Message from the President of the Treasury Board

As President of the Treasury Board, I am presenting the 35th Annual Report on Official Languages, which provides an overview of how federal institutions have met their official languages obligations during the 2022–23 fiscal year.

During this period, institutions reported on elements pertaining to the application of Parts IV, V, and VI of the *Official Languages Act*; specifically, communications with and services to the public in both official languages, language of work, human resources management, governance, and monitoring of official languages programs.

This information, as well as statistical data, shows that federal institutions continue to have a strong capacity to provide services to the public and to employees in the official language of their choice. However, it also shows that more needs to be done to improve outcomes in line with the *Official Languages Act*.

The Honourable Anita Anand
President of the Treasury Board

To that end, the Treasury Board Secretariat has released a new *Directive for the Implementation of the Official Languages (Communications with and Services to the Public) Regulations*, launched consultations for a new language training framework, supported federal institutions in their official languages responsibilities, and continued to focus on modernizing the *Official Languages Act*.

Parliament adopted the new *Official Languages Act* in June 2023, marking the first major revision of the legislation in 35 years. The modernized Act affirms the Government of Canada's commitment to an inclusive, bilingual society, in which Canadians can flourish in the official language of their choice. It also strengthened the Treasury Board's official languages authorities, as well as the Board's duty, and mine, to provide enhanced guidance to federal institutions.

Now, we are working to develop Part VII regulations ("Advancement of Equality of Status and Use of English and French") to allow federal institutions to strengthen the vitality of official language minority communities, promote the substantive equality of English and French, and work towards the inclusion of language clauses in federal-provincial-territorial agreements. In addition, a new accountability and reporting framework will guide federal institutions in applying the Act and ensuring accountability to Canadians.

I look forward to reporting on these and other activities in our next annual reports.

I invite you to read the report that follows to find out more about our work to better serve Canadians and strengthen Canada's bilingual identity for the future.

The Honourable Anita Anand, P.C. M.P.
President of the Treasury Board

Introduction

The Treasury Board is responsible for the general direction and coordination of the policies and programs relating to the implementation of Parts IV, V and VI of the *Official Languages Act* (the Act) in federal institutions. With the changes to the Act passed in June 2023, the Treasury

Board is now also responsible for certain aspects of Part VII. This report covers the 2022–23 fiscal year, preceding the modification of the Act.

Within the Treasury Board of Canada Secretariat (TBS), the Office of the Chief Human Resources Officer is responsible for developing and assessing the extent to which policies and programs are applied and what results they have produced. In concrete terms, TBS assists some 200 federal institutions that are subject to the Act, including departments and agencies, Crown corporations and privatized entities, in fully meeting their linguistic obligations.

Federal institutions' obligations under the Act fall into four main categories. Institutions must:

1. serve and communicate with members of the public in both official languages
2. establish a bilingual workplace in regions designated bilingual
3. contribute to maintaining a public service whose workforce tends to reflect Canada's demographic composition in terms of official languages
4. ensure that official languages issues are managed appropriately

This 35th annual report examines the extent to which federal institutions have been successful in meeting their obligations. It also provides examples of practices whose widespread adoption would be beneficial.

TBS requires federal institutions to submit an official languages review at least once every three years.¹ Starting next year, reviews will be required once every two years and 30 institutions will submit a review annually.

This year's report provides a general overview of the results of the reviews submitted by federal institutions for the 2020–21, 2021–22 and 2022–23 fiscal years, comparing them, where possible, with those provided in the 2017–20 cycle. [Appendix A](#) presents the specific methodology used to analyze the results.

Chapter 1 of this report covers the results for communications with and services to the public; Chapter 2, language of work; Chapter 3, Anglophone and Francophone representation in the federal public service; and Chapter 4, official languages governance. Chapter 5 describes how institutions take official languages into account in crises or emergency situations. Chapter 6 highlights some measures TBS took in 2022–23 to promote overall compliance with the Act.

Chapter 1. Communications with and services to the public

▼ In this section

- [1.1 Summary.](#)

- 1.2 Oral and written communications
- 1.3 Active offer
- 1.4 Outreach and advertising
- 1.5 Contracts and agreements with third parties
- 1.6 Upholding the principle of substantive equality.
- 1.7 Conclusion

Proportion of designated bilingual offices and service points across all institutions

Within the core public administration

of all positions that serve the public are bilingual

of incumbents meet the language requirements of their position

Within other institutions subject to the Act

of all positions that serve the public are bilingual

▼ Infographic 1 - Text version

Proportion of designated bilingual offices and service points across all institutions: 33.8%.

Within the core public administration, 41% of all positions that serve the public are bilingual.

95% of incumbents meet the language requirements of their position.

Within other institutions subject to the Act, 34% of all positions that serve the public are bilingual.

1.1 Summary

The network of public offices and service locations operated by federal institutions (see [Appendix E](#) for a map) spans all provinces and territories and extends to Canadian offices internationally. As of March 31, 2023, this network had 10,976 offices and service locations

providing service in person; over the telephone; aboard aircraft, ferries and trains; and through interactive kiosks. Of these, 3,715 (33.8%) were required to provide services to and communicate with the public in both official languages.

TBS’s target is that at least 90% of federal institutions and their offices and service locations will “nearly always” comply with their obligations under the Act and will “nearly always” apply certain best practices (such as ensuring that official languages issues are regularly on the agenda of senior management meetings).

As shown in Table 1, the majority of federal institutions surveyed between 2020 and 2023 “nearly always” met their obligations relating to communications with and service to the public (see definition in [Appendix C](#)). This positive result is largely attributable to the fact that federal institutions have the capacity to provide services in both official languages. For example, as of March 31, 2023, 40.7% of the 120,456 incumbents of positions serving the public in the core public administration (49,051 employees) were required to offer services in both English and French. Of these, 95.3% met the language requirements of their position. In other words, they were able to provide service at the desired level to both English and French speakers. In institutions outside the core public administration, 33,292 of the 96,280 positions providing services to the public (34.6%) were bilingual.

Further progress is required to reach the 90% target for each of the questions presented in Table 1. The target has been met for only four of the statements. Although this is a slight improvement over 2017–20 (when the target was met for 3 of the 11 statements) and although 9 of 11 indicators reflect progress over last cycle, this result remains unsatisfactory.

Table 1. Proportion of federal institutions whose designated bilingual offices “nearly always” met their obligations relating to communications with and service to the public

Questions	2017– 20	2020– 23
Oral communications occur in the official language chosen by the public when the office is designated bilingual.	87%	88%
Written communications occur in the official language chosen by the public when the office is designated bilingual.	89%	95% *

* Target met.

Questions	2017–20	2020–23
All communications material is produced in both official languages and is simultaneously issued in full in both official languages when the material comes from a designated bilingual office.	85%	87%
The English and French versions of websites are simultaneously posted in full and are of equal quality.	91% [*]	94% [*]
Signs identifying the institution’s offices or facilities are in both official languages at all locations.	94% [*]	93% [*]
Appropriate measures are taken to greet the public in person in both official languages.	81%	84%
Appropriate measures are taken to greet the public by telephone, including recorded messages, in both official languages.	n/a	83%
Contracts and agreements with third parties contain clauses setting out the office’s or facility’s linguistic obligations that the third parties must meet.	75%	77%
The linguistic obligations in these clauses have been met.	70%	77%
The institution selects and uses advertising media that reach the targeted public in the most efficient way possible in the official language of their choice.	97% [*]	95% [*]
The institution respects the principle of substantive equality in its communications and services to the public, as well as in the development and assessment of policies and programs.	79%	82%
[*] Target met.		

1.2 Oral and written communications

Between 2020 and 2023, 95% of institutions reported that when communicating with the public in writing (particularly through news releases and public notices), they “nearly always” did so in the official language chosen by the public, an increase of six percentage points from the 2017–20 cycle. The obligation that applies to written communications is one of the four with which federal institutions are currently most compliant (the other three concern websites, signage and advertising media).

In terms of oral communications, the results were almost the same as at the end of the last cycle: 88% (87% in 2017–20) said they “nearly always” use both English and French, particularly in news conferences, public addresses and videos.

Best practice

In 2022, Veterans Affairs Canada conducted a national survey of Veterans, members of the Canadian Armed Forces and the Royal Canadian Mounted Police, as well as their survivors, to determine their level of satisfaction with, among other things, the language used in its services and benefits. The survey found that for 95% of Veterans, institutions served them and communicated with them in the official language of their choice. In March 2022, the department's Service Delivery Branch developed training materials on notetaking for client files to ensure that notes are written in the client's official language and respect their language rights, in both oral and written communications.

Best practice

Canada Post has implemented various measures to ensure that communications are in the public's official language of choice. These measures include twice monthly reminders to the bilingual post office network, telephone audits, quality audits of written communications and surveys of customers of designated bilingual post offices to determine their level of satisfaction with access to services in the official language of their choice. When opportunities for official languages related improvements are identified, the Crown corporation implements the necessary changes through actions such as coaching, process reviews and reminders.

