

End of registration for ziram pesticides (agricultural uses)

All pesticides used in Canada must be registered under the *Pest Control Products Act*. Pesticides are re-evaluated to ensure that they continue to meet health and environmental requirements. Re-evaluation may result in the revocation of a product or product uses. Health Canada may also request changes to a product's label, including mitigation measures, use sites and application methods.

Ziram is a fungicide registered for control of various fungal diseases on apples, peaches and apricots regionally in British Columbia; and nationally on cucumbers, tomatoes, melons, pumpkins and squash. The re-evaluation decision concerning the **agricultural uses** of the active ingredient **ziram** was published on April 14, 2018.

All pesticides containing ziram for agricultural uses are cancelled.

As of December 14, 2020

The sale of ziram pesticides is prohibited.

As of December 14, 2021

Any use of ziram pesticides is prohibited.

Using unregistered pesticides is a violation of the *Pest Control Products Act*.

Cancelled product	Registration No.
ZIRAM 85 W	29140
ZIRAM GRANUFLO	29685

Read the label

All pesticides registered in Canada have a Health Canada-approved label with a registration number. Read the pesticide label carefully, as it contains specific information on how to use it.

To find the most up-to-date label, use our online [label search tool](#), or search for "Health Canada pesticide labels" using your favourite search engine.
