

COMMUNICATIONS CANADA
PACIFIC REGION

A COMPARATIVE ANALYSIS CONCERNING THE
AVAILABILITY AND QUALITY OF TELEVISION
RECEPTION WITHIN COMMUNITIES OF
BRITISH COLUMBIA AND THE YUKON.

VOLUME II - APPENDIX

AUGUST 1973

APPENDIX TABLE OF CONTENTS

APPENDIX A TELEVISION COVERAGE AND OTHER CONSIDERATIONS

Introduction

Part I Percentage breakdown of community response to Sections B (Television Coverage) and C (Other Considerations)

Part II Correlations of questions from Sections B (Television Coverage) and C (Other Considerations) of the questionnaire.

APPENDIX B SUPPORTING COMMUNITY DATA

Introduction

Map Index

Community Data Subsections A to R

Community Data Summary

Community Data Index

INTRODUCTION TO APPENDIX A

A total of 531 citizens were interviewed throughout 217 communities of British Columbia and the Yukon.

The following appendix contains two parts. Part I is a cumulative percentage breakdown of community response to the questions listed in sections B (Television Coverage) and C (Other Considerations) of the questionnaire. Part II is a cross-tabulation of some of those questions. These cross tabulations represent correlations between selections of two questions and selections of three questions.

Some of the cross-tabulations available to the project team were excluded from this appendix. Only those which were of direct concern to the report were selected. A full copy of the cross-tabulations, however, has been left with the Pacific Regional Office for those who wish additional information.

PART I

PERCENTAGE BREAKDOWN OF COMMUNITY RESPONSE
TO SECTIONS B AND C OF THE QUESTIONNAIRE

Question No. 1

Does your area receive television coverage?

97.5% YES 2.5% NO

Question No. 3

Do you own a television set?

97.5% YES 2.5% NO

Question No. 4

Do you have access to a television set?

98.3% YES 1.7% NO

Question No. 5

Is it black and white?

59.4% YES 40.6% NO

Question No. 6

Is it colour?

40.3% YES 59.7% NO

Question No. 7

If colour, does your set receive colour?

96.7% YES 3.3% NO

Question No. 8

In your opinion, is the colour quality good, fair or poor?

45% GOOD 45.9% FAIR 9.1% POOR

Question No. 9

Do you have cable television?

34.4% YES 65.6% NO

Question No. 11

If you have T.V., would you prefer not to have it?

5.5% YES 94.5% NO

Question No. 12

If you do not have T.V. reception, would you prefer to have it?

93.3% YES

6.7% NO

Question No. 13

If you receive only one television station, would you prefer to receive an additional one?

95.4% YES

4.6% NO

Question No. 14

If your area had cable television, would you wish to have it?

69.8% YES

30.2% NO

Question No. 15

Are you satisfied with your television reception?

52.4% YES

47.6% NO

PART II

CORRELLATIONS OF QUESTIONS FROM SECTIONS B
(TELEVISION COVERAGE) AND C (OTHER CONSIDERATIONS)
OF THE QUESTIONNAIRE

OFF-AIR SIGNALS

70.9% of those residents interviewed who owned black and white television sets received off-air signals.

56.0% of those residents interviewed who owned colour television sets received off-air signals.

55.1% of those residents interviewed who received off-air signals were dissatisfied with their television reception.

58.9% of those residents interviewed who owned black and white television sets and received off-air signals were dissatisfied with their reception.

95.2% of those residents interviewed who received only one off-air signal preferred to receive an additional signal.

46.9% of those residents interviewed who owned colour television sets and received off-air signals were dissatisfied with their television reception.

42.2% of those residents interviewed who owned colour television sets and received off-air signals considered their colour signal quality to be good, while 44.8% of them considered it to be fair and 12.9% considered it to be poor.

92.6% of those residents interviewed who received off-air signals and were dissatisfied with their reception still preferred to receive television.

CABLE TELEVISION

33.9% of those residents interviewed who had cable television were dissatisfied with their reception.

100% of those residents interviewed who received only one television station and had cable television preferred to receive an additional station.

41.6% of the residents interviewed who owned black and white television sets and had cable television were dissatisfied with their reception.

26.1% of those residents interviewed who owned colour television sets and had cable television were dissatisfied with their reception.

48.9% of those residents interviewed who owned colour television sets and had cable television considered the colour signal quality to be good, while 46.7% of them considered it to be fair and 4.3% considered it to be poor.

64.7% of those residents interviewed who stated they wished to have cable television if their area had it were dissatisfied with their present reception.

25% of those residents interviewed who had television, but preferred not to have it, had cable television.