1.3 Active offer

To encourage members of the public to interact with federal institutions in the official language of their choice, institutions must practise active offer. The Office of the Commissioner of Official Languages defines active offer as "an open invitation to the public to use...English or French... when communicating with or receiving a service from the federal government. Active offer includes a bilingual greeting, such as "Hello! Bonjour!", and visual cues, such as signs, that support this invitation." ²

The number of federal institutions that apply active offer systematically is still too low. From 2020 to 2023, the reviews showed that only 84% of institutions "nearly always" took appropriate greeting measures (such as saying "Hello! Bonjour!") to signal to people who visit their offices that they can feel comfortable using English or French. This is a slight increase (three percentage points) over the previous review. When it comes to active offer in telephone service, only 83% of institutions surveyed over the past three years say they "nearly always"

practise active offer on the telephone. In terms of active offer in person, 93% of institutions nearly always have English and French signage displayed in public view in their designated bilingual offices or have employees in these offices wear “English/Français” pins.

A survey by the Institute for Citizen-Centred Service³ found that 87% of Canadians polled agreed with the following statement: “I was able to access the service in my choice of English or French” (67% said they “strongly agreed” with this statement, and 21% “agreed”). 3% of respondents said they “strongly disagree” and 1% “disagree.” According to the survey, receiving service in the language of one’s choice is the most important consideration for federal government clients, regardless of the method of service delivery (in person, on the telephone or through a website). In fact, Canadians think it is more important to be served in the language of their choice (especially when they have a problem to solve) than it is to deal with a competent employee or to achieve a satisfactory outcome.

Best practice

In connection with the project to construct a rail bypass around the municipality’s downtown core following the 2013 train derailment, Transport Canada (TC) is maintaining a register of stakeholders and their preferred official language for the community of Lac-Mégantic, Quebec. The register has enabled TC to determine that some residents of this predominantly French-speaking community prefer to be communicated with in English. The department’s major projects team made French-to-English interpreters available to participants at the in-person information sessions held in Lac-Mégantic and at the various virtual public sessions so that participants could communicate and receive answers in the official language of their choice.

1.4 Outreach and advertising

To meet the needs of the public, federal institutions must ensure that the information they disseminate (on websites or in electronic or paper publications) is accessible in both official languages.

The websites of federal institutions generally meet this requirement. In the 2020–23 cycle, 94% of institutions reported that, with rare exceptions, the English and French content on their website is posted simultaneously, is of equal quality, and is published in full in both languages. This is three percentage points higher than in the 2017–20 cycle.

To reach citizens who prefer more traditional means of communication than the Internet, federal institutions must continue to use English and French in other communication tools such as reports and brochures. In their most recent reviews, 87% of institutions stated that communications materials issued by their designated bilingual offices are “nearly always” produced and disseminated simultaneously and in full in both English and French. This percentage was the same in the previous cycle.

The use of suitable advertising vehicles is an area where federal institutions are doing well. When it comes to advertising, over 95% of the large institutions surveyed said they “nearly always” choose and use advertising vehicles (such as newspapers, television and radio stations or social media) that enable them to reach their target audience in the official language of their choice. This percentage is a slight decrease from the previous cycle (97%).

Best practice

All National Research Council Canada information materials produced for the Canadian public (for example, brochures, pamphlets and information kits) are printed in a bilingual version, or separately in English and French. Translation deadlines are always included in production schedules to ensure that English and French versions are published simultaneously. The Council also ensures that both versions of published documents are identical (for example, same font size, and same use and placement of graphics).

1.5 Contracts and agreements with third parties

The Act stipulates that federal institutions are responsible for ensuring that any partner organization providing information or services to members of the public on their behalf respects their language preferences. Results indicate that many institutions are not always meeting this obligation.

First, only 77% of large institutions ensure that contracts and agreements with third parties where the third parties act on behalf of the institutions “nearly always” include clauses that set out the language obligations these third parties must meet when offering services. This is slightly better than in 2017–20 (75%). Second, 77% of large institutions that have language clauses in their contracts or agreements with third parties report that these clauses were “nearly always” adhered to. Although this result is a jump of seven percentage points from 2017–20, it still falls well short of the target.

Best practice

All Innovation, Science and Economic Development Canada (ISED) contracts for professional services include an official languages clause. The contract request summary contains a mandatory section specifying the language in which the work will be performed, as well as the language in which deliverables and progress reports (if any) will be submitted. The project manager is responsible for ensuring that the language obligations set out in the contract are met. In addition, all public opinion research contracts awarded by ISED contain provisions that stress the need to conduct the study in both official languages.

Best practice

Global Affairs Canada (GAC) has included a standard clause on language requirements in its contracts with third parties to provide a public service on its behalf. This clause is part of GAC's pre-award requirements:

Certification of Language: By submitting a bid, the Bidder certifies that, should it be awarded a contract as a result of the bid solicitation, every individual proposed in its bid will be fluent in (English, French, or English and French, to be specified). The individual(s) proposed must be able to communicate orally and in writing in (English, French, or both, to be specified) without any assistance and with minimal errors.

1.6 Upholding the principle of substantive equality

According to the principle of substantive equality, official language minority communities have the right to receive government services of the same quality as those offered to the majority. To meet this objective, federal institutions are expected to adapt their practices (for example, by changing their mode of delivery or by offering separate content) to reflect the specific needs and characteristics of minority communities.

The reviews from 2020 to 2023 reveal that only 82% of federal institutions “nearly always” uphold the principle of substantive equality when communicating with or providing services to the public. This is a slight improvement from the 2017–20 result (79%).

Best practice

Immigration, Refugees and Citizenship Canada (IRCC) ensures the substantive equality of English and French by applying a purely Francophone lens when developing its French-language immigration programs and policies. For example, the department created the Francophone Mobility stream to reflect the specific circumstances of French-speaking

minority communities. This stream enables French-speaking temporary foreign workers to hold managerial, professional and technical occupations outside Quebec without their employer having to have a labour market impact assessment done. IRCC also applies a Francophone lens to its efforts to attract foreign students. For example, it collaborates with the Association des collèges et universités de la francophonie canadienne and participates in various departmental working groups on Francophone immigration. It also made changes to the International Student Program to include an objective specifically aimed at making it easier for French-speaking students to study in French outside Quebec.

1.7 Conclusion

A large majority of federal institutions indicate that they “nearly always” comply with their obligations under Part IV of the Act or embrace certain best practices in communicating with and serving the public. However, the 90% compliance target has been reached for only 4 out of 11 requirements. Nearly one-quarter of federal institutions do not include language clauses in their agreements with third parties, or do not ensure compliance with such clauses. Similarly, almost one institution in six is lagging in applying certain key practices, such as those relating to active offer and the application of the principle of substantive equality.

Chapter 2. Language of work

▼ In this section

- [2.1 Summary](#)
- [2.2 Language of written communication](#)
- [2.3 Language of meetings](#)
- [2.4 Language of employee supervision](#)
- [2.5 Personal and central services](#)
- [2.6 Training and professional development](#)
- [2.7 Communicating with staff](#)
- [2.8 Documentation and working tools](#)
- [2.9 Conclusion](#)

Within the core public administration

96% of incumbents in bilingual supervisory positions meet the language requirements of their position

66% of bilingual supervisory positions required Level C proficiency in oral interaction

95% of incumbents who offer personal and central services in both official languages meet the language requirements of their position

37% of bilingual positions that offer personal and central services require Level C proficiency in oral interaction

▼ Infographic 2 - Text version

Within the core public administration, 96% of incumbents in bilingual supervisory positions met the language requirements of their position.

66% of bilingual supervisory positions required Level C proficiency in oral interaction.

95% of incumbents who offer personal and central services in both official languages meet the language requirements of their position.

37% of bilingual positions that offer personal and central services require Level C proficiency in oral interaction.

2.1 Summary

Part V of the Act sets out obligations with regard to language of work. It stipulates that federal public service employees have the right to use either English or French in their work in designated bilingual regions. It aims to foster the full recognition of both official languages in the federal public service.

The results from the 2020–23 reviews show that employees still struggle to exercise their language rights. As shown in Table 2, the 90% target has not been reached for any of the obligations set out in the Act with respect to language of work. In fact, the results for most questions have slipped from the previous cycle. For example, only 61% of federal institutions surveyed indicate they “nearly always” allow their employees to draft documents in the official language of their choice (compared with 63% in the previous cycle) or almost always ensure that their management communicates regularly with their staff in English and French (a significant drop of 10 percentage points from 2017–20) in designated bilingual regions. In addition, less than half of institutions “nearly always” conduct bilingual meetings (49%). This percentage, unchanged since last year, is still far too low.

These results do not appear to stem from a lack of language proficiency. Over 95% of public servants who must offer personal and central services in both English and French, and over 96% of those in bilingual supervisory positions in the core public administration, meet the language requirements of their position.

Table 2. Proportion of federal institutions that report “nearly always” complying with their obligations with respect to language of work

Questions	2017–20	2020–23
In regions designated bilingual for language of work		
It is possible for employees to write documents in their official language of choice.	63%	61%
Meetings are conducted in both official languages, and employees may use the official language of their choice.	49%	49%
Incumbents of bilingual or either/or positions are supervised in the official language of their choice.	73%	78%
Personal and central services are provided to employees in the official language of their choice.	88%	84%
The institution offers employees training in the official language of their choice.	79%	76%
Documentation and regularly and widely used work instruments and electronic systems are available to employees in the official language of their choice.	81%	79%
In regions designated unilingual for language of work		
Documentation and regularly and widely used work instruments and electronic systems are available in both official languages for employees who are responsible for providing bilingual services to the public or to employees in bilingual regions.	87%	81%
In all regions		
Senior management communicates with employees on a regular basis in both official languages.	71%	61%

2.2 Language of written communication

Written communication is one of the key areas of Part V of the Act that will require special attention. Less than two thirds (61%) of institutions surveyed in 2020–23 said their employees in regions designated bilingual for language-of-work purposes “nearly always” have the opportunity to draft documents in the official language of their choice.

