Trademarks Journal

Vol. 71 No. 3644

General Information

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

(1) Computer software for navigation, namely software enabling vehicular GPS navigation; Computer software for coordinating transportation services, namely, software for the scheduling and dispatch of motorized vehicles; computer software for obtaining, arranging and booking transportation services, namely software for the automated scheduling and dispatch of motorized vehicles; computer software for coordinating and obtaining delivery services, namely software for the automated scheduling and dispatch by motor vehicles of people, food and groceries directly between customers and transportation providers; mobile application software for coordinating transportation services, namely, software for the automated scheduling and dispatch of motorized vehicles; mobile application software for navigation, namely software enabling vehicular GPS navigation; mobile application software for obtaining, arranging and booking transportation services, namely software for the automated scheduling and dispatch of motorized vehicles; mobile application software for coordinating and obtaining delivery services, namely software for the automated scheduling and dispatch by motor vehicles of people, food and groceries directly between customers and transportation providers; Computer software for creating, sending and receiving email and electronic communications between customers and vehicle operators and transportation service brokers, namely calls, SMS and text messages, and push-notifications;

Downloadable software facilitating the electronic transmission of data, namely, data that provides location of delivery vehicles and addresses of customers via a global computer network between customers and vehicle operators; Encoded gift cards;

(2) Computer software for use by motorized vehicle operators and passengers and potential passengers for ridesharing; mobile application software for use by motorized vehicle operators and passengers and potential passengers for ridesharing;

Class 16

(3) Vouchers and corporate charge slips issued as credit for delivery and transportation services;

Services

Class 36

(1) Financial services, namely, providing credit card services for customers of taxicabs, delivery transports and other motorized vehicles; Brokering and arranging payment for taxi and delivery transport services by motor vehicle of people, food, groceries and cargo, namely processing of credit card, processing electronic payment made through gift cards, prepaid cards and provision of payment gateway services;

(2) Financial services, namely, providing credit card services, gift cards namely prepaid cards, vouchers and corporate charge slips for ridesharing;

Class 38

(3) Telecommunications services, namely, routing calls, SMS and text messages, and push-notifications to customers and to vehicle operators in the vicinity of the caller using mobile phones; electronic transmission of data via calls, SMS and text messages, and push-notifications between customers and vehicle operators and transportation service brokers via a global computer network in the field of transport and delivery by motor vehicles of people, food, groceries and cargo; Telecommunications between customers and vehicle operators and transportation service brokers via a global computer network in the field of transport and delivery by motor vehicles of people, food, groceries and cargo, namely via text messaging; Providing access to a website featuring information regarding ridesharing services, booking for ridesharing services, information regarding ridesharing; Providing via a global computer network access to a website for coordinating and obtaining delivery services, namely the automated scheduling and dispatch of deliveries by motor vehicles of people, food, groceries and cargo;

(4) Telecommunications services, namely, routing calls, SMS and text messages, and push-notifications to customers and to vehicle operators in the vicinity of the caller using mobile phones for coordinating ridesharing;

Class 39

(5) Taxi Services; Courier services; Limousine services; Assisted transportation of passengers with physical disabilities and special medical needs by motor vehicle; Passenger motor vehicle charter transportation, namely sedans, shuttle vans, taxis, wheel chair and physically disabled accessible vehicles; Passenger motor vehicle transportation, namely sedans, shuttle vans, taxis, wheel chair and physically disabled accessible vehicles; Designated driving services, namely meeting customers at predetermined locations and driving them to their destinations in their own vehicles; Operation for hire of taxis, point to point shuttles and busses, taxicabs and privately owned contract motor vehicles for the conveyance of passengers and goods, namely food, groceries and cargo; operation of taxi stands and taxicab dispatch services; Transportation logistics services, namely, planning, arranging and scheduling the transportation of people, food, groceries and cargo by motor vehicles;

(6) Operation of a ridesharing business, namely coordinating the delivery and conveyance of passengers and food, groceries and cargo via a ordering, booking and dispatch system; Ridesharing logistics services in relation to the operation of a motor vehicle and passenger transportation ordering, booking and dispatch system for coordinating the delivery and conveyance of passengers and goods; Coordinating and arranging ridesharing services; Providing information regarding ridesharing services, booking for ridesharing services, information regarding ridesharing via a website;

Class 42

(7) Providing via a global computer network temporary use of online non-downloadable software for coordinating and obtaining delivery services, namely software for the automated scheduling and dispatch of deliveries by motor vehicles of people, food, groceries and cargo;

