied from year to year, so this is one program to keep an eye on.

Farmers Home Administration

Loans are available to those interested in developing recreational facilities in rural areas. Loans are available to individuals and businesses as well as to governmental units.

A number of FHA programs apply to recreational developments: Rural rental housing loans can be secured for the development of recreational projects in connection with rental housing projects. Resource conservation and development loans are available to those designated areas "where acceleration of a program of resource conservation, development and utilization will increase economic opportunities for local people. The Small Watershed Program offers assistance in the protection, development and utilization of land and water resources in small watersheds.

The Soil Conservation and Domestic Allotment Act provides project grants, advisory services and counseling to assist local people in initiating and carrying out long-range programs of resource conservation and development.

The Farmers Home Administration has had a strong interest in the development of recreation in rural areas. One example of an ice rink constructed with FHA financing is the Cottonwood County Arena, in Windom, Minnesota (see "Government Financing of Ice Facilities," October 1975 U.S. HOCKEY/ARENA BIZ).

Land Acquisition Programs

A number of Federal land acquisition programs could assist in the development of park areas where ice rinks could be built.

The Federal Property Assistance Program of the Department of Health, Education and Welfare donates surplus Federal personal and real properties to eligible organizations and institutions for use in health or educational programs. The Department of Housing and Urban Development has a surplus land program for use in the provision of low or moderate income housing. Recreational developments could be a part of these housing projects.

The Department of Interior has a Public Land Program for Recreation, Public Purposes and Historical Monuments. This program permits the lease or acquisition of available public land. The General Services Administration also has a program for the disposal of Federal surplus real property for public parks or recreation at up to 100% discounts.

These programs may have stipulations about how the property can be used. So its up to the community or the organization requesting the land to persuade the Federal Government that indoor or outdoor ice facilities conform to the intent of the program. Other Federal programs, like the Land and Water Conservation Fund and FIA Resource and Conservation Development Loans, to name just two, also provide for the acquisition of land.

Regional Commissions

Regional Commissions have been established for certain multi-state areas that the Federal Government feels are in need of additional assistance. This assistance is in the form of technical planning and counseling and outright project grants. Some commissions also have the authority to provide grants to local government so that the local share of a Federal matching grant can be met.

The seven regional planning commissions are Appalachian Regional Commission, Coastal Plains Regional Commission, New England Regional Commission, Old West Regional Commission, Ozarks Regional Commission, Pacific North West Regional Commission, and the Upper Great Lakes Regional Commission.

Communities should check with their state Governor's office to determine if they are within one of these regions. For example, portions of New York state fall within the Appalachian Regional Commission. Only those communities in that specific area of the state can file for assistance from the Regional Commission.

Hockey Equipment

Here is a categorized breakdown of leading manufactures and suppliers of hockey equipment and related hockey products, accessories and services.

Note: CAN/AM, Ltd. is a Wholesale Supplier

In addition to the major products—skates, sticks, protective gear, you will find laces, eyeglass holders, garters, boot protective polish, equipment bags and other accessories. Other team supporting categories include insurance, awards, lettering, fund raising, tickets and management items.

New.

Introducing Dynaglas.
 So new, it even has a new name.

7 layers of wood and fibreglass laminated together so it lasts longer and has a stiffer, tougher feel.

Weighs about 21 ounces (the same as regular sticks).

Fibreglass even inside the handle gives it extra strength.

NHL approved.
 (Every stick wears this official NHL hang tag.)

Bold, handsome design. Lots of pizzazz.

**Everything you
always wanted
to know about***

*But were afraid to ask

A Brief History

During the past 11 years more than 5000 young hockey players have participated in a continually enriched learning experience as students of one of the 37 Jim Campbell hockey schools and clinics. Using an approach where fundamental skill development is a first step to learning advanced team play, Jim Campbell and his staff have sought to create a school environment where players learn according to individual achievement levels based on age and ability. Learning goals are established for each player to assure maximum results within a healthy and enjoyable school experience.