Best practice

Employment and Social Development Canada is one of the federal institutions that “nearly always” allows its employees to draft documents in the language of their choice. Most of its branches have mechanisms in place to provide employees with rapid access to translation services. The department’s Language Revision Unit in the Atlantic Region enables employees to write in the language of their choice by making sure their documents are translated promptly in both official languages. Senior management has commended the unit for its work.

2.3 Language of meetings

More effort is required to achieve the targets set for language of meetings, with only 49% of institutions reporting that meetings in regions designated bilingual are “nearly always” conducted in both official languages. This low percentage, which is the same as for the 2017–20 cycle, demonstrates the need for leadership to ensure that both languages are used in meetings in federal institutions.

Best practice

At Public Services and Procurement Canada, senior management leads by example, opening meetings by reminding participants that they can speak in the language of their choice or alternate between the two official languages. Interpretation services are available when required, particularly for key meetings and events.

Best practice

Innovation, Science and Economic Development Canada encourages bilingual meetings and makes every effort to ensure that employees feel comfortable using either English or French. Previous results from the Public Service Employee Survey were one of the reasons for launching an initiative to hold regular bilingual bilateral and all-staff meetings. Employees have access to translation tools in MS Teams (automatic translation of messages in the chat and of subtitles and transcripts during teleconferencing), and organizers use backgrounds to promote the use of both official languages. The department uses other tools to promote bilingualism at meetings, including the guide *Effective Practices for Chairing Bilingual Meetings*, which was produced by the Office of the Commissioner of Official Languages.

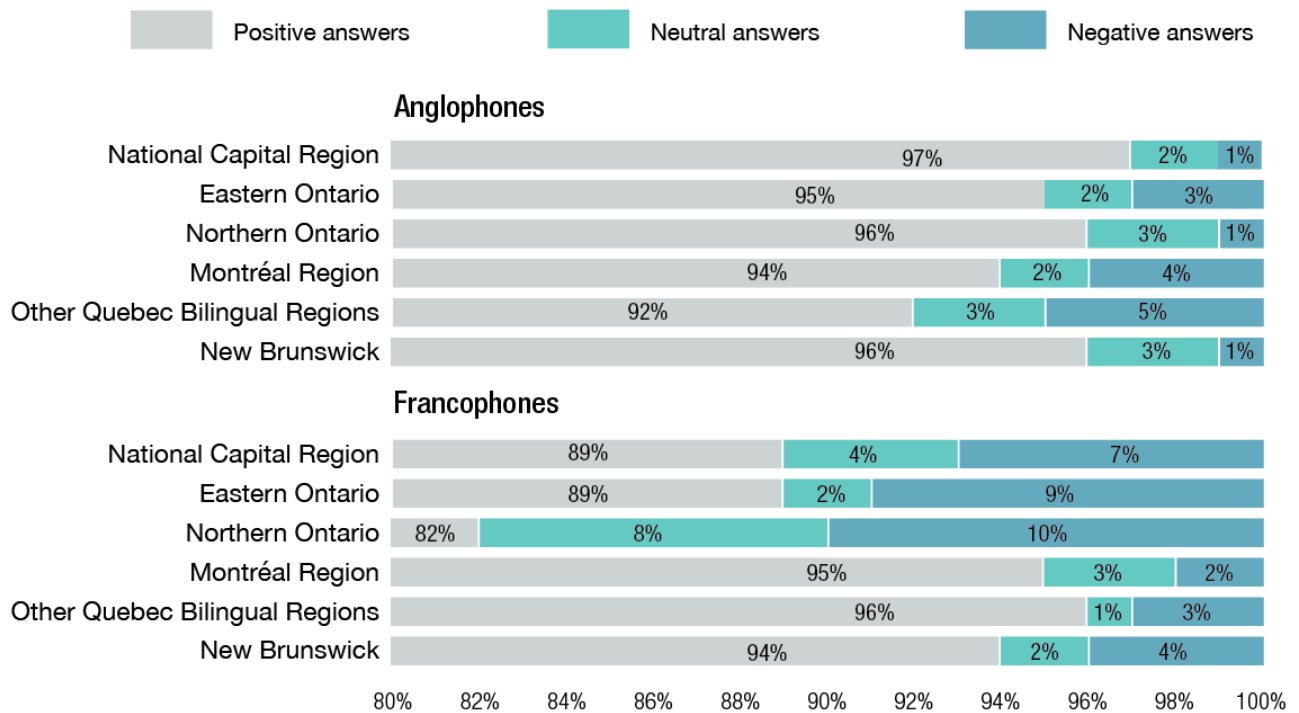

2.4 Language of employee supervision

Incumbents of bilingual and either/or positions are entitled to be supervised in the official language of their choice in regions designated bilingual. In the 2020–23 cycle, only 78% of institutions indicated that they “nearly always” respected this obligation, but this result is still an improvement from the previous cycle (73%).

While almost all incumbents of bilingual supervisory positions in the core public administration (95.8%) meet the language requirements of their position,⁴ only 78.2% of managers who are required to be bilingual in institutions that are not part of the core public administration and that have offices in regions designated bilingual for language-of-work purposes are actually able to perform their supervisory functions in both official languages.

Results from the 2022 Public Service Employee Survey.⁵ are more encouraging (Graph 1). According to the survey, which covers the core public administration and separate agencies, 94% of public servants feel comfortable communicating with their immediate supervisor in the official language of their choice. However, Francophone respondents in Ontario feel much less comfortable than their colleagues in other regions using the language of their choice at work. In Northern Ontario in particular, 82% of respondents said they feel free to communicate with their immediate supervisor in the official language of their choice, with 10% of respondents providing a negative answer to this question.

Graphic 1. Proportion of public servants who say they feel comfortable using the official language of their choice with their immediate supervisor in regions designated bilingual for language of work purposes ⁶

▼ Graphic 1 - Text version

In the National Capital Region, 89% of Francophones provided positive answers; 4%, neutral answers; and 7%, negative answers. In Eastern Ontario, 89% of Francophones provided positive answers; 2%, neutral answers; and 9%, negative answers. In Northern Ontario, 82% of Francophones provided positive answers; 8%, neutral answers; and 10%, negative answers. In the Montréal region, 95% of Francophones provided positive answers; 3%, neutral answers; and 2%, negative answers. In other Quebec bilingual regions, 96% of Francophones provided positive answers; 1%, neutral answers; and 3%, negative answers. In New Brunswick, 94% of Francophones provided positive answers; 2%, neutral answers; and 4%, negative answers.

In the National Capital Region, 97% of Anglophones provided positive answers; 2%, neutral answers; and 1%, negative answers. In Eastern Ontario, 95% of Anglophones provided positive answers; 2%, neutral answers; and 3%, negative answers. In Northern Ontario, 96% of Anglophones provided positive answers; 3%, neutral answers; and 1%, negative answers. In the Montréal region, 94% of Anglophones provided positive answers; 2%, neutral answers; and 4%, negative answers. In other Quebec bilingual regions, 92% of Anglophones provided positive answers; 3%, neutral answers; and 5%, negative answers. In New Brunswick, 96% of Anglophones provided positive answers; 3%, neutral answers; and 1%, negative answers.

2.5 Personal and central services

Under the Act, public servants in regions designated bilingual have the right to receive personal and central services (for example, assistance with their pay or computer network) in the official language of their choice. According to data collected from 2020 to 2023, only 84% of federal institutions “nearly always” provide this opportunity, down four percentage points from the previous cycle.

However, almost all public servants who are required to provide personal and central services in both official languages in the core public administration (95.1%) meet the language requirements of their position. Nearly 72% of employees assigned to personal and central services in the core public administration are required to provide services in both English and French. Outside the core public administration, only 40.7% of employees who provide these services are required to do so in both official languages.

2.6 Training and professional development

In bilingual regions, federal institutions must offer training or professional development services in employees’ official language of choice. According to data for 2020–23, 76% of large institutions surveyed were able to meet this obligation, a three-percentage-point decline from the already unsatisfactory 2017–20 result.