(8) Hosting a website featuring information regarding ridesharing services, booking for ridesharing services, information regarding ridesharing; Providing temporary use of online non-downloadable software for providing ridesharing services, bookings for ridesharing services and for arranging motorized vehicles to service ridesharing customers, and for coordinating and obtaining ridesharing services; design and development of computer hardware and software;

Class 06

(1) Metal building materials, particularly, metal panels, metal bars, sheet metal for construction; ceiling and wall panels of metal; acoustic panels of metal for ceilings and walls; fireproof panels of metal for construction; refractory tiles of metal for ceilings and walls; tiles, poles and foils of metal for the fitting-out of buildings; semifinished tiles, poles and foils of metal for use in fitting-out of buildings; ceiling and wall tiles of metal, particularly, metal ceiling and wall tiles; metal partitions, particularly, metal partitions for building; wall components, particularly, building wall framing primarily of metal and wall linings of metal for building; shaped metal sections, particularly, metal profiles for arranging devices on and in walls, ceilings and other building surfaces; metal frames for building; ceilings of metal, particularly, ceiling boards of metal; ceiling panels of metal as parts of ceilings; metal ceiling and partition systems for the building sector and metal parts therefor, comprising ceiling and wall panels, suspension clamps, support strips, clamping strips and profile strips, cross connectors, springs, hooks, wall plugs, dowels, wires and wire ropes; metal building materials, particularly, ceiling and wall coverings in the form of metallic ceiling and wall coverings forming wall and ceiling panels of metallic materials, including such metal building materials covered with textile materials

Class 11

(2) Downlights, spotlights and LED light strips, in particular built-in downlights, spotlights and LED light strips to be integrated in suspended ceiling systems

Class 17

(3) Lightweight mineral wool slabs for fire insulation purposes; Fire resistant insulated panels; Sound damping ceiling coverings; Sound-absorbing ceiling coverings; Acoustic board for ceilings [insulation]; Ceilings made of mineral fibres for insulating buildings, sound absorbent materials in in the form of sheets, plates, panes, blocks and bricks, being for use in manufacturing, all the aforesaid goods being made from fibre, particularly from wood fibre and from mineral wool fibre, mineral fibre wool, and used as a building insulator, Ceramic structural wall and ceiling parts for construction of buildings comprising mineral fibers, semi-processed plastics in extruded form for use in manufacturing, wall construction plates for hanging and suspension of ceilings and walls for

isolating against heat; wall construction plates for hanging and suspension of ceilings and walls for isolating against sound; wall construction plates for hanging and suspension of ceilings and walls for gas proof sealing; wall construction plates for hanging and suspension of ceilings and walls for waterproof sealing purposes; non-woven fabrics and plastic foils for use on walls and ceilings for isolating against heat; non-woven fabrics and plastic foils for use on walls and ceilings for isolating against sound; non-woven fabrics and plastic foils for use on walls and ceilings for gas proof sealing; non-woven fabrics and plastic foils for use on walls and ceilings for waterproof sealing purposes; non-metallic acoustic panels, acoustic panels for ceilings, acoustical insulation barrier panels, roof insulation panels for building, insulation sheets for building, and thermal insulation sheeting, acoustical insulation boards for ceilings, soundproofing materials, in particular non-woven insulating fabrics for soundproofing, sound-absorbing acoustical insulation barrier panels, roof insulation panels for building, insulation sheets for building and thermal insulation sheeting, soundproofing materials, particularly, non-woven fabrics for soundproofing and acoustic absorbent boards, sound absorbing material in the form of ceiling and wall canvases for application to ceilings and walls, particularly acoustic panels, insulating refractory materials, all the aforesaid goods being in particular for the fitting-out of buildings and in particular for the sealing and insulation of ceiling and wall systems