In addition, Jim Campbell personally directs the skating instruction program at the School. Over the years his teaching methods have been a major factor in the development of many outstanding amateur and collegiate players.

Many schools and clinics tell a player what to do but fail to give him the knowledge and tools necessary to build his skill. During the 6 days at the Wagon Wheel, each boy is involved in a fully planned program of activities taught by professional teachers and trainers. This program concentrates on giving each player the how to do it skill needed to improve his total performance on the ice.

Teaching Is The Ability To Inspire Learning

Valeur des importations FRANCO QUAI

La valeur franco quai représente la valeur de transaction des importations au bureau étranger d'exportation. Elle est fondée sur le prix d'achat, c'est-à-dire sur la valeur réelle de la transaction et comprend généralement les frais occasionnés par l'embarquement des marchandises à bord du transporteur au bureau d'exportation du pays d'origine.

Valeur des importations C.A.F.

La valeur c.a.f. représente la valeur des importations au premier bureau d'admission aux Etats-Unis. Elle est fondée sur le prix d'achat et comprend les frais de transport, les frais d'assurance et autres frais (y compris les droits de douane américains) occasionnés par le transport des marchandises depuis le pays d'origine et habituellement l'embarquement de ces marchandises à bord du transporteur, au premier bureau d'admission aux Etats-Unis. Si l'acquisition de la marchandise se fait en vertu d'une transaction entre parties liées, le prix d'achat utilisé pour dériver la valeur c.a.f. est fondé sur un prix équivalent de transaction indépendant, c'est-à-dire un prix qui aurait cours entre acheteurs et vendeurs non liés.

PREFERENCES DANS LES CROSSES

Une enquête sur le marché en 1976

Les crosses de hockey s'achètent sans arrêt au long de la saison, et de nombreuses marques différentes peuvent se vendre en proportions variables. Il est opportun de pondérer le marché, tant par ordre de préférence qu'en évaluant le choix sur une base 3-2-1.

Pourcentage de préférence du marché à l'échelle nationale:

	<u>1er</u>	<u>2e</u>	<u>3e</u>
Manufacturier de crosses A	14.24%	13.16%	16.53%
" " " B	15.86%	22.70%	16.53%
" " " C	16.83%	14.14%	17.34%
" " " D	12.94%	8.88%	4.03%
" " " E	5.50%	1.97%	6.85%
" " " F	5.82%	6.91%	5.65%
" " " G	2.59%	4.61%	5.24%
" " " H	2.59%	2.96%	2.02%
" " " I	.003%	.099%	.081%

EXPOSITION D'ARTICLES DE HOCKEY, EN AOUT 1977, AUX ETATS-UNIS

PRESENTED BY

INC.

NATIONAL HOCKEY

EXPO

P.O. BOX 13
GREEN BAY, WISCONSIN 54305

United Expos, Inc. is proud to announce our second National Hockey and Arena Expo, to be held in Minneapolis August 12-14. National Hockey and Arena Expo is a trade show exclusively planned for the sport and business of hockey and arenas. It is the only exposition of its kind in North America!

The first show, also held in Minneapolis, attracted a total registered attendance of over 4,000 persons. They came from throughout the United States and Canada, and the follow-up correspondence which continued after the event, has extended the show's influence into several foreign countries.

WHAT TYPE OF ATTENDANCE? The following registration categories provide samples of the types of buyers who attended the first show:

- SPORTING GOODS STORES
- ARENAS
- WHOLESALE/JOBBER
- DEPARTMENT STORES
- COLLEGES/SCHOOLS
- MUNICIPALITIES
- TEAMS
- ASSOCIATIONS
- PRESS/PUBLIC RELATIONS

More than eighty exhibitors participated in the first National Hockey Expo, and they represented a variety of hockey and arena industry interests. Hockey equipment...from skates to sticks and pucks, to protective equipment. Arena equipment... from the ice surface to seating and concession equipment, scoreboards, and even the ticket office. There were also displays featuring coaches aids, arena construction, hockey fund raising, publications, and much more.

