Trademarks Journal

Vol. 71 No. 3628

General Information

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Trademark Description

The mark consists of a design applied to the front and back of the goods each contained within a black rectangle. The front in the lower half is divided by a green arch separating a yellow green field from a gray field that includes white squares in the background. The yellow green field is stippled with fine white dots. Over the gray squares are the words 'disposable' in black above 'fly trap,' in larger black font with gray and black edging, over the words 'add water. subtract flies.' in black. Above the 'p' in 'trap' is a stylized image of a black, white and green fly with red eyes. In the upper half above the gray and green field is a cross hatch design consisting of black squares against a white background. At the top of the image is a half circle with three images of black

scissors. The top half of the image of the back of the back label is a mirror image of the front cross hatch design. The lower half of the back image shows a centered gray field containing an illustration with black and white images numbered in light green 1 through 8 illustrating instructions on use of the goods that includes scissors, hands, and water pitcher.

Colour Claim

Colour is claimed as a feature of the trademark. The colours warm gray (Pantone 11 C) and red (Pantone 485C) are claimed as a feature of the mark. The mark consists of the rhombus with warm gray (Pantone 11 C) and red (Pantone 485C) colours on the left side of the mark, the word "ECOSOL" with the all letters in the colour warm gray (Pantone 11 C) on the top right side of the mark and the word "STONE" with the all letters in the colour red (Pantone 485C) on the bottom right side of the mark. The rhombus consists of four smaller rhombuses with two different sizes. Each rhombus is a single colour - warm gray (Pantone 11 C) and red (Pantone 485C). The colours of the individual rhombuses are, clockwise starting from the top left rhombus, warm gray (Pantone 11 C), red (Pantone 485C), warm gray (Pantone 11 C) and red (Pantone 485C). All of the mark elements are separated by a white space, with the mark appeared on a white background. Only two red (Pantone 485C) rhombuses are joined by one angle. *Pantone is a registered trademark.

electricity generator systems; electronic and electric controls, computer hardware and software for controlling turbines, rotors, turbine impellers, turbine blades and rotor blades for fluid flow, tidal, wave power plants; energy controller, apparatuses and instruments for the switching, transformation, storage, control and conduction of energy, being electric current switches, circuits for heavy current, electric transformers, electric cables and wires, electric control panels, electric capacitors, electric switch plates, electric conductors for transformers, electric connectors, electrical disconnects for stopping the flow of electricity in an electrical circuit, electrical converters, electricity conduits, electricity limiters, electricity distribution consoles, monitoring modules for measuring fluid and tidal flow through hydroelectric generators for electrical impedance and voltage to ensure electrical efficiency; photovoltaic solar modules; solar cell boards; solar battery charging apparatuses, being photovoltaic installations for generating solar electricity to be stored in electrical batteries; solar cells, solar batteries for industrial purposes; solar collectors for the power generation; monitoring and controlling apparatus and systems consisting of electronic sensors, transmitters and receivers and customizable computer software which allows users to monitor and assess current water flow, fluid flow and energy generation for the condition, operation and performance of water, fluid flow, tidal, wind, wave, solar, geothermal energy and solar heat power plants; monitoring and controlling apparatus and systems for the operation of power generation systems, namely, electricity generators and electricity generator systems, consisting of computer software which allows users to monitor and assess current water flow, fluid flow and energy generation, computer hardware, electronic sensors, transmitters and receivers; monitoring and controlling apparatus and systems consisting of electronic sensors, transmitters and receivers and customizable computer software which allows users to monitor and assess current water flow, fluid flow and energy generation for the operation and performance of turbines, rotors, turbine impellers, turbine blades and rotor blades for fluid flow, tidal and wave power plants; computer hardware and downloadable software for receiving, storing, processing, transmitting and displaying data which allows users to assess the energy production and energy efficiency of water, fluid flow, tidal, wave, wind, wave, solar, geothermal energy and solar heat power plants; computer hardware and software for use with monitoring and controlling electricity generators and electricity generator which allows users to assess the energy production and energy efficiency of electricity generators and electricity generator systems; computer hardware and software for monitoring and controlling the condition, operation and performance of water, fluid flow, tidal, wind, solar, geothermal energy and solar heat power plants, on site and remote; computer hardware and software for monitoring and controlling turbines, rotors, turbine impellers, turbine blades and rotor blades for fluid flow and tidal power plants, on site and remote; error recording electric sensors and computer hard drives for recording and storing data resulting from monitoring and controlling the condition, operation and performance of water, fluid flow, tidal, wind, wave, solar, geothermal energy and solar heat power plants, power generation systems, electricity generators and electricity generator systems, turbines, rotors, turbine impellers, turbine blades and rotor blades for fluid flow and tidal power plants; electric and electronic sensors, being automatic solar tracking sensors, digital humidity sensors, digital liquid level sensors, distance sensors, electronic sensors for measuring solar radiation, flame sensors, gas sensors, humidity sensors, hydrogen detection sensors for hydrogen generators, liquid level sensors, metering systems comprised primarily of flow meter and electric calibration sensor for measurement of the flow rate and volume of water, photoelectric sensors, pressure sensors, proximity sensors, remote temperature sensors, temperature sensors, thermopile infrared sensors, vibration sensors, water level sensors, velocity sensors, for measuring data for monitoring and controlling the condition, operation and performance of water, fluid flow, tidal, wave, wind, solar, geothermal energy and solar heat power plants, power generation systems, electricity generators and electricity generator, turbines, rotors, turbine impellers, turbine blades and rotor blades for fluid flow and tidal power plants; vibration sensors; electric sensors,

