APPLICATION DES SATELLITES AU DOMAINE DE LA RADIO-MOBILE CANADIENNE: ETUDE DE SYSTEMES

BIBLIOGRAPHIE

pour

Ministère des Communications du Canada, Ottawa

Pour la réalisation complète du contrat no. OSU81-00189 du Ministère des Approvisionnements et Services, réalisé du 17 juillet 1981 au 31 mars 1982.

Chercheur principal:

Roger Goulet

Chercheurs associés:

Noël Boutin
Hui Shen Chi

Sarto Morissette
Directeur CRCS

Sherbrooke, Québec
27 mars 1982

BIBLIOGRAPHIE

Cette bibliographie est le résultat d'une recherche informatisée effectuée à la Bibliothèque des Sciences de l'Université de Sherbrooke pour une bonne part et, pour le reste, d'une recherche effectuée par les moyens plus classiques, surtout dans le cas des documents les plus récents. Les banques de données consultées sont celles du NTIS (National Technical Information Service, U.S. Department of Commerce) et de l'Engineering Index.

De toutes les références obtenues, nous n'avons conservées, à ce moment-ci, que celles qui nous paraissaient les plus pertinentes et que nous avons déjà pu obtenir. Par ailleurs, une mise à jour périodique s'effectue au fur et à mesure que de nouveaux documents nous arrivent. A notre avis, le format de présentation retenu facilite cette mise à jour.

La bibliographie est divisée en deux INDEX, l'un d'AUTEURS, l'autre de SUJETS.

L'index "Auteur" présente les références par ordre alphabétique d'auteur, le nom de l'auteur principal prévalant toujours dans les cas d'auteurs multiples; les noms des auteurs secondaires apparaissent alors au-dessous du nom de l'auteur principal. Enfin, dans le cas de documents sur lesquels n'apparaît aucun auteur particulier, le nom de la firme ou organisme d'où émane le document est cité comme auteur.

L'index "Sujets" reprend les références de l'index précédent mais, cette fois-ci, en fonction de sujets principaux. Dans cet index, une même référence pourra apparaître à plus d'une reprise si différents sujets y sont abordés. Enfin, il faut prévoir que de nouveaux sujets apparaîtront dans cet index au fur et à mesure que nos recherches avanceront. Ceci pourra provoquer une reclassification de certains documents.

INDEX AUTEUR