The first National Hockey Expo also presented an informative series of seminar sessions, conducted by leaders from within the hockey and arena industries. These programs were professionally produced and offered valuable information to those persons attending the new trade exposition.

The first National Hockey Expo was a success for both the participants and the thousands of registered visitors!

BUT...the SECOND National Hockey and Arena Expo promises to be even better. And there are several NEW reasons why...

NEW DATES:

The pre-fall dates of August 12-14 offer several advantages over the previous spring dates. The show will be staged at a time when pre-season interest and enthusiasm is high. Dealers, arena management, teams, and representatives will be thinking about the up-coming season. They will be ready to make decisions and place orders! And the August dates still provide sufficient time for show exhibitors to follow up on leads and orders placed at the expo.

NEW - EXPANDED EXPO FACILITIES:

This year the National Hockey and Arena Expo moves to the main level of the modern Minneapolis Auditorium and Convention Hall. This means street level convenience for those attending the show. It also means more exhibit space and a larger exposition. A total of 46,000 square feet of space will be utilized in the expanded Hockey and Arena Expo.

IMPROVED SEMINAR SESSIONS:

Several of the key seminar programs created some of the best reaction to the first National Hockey and Arena Exposition. Our goal again will be to provide sessions packed with information of value to those attending. We'll tackle the controversial topics, and send the registrant home with material and ideas that will improve his business in the coming season.

INDUSTRY MEDIA PARTICIPATION:

Several hockey and arena publications were involved and supported the first Hockey Expo. Among them were U.S. Hockey/Arena Biz, the Hockey News, Amusement Business, and Let's Play Hockey. Expanded participation can be expected for the second expo.

U.S. HOCKEY/ARENA BIZ provided important show involvement with the exhibitors message center and daily show bulletins. They will be offering this service to exhibitors again next August, and they RECOMMEND the National Hockey and Arena Exposition.

For their reactions and comments you are invited to contact either the Publisher, Fenton Kelsey; or Associate Publisher, Mary Hofer, at U.S. HOCKEY/ARENA BIZ, 2038 Pennsylvania Avenue, Madison, Wisconsin 53704. Phone: 608/249-0186.

LOCATION:

Minneapolis continues to offer the ideal location for this important trade exposition. It is in the heart of one of North America's finest hockey markets.

Minneapolis is easy to reach with air, rail, bus and truck services that meet every schedule.

The 16 million dollar Minneapolis Auditorium and Convention Hall is within walking distance of downtown hotels and motels, with more than 5,000 accommodations nearby.

The Minneapolis convention hall offers a "no hassle" exposition facility, with ease of show set-up and operation. Every service is available at a price that is reasonable.

NOW IS THE TIME...

to reserve your space in the second National Hockey and Arena trade exposition. Get an early start and see how our special show promotional programs will help you generate early season sales and good will.

A complete exhibitor packet, containing floor plans, price information, contracts and other details, is available now. Simply complete and return the enclosed postage paid reply card.

We hope to see you at the most important selling event in the sport and business of hockey...

THE SECOND NATIONAL HOCKEY AND ARENA EXPO....
August 12-14, 1977 -- MINNEAPOLIS, MINNESOTA.

NATIONAL HOCKEY/ARENA EXPO

SHOW FACTS:

LOCATION —

Minneapolis' new 16 million dollar Auditorium and Convention Hall is the ideal place for the annual NATIONAL HOCKEY/ARENA EXPO.

Minneapolis is geographically located in the center of North America's fastest growing hockey market. It is easy to reach with air, rail, bus and truck services that meet every schedule. A growing system of highways serves those who choose to come by car.

The Auditorium and Convention Hall is within walking distance of downtown hotels and motels, with more than 5,000 accommodations, ranging from single rooms to luxury suites. There is a choice of superb restaurants, good entertainment, shops and department stores nearby.