being automatic solar tracking sensors, digital humidity sensors, digital liquid level sensors, distance sensors, electronic sensors for measuring solar radiation, flame sensors, gas sensors, humidity sensors, hydrogen detection sensors for hydrogen generators, liquid level sensors, metering systems comprised primarily of flow meter and electric calibration sensor for measurement of the flow rate and volume of water, photoelectric sensors, pressure sensors, proximity sensors, remote temperature sensors, temperature sensors, thermopile infrared sensors, vibration sensors, water level sensors and velocity sensors; industrial calibration sensors, being automatic solar tracking sensors, digital humidity sensors, digital liquid level sensors, distance sensors, electronic sensors for measuring solar radiation, flame sensors, gas sensors, humidity sensors, hydrogen detection sensors for hydrogen generators, liquid level sensors, metering systems comprised primarily of flow meter and electric calibration sensor for measurement of the flow rate and volume of water, photoelectric sensors, pressure sensors, proximity sensors, remote temperature sensors, temperature sensors, thermopile infrared sensors, vibration sensors, water level sensors and velocity sensors; fluid level sensors; optical sensors; photoelectric sensors; pressure sensors; proximity sensors; sensors for the determination of temperatures, positions, distances, velocity and acceleration; timing sensors; ultrasonic sensors; security equipment for water, fluid flow, tidal, wind, solar, geothermal energy and solar heat power plants, power generation means and systems, electricity generators and electricity generator systems, turbines, rotors, turbine impellers, turbine blades and rotor blades for fluid flow, wave and tidal power plants, namely security motion sensors and cameras for water; environment monitoring system, comprising counters and sensors, namely particle counters for measuring air quality and sensors measuring pressure, water flow, humidity and temperature, measuring pressure, water flow, humidity and temperature; nautical sensor, being position sensors and navigation systems, being global positioning system (GPS) receivers and transmitters for positioning, setting, aligning, controlling, securing and tracing fluid flow, wave and tidal power plants; frequency inverters; frequency converters; electric transformers; current converters; power supply converters; power supply filters, being AC/DC power supplies; inverters for power supply devices; anodes; plastic housings for electrical circuits, electrical converters, electricity conduits, electricity limiters, electricity distribution consoles and monitoring modules; watertight housings for electrical circuits, electrical converters, electricity conduits, electricity limiters, electricity distribution consoles and monitoring modules; pressure-resistant housings for electrical converters, electricity conduits, electricity limiters, electricity distribution consoles and monitoring modules; power supplies being electrical circuits, electrical converters, electricity conduits, electricity limiters, electricity distribution consoles and monitoring modules; capsulated electronic and electrical controls, control modules, apparatuses circuitry and switches, being electrical circuits, electrical converters, electricity conduits, electricity limiters, electricity distribution consoles and monitoring modules; capsulated measurement devices, being depth gauges, flow gauges, level gauges, liquid-level gauges, pressure gauges, temperature gauges, water level gauges and water temperature gauges; watertight electrical connectors, plugs and sockets; internal cooling elements and cooling devices for electronic and electrical controls, control modules, circuitry, switches and measurement devices, namely, central processing unit (CPU) fans, internal cooling fans for computers, coolers for processors for data processing apparatus, fluid coolers for processors, liquid coolers for processors, coolers for electronic components, and active coolers for electronic components; temperature controls, being remote temperature sensors, sensors for determining temperature, temperature alarms, temperature gauges, temperature indicators, temperature meters for industrial purposes, temperature meters for scientific use, temperature monitors for industrial purposes, temperature sensors, temperature switches, temperature transmitters, thermopile infrared temperature sensors, water temperature gauges, wired temperature sensors; uninterrupted power supply devices, namely electrical storage batteries, general purpose batteries, lithium batteries,

