

End of registration for ferbam pesticides

All pesticides used in Canada must be registered under the *Pest Control Products Act*. Pesticides are re-evaluated to ensure that they continue to meet health and environmental requirements. Re-evaluation may result in the revocation of a product or product uses. Health Canada may also request changes to a product's label, including mitigation measures, use sites and application methods.

Ferbam is a fungicide used to control diseases on pome and stone fruits, greenhouse vegetables, grapes, berries, tobacco (seed bed), and spruce cones. The re-evaluation decision for the active ingredient **ferbam** was published on April 14, 2018.

All pesticides containing ferbam are cancelled.

As of December 14, 2020

The sale of ferbam pesticides is prohibited.

As of December 14, 2021

Any use of ferbam pesticides is prohibited.

Cancelled product	Registration No.
FERBAM 76 WDG (dry flowable)	20136
FERBAM 76 WDG (wetable granules)	20536

Using unregistered pesticides is a violation of the *Pest Control Products Act*.

Read the label

All pesticides registered in Canada have a Health Canada-approved label with a registration number. Read the pesticide label carefully, as it contains specific information on how to use it.

To find the most up-to-date label, use our online [label search tool](#), or search for "Health Canada pesticide labels" using your favourite search engine.

For more information

Re-evaluation decision, [RVD2018-37](#), Ferbam and its associated end-use products. *The re-evaluation decision is the official Health Canada document. In the event of any discrepancy with the content of this factsheet, the content of the decision shall prevail.*

Health Canada's Pesticide Compliance Program (PCP) is responsible for enforcing the *Pest Control Products Act*. Visit: canada.ca/pesticide-compliance.