Class 19

(4) Mineral wool plates for building; mineral fibre plates for building; glass wool plates for building; mineral wool plates covered with fleece for building; mineral wool plates covered with fabric for building; mineral wool panels; mineral fibre panels; glass wool panels, mineral wool panels covered with fleece, mineral wool panels covered with fabric, non-metal ceiling panels, wall panels, not of metal; subfloor panels, not of metal; fireproof tiles; fireproof tiles, made of mineral wool; fireproof tiles, made of mineral fiber; fireproof tiles, made of glass wool; glass wool bars for building; non-woven textile fabrics and nonwoven textile sheets for building purposes; ceiling plates, roof plates and wall panels, tiles and boards comprising wood fibers, mineral fibers, gypsum and perlite; non-metal fireproof panels for construction; wall panels not of metal for building, comprising wood fibers; wall panels not of metal for building, comprising gypsum fibers; wall panels not of metal for building, comprising perlite fibers; wall panels not of metal for building, comprising of aramid fibers; wall panels not of metal for building, comprising of glass fibers; wall panels not of metal for building, comprising of carbon fibers; and wall panels not of metal for building, comprising ceramic fibers; building cardboard and fiberboard for building, particularly, wall tiles; fiberboard plates for building; non-metallic partitions for construction comprising wood fibers; non-metallic partitions for construction comprising mineral fibers; non-metallic partitions for construction comprising gypsum fibers; non-metallic partitions for construction comprising perlite fibers; non-metallic partitions for construction comprising aramid fibers; non-metallic partitions for construction comprising glass fibers; non-metallic partitions for construction comprising carbon fibers; non-metallic partitions for construction comprising ceramic fibers; wall elements being wall claddings not of metal for construction and building, wall boards not of metal for the building sector and asbestos cement panels for the building sector; non-woven textile fabrics for ceiling and wall construction; separating walls, dividing walls and prefabricated wall elements and wall panels made of fibre plates, particularly made of wood fibre and mineral fibre; plaster for use in building and fireproof cement coatings; non-metallic fire protection materials for use in building, particularly, fire-resisting boards and panels, fireproof tiles; plaster for building purposes, particularly acoustic plaster; ceiling boards, not of metal for building comprising wood fibers; ceiling boards, not of metal for building comprising mineral fibers; ceiling boards, not of metal for building comprising gypsum fibers; ceiling boards, not of metal for building comprising perlite fibers; ceiling boards, not of metal for building comprising aramid fibers; ceiling boards, not of metal for building comprising glass

fibers; ceiling boards, not of metal for building comprising carbon fibers; ceiling boards, not of metal for building comprising ceramic fibers; non-metal ceilings and wall partition systems for the building sector, and parts therefor, namely, ceiling panels, suspension clamps, support strips, clamping strips and profile strips, cross connectors and springs

Class 20

(5) Freestanding partitions furniture; movable office partitions, namely, room divider for offices; movable partitions in the form of frames covered with textile materials, namely, movable office partitions

Class 24

(6) Ceiling canopies of cloth; wall canopies of cloth

Services

Class 35

(1) Business management and organization consultancy in the field of ceiling and wall configuration, interior design, interior fitting of buildings, and installation systems for ceilings and walls; compilation, systematization, updating and administration of information in computer databases; Sales promotion for others provided through the means of internet platforms, internet helpdesks, telephone helplines, personal consulting and teaching; Advertising the goods and services of others; Direct marketing of the goods and services of others

Class 37

(2) Construction consultation and technical consulting in the field of building construction and interior fitting of buildings; construction services, particularly, planning, laying out and custom construction in the field of ceiling and wall configuration, interior design, interior fitting of buildings, and installation systems and installation aids for ceilings and walls; providing information with regard to construction and repair issues in the fields of ceiling and wall configuration, interior design, interior fitting of buildings, and installations for ceilings and walls; Providing information in the field of ceiling and wall configuration, interior design, interior fitting of buildings, and installations for ceilings and walls

Class 42

(3) Services provided by engineers, architects and interior designers in the field of ceiling and wall plan design, interior design, interior fitting of buildings and installation systems, aids and tools for ceilings and walls; technical project planning and technical consultation in the field of ceiling and wall plan design, interior design, interior fitting of buildings and installation systems, aids and tools for ceilings and walls; industrial analysis services and industrial research services in the field of ceiling and wall plan design, interior design, interior fitting of buildings and installation systems, aids and tools for ceilings and walls; Providing scientific research information and consulting in the field of acoustics and building physics for others through the internet and computer databases