SHOW HOURS —

Friday, August 12: Noon — 6:00 pm

Saturday, August 13: Noon — 5:30 (Trade) 6:00 — 10:00 (Public)

Sunday, August 14: Noon — 6:00 pm

Show set-up: Thursday, August 11th — begins 8:00 am.

Show tear-down: After the show closes August 14th and again Monday, August 15th.

ATTENDANCE —

All persons attending the show during trade hours will be screened and registered for admittance. Firm name, address, and title will be registered, and printed lists will be available to exhibitors only, after the show has been completed.

FREIGHT:

Trailer trucks have direct access to the floor of the Exhibit Hall. Canopied loading docks 360 feet long also provide all-weather protection at other loading zones.

UTILITIES:

Services to the show include electricity, hot-cold water, gas, drains and telephone connections. Provided are 115/208, three-phase, five-wire, up to 100 Amp circuits. The latest and most efficient type of illumination is used throughout the hall, with special lighting effects available. The entire area is air conditioned, and ventilating systems provide a constant flow of fresh air and controlled temperature.

MOVE-IN AND BUILDING SERVICES —

Each exhibitor will be provided with a complete move-in packet, with easy to follow instructions and general show information. Packets will be mailed well in advance of show dates, to permit sufficient time for exhibit planning.

SUBJECT / OBJET : ACCES A L'EQUIPEMENT DE HOCKEY
 EN EUROPE DE L'OUEST

Comme je vous l'ai dit au cours de notre conversation téléphonique d'aujourd'hui, notre bureau est en mesure de fournir des renseignements à jour au sujet des importations de produits canadiens dans les pays de la C.E.E. et d'autres pays de l'Europe de l'Ouest.

A ce sujet, je joins une série de listes tarifaires s'appliquant à toute la gamme des articles de hockey énumérés dans votre télex du 17 février 1977 et importés par la Communauté et divers Etats membres de l'Association Européenne de Libre-Echange (A.E.L.E.).

A.L. Stevenson

LISTE DES TARIFS

DIVISION DE L'EUROPE DE L'OUEST I, BUREAU DE L'EUROPE

DATE: le 17 mars 1977

COMMUNAUTE ECONOMIQUE EUROPEENNE

(Belgique, France, Allemagne, Italie, Luxembourg, Pays-Bas, Danemark,
Royaume-Uni, Irlande)

Les droits de douanes figurant ci-dessous s'appliquent, pour autant que nous le sachions, aux produits importés par les Etats membres, en provenance de tous les pays qui ne font pas partie de la CEE ou ne sont pas associés avec celle-ci.

NUMERO TARIFAIRE

TAUX DE DROIT

97.06C	Patins à glace)	
	Patins de hockey)	
	Crosses de hockey)	9.5%
	Lames de patins à glace)	
65.06	Casques de hockey	9.5%
64.06	Epaulières, coudières et genouillères	9.5%
64.01	Culottes de hockey	17%
42.03B11	Gants de hockey	11%
84.59E	Machines servant à l'entraînement	6%

VALEUR IMPOSABLE

Les droits sont perçus sur la valeur c.a.f.

La valeur c.a.f. des biens est le coût, l'assurance, le fret et tous autres frais:

- (a) sur les marchandises importées par mer - jusqu'au port où les marchandises sont débarquées ou transbordées;
- (b) sur les marchandises importées par air - jusqu'à l'endroit où les marchandises franchissent la frontière de la Communauté.

TAXES

En plus des droits de douane susmentionnés, l'importation de ces produits est sujette à la taxe de vente suivante, calculée d'après la valeur à l'acquitté, c'est-à-dire la valeur c.a.f. plus le montant des droits de douane. (La production nationale est sujette à la même taxe.)

Danemark	15%	France	20%	Irlande	16.4%
Allemagne	11%	Belgique	18%	Royaume-Uni	10%
Italie	20%	Pays-Bas	16%	Luxembourg	10%

CONTROLE DES IMPORTATIONS

Ce produit n'est pas sujet au contrôle des importations.