Best practice

According to the Treasury Board of Canada Secretariat’s (TBS’s) *Departmental Policy on Official Languages*, the organization must provide its employees with access to training and development in the official language of their choice. To comply with this internal policy, TBS’s Learning and Community Development Services have:

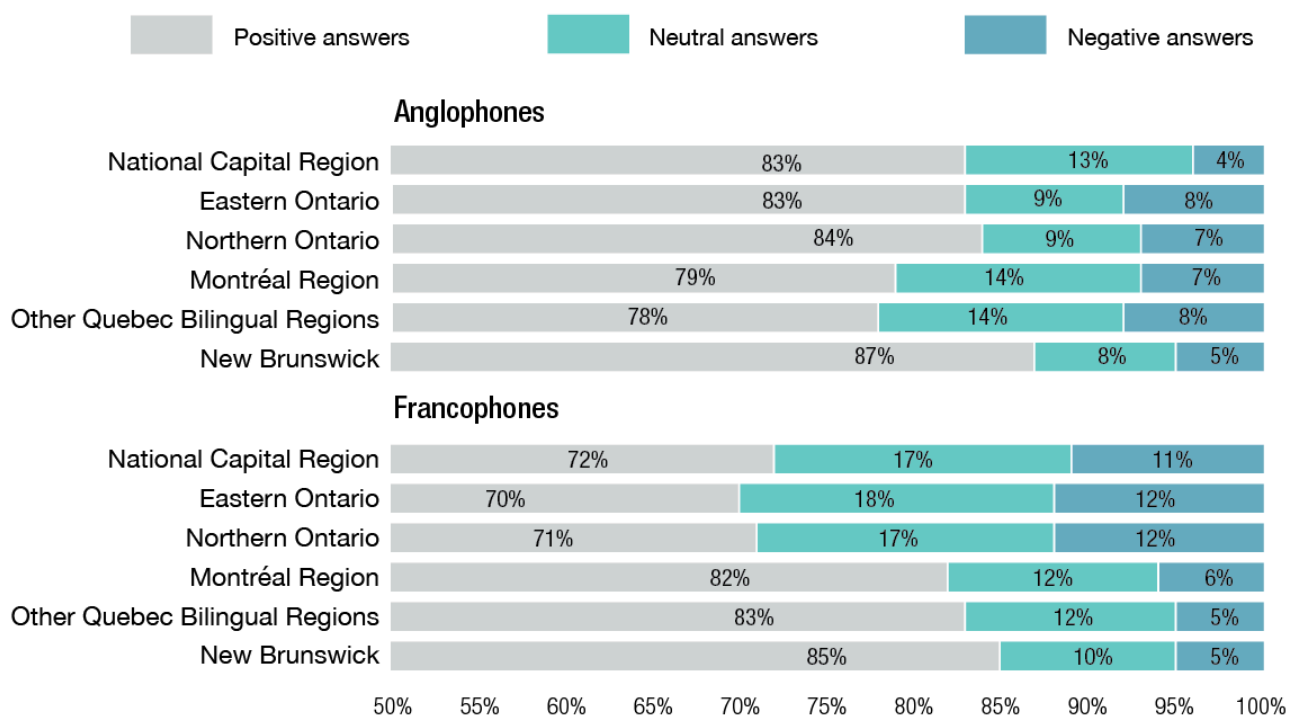

- conducted all its 2022–23 learning activities in a bilingual format or in each of the two official languages
- simultaneously provided participants with all learning materials in both official languages
- made an active offer at the start of all learning events they organized
- ensured that presenters have the necessary language skills to address participants in both official languages and that bilingual facilitators are available to provide interpretation services as required

2.7 Communicating with staff

In the 2020–23 cycle, only 61% of federal institutions indicated their senior management “nearly always” communicates with employees in both English and French, a significant drop of 10 percentage points from the previous three-year cycle.

The [2022 Public Service Employee Survey](#) results paint a slightly more encouraging picture (Graph 2): 76% of English-speaking public servants and 75% of French-speaking public servants say that senior managers in their department or agency use both official languages in their interactions with employees. Nevertheless, this is a drop of four percentage points from the 2020 survey.

Graphic 2. Public servants’ perception of senior managers and their use of both official languages when interacting with employees in regions designated bilingual for language of work purposes

▼ Graphic 2 - Text version

In the National Capital Region, 72% of Francophones provided positive answers; 17%, neutral answers; and 11%, negative answers. In Eastern Ontario, 70% of Francophones provided positive answers; 18%, neutral answers; and 12%, negative answers. In Northern Ontario, 71% of Francophones provided positive answers; 17%, neutral answers; and 12%, negative answers. In the Montréal region, 82% of Francophones provided positive answers; 12%, neutral answers; and 6%, negative answers. In other Quebec bilingual

regions, 83% of Francophones provided positive answers; 12%, neutral answers; and 5%, negative answers. In New Brunswick, 85% of Francophones provided positive answers; 10%, neutral answers; and 5%, negative answers.

In the National Capital Region, 83% of Anglophones provided positive answers; 13%, neutral answers; and 4%, negative answers. In Eastern Ontario, 83% of Anglophones provided positive answers; 9%, neutral answers; and 8%, negative answers. In Northern Ontario, 84% of Anglophones provided positive answers; 9%, neutral answers; and 7%, negative answers. In the Montréal region, 79% of Anglophones provided positive answers; 14%, neutral answers; and 7%, negative answers. In other Quebec bilingual regions, 78% of Anglophones provided positive answers; 14%, neutral answers; and 8%, negative answers. In New Brunswick, 87% of Anglophones provided positive answers; 8%, neutral answers; and 5%, negative answers.

Best practice

At Correctional Service Canada, senior management positions are designated bilingual, enabling staff to communicate with senior management in the official language of their choice. In direct communications, the employee's language is used. If the manager does not know the employee's language, they make an active offer, then use the employee's language of choice.

Best practice

Employment and Social Development Canada ensures that senior management meets its bilingualism obligations. In regions designated bilingual for language-of-work purposes, meetings chaired by senior management are held in both languages. Several tools are available on the department's intranet to help senior managers chair meetings in a way that gives English and French equal status. Deputy ministers' town halls are held in both official languages, and employees are encouraged to ask questions in English or French.

2.8 Documentation and working tools

Employees in bilingual regions have the right to access documentation (for example, instruction manuals, procedures, guides and forms) and regularly and widely used work instruments (for example, keyboards) and electronic systems (for example, spreadsheets and

word-processing software) in the official language of their choice. As in the previous cycle, almost four out of five federal institutions (79%) say they “nearly always” uphold this right.

The Act gives the same right to federal employees in unilingual regions who must provide services to the public in English and French or to employees in bilingual regions. According to the reviews, 81% of institutions “nearly always” make it possible for their staff to exercise this right. In the previous cycle, the figure was 87%.

In the 2022 Public Service Employee Survey, 94% of respondents said the equipment and tools they use in their work, including software and other automated tools, are available in the official language of their choice, the same result as in the 2020 survey. Three percent of respondents gave a negative answer to this question.

Graphic 3. Public servants’ perception of the availability of materials and work tools in the official language of their choice in regions designated bilingual for language-of-work purposes

▼ Graphic 3 - Text version

In the National Capital Region, 88% of Francophones provided positive answers; 6%, neutral answers; and 6%, negative answers. In Eastern Ontario, 92% of Francophones provided positive answers; 4%, neutral answers; and 4%, negative answers. In Northern Ontario, 94% of Francophones provided positive answers; 2%, neutral answers; and 4%, negative answers. In the Montréal region, 91% of Francophones provided positive answers; 4%, neutral answers; and 5%, negative answers. In other Quebec bilingual

regions, 91% of Francophones provided positive answers; 5%, neutral answers; and 4%, negative answers. In New Brunswick, 93% of Francophones provided positive answers; 4%, neutral answers; and 3%, negative answers.

In the National Capital Region, 96% of Anglophones provided positive answers; 2%, neutral answers; and 2%, negative answers. In Eastern Ontario, 94% of Anglophones provided positive answers; 4%, neutral answers; and 2%, negative answers. In Northern Ontario, 97% of Anglophones provided positive answers; 2%, neutral answers; and 1%, negative answers. In the Montréal region, 94% of Anglophones provided positive answers; 2%, neutral answers; and 4%, negative answers. In other Quebec bilingual regions, 95% of Anglophones provided positive answers; 1%, neutral answers; and 4%, negative answers. In New Brunswick, 96% of Anglophones provided positive answers; 2%, neutral answers; and 2%, negative answers.

2.9 Conclusion

Significant shortcomings remain in the implementation of Part V of the Act in 2020–23. In particular, the language of meetings remains a challenge for just over half of institutions. Furthermore, too few employees feel they can exercise their right to prepare documents, participate in meetings or receive training in the official language of their choice. Senior managers must strengthen leadership in this regard and ensure that their interactions with employees respect employees' preferences and contribute to a bilingual federal public service.

Chapter 3. Federal institutions and the participation of English-speaking and French-speaking Canadians

▼ In this section

- [3.1 Overall situation](#)
- [3.2 Situation of specific groups](#)
- [3.3 Conclusion](#)