(1) Scientific instruments, namely, alcohol meters; beverage meters for measuring and analyzing the sugar, CO₂, alcohol, and extract content of beverages; CO₂ meters; density meters; concentration meters; dynamic mechanical thermal analysis (DMTA) instruments; high-pressure digestion systems comprised of vessels for the heating and mineralization of samples, namely ovens and reactors for industrial and laboratory use; microwave digestion systems, namely, microwave ovens and reactors for laboratory use, including for performing, drying, evaporation, extraction, UV digestion, and oxygen combustion; microwave synthesis systems, namely microwave ovens and reactors for industrial and laboratory use; oxygen meters for measurement of dissolved oxygen in fluid media including beverages in process lines and beverage containers and headspace gases in containers, oxygen sensors for monitoring ambient conditions of samples and measurement instruments; polarimeters; refractometers; rheometers for investigating the deformation and flow behavior of liquid and solid samples; sugar analyzers for testing sugar concentration and content and identifying sugar types in the field of pharmaceutical formulations, food, beverage and agricultural products; analyzers for performing solid surface analysis and analyzing surface chemistry and properties of macroscopic solids namely scratch tester, hardness tester, indenter, GISAXS (Grating Incident Angle X-ray Scattering), surface charge analyzer; digital thermometers for laboratory use, not for medical purposes, reference thermometers, infrared thermometers, laboratory thermometers for sample and environmental measurement in connection with measurement instruments; tribometers; turbidity meters; viscosimeters for measuring flow resistance; X-ray structure analyzers, small-angle X-ray scattering (SAXS) systems; X-ray diffraction (XRD) systems for determining the quality and molecular structure of crystalline material by diffracting x-rays through the sample and X-Ray diffraction systems for determining the molecular structure of surfaces, coatings and films using grazing-incidence small-angle scattering; CO₂ sensors; density and sound velocity sensors; density sensors for measurement of density and concentration of gases, liquids, semi-solids and solids based on physical effects including oscillation frequency, sound velocity, specific gravity, refractometry and buoyancy; evaluation units for measuring the density and concentration of liquids and gases and sound velocity sensors, namely concentration meters and accompanying computer software, namely, computer operating software sold as a unit with instruments for use in scientific, laboratory

and process applications; surface charge analyzer for measuring zeta potential; spectrometers; spectral analyzers and integrated optics, namely spectral cameras and spectrometers; nanomechanical and micromechanical testing instruments for indentation, lateral force, scratch, fatigue and wear testing of surfaces, coatings, membranes, thin films, biological materials and material interfaces; physical measurement, scientific and industrial testing equipment for determining the chemical and physical properties of crude oil and petroleum products, namely flash point testers, distillation units, test instruments for the oxidation stability, test instruments for cold flow properties namely cold filter plugging point testers and cloud pourpoint testers, test instruments for consistency and ductility namely penetrometers, grease workers, softening point testers, breaking point testers and ductility meters as well as gum content testers, Herschel emulsifiers and foam tester; physical measurement, scientific and industrial testing equipment for determining the chemical and physical properties of pharmaceuticals, cosmetics, fragrances and flavors, namely flash point testers, distillation units, test instruments for the oxidation stability, softening point testers; particle analyzers to measure particle size, zeta potential, molecular mass, transmittance, and refractive index; laser diffraction measuring instruments; titrators for laboratory and scientific research purposes, namely for sample preparation for measurement instruments including particle size analyzer and spectrometer to characterize particles, ingredients and concentration in liquids and gases, and accessories thereto, namely, cooling evaporators, laboratory samplers, and laboratory titration cells; ph measuring instruments; instruments to determine the molecular weight of polymers, namely light scattering analyzers, rolling ball viscometers; automatic systems for sample preparation, dosing, blending, subsampling, sampling, filling, cleaning and transfer of liquids, solids and semisolids, heated and unheated sample filling and cleaning systems by means of pumps, syringes, compressed air or vacuum, automatic gripping, cutting and shaking systems, automatic systems for capping and decapping of sample containers, as well as a combination of the systems listed above using carousels, pipette holder, sample racks and accompanying computer software, namely, computer operating software sold as a unit with instruments for use in scientific laboratory operations

(2) Raman-spectrometer and Raman-microscopes

(3) Atomic force microscopes

(4) Volumetric gas sorption analyzers; dynamic flow gas sorption analyzers; dynamic flow single-point analyzers; surface area and pore size analyzers; porosimeters; measurement apparatus and instruments for volumetric filling of liquids for laboratory use, namely, droppers for use in porosimeters; degassers for the purpose of sample preparation for surface area analysis; memory contact angloimeters, namely an instrument for measuring angels; particle micrometers; gas flow controllers; multiple sample manifolds for use in surface area analyzers; material density meters, and powder samplers for laboratory use, quality and process control