29.1% of those residents interviewed who owned black and white television sets had cable television.

44% of those residents interviewed who owned colour television sets had cable television.

95.1% of those residents interviewed who had cable television and were dissatisfied with their reception still preferred to have cable television.

RECEPTION OF ONLY ONE TELEVISION SIGNAL

65.2% of those residents interviewed who received only one television station and preferred to receive an additional one were dissatisfied with their reception.

70.3% of those residents interviewed who owned black and white television sets, received only one television station and preferred to receive an additional one, were dissatisfied with their reception.

55.7% of those residents interviewed who owned colour television sets, received only one television station and preferred to receive an additional station, were dissatisfied with their reception.

77.8% of those residents interviewed who owned black and white television sets, received only one television station and preferred not to receive an additional station, were dissatisfied with their reception.

SATISFACTION OF RECEPTION FOR COLOUR VERSUS BLACK AND WHITE TELEVISION SETS

39.8% of those residents interviewed who owned colour television sets were dissatisfied with their reception.

53.9% of those residents interviewed who owned black and white television sets were dissatisfied with their reception.

INTRODUCTION

The following appendix describes the quality, type and status of television reception for each community surveyed. The appendix is divided into sub-sections (under the headings A to R), with each representing an area within B.C. and/or the Yukon. An index of the communities and two maps have been provided for each sub-section. The second map is a modified version of the first and identifies each community surveyed by a code number.

KEY TO CODE NUMBER

The code assigned to each location on the modified maps describes the status and type of broadcast undertaking.

The first three digits indicate the community surveyed. The letters assigned after the digits denote the type of broadcast undertakings(s) utilized by the interviewee. The letters are as follows:

- C Licensed CATV System
- S Licensed Canadian Satellite
- FS Licensed Canadian Satellite Transmitting a Non-Canadian Signal
- T Licensed Canadian Television Station (Studio)
- FT Non-Canadian Signal (off-air pickup)
- ER Anik Earth Station (Telesat Domestic Communications Satellite)
- N No reception
- * Any letter displaying this symbol denotes an unlicensed broadcast undertaking.

Example:

004/S.FS*

004/ represents the community surveyed - Argenta

S.FS* indicates that the residents interviewed in Argenta are receiving television signals from (S) a licensed Canadian satellite and (FS*) an unlicensed Canadian satellite transmitting a non-Canadian signal.

COMMUNITY DATA FORMAT

The community data which follows each map section contains the type and quality of television received at the time of the interview.

The data is arranged according to the type of antenna system used by the interviewee. Three classifications were used for antenna systems : cable (CATV), Rooftop and Other (Rabbit-ears or Rod Antenna).

The channels listed do not necessarily represent all the television signals carried by the CATV company. The channels listed represent only those signals which were graded or viewed at the time of the interview. Several CATV companies throughout the southern portion of B.C. carry the U.S. Public Broadcasting Stations which transmit later in the day and were not transmitting at the time of the interview. In such cases, they were excluded from the survey. CATV systems may also carry FM radio stations on their unused channels. These were also excluded as the project was concerned only with the quality of television broadcast undertakings.