high tension batteries, solar batteries, solar-powered rechargeable batteries, rechargeable electrical storage batteries, rechargeable general purpose batteries, rechargeable lithium batteries, rechargeable high tension batteries, rechargeable solar batteries, solar-powered rechargeable batteries, battery chargers for electrical storage batteries, general purpose batteries, lithium batteries, high tension batteries and solar-powered batteries; power supply units, namely, electrical storage batteries, general purpose batteries, lithium batteries, high tension batteries, solar batteries, solar-powered rechargeable batteries, rechargeable electrical storage batteries, rechargeable general purpose batteries, rechargeable lithium batteries, rechargeable high tension batteries, rechargeable solar batteries, solar-powered rechargeable batteries, battery chargers for electrical storage batteries, general purpose batteries, lithium batteries, high tension batteries and solar-powered batteries; apparatuses for the uninterrupted power supply; uninterrupted power supplies in the form of batteries.

Services

Class 37

(1) Mounting, installation, maintenance and repair of water, fluid flow, tidal, wave, wind, solar, geothermal energy and solar heat power plants, energy generation systems being electric power generators, electrical generators using solar cells, electrical generators using hydrogen fuel cells, electric power generators using geothermal power, gas operated power generators, generators for wind turbines, hybrid electric power generators, mobile electric generators, nuclear fusion power generators, wind-powered electricity generators; mounting, installation, maintenance and repair of electricity generators and electricity generator systems, turbines, rotors, turbine impellers, turbine blades and rotor blades, especially for fluid flow, wave and tidal power plants; mounting, installation, maintenance and repair of electronic and electric controls, being electric current switches, circuits, transformers, electric cables and wires, electric control panels, electric capacitors, electric switch plates, electric conductors for transformers, electric connectors, electrical disconnects for stopping the flow of electricity in an electrical circuit, electrical converters, electricity conduits, electricity limiters, electricity distribution consoles, monitoring modules for measuring fluid and tidal flow through hydroelectric generators for electrical impedance and voltage to ensure electrical efficiency, and computer hardware for controlling water, fluid flow, tidal, wind, solar, geothermal energy and solar heat power plants, electricity generators and electricity generator systems, turbines, rotors, turbine impellers, turbine blades and rotor blades for fluid flow and tidal power plants as well as for power generation with the use of fluid flows and tide; mounting, installation, maintenance and repair of containers and housings made of metal, namely, watertight, gastight and pressure-resistant containers and housings made of metal, as well as of metal constructions and metal frames as construction and support parts for electricity generators and electricity generator systems, turbines, rotors, turbine impellers, turbine blades and rotor blades for fluid flow and tidal power plants; information relating to installation of power plants, especially water, fluid flow, tidal, wind, solar, geothermal energy and solar heat power plants; construction of power plants, especially water, fluid flow, wave, tidal, wind, solar, geothermal energy and solar heat power plants; installation, maintenance and repair of aquaculture farms and infrastructure.

Class 40

(2) Energy generation, being electrical power generation, energy recycling services that capture and convert wasted energy into electricity and useful steam, generation of electricity from renewable sources, hydrogen power generation services, production of hydroelectric power; information and consultancy relating to energy production; production of energy from renewable sources in particular from hydrokinetic, hydroelectric, wave-powered and tide-powered energy;

consultancy and information in the field of the production of energy from hydrokinetic, hydroelectric, wave-powered and tide-powered energy; rental of equipment for energy production.

Class 42

(3) Advice and information relating to environmental protection, renewable energy and sustainable development of water, fluid flow, tidal, wind, solar, geothermal energy and solar heat power plants; technological consultancy relating to energy saving and production; technological consultancy in the field of the production, distribution, storage and transport of electrical energy from water, fluid flow, tidal, wind, solar, geothermal energy and solar heat power plants; conducting evaluations, assessments and research in the fields of science and technology, carried out by engineers, in particular in the field of production, distribution, storage and transport of electrical energy from water, fluid flow, tidal, wind, solar, geothermal energy and solar heat power plants; technical project studies in the field of production, distribution, storage and transport of electrical energy from water, fluid flow, tidal, wind, solar, geothermal energy and solar heat power plants; scientific research and development of technology in the field of hydrokinetic, hydroelectric, wave-powered and tide-powered energy.

Class 44

(4) Aquaculture services; rental of equipment for aquaculture.

Colour Claim

Colour is claimed as a feature of the trademark. The mark consists of a grey, black and blue life preserver. In the lower right corner of the life preserver is a blue wave and above the wave, in the center of the life preserver, is a blue zigzag arrow moving in an increase direction. The literal element of the mark is the word "PoolOps". "PoolOps" is written in stylized letter. It is all one word with the letters "P" and "O" capitalized. "Pool" is grey and "Ops" is blue. White represents background.