(5) Scientific measuring instruments for scientific use, and laboratory use, namely for processing material characterization of fluid, gaseous, semisolid, powdery and solid samples by measuring, evaluating and investigating physical properties of samples; electric power converters and their parts and fittings for monitoring, conducting, switching, transforming, accumulating, regulating and controlling the distribution and use of electricity; apparatus and instruments for recording, transmitting, reproducing or processing sound, images or data, namely encoded integrated circuit identification cards and their inlays; recorded and downloadable media, namely digital computer downloads containing computer software and electronic data, digital and analog recording and storage media computer software and electronic data namely USB's, CD's and DVD's, non volatile memory cards and external HDD and SSDs; mechanisms for coin-operated apparatus; cash registers, calculating devices; computer hardware, software and computer peripheral devices, namely displays, screens, digital cameras, keyboards, modems, mouse, printers, scanners,

speakers, video recorders in particular for operation, control, calibration of measurement instruments, evaluation and display of measurement data and sample and user identification; diving suits, divers' masks, ear plugs for divers, nose clips for divers and swimmers, gloves for divers, breathing apparatus for underwater swimming; fire-extinguishing apparatus

Class 10

(6) Surgical, dental and veterinary instruments and medical instruments for general examination and medical implants; X-ray structure analyzers, small-angle X-ray scattering (SAXS) systems, all for medical purposes; X ray diffraction (XRD) systems, for medical purposes; spectrometers, for medical purposes; spectral analyzers and integrated optics, all for medical purposes; Raman-spectrometer and Raman-microscopes, all for medical purposes

(7) Artificial limbs, eyes and teeth; artificial orthopaedic implants; suture materials

(8) Nebulizer for sample preparation for measurement of physical properties with laboratory and scientific

Colour Claim

Colour is claimed as a feature of the trade-mark. The applicant claims the colours 'red' (Pantone* 1795) and 'light gray' (Pantone* 427) as essential features of the trade-mark. The words 'Anton Paar' are 'red' (Pantone* 1795). The curved lines at the top left and bottom right of the design element and the triangle-shaped design at the bottom left of the design element to the left of the words 'Anton Paar' are 'light gray' (Pantone* 427). The curved intersecting lines in the design element to the left of the words 'Anton Paar' are 'red' (Pantone* 1795). *PANTONE is a registered trade-mark.

Goods

Class 09

(1) Scientific instruments, namely, alcohol meters; beverage meters for measuring and analyzing the sugar, CO₂, alcohol, and extract content of beverages; CO₂ meters; density meters; concentration meters; dynamic mechanical thermal analysis (DMTA) instruments; high-pressure digestion systems comprised of vessels for the heating and mineralization of samples, namely ovens and reactors for industrial and laboratory use; microwave digestion systems, namely, microwave ovens and reactors for laboratory use, including for performing, drying, evaporation, extraction, UV digestion, and oxygen combustion; microwave synthesis systems, namely microwave ovens and reactors for industrial and laboratory use; oxygen meters for measurement of dissolved oxygen in fluid media including beverages in process lines and beverage containers and headspace gases in containers, oxygen sensors for monitoring ambient conditions of samples and measurement instruments; polarimeters; refractometers; rheometers for investigating the deformation and flow behavior of liquid and solid samples; sugar analyzers for testing sugar concentration and content and identifying sugar types in the field of pharmaceutical formulations, food, beverage and agricultural products; analyzers for performing solid surface analysis and analyzing surface chemistry and properties of macroscopic solids namely scratch tester, hardness tester, indenter, GISAXS (Grating Incident Angle X-ray Scattering), surface charge analyzer;