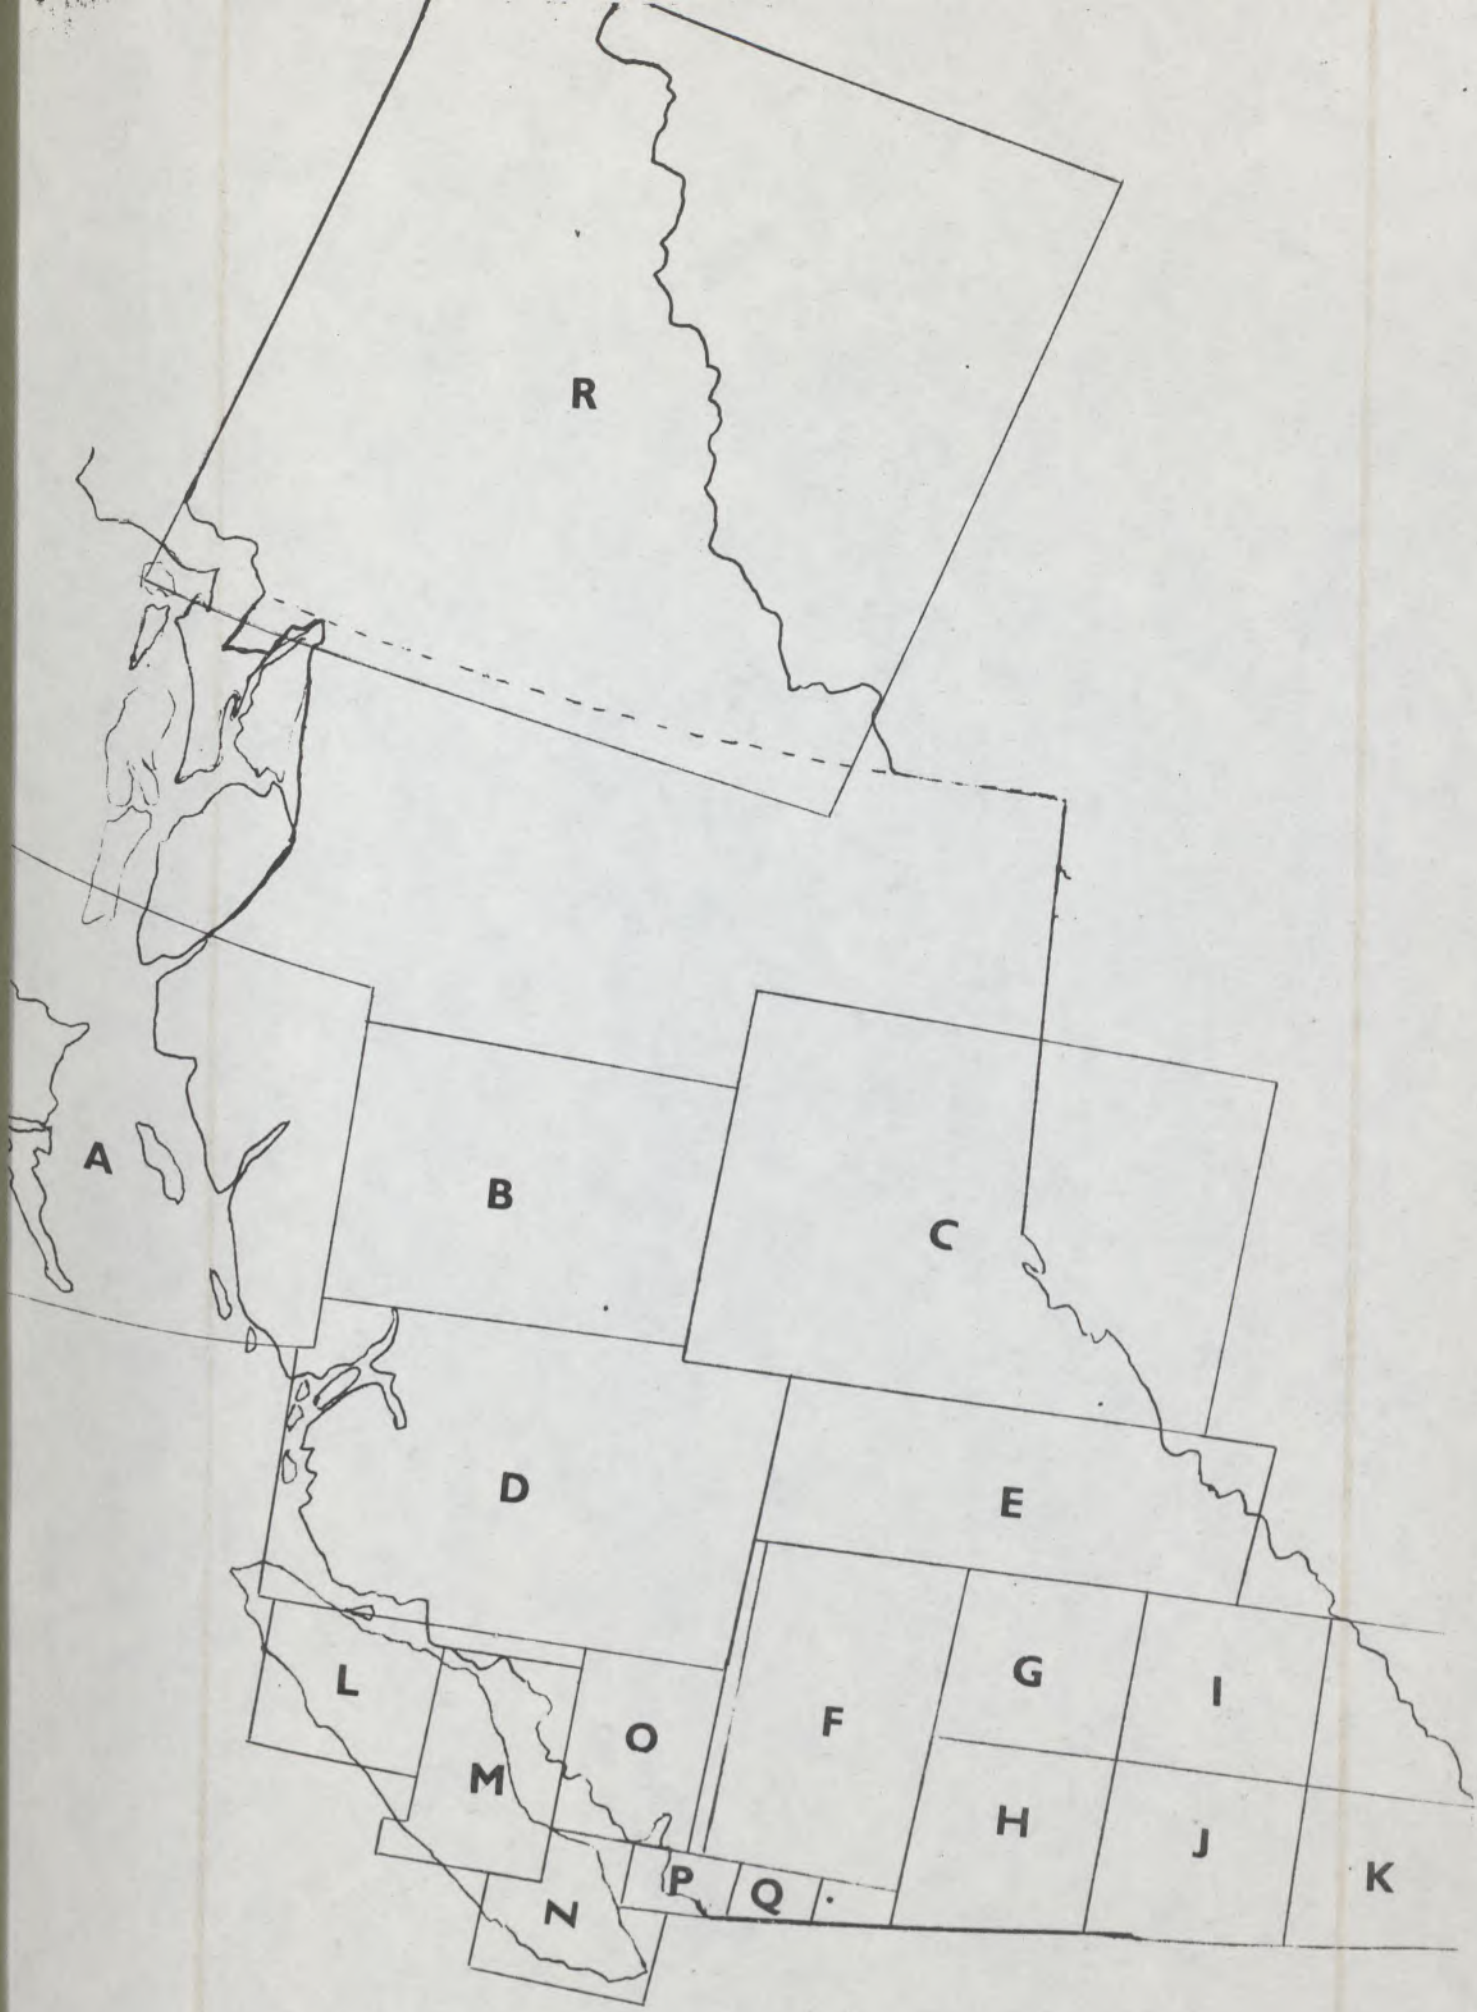

DESCRIPTION OF GRADING

PICTURE QUALITY

NUMBER	NAME	DESCRIPTION
1	Excellent	The picture is of extremely high quality, as good as you could desire.
2	Fine	The picture is of high quality providing enjoyable viewing. Interference is slightly noticeable.
3	Passable	The picture is of acceptable quality. Interference is not objectionable.
4	Marginal	The picture is poor in quality and you wish you could improve it. Interference is somewhat objectionable.
5	Inferior	The picture is very poor but you could watch it. Definitely objectionable interference is present.
6	Unusable	The picture is so bad that you could not watch it.

SOUND QUALITY

NUMBER	NAME	DESCRIPTION
1	Excellent	The sound is of extremely high quality, as good as you could desire.
2	Fine	The sound is of high quality. Interference is slightly noticeable.
3	Passable	The sound is of acceptable quality. Interference is not objectionable.
4	Marginal	The sound is poor in quality and you wish you could improve it. Interference is somewhat objectionable.
5	Inferior	The sound is very poor in quality but you could hear it. Definitely objectional interference is present.
6	Unusable	The sound is so bad that you could not hear it.