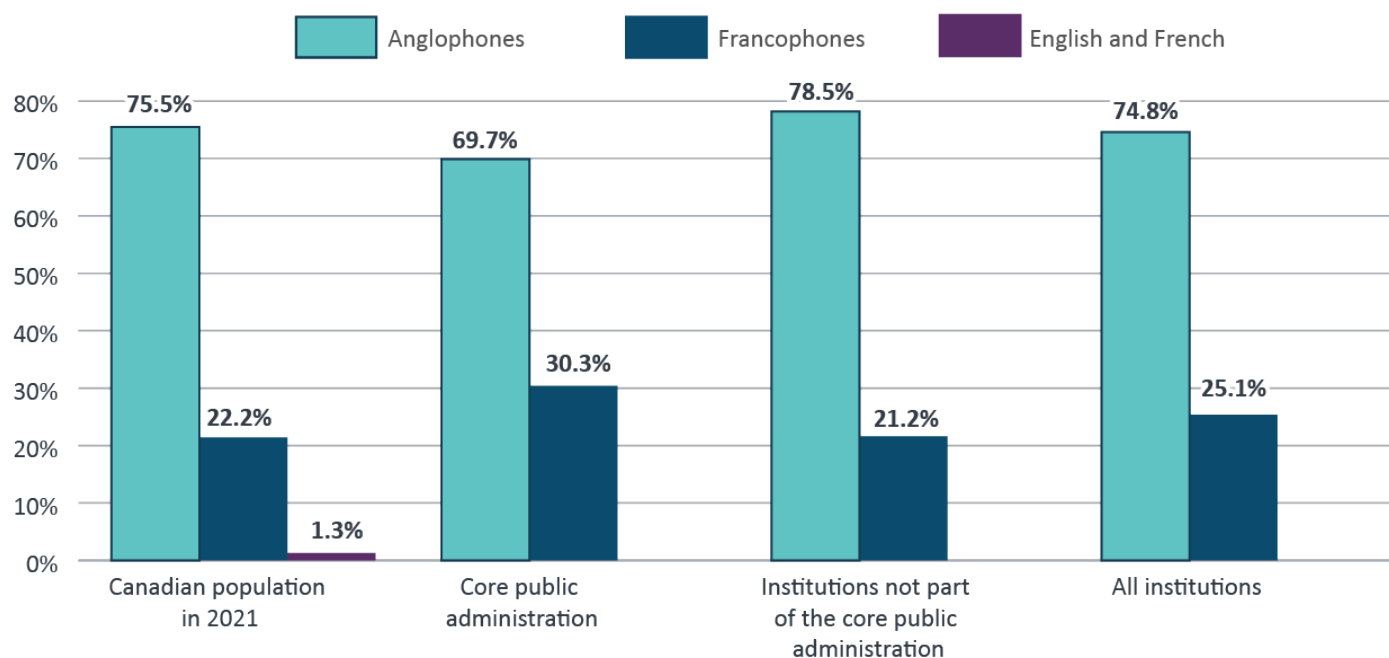

3.1 Overall situation

One of the objectives of Part VI of the Act is to give English- and French-speaking Canadians equal opportunities to obtain employment and advancement in federal institutions, while upholding the merit principle in human resources management. Furthermore, under Part VI,

federal institutions must ensure that their workforce tends to reflect the composition of the country’s two official language communities (taking into account factors such as their mandate and the location of their offices).

To meet their representation commitments, institutions can take different measures, such as participating in job fairs, maintaining ties with various post-secondary institutions in English- or French-speaking minority communities, and posting job offers in the media those communities consume.

Graphic 4. Representation of English speakers and French speakers in the federal public service as of March 31, 2023

▼ Graphic 4 - Text version

Linguistic representation within the federal public service: Anglophones in the Canadian population in 2021: 75.5%, Francophones, 21.4%, and 1.3% that said that English and French are both their official languages; Anglophones in the core public administration: 69.7%, and Francophones, 30.3%; Anglophones in institutions that are not part of the core public administration: 78.5%, and Francophones, 21.2%; Anglophones in all the institutions, 74.8%, and Francophones, 25.1%. Sources: Census 2021; Positions and Classification Information System and System for Official Languages Obligations as of March 31, 2023.

According to the reviews, 87% of large federal institutions took steps in the 2020–23 cycle to ensure that the composition of their workforce tended to reflect that of Canada’s population. This rate was 88% at the end of the previous three-year cycle.

These efforts appear to be yielding results. As Graph 4 shows, as of March 31, 2023, 69.7% of employees in the in the core public administration were Anglophone and 30.3% were Francophone. In federal institutions not part of the core public administration, the rates were 78.5% and 21.2%, respectively. Across all institutions subject to the Act, Anglophones made up 74.8% of the workforce and Francophones, 25.1%. These percentages are in line with those in the 2021 Census of Population, which showed that 75.5% of the population had English as their first official language and 21.4%, French (1.3% of respondents reported both French and English as their first official languages).

3.2 Situation of specific groups

Official language communities are well represented in federal institutions and in their offices in the provinces and territories. That said, some employment equity groups see fewer of their members holding bilingual positions than the federal average.

Currently, 41.4% of employees in the core public administration occupy a bilingual position. The percentage is somewhat lower for some groups—for example, 32.8% of Indigenous people, 35.2% of visible minorities and 40.6% of persons with disabilities hold a bilingual position. Worth noting is the fact that 95.6% of Indigenous people, 94.6% of visible minorities and 94.6% of persons with a disability meet the language requirements of their position.

Best practice

Shared Services Canada (SSC) developed a strategic workforce plan for 2023–26 that includes measures to promote diversity and inclusion, and strategic investments in official languages. Under this plan, the department participated in 30 of the virtual and in-person job fairs held over the past year by Canada’s English- and French-language post-secondary institutions. It has also designated 16 senior representatives to work closely with post-secondary institutions across the country (such as the École de technologie supérieure and McGill University in Quebec) as part of the Post-Secondary Education Champions Initiative. Of note, in fiscal year 2022–23, SSC recruited six new participants to its IT Apprenticeship Program for Indigenous Peoples.

Best practice

Although primarily located on Canada’s east and west coasts, Fisheries and Oceans Canada’s workforce reflects the composition of Canada’s population quite well. The department uses both English- and French-language media to advertise its job

opportunities. All job opportunities are posted in both official languages on the Government of Canada job site. Canada-wide recruitment campaigns are advertised in both official languages. The Canadian Coast Guard targets official language minority communities and their institutions through its regional recruitment strategy, which draws on cooperation with community media.

3.3 Conclusion

Overall, Canada's two major language groups are well represented in the composition of the federal public service. Ongoing effort will be important, and best practices will have to be implemented to ensure continuity in this regard.

Chapter 4. Institutions and management of the official languages files

▼ In this section

- [4.1 Summary](#).
- [4.2 Human resources management](#)
- [4.3 Governance of official languages](#)
- [4.4 Monitoring](#)
- [4.5 Conclusion](#)

4.1 Summary

Federal institutions must establish rigorous and enduring official languages management processes to ensure compliance with the Act. This section discusses the measures that institutions have taken in the areas of human resource management, governance and monitoring to create and implement these processes.

According to TBS's analysis of the reviews, only 3 of the 19 management processes institutions are expected to apply (processes shown in Tables 3, 4 and 5) were "nearly always" implemented by 90% of institutions or more.

Of the 16 processes that are under-applied, 4 are seriously under-applied. Only about 50% of federal institutions are providing language training to their staff for career advancement or are building a conducive environment for practising the second language after language training.

Furthermore, only around 60% put official languages on the agenda of senior management meetings or set specific official languages objectives in performance agreements or in planning instruments, such as action plans.

4.2 Human resources management

Federal institutions must implement effective human resources management practices to build their capacity to provide quality bilingual services to the public and to their employees. Table 3 shows that some challenges remain in this area.

At the end of the 2020–23 review cycle, for example, only 73% of federal institutions considered they “nearly always” had the human resources they needed to meet all their language obligations. This result is virtually unchanged from the previous cycle.

Federal institutions take various measures to ensure that they have staff who can respect the language rights of members of the public and federal employees.

Table 3. Proportion of federal institutions that “nearly always” comply with their obligations related to human resources management or apply some best practices in that area

Questions	2017–20	2020–23
Overall, the institution has the necessary resources to fulfill its linguistic obligations relating to services to the public and language of work.	74%	73%
The language requirements of bilingual positions are established objectively. Linguistic profiles reflect the duties of employees or their work units and take into account the obligations with respect to service to the public and language of work.	85%	83%
The institution objectively reviews the linguistic identification of positions during human resources activities such as staffing, reorganizations or reclassifications.	n/a	96% *
Bilingual positions are staffed by candidates who are bilingual upon appointment.	78%	74%
If a person is not bilingual, administrative measures are taken to ensure that the public and employees are offered services in the official language of their choice.	93% *	93% *
Language training is provided for career advancement.	58%	51%
The institution provides working conditions conducive to the use and development of the second-language skills of employees returning from language training and, to that end, gives employees all reasonable assistance to do so, particularly by ensuring that they have access to the tools necessary for learning retention.	68%	54%

* Target met.

Objectively determining the language requirements of bilingual positions is an important step in ensuring that Canadians receive adequate service in both English and French. Ultimately, it ensures that a person is comfortable enough in both official languages to work in a job where a particular level of proficiency in English and French is required (reading comprehension, writing, oral interaction) for certain tasks. Table 3 shows that 83% of institutions, slightly lower than in the previous cycle (85%), claim to “nearly always” adopt this measure. Similarly, 96% of institutions say they “nearly always” review how a position has been designated during staffing, reclassification or reorganization.

Best practice

This year, Shared Services Canada’s Official Languages team launched a new analysis grid for the linguistic identification of positions. This improved version features an integrated approval system, as well as pre-established linguistic profiles for the most common groups and levels. The delegated manager is expected to complete and submit the analysis grid in various cases (for example, when creating a position or before initiating a staffing action in a work unit where a reorganization or a change in reporting structure has taken place). The Official Languages team is notified when the manager decides not to apply the results of the analysis grid.

Best practice

Global Affairs Canada’s (GAC’s) Official Languages Program and Classification Unit recommends that departmental managers use [The linguistic profile at your fingertips](#) tool developed by the Treasury Board of Canada Secretariat when they need to objectively determine the linguistic profile of a bilingual position. GAC also has a language requirements form for positions. This form now includes definitions of language requirements and levels of delegation, which helps managers properly define the language requirements of positions.

Another important human resources management practice is making sure candidates selected for designated bilingual positions meet the language requirements of the position at the time of hiring. An examination of the reviews submitted between 2020 and 2023 shows that 74% of institutions (4 percentage points less than in 2017–20) nearly always recruit individuals who are already bilingual at the expected level when they are appointed to a position. As in the previous cycle, in 2020–23, 93% of institutions surveyed say they take specific administrative measures

when the person assigned to a position does not have the required level of bilingualism to ensure equal quality of services offered to the public and to employees in both English and French at all times.