digital thermometers for laboratory use, not for medical purposes, reference thermometers, infrared thermometers, laboratory thermometers for sample and environmental measurement in connection with measurement instruments; tribometers; turbidity meters; viscosimeters for measuring flow resistance; X-ray structure analyzers, small-angle X-ray scattering (SAXS) systems; X-ray diffraction (XRD) systems for determining the quality and molecular structure of crystalline material by diffracting x-rays through the sample and X-Ray diffraction systems for determining the molecular structure of surfaces, coatings and films using grazing-incidence small-angle scattering; CO2 sensors; density and sound velocity sensors; density sensors for measurement of density and concentration of gases, liquids, semi-solids and solids based on physical effects including oscillation frequency, sound velocity, specific gravity, refractometry and buoyancy; evaluation units for measuring the density and concentration of liquids and gases and sound velocity sensors, namely concentration meters and accompanying computer software, namely, computer operating software sold as a unit with instruments for use in scientific, laboratory and process applications; surface charge analyzer for measuring zeta potential; spectrometers; spectral analyzers and integrated optics, namely spectral cameras and spectrometers; nanomechanical and micromechanical testing instruments for indentation, lateral force, scratch, fatigue and wear testing of surfaces, coatings, membranes, thin films, biological materials and material interfaces; physical measurement, scientific and industrial testing equipment for determining the chemical and physical properties of crude oil and petroleum products, namely flash point testers, distillation units, test instruments for the oxidation stability, test instruments for cold flow properties namely cold filter plugging point testers and cloud pourpoint testers, test instruments for consistency and ductility namely penetrometers, grease workers, softening point testers, breaking point testers and ductility meters as well as gum content testers, Herschel emulsifiers and foam tester; physical measurement, scientific and industrial testing equipment for determining the chemical and physical properties of pharmaceuticals, cosmetics, fragrances and flavors, namely flash point testers, distillation units, test instruments for the oxidation stability, softening point testers; particle analyzers to measure particle size, zeta potential, molecular mass, transmittance, and refractive index; laser diffraction measuring instruments; titrators for laboratory and scientific research purposes, namely for sample preparation for measurement instruments including particle size analyzer and spectrometer to characterize particles, ingredients and concentration in liquids and gases, and accessories thereto, namely, cooling evaporators, laboratory samplers, and laboratory titration cells; ph measuring instruments; instruments to determine the molecular weight of polymers, namely light scattering analyzers, rolling ball viscometers; automatic systems for sample preparation, dosing, blending, subsampling, sampling, filling, cleaning and transfer of liquids, solids and semisolids, heated and unheated sample filling and cleaning systems by means of pumps, syringes, compressed air or vacuum, automatic gripping, cutting and shaking systems, automatic systems for capping and decapping of sample containers, as well as a combination of the systems listed above using carousels, pipette holder, sample racks and accompanying computer software, namely, computer operating software sold as a unit with instruments for use in scientific laboratory operations

(2) Raman-spectrometer and Raman-microscopes

(3) Atomic force microscopes

(4) Volumetric gas sorption analyzers; dynamic flow gas sorption analyzers; dynamic flow single-point analyzers; surface area and pore size analyzers; porosimeters; measurement apparatus and instruments for volumetric filling of liquids for laboratory use, namely, droppers for use in porosimeters; degassers for the purpose of sample preparation for surface area analysis; memory

contact angulometers, namely an instrument for measuring angles; particle micrometers; gas flow controllers; multiple sample manifolds for use in surface area analyzers; material density meters, and powder samplers for laboratory use, quality and process control

(5) Scientific measuring instruments for scientific use, and laboratory use, namely for processing material characterization of fluid, gaseous, semisolid, powdery and solid samples by measuring, evaluating and investigating physical properties of samples; electric power converters and their parts and fittings for monitoring, conducting, switching, transforming, accumulating, regulating and controlling the distribution and use of electricity; apparatus and instruments for recording, transmitting, reproducing or processing sound, images or data, namely encoded integrated circuit identification cards and their inlays; recorded and downloadable media, namely digital computer downloads containing computer software and electronic data, digital and analog recording and storage media computer software and electronic data namely USB's, CD's and DVD's, non volatile memory cards and external HDD and SSDs; mechanisms for coin-operated apparatus; cash registers, calculating devices; computer hardware, software and computer peripheral devices, namely displays, screens, digital cameras, keyboards, modems, mouse, printers, scanners, speakers, video recorders in particular for operation, control, calibration of measurement instruments, evaluation and display of measurement data and sample and user identification; diving suits, divers' masks, ear plugs for divers, nose clips for divers and swimmers, gloves for divers, breathing apparatus for underwater swimming; fire-extinguishing apparatus

Class 10

(6) Surgical, dental and veterinary instruments and medical instruments for general examination and medical implants; X-ray structure analyzers, small-angle X-ray scattering (SAXS) systems, all for medical purposes; X ray diffraction (XRD) systems, for medical purposes; spectrometers, for medical purposes; spectral analyzers and integrated optics, all for medical purposes; Raman-spectrometer and Raman-microscopes, all for medical purposes

(7) Artificial limbs, eyes and teeth; artificial orthopaedic implants; suture materials

(8) Nebulizer for sample preparation for measurement of physical properties with laboratory and scientific measurement instruments

