FOREWORD

Undertaken by the Program Evaluation Branch of the Canada Department of Regional Economic Expansion with the cooperation and assistance of the Government of Prince Edward Island, the following inventory compilation was approved jointly by Canada and the Province under "The Development Plan for Prince Edward Island".

Presented whenever possible as a time series from 1961 - 1970, the data inventory is intended to give a statistical picture of all the important sectors of P.E.I. influenced by "The Plan". As data for the Atlantic Provinces and Canada are given in many instances, comparisons can be made among various regions of Canada.

The Inventory's uses are expected to be many. Those wishing to study the Island may use the data to measure the provincial economic and social environment discretely or they may choose to project the data to simulate baseline conditions. However, it should be recognized that since "The Development Plan for Prince Edward Island" is comprehensive in scope and is in fact designed to effect major revisions in the Island make-up, the trends apparent in the time series may well shift dramatically.

It is anticipated also that individual program and project managers of "The Plan" will use the data for management purposes. Implementors, armed with both trend patterns and actual figures, may be able to establish yardsticks with which to effectively gauge their own performance and formulate macro-goals for which to strive.

Continued updating of this document would be desirable if it is to retain its currency. We anticipate that this will be agreed to and will occur.

The data, compiled by Messrs. T. Brennan, R. Callaghan, J. Cronier, J. Gibson and T. Rankin under the supervision of M. Parnes was amassed during the three month period, June - August, 1971.

The authors wish to thank the following persons for their cooperation in allowing the researchers liberal use of their facilities and providing the information so vital to the preparation of this data inventory:

SECTION 5 MANUFACTURING

MANUFACTURING

The percentage contribution of manufacturing to the net value of commodity production is second only to that of agriculture. In 1968 the net value added was approximately 25.0%. The food and beverage industries constitute the bulk of the P.E.I. manufacturing sector as indicated by Chart I,

BY SALES VALUE

Source: Howard, T. B., Industrial Audit and Study of Manufacturing and Processing Industries on P.E.I., New Brunswick Research and Productivity Council, Fredericton, N.B., 1967.

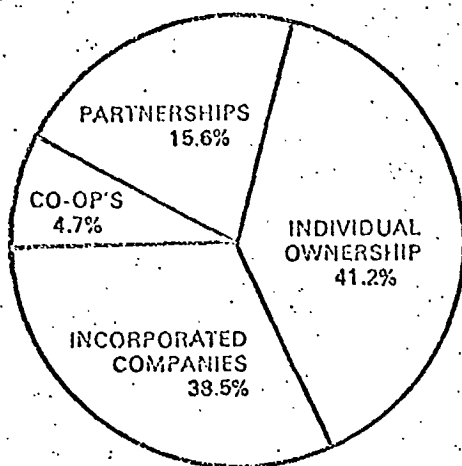

Of all firms in the manufacturing industry in P.E.I. 41.2% were owned by individuals. The percentage of incorporated companies was 38.7% the lowest of any province in Canada. However, these companies accounted for 87.8% of the total value of factory shipments. Table I shows the percentage distribution of the value of factory shipments by type of organization while Chart II shows the distribution by type of organization for the manufacturing industry of P.E.I. for the year 1964.

CANADA

The size distribution of firms in P.E.I. shows that the largest percentage of factory shipments was accounted for by a relatively small number of firms: 5.4% of the firms (50 employees and over) produced 52.9% of all factory shipments while 52.7% of all firms produced only 4.5% of all shipments. A higher percentage of firms employ small numbers of people in P.E.I. than for Canada as a whole.

*Predicted

1. Calculated: Wage and salary bill divided by employment; but it should be noted that using the month of October distorts the figures somewhat in that the figures are not equivalent to the yearly average; in fact they are higher and thereby make the average incomes appear lower than is the case.