From 2020 to 2023, only half of federal institutions reported “nearly always” ensuring that English or French language training was offered to employees for career advancement. Furthermore, just over half of all institutions (54%) reported that they “nearly always” provide staff with working conditions and tools (for example, software for second-language writing) that encourage language retention, a drop of 14 percentage points from the previous cycle.

As indicated in Chapter 6, TBS is continuing its efforts to create a new language training framework that will help institutions overcome shortcomings in this area.

Best practice

Employment and Social Development Canada’s College@EDSC organizes second-language conversation groups. This initiative is aimed at learners in positions requiring a B or C level in oral interaction. Some branches in the department have also launched in-house initiatives, such as lunch-and-learn sessions. Lastly, the institution is promoting the new Mauril English and French learning platform and the Canada School of Public Service’s learning tools.

4.3 Governance of official languages

Deputy heads remain responsible for meeting their institution’s legislative obligations with respect to official languages. To assist them, the *Policy on Official Languages* requires the establishment of an official languages governance structure in each institution. Depending on the size and mandate of an institution, this governance could involve having a senior manager serve as official languages champion, appointing a person responsible for official languages, and creating a unit dedicated to the advancement of official languages in the institution. Table 4 lists some of these mechanisms and shows that, while four of five indicators have improved since the last cycle, considerable work is still required to strengthen official languages governance in federal institutions.

For example, less than two thirds of institutions currently have a separate official languages action plan or have incorporated into another planning instrument (such as their strategic plan) specific and comprehensive objectives for the parts of the Act relating to communications with and services to the public (Part IV), language of work (Part V), the participation of

English-speaking and French-speaking Canadians (Part VI) or the advancement of English and French (Part VII). Planning is a crucial step that enables institutions to support accountabilities, set objectives and equip themselves with the means to achieve them.

Best practice

Shared Services Canada's Departmental Action Plan for Official Languages 2022–25 contains a series of commitments and activities that aim to improve the department's overall compliance with the *Official Languages Act* and its related regulations and policy instruments. The plan aligns with the institution's corporate strategies and priorities and focuses on its capacity to offer bilingual services to its employees and to its 45 client departments. It includes a number of indicators from the Official Languages Maturity Model, developed by the Office of the Commissioner of Official Languages to provide a roadmap for the continuous improvement of departmental bilingualism practices.

One important way of encouraging federal executives and managers to show leadership in complying with the Act is to add to performance agreements clear official languages objectives that management and staff must meet. Only 62% of federal institutions (just two percentage points higher than in 2017–20) “regularly” ensure that such objectives relating to the implementation of Parts IV through VII of the Act are included.

Best practice

For fiscal year 2022–23, performance agreements for Employment and Social Development Canada executives holding bilingual positions included the following commitment: “I will demonstrate my language skills using both official languages often and identify concrete measures to increase the use of both official languages within my team.”

It is also important to “regularly” include official languages on the agenda of executive committee meetings. This practice ensures that they receive the necessary attention at all levels of an institution. The results of the 2020–23 cycle show that 59% of large institutions apply this type of measure, four percentage points higher than in the 2017–20 cycle.

Best practice

The Executive Committee at Marine Atlantic Inc. includes an official languages item on the agenda at each of its meetings. Before each meeting, the persons responsible for official languages discuss the issues to be addressed. Topics are presented to management for

discussion and follow-up.

Other official languages coordinating bodies also play a role. The reviews show that in 76% of large institutions (seven percentage points below 2017–20), the Champion (or Co-Champion), the persons responsible for Parts IV, V and VI, and the coordinators for section 41 of Part VII of the Act meet “regularly” to discuss official languages issues. Reviews from the 2020–23 cycle reflect that 75% of institutions (71% in the previous cycle) have an internal committee or network that meets frequently to help them fulfill their official language obligations and responsibilities effectively.

Best practice

Fisheries and Oceans Canada’s Atlantic Region created an Official Languages Working Group in April 2019. This working group was expanded in 2022–23 to include representatives from all regional and area offices. The group meets every eight weeks to discuss official languages updates and to plan and implement activities. The working group regularly revises an official languages work plan that guides the department in taking measures to enhance the vitality of official language minority communities and to foster the full recognition of English and French in Canadian society.

Table 4. Proportion of federal institutions that “regularly” apply some best practices related to governance

Questions	2017–20	2020–23
The institution has a distinct official languages action plan or has integrated precise and complete objectives in another planning instrument in order to ensure that its obligations with regard to Parts IV, V, VI and/or VII of the <i>Official Languages Act</i> are met.	57%	62%
Taking into consideration the institution’s size and mandate, performance agreements include performance objectives related to Parts IV, V, VI and VII (section 41) of the Act, as appropriate.	60%	62%
Obligations arising from Parts IV, V, VI and VII (section 41) of the Act are on the Senior Management Committee’s agenda.	55%	59%
The Champion (and/or Co-Champion) and the person or persons responsible for Parts IV, V, VI and VII (section 41) of the Act meet to discuss official languages files.	83%	76%
An official languages committee, network or working group made up of representatives from different sectors or regions of your institution holds meetings to deal horizontally with questions related to Parts IV, V, VI and VII (section 41) of the Act.	71%	75%

4.4 Monitoring

Establishing monitoring mechanisms enables federal institutions to track their progress on official languages. These mechanisms enable them not only to report on their actions, but also to take corrective action where necessary and reinforce successful practices. While some monitoring practices are well established in institutions, others are not sufficiently ingrained.

Table 5. Proportion of federal institutions that apply some best practices related to monitoring

Questions	2017–20	2020–23
Measures are regularly taken to ensure that employees are well aware of the federal government’s obligations under Parts IV, V, VI, and VII (section 41) of the Act.	87%	89%
Activities are conducted throughout the year to measure the availability and quality of services offered in both official languages (Part IV).	73%	67%
Activities are conducted to periodically measure whether employees can use their official language of choice in the workplace (in regions designated bilingual for language of work) (Part V).	80%	77%
The deputy head is informed of the results of monitoring activities.	89%	89%
Mechanisms are in place to determine and document the impact of the institution’s decisions on the implementation of Parts IV, V, VI, and VII (section 41) of the Act (such as adopting or reviewing a policy, creating or abolishing a program, or establishing or closing a service location).	69%	68%
Audit or evaluation activities are undertaken, by either the internal audit unit or other units, to evaluate to what extent official languages requirements are being implemented.	61%	52%
When the institution’s monitoring activities or mechanisms reveal shortcomings or deficiencies, steps are taken and documented to quickly improve or rectify the situation.	96% *	95% *
* Target met.		

As shown in Table 5, according to the reviews for the last two cycles 89% of federal institutions have measures in place to keep the deputy head, who is responsible for implementing official languages policies, informed of any issues. From 2020 to 2023, 95% of institutions also ensured that prompt corrective action was taken when shortcomings were identified through the monitoring mechanisms in place.

However, the reviews also show that many institutions are still slow to adopt some monitoring practices. Specifically, only 67% of federal institutions conduct activities (for example, informal evaluations, spot checks and surveys) to measure the availability and quality of the services

they offer to the public in English and in French, and only 77% say they use them to measure whether employees can use the official language of their choice at work. Both these figures are slightly lower than in the previous cycle.

Best practice

In 2022, Canada Post conducted a new language-of-work survey among staff based in bilingual regions to support initiatives to create an inclusive and respectful workplace. The goal was to find out the extent to which these employees feel their work environment fosters the use of both official languages and to gain a better understanding of the culture surrounding bilingualism. The results of this survey will be used to identify existing obstacles and develop suitable support measures in 2023–24.

Best practice

At the National Security and Intelligence Review Agency Secretariat, all employee exit interviews include a question on the use of both official languages in the workplace.

Best practice

Transport Canada employees are encouraged to report any potential official languages issues using the Official Languages Feedback Tool. This tool lets employees submit an internal report to the department's Human Resources Branch when they feel they cannot use the official language of their choice in the workplace. Human resources advisors then investigate any internal complaints and work with the senior manager concerned to rectify the situation.

Best practice

Agriculture and Agri-Food Canada regularly evaluates and monitors the quality of the services it offers to the public in both official languages. For example, a sample of procurement files is reviewed to ensure that service quality is the same in both languages. The Canadian Agriculture Library spot-checks its front-line staff to ensure that members of the public are greeted and served in the official language of their choice.

Similarly, 68% of institutions report having mechanisms (such as completing the checklist for Treasury Board submissions) to evaluate the impact of their decisions on official languages (for example, the decision to review a policy or close an office). Again, the results are down slightly from the previous cycle.

Best practice

In 2008, Innovation, Science and Economic Development Canada created the Official Languages Filter, a tool for assessing the impact of the department's programs, policies and services on official language communities. This year, the filter was applied to 26 memoranda to Cabinet and 14 Treasury Board submissions.

In 2020–23, only 52% of institutions, versus 61% in 2017–20, reported using audits or evaluations to measure the level of compliance with official languages obligations.

Best practice

In the past 12 months, Canadian National (CN) hired an external firm to assess its compliance with the *Official Languages Act*. Following this exercise, CN's human resources department carried out its own internal review of activities and initiatives related to its official languages obligations.

4.5 Conclusion

To manage official languages and ensure compliance with the various parts of the Act, federal institutions have implemented various mechanisms and processes. Nearly 90% of them apply some of the best practices for human resources management, governance and monitoring that support the advancement of English and French. For example, almost all institutions surveyed said they take corrective action when an employee cannot provide services in the public's official language of choice or when their monitoring activities or mechanisms reveal shortcomings.