Colour Claim

Colour is claimed as a feature of the trade-mark. The trademark consists of six intersecting coloured triangular shapes which together form a squared diamond. The four tips of the squared diamond are at the top, bottom, left and right of the trademark. The various intersections between the constituent triangular shapes creates 14 separate coloured segments. There are four principle colours in the trademark - red, yellow, blue and green - which overlap among the 14 segments to create different shades of those colours. Those segments are coloured as follows: 1. the triangular segment which stretches right from the left tip of the squared diamond is burgundy 2. the quadrilateral segment to the right of that triangle is dark red 3. the large triangular segment to the right of that segment (which stretches to the upper tip of the squared diamond) is red 4. the triangular segment to the right of that segment is dark red 5. the trapezoidal segment beneath that segment is yellow 6. the quadrilateral segment beneath that segment (which stretches to the right tip of the squared diamond) is dark yellow 7. the equilateral triangular segment to the lower left of that segment is light blue 8. the triangular segment to the right of that segment (which stretches to the right tip of the squared diamond) is dark blue 9. the quadrilateral segment to the left of that segment is blue 10. the large triangular segment to the left of that segment (which stretches to the lower tip of the squared diamond) is light blue 11. the triangular segment to the left of that segment is dark green 12. the trapezoidal segment above that segment is light green 13. the quadrilateral segment above that segment (which stretches to the left tip of the squared diamond) is green 14. the equilateral triangular segment to the upper right of that segment is light blue. The words 'QuadReal' and 'EXCELLENCE LIVES HERE' are black.

Certification Mark Standard

The certification mark, as used by persons authorized by the applicant, certifies that the goods in association with which it is used are of the following defined standard: the goods are manufactured to integrate open, interoperable information and communication technologies in the field of industrial automation, including a media independent network protocol and the network adaptations of such industrial protocol, or are designed to enhance the implementation, operation, or support of hardware or software that integrate such technologies in a multi-vendor systems environment, all in accordance with the ODVA Policy Regarding Compliant Products, a copy of which is on file with the Canadian Intellectual Property Office.

Goods

Class 09

Industrial automation network protocols that interoperate in multi-vendor systems, namely, industrial automation protocol and network system that allows interoperable communication between devices, comprised of limit switches, photoelectric cells, automatic valves for manifolds, pneumatic valve actuators, motor starters, drives that control and power mechanical components for motors that operate machinery, programmable logic controller and interface boards or cards for computers, software development tools to enhance the development of software used for communication for control, motion, synchronization, safety, energy and network management for electronic devices, sold as a unit, Communication protocol adapters and gateways devices that facilitate the exchange of electronic data in the nature of computer hardware, power controllers, namely, an electrical device that controls alternating current voltage and current through temperature control, electric signal transmission cable connectors for transmitting signals from cable to other parts of industrial machinery, human machine interfaces in the nature of electronic display interfaces that allow operators to perform industrial functions for control processes, Energy measurement and management systems comprised of electric sensors and electric control devices for energy management, namely, energy output monitoring and data analysis related to efficiency,

carbon emissions, an energy costs, Feedback detection devices in the nature of temperature, position, speed, tension sensors for detecting output of mechanical devices, Flow controllers in the nature of electrical controllers that monitor and maintain flow rate variables in process applications, Input/Output modules in the nature of integrated circuit modules for managing communication between central processing units and networks, namely, data transfer, power load management, and machine function control, Light stacks and strobes for use on industrial manufacturing equipment and process control environments, namely, electric warning lights, electric meters that provide visual and audible indicators of machinery status, Motion control synchronization systems comprised of motion detectors and electronic motion sensitive switches for controlling multiple machinery motors to assist with machine motion control, Electric motor power supply drives that vary the frequency and voltage of power supply to electric motors, Electric motor starters, namely, electrical devices that control the electrical power for starting, stopping, reversing and protecting electrical power for industrial machinery motors, network infrastructure devices, namely, physical media, namely, electrical cables and connectors, network power supplies and computer network hubs, and network gateways and routers for use in transporting communication of data, applications, services, and multi-media across components of a network, Optical analysis scanners for visualizing and examining manufactured parts, prototypes, and machine tool wear, Power Supplies, namely, an electronic device that converts electrical currents from a source to the necessary voltage, current, and frequency to power an electrical load, Controlled volume metering pumps for injecting chemical additives, blending of components, or metered transfer of liquid, electrical movement controllers for robots used in feedback control systems, electrical controllers for computer safety devices and safety control computer systems, electric industrial sensors for monitoring and measuring physical parameters and environmental conditions in industrial settings, computer operating software, namely, software that manages the operation of all software and hardware on a computer, Day and night vision systems primarily comprised of day and night vision sensors, day and night cameras, power sources for the aforementioned sensors and cameras, communication means in the nature of analyzing images captured by the sensors and cameras, monitors and operating software, all for use in automation of manufacturing inspection processes; Industrial automation network components compliant with industrial automation network protocol, namely, limit switches for production line machinery that determine position feedback of parts on production lines, photoelectric cells for emitting and receiving light and conversion of light reception into electrical output, automatic valves for manifolds that allow solenoid valves to share a single air supply, software development tools to enhance the development of software used for communication for control, motion, synchronization, safety, energy and network management for electronic devices, sold as a unit, Communication protocol adapters and gateway devices that facilitate the exchange of electronic data in the nature of computer hardware power controllers, electric signal transmission cable connectors for transmitting signals from cables to other parts of industrial machinery, human machine interfaces in the nature of electronic display interfaces that allow operators to perform industrial functions for control processes, Energy measurement and management systems comprised of electric sensors and electric control devices for energy management, namely, energy output monitoring and data analysis related to efficiency, carbon emissions, and energy costs, Feedback devices in the nature of temperature, position, speed, tension sensors, Feedback detection devices in the nature of temperature, position, speed, tension sensors for detecting output of mechanical devices, Flow controllers in the nature of electrical controllers that monitor and maintain flow-rate variables in process applications, Input/Output modules in the nature of integrated circuit modules for managing communication between central processing units and networks, namely, data transfer, power load management, and machine function control, Light stacks and strobes for use on industrial manufacturing equipment and process control environments, namely, electric warning lights, electric meters that provide visual

