DÉCALCOMANIES IMPRIMÉES

INTRODUCTION

Le présent rapport fait partie d'une série de documents destinés à mieux faire connaître les possibilités de fabrication au Canada.

IMPORTATIONS CANADIENNES

Les pages qui suivent présentent des données sur les importations du produit suivant :

<u>Description</u>	<u>Code des marchandises</u>	<u>IMPORTATIONS TOTALES</u>		<u>% de l'écart 1986-1987</u>
		<u>1986</u>	<u>1987</u>	
		<u>(en millions \$ CAN)</u>		
Décalcomanies imprimées	895-28-10	13,4	16,6	+24

Les importations canadiennes sont énumérées à l'annexe A, à la page 8.

PRODUCTION CANADIENNE

On dénombre au moins cinquante fabricants de décalcomanies imprimées au Canada. Statistique Canada rapporte que les expéditions se chiffraient à 24,9 millions de dollars en 1985, ce qui représente une augmentation de 47 % par rapport à 1984. Le marché national apparent était évalué à 35,0 millions de dollars en 1985, et à 40,8 millions de dollars en 1986.

EXPORTATIONS CANADIENNES

Statistique Canada ne publie pas de données distinctes sur les exportations de décalcomanies imprimées. Les exportations de décalcomanies imprimées effectuées par le Canada en 1987 sont évaluées à 2 millions de dollars.

IMPORTATIONS AUX ÉTATS-UNIS

En 1987, d'après le Ministère du Commerce des États-Unis, les importations américaines de décalcomanies imprimées (sauf les jouets) en provenance de tous les pays ont totalisé 38,4 millions de dollars canadiens. Le Canada est intervenu pour une valeur de 1,9 million de dollars canadiens.

RÉSUMÉ DU MARCHÉ

Une décalcomanie imprimée est un dessin, une illustration ou du lettrage appliqué sur une pellicule de transfert et imprimé ultérieurement sur une autre surface. Ces images sont reproduites en une ou plusieurs couleurs au moyen d'un procédé d'imprimerie. Certaines décalcomanies sont imprimées sur feuilles métalliques. Les décalcomanies imprimées peuvent être appliquées sur à peu près n'importe quelle surface lisse. On en fait une vaste utilisation pour les marques de commerce, les plaques signalétiques, les enseignes, les slogans publicitaires et les instructions de même que pour les décorations sur la céramique, la vaisselle de plastique, la verrerie et les jeux pour enfants.

Le marché canadien des décalcomanies imprimées serait passé de 28,6 millions de dollars en 1983 à 41 millions de dollars en 1986, ce qui représente une augmentation annuelle moyenne de 13 %. Au cours de cette période, les importations ont baissé de 14,4 à 13,4 millions de dollars, et leur part du marché canadien est tombée de 50,4 % en 1983 à 32,8 % en 1986. Cependant, les importations ont augmenté de 16,6 millions de dollars en 1987. Les États-Unis sont de loin les plus grands fournisseurs de décalcomanies imprimées du Canada.

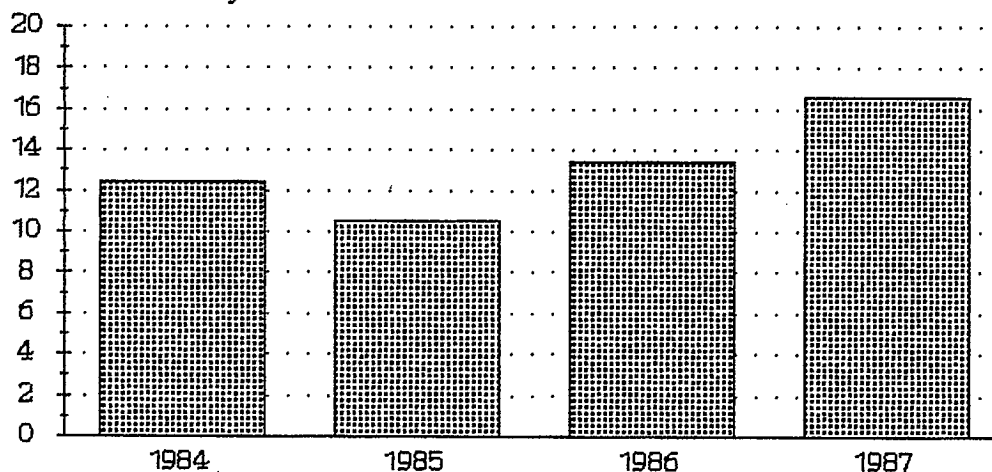

Environ 50 entreprises canadiennes fabriquent des décalcomanies imprimées. La grande majorité de ces entreprises sont classées dans le secteur de l'imprimerie commerciale. Plusieurs d'entre elles impriment également d'autres produits d'identification comme les étiquettes et labels. Statistique Canada ne publie pas de données distinctes sur les exportations de décalcomanies imprimées. On estime que les exportations ont atteint 2,1 millions de dollars en 1987, niveau trois fois plus élevé que celui de 1986. Quatre-vingt-dix pour cent des exportations auraient été effectuées sur les marchés américains.

On prévoit que la demande de décalcomanies imprimées sur le marché canadien augmentera de façon passablement constante à moyen terme et fournira donc de solides occasions d'augmenter la production au Canada.

NOTES EXPLICATIVES

Évaluation

En général, les importations sont consignées selon les valeurs établies aux fins des droits de douane, conformément aux dispositions de la Loi sur les douanes. Pour la plupart des transactions entre entreprises non-affiliées, les valeurs en douane sont identiques aux prix de vente. Cependant, pour beaucoup de transactions entre entreprises affiliées, les valeurs en douane sont supérieures aux prix de vente. Toutes les valeurs sont exprimées en dollars canadiens (droits de douane non inclus).

Taux de croissance moyen

Le taux de croissance moyen est calculé sur la base des taux d'accroissement composés annuels.

Total

Le total peut ne pas correspondre à la somme des chiffres, étant donné que ceux-ci ont été arrondis.