However, adoption of some practices is not sufficiently widespread. For example, institutions should offer more language training to their employees for career advancement purposes. They should also conduct audits or evaluations to gain a full understanding of the official languages-related challenges they face. Implementing these practices would address some of the shortcomings noted in the various sections of this report.

Chapter 5. Official languages and crisis situations

▼ In this section

- [5.1 Institutional measures](#)
- [5.2 Leadership](#)
- [5.3 Conclusion](#)

5.1 Institutional measures

Federal institutions have an obligation to comply fully with the provisions of the Act even during crises. As shown in Table 6, most institutions are effective in this area. They also continue to meet their linguistic obligations while adjusting to the changes brought about by the COVID-19 pandemic, such as hybrid work, where employees are present in the workplace some of the time and work from home at other times.

Table 6. Measures taken by federal institutions to ensure full compliance with the Act in times of crisis

Question	2020-21	2021-22	2022-23	2020-23
Official languages are included in the institution's emergency preparedness and crisis management planning.	73%	92% *	89%	83%
Steps were taken to ensure that external communications were in the public's preferred official language during the COVID-19 pandemic.	100% *	100% *	100%	99% *
Steps were taken to ensure that internal communications were in the employee's preferred official language during the COVID-19 pandemic.	100% *	100% *	98%	97% *
* Target met.				

5.2 Leadership

For institutions that submitted a review in 2022-23, 98% said they had taken steps to ensure compliance with the part of the Act relating to language of work when implementing pandemic-related measures (97% for the 2020-23 three-year cycle).

In addition, 100% of the federal institutions surveyed (99% for the last three-year cycle) said they have taken various measures to ensure compliance with their obligations regarding communications with and services to the public. For example, they published notices and issued alerts in both official languages, held their news conferences in English and French, and

assigned more staff to bilingual front-line services. They also communicated in both languages with equal care, held pandemic-related meetings in both English and French, and posted bilingual signage in their workplaces.

The pandemic gave some institutions the opportunity to better integrate official languages into their emergency planning and crisis management. At the end of the 2022–23 review cycle, 89% of institutions said they were meeting their obligations in this area. This result is slightly lower than in 2021–22 but is a 16-percentage-point jump from 2020–21.

Best practice

Shared Services Canada has implemented various measures to ensure that urgent communications are translated promptly. The department developed a protocol for obtaining urgent translations outside working hours, acquired five licences of specialized translation software to translate informal communications quickly, and created a protocol for the rapid revision of translations by bilingual employees.

Best practice

On its intranet site, the Canada Revenue Agency made a toolbox available to its staff, enabling communications to be sent rapidly and simultaneously to all employees in both official languages during an emergency. The toolbox includes standardized bilingual email templates for a variety of situations.

Best practice

Innovation, Science and Economic Development Canada hired new bilingual employees for its call centres. These new hires mean the department can respond to an increase in demand from Canadian businesses. In addition, the department redirected some Measurement Canada staff to laboratories in bilingual regions to maintain their capacity to answer questions in both official languages.

5.3 Conclusion

As they deal with crisis situations federal institutions are demonstrating their responsiveness and adaptability and are taking the necessary steps to continue to meet their linguistic obligations.

Chapter 6. Official languages and the Treasury Board of Canada Secretariat

▼ In this section

- [6.1 Amended Act, new responsibilities](#)
- [6.2 Expanding public access to federal services](#)
- [6.3 Reinforcing bilingualism and equity, diversity and inclusion in the public service](#)
- [6.4 Supporting the official languages community of practice](#)
- [6.5 Conclusion](#)

The 2022–23 fiscal year was marked by preparations for:

- the coming into force of the amended *Official Languages Act*
- the implementation of the related Part IV Regulations
- advancing both official languages objectives and equity, diversity and inclusion objectives
- supporting official languages networks across the public service

6.1 Amended Act, new responsibilities

On June 20, 2023, Bill C-13 (*An Act to amend the Official Languages Act, to enact the Use of French in Federally Regulated Private Businesses Act and to make related amendments to other Acts*) received royal assent. The amended Act confers new responsibilities on the Treasury Board and its President.

The President of the Treasury Board now exercises an enhanced leadership role within the federal government when it comes to implementing and coordinating the *Official Languages Act*, and to ensuring its good governance.

The Treasury Board's authority to monitor federal institutions' compliance with the obligations set out in Parts IV, V and VI of the Act has been enhanced. It now has new and expanded authority to monitor how institutions are taking positive measures to support the development of official language communities and to consider the inclusion of language clauses in the agreements they sign with provincial or territorial governments.

In addition, the Treasury Board has been mandated to develop regulations on the application of Part VII, after consulting with the Minister of Canadian Heritage.

The amended Act also contains new obligations on the use of English and French as languages of work in federal institutions.

One of the new provisions of the Act stipulates that anyone appointed to the position of deputy minister or associate deputy minister or a position of an equivalent rank must, on their appointment, take the language training that is necessary to be able to speak and understand clearly both official languages.

Another provision will require federal institutions to ensure that employees in regions designated bilingual for language-of-work purposes are supervised in the official language of their choice, regardless of the linguistic designation of their position. This new measure will come into effect on June 20, 2025, two years after the bill received royal assent.

The amended Act will also have an impact on the process for disposing of surplus federal real property, which will have to be carried out with due regard for the interests of official language minority communities.

In 2022–23, TBS once again helped organize Official Languages Day (formerly Linguistic Duality Day), held on September 8, 2022, with some 1,700 participants. With the collaboration of the Council of the Network of Official Languages Champions and the Canada School of Public Service, the day focused on the modernization of the *Official Languages Act* and language dynamics in Canada.

6.2 Expanding public access to federal services

On August 23, 2022, the President of the Treasury Board approved the revised *Directive on the Implementation of the Official Languages (Communications with and Services to the Public) Regulations*. The purpose of the Directive is to ensure consistent and coherent implementation of the *Official Languages (Communications with and Services to the Public) Regulations* (Regulations), which were amended in 2019.

In 2022–23, important preparatory steps were taken ahead of the launch of the Official Languages Regulations Reapplication Exercise (OLRRE). The OLRRE, which is a legislative requirement, is carried out every 10 years following the release of language data from the decennial census. The purpose of this exercise is to update the linguistic obligations of federal offices and determine which ones must communicate with and provide services to the public in English, in French or in both official languages. TBS coordinates the OLRRE, and federal institutions are required to take the necessary steps to confirm the linguistic designation of their offices, including:

- defining the geographical area their offices serve
- evaluating demand for services in one or both official languages
- consulting with the linguistic minority community

This OLRRE is of particular interest to stakeholders because the Regulations were amended in 2019 to reflect demographic and technological changes, as well as changes in the federal government in general since 1991. It is through this exercise that most of the regulatory changes will be implemented for the first time, which will increase access to bilingual services across Canada.

In December 2022, TBS launched the System for Official Languages Obligations (SOLO), a new web application designed with three key objectives:

- help federal institutions apply the Regulations
- populate Burolis, the website that informs the public which federal offices provide services in English, in French or in both official languages
- coordinate the OLRRE

Using SOLO, TBS coordinated the update of data for some 10,000 federal offices, including addresses, clients served and office functions. This essential preliminary step in the OLRRE process ensures that the provisions of the Regulations are implemented correctly.

For more information on the OLRRE, visit the [Official Languages Regulations Reapplication Exercise](#) webpage on the Government of Canada website.

6.3 Reinforcing bilingualism and equity, diversity and inclusion in the public service

In 2022–23, TBS continued to promote linguistic duality in federal workplaces and work to make the public service a more diverse and inclusive workplace.

TBS organized the Best Practices Forum on Official Languages, in collaboration with Canadian Heritage, the Council of the Network of Official Languages Champions and the Canada School of Public Service. The forum, which was held from February 6 to 10, 2023, focused on language training in the federal public service. The 1,870 participants had the opportunity to:

- learn about best practices for translation and staffing
- participate in workshops on the Second Official Language Scholarship Program and CBC/Radio-Canada's Mauril application
- learn more about measures to promote the career advancement of members of equity-seeking groups

This year, TBS also forged ahead with developing an inclusive, flexible, accessible and learner-centred language training framework that will consider the needs of equity-seeking groups. This framework will promote a culture that fosters bilingualism in the workplace, as well as the regular use of employees' second official language skills.

To better understand the needs of employees in this area, TBS conducted consultations with key stakeholders and equity-seeking networks (see [Appendix E](#)). Issues discussed included a bilingual culture in the public service, governance, inclusion, learning pathways and second-language evaluation. The information gathered during these consultations will be used to create tools to promote second official language training, for example, guidelines, an implementation guide and a learning path.

In preparation for a potential increase in minimum language requirements for incumbents of bilingual supervisory positions, TBS also held a series of 14 activities (presentations or consultations) from June 2022 to June 2023, including face-to-face meetings and online surveys. Participants in these activities included the following:

- members of departmental and Crown corporation advisory committees on official languages
- heads of human resources
- official languages champions
- members of the Committee of Assistant Deputy Ministers on Official Languages
- the National Joint Committee
- members of the Community of Practice of Designated Senior Officials for Employment Equity, Diversity and Inclusion
- representatives of equity-seeking groups

These activities helped TBS answer several questions relating to the implementation of the new requirements and their potential impact. In addition, they provided an opportunity to consult with the various stakeholders and to address their concerns.