and audible indicators of machinery status, Motion control synchronization systems comprised of motion detectors and electronic motion sensitive switches for controlling multiple machinery motors to assist with machine motion control, Electric motor power supply drives that vary the frequency and voltage of power supply to electric motors, Electric motor starters, namely, electrical devices that control the electrical power for starting, stopping, reversing and protecting electrical power for industrial machinery motors, network infrastructure devices, namely, physical media, namely, electrical cables and connectors, network power supplies and computer network hubs, and network gateways and routers for use in transporting communication of data, applications, services, and multi-media across components of a network, Optical analysis scanners for visualizing and examining manufactured parts, prototypes, and machine tool wear, Power Supplies, namely, an electronic device that converts electrical currents from a source to the necessary voltage, current, and frequency to power an electrical load, Controlled volume metering pumps for injecting chemical additives, blending of components, or metered transfer of liquid, electrical movement controllers for robots used in feedback control systems, electrical controllers for computer safety devices and safety control computer systems, electric industrial sensors for monitoring and measuring physical parameters and environmental conditions in industrial settings, computer operating software, namely, software that manages the operation of all software and hardware on a computer, Day and night vision systems primarily comprised of day and night vision sensors, day and night cameras, power sources for the aforementioned sensors and cameras, communication means in the nature of analyzing images captured by the sensors and cameras, monitors and operating software, all for use in automation of manufacturing inspection processes; Software, namely, software with development, testing, and training tools for industrial automation and associated networks therefor to assist vendors with the development and testing of their industrial automation products.

Colour Claim

Colour is claimed as a feature of the trade-mark. The trademark consists of six intersecting coloured triangular shapes which together form a squared diamond. The four tips of the squared diamond are at the top, bottom, left and right of the trademark. The various intersections between the constituent triangular shapes creates 14 separate coloured segments. There are four principle colours in the trademark - red, yellow, blue and green - which overlap among the 14 segments to create different shades of those colours. Those segments are coloured as follows: 1. the triangular segment which stretches right from the left tip of the squared diamond is burgundy 2. the quadrilateral segment to the right of that triangle is dark red 3. the large triangular segment to the right of that segment (which stretches to the upper tip of the squared diamond) is red 4. the triangular segment to the right of that segment is dark red 5. the trapezoidal segment beneath that segment is yellow 6. the quadrilateral segment beneath that segment (which stretches to the right tip of the squared diamond) is dark yellow 7. the equilateral triangular segment to the lower left of that segment is light blue 8. the triangular segment to the right of that segment (which stretches to the right tip of the squared diamond) is dark blue 9. the quadrilateral segment to the left of that segment is blue 10. the large triangular segment to the left of that segment (which stretches to the lower tip of the squared diamond) is light blue 11. the triangular segment to the left of that segment is dark green 12. the trapezoidal segment above that segment is light green 13. the quadrilateral segment above that segment (which stretches to the left tip of the squared diamond) is green 14. the equilateral triangular segment to the upper right of that segment is light blue. The word 'QuadReal' is black, and the words 'LÀ OÙ L'EXCELLENCE PREND VIE' are blue.

Colour Claim

Colour is claimed as a feature of the trademark. The colours blue and green are claimed as features of the mark. The mark consists of four stylized human figures in blue, in gradually larger sizes going from left to right, with the body segment formed by a stylized letter "x" with a diagonal break on the right side. The head element is formed by a circle that is separated from the body. Below the figures is a green stylized arc which is wider in the middle and tapered at the ends.
