## TOME III

### LES SOCIETES OEUVRANT DANS LE SECTEUR DE LA SOUDURE ELECTRIQUE

#### INTRODUCTION

Le répertoire des sociétés oeuvrant dans le domaine de la soudure électrique a été compilé à partir de l'organe de communication de l'industrie "Canadian Welder and Fabricator". A la suite de la compilation des questionnaires et interviews téléphoniques, nous avons éliminé environ 20% des sociétés qui n'étaient directement liées à l'industrie de la soudure électrique.

Pour les fins de ce répertoire, les sociétés sont classées en trois grandes catégories:

- 1) Manufacturier
- 2) Manufacturier et distributeur
- 3) Distributeurs

Parmi les manufacturiers, on retrouve certaine société qui manufacture une grande partie de leur produits et la gamme est complétée en agissant comme importateur ou distributeur principal des produits complémentaires.

Seul les principaux distributeurs sont mentionnés.

Grâce aux botins industriels tel que le "Scott", "Dun & Bradstreet", nos appels téléphoniques et les questionnaires, nous avons pu indiquer les ventes annuelles en 1975 ~ 1976, le nombre d'employés, et si la société est une filiale d'une autre. Pour certains cas, il fut impossible d'obtenir une ou plusieurs de ces trois informations, généralement il s'agissait de petites entreprises et dans d'autres cas, les sociétés désiraient la confidentialité.