TBS also held internal consultations in 2022–23 on the implementation of the part of the Act that deals with the equitable participation of the two linguistic communities in institutions subject to the Act. Representatives from the Quebec Community Groups Network and the Community Economic Development and Employability Corporation participated in the August 2022 consultations with the persons responsible for official languages.

6.4 Supporting the official languages community of practice

As described in subsection 6.2, the OLRRE is an ambitious and sensitive initiative. Starting in 2019, through various forums and platforms (such as the Committee of Assistant Deputy Ministers on Official Languages), TBS began communicating with deputy heads and with the persons responsible for official languages to introduce them to the OLRRE, and to encourage

them to consider its potential impact and plan for the resources they will need to implement it. [Appendix E](#) includes a list of meetings that were organized in 2022–23 to share information on the OLRRE.

In November 2022, TBS developed a bilingual training course that provides an overview of the Regulations, the OLRRE and institutions' obligations regarding the linguistic designation of federal offices that provide services to the public. In all, over 100 persons responsible for official languages took part. A video version of the training was uploaded to YouTube in winter 2023. It is available to institutions subject to the Act, through the new [Regulations Toolbox](#).

From December 2022 to February 2023, TBS also held some 15 training sessions on using SOLO. In total, over 145 persons responsible for official languages in federal institutions participated. These sessions were intended to help them navigate the system and update their office listings.

On February 8, 2023, at the Best Practices Forum on Official Languages, TBS led a workshop on the Regulations and the OLRRE. It also participated in the virtual booths held from February 6 to 10, 2023. In March 2023, a new resource page about the Regulations was launched on the GCwiki site of the Government of Canada's official languages community of practice. The resources on the page include the [Guide for Federal Institutions Regarding the Obligation to Consult or Inform the English or French Linguistic Minority Population](#), the [Best Practices Guide for Measurement of Demand](#), and other resources relating to the implementation of the Regulations for the exclusive use of institutions subject to the Act. This evergreen page is a one-stop shop for all the tools needed to understand the Regulations and ensure a successful OLRRE.

6.5 Conclusion

TBS will continue to support the community of official language practitioners and take steps to strengthen bilingualism, diversity and inclusion in the public service. It will focus efforts on supporting institutions in implementing the new *Directive on the Implementation of the Official Languages (Communications with and Services to the Public) Regulations*. It will also develop and implement a language training framework that meets the needs of institutions and their employees. This language training framework will support federal institutions in their language training efforts, help them foster bilingualism in the workplace, increase linguistic security, and increase employees' regular use of their second official language skills.

Conclusion of the report

Federal institutions continue to display a strong capacity to provide services to the public and to employees in the official language of their choice. But although they are generally able to fulfill their official languages obligations on a day-to-day basis, they are still not in full compliance with the *Official Languages Act*.

They need to do better at:

- ensuring that contracts and agreements with third parties contain language clauses
- consistently making an active offer of services in both official languages
- providing employees with the tools they need for linguistic success
- maintaining a work environment that is conducive to the use of both official languages

Federal institutions should pursue their efforts, and for some, enhance them to comply with the Act.

The Treasury Board's leadership on official languages has been strengthened since the modernization of the *Official Languages Act* in June 2023. It will now be playing a key role in coordinating government-wide implementation of the Act, as well as ensuring its good governance. TBS already launched some initiatives to help federal institutions in this process.

In line with its new horizontal coordination role, TBS is currently finalizing an accountability framework for official languages. This framework will:

- outline the government's expectations with respect to official languages
- set out the roles and responsibilities of federal institutions in implementing official languages activities
- articulate the process for dealing with non-compliance

New regulations for the application of Part VII of the Act will provide guidance to institutions on the positive measures they must take to enhance the vitality of official language minority communities and on how to contribute to the substantive equality of English and French in Canadian society, while also ensuring that language clauses are included in federal-provincial-territorial agreements.

Appendix A. Methodology for reporting on the status of official languages programs

Federal institutions must submit a review on official languages to TBS at least once every three years. The 2022–23 fiscal year marks the third year of the 2020–23 three-year cycle. Sixty-four organizations had to complete a questionnaire on elements pertaining to the application

of Parts IV, V and VI of the Act in 2022–23.

Institutions were required to report on the following elements:

- communications with and services to the public in both official languages
- language of work
- human resources management
- governance
- monitoring of official languages programs

These five elements were evaluated mainly using multiple-choice questions, to reduce the administrative burden on small institutions.

Deputy heads were responsible for ensuring that their institution’s responses were supported by facts and evidence.

Table 1 describes the response scales used in the review for 2022–23.

Table 1. Response scales used in the review on official languages

Response	Scale
Nearly always	In 90% or more of cases
Very often	Between 70% to 89% of cases
Often	Between 50% to 69% of cases
Sometimes	Between 25% to 49% of cases
Almost never	In fewer than 25% of cases
Yes	Completely agree with the statement
No	Completely disagree with the statement
Regularly	With some regularity
Sometimes	From time to time, but not regularly
Almost never	Rarely
N/A	Does not apply to the institution

The previous sections outline the status of official languages programs based on the most recent reviews submitted by the 177 institutions during the 2020–23 cycle. Best practices mentioned in this report were chosen from the 64 institutions that submitted a review this year. The statistical tables in [Appendix D](#) of this report outline the results for all federal institutions.

Appendix B. Federal institutions required to submit a review for the 2022–23 fiscal year

In total, 64 federal institutions submitted a review for 2022–23 fiscal year. The distinction between small institutions and large institutions is based on size. Large institutions were requirement to respond to a longer questionnaire. Small institutions have fewer than 500 employees. The lists of federal institutions that submitted a review for the two previous years of the three-year cycle are available in the Appendix B of the *Annual Report on Official Languages 2020–21* and the *Annual Report on Official Languages 2021–22*.

Large institutions

- Administrative Tribunals Support Service of Canada
- Agriculture and Agri-Food Canada
- Air Canada
- Canada Border Services Agency
- Canada Post
- Canada Revenue Agency
- Canadian Broadcasting Corporation
- Canadian Forces Morale and Welfare Services
- Canadian Heritage
- Canadian National Railway
- Communications Security Establishment Canada
- Correctional Service Canada
- Employment and Social Development Canada
- Fisheries and Oceans Canada
- Global Affairs Canada
- Health Canada
- Immigration and Refugee Board of Canada
- Immigration, Refugees and Citizenship Canada
- Innovation, Science and Economic Development Canada
- Marine Atlantic Inc.
- National Defence
- Natural Resources Canada
- Public Sector Pension Investment Board
- Public Services and Procurement Canada
- Royal Canadian Mounted Police
- Shared Services Canada

- Transport Canada
- Treasury Board of Canada Secretariat
- Veterans Affairs Canada
- VIA Rail Canada Inc.

Small institutions

- Accessibility Standards Canada
- Atlantic Pilotage Authority Canada
- Canada Development Investment Corporation
- Canada Foundation for Sustainable Development Technology
- Canada Science and Technology Museum
- Canadian Commercial Corporation
- Canadian Dairy Commission
- Canadian Intergovernmental Conference Secretariat
- Canadian Museum of History
- Canadian Museum of Nature
- Federal Bridge Corporation
- Federal Economic Development Agency for Northern Ontario
- Financial Consumer Agency of Canada
- Indian Oil and Gas Canada
- International Development Research Centre
- Invest in Canada
- Laurentian Pilotage Authority Canada
- Military Police Complaints Commission of Canada
- Nanaimo Port Authority
- National Security and Intelligence Review Agency Secretariat
- Office of the Commissioner of Lobbying of Canada
- Office of the Secretary to the Governor General
- Pacific Pilotage Authority Canada
- Patented Medicine Prices Review Board Canada
- Polar Knowledge Canada
- Quebec Port Authority
- Saguenay Port Authority
- Secretariat of the National Security and Intelligence Committee of Parliamentarians
- Standards Council of Canada
- The Jacques-Cartier and Champlain Bridges Inc.
- The National Battlefields Commission

- The Seaway International Bridge Corporation
- Veterans Review and Appeal Board
- Windsor Port Authority

Appendix C. Definitions

“Anglophone”

refers to employees whose first official language is English.

“Bilingual position”

is a position in which all or part of the duties must be performed in both English and French.

“First official language”

is the language declared by the employee as the one that they primarily identify with.

“Francophone”

refers to employees whose first official language is French.

“Incomplete record”

means a position for which data on language requirements is incorrect or missing.

“Position”

means a position filled for an indeterminate period or a determinate period of three months or more, according to the information in the Position and Classification Information System (PCIS).

“Public”

means any person, group of persons (professional associations or others) or organization or company (other than a Crown corporation) in Canada or abroad, any representative of another level of government communicating with or receiving a service from an institution, excluding officers and employees of institutions subject to *the Official Languages Act* when carrying out their duties.

“Resources”

refers to the resources required to meet obligations on a regular basis, according to the information available in the System for Official Languages Obligations (SOLO). Resources can consist of a combination of full-time and part-time employees, as well as contract resources. Some cases involve automated functions, hence the need to use the term “resources” in this report.

“Reversible” or “either/or position”

is a position in which all the duties can be performed in English or French, depending on the employee’s preference.

Appendix D. Statistical tables

There are four main sources of statistical data:

- Burolis is the official inventory that indicates whether offices have an obligation to communicate with the public in both official languages

- The Position and Classification Information System (PCIS) covers the names and positions of employees working in institutions that are part of the core public administration
- The System for Official Languages Obligations (SOLO) provides information on the resources of institutions that are not part of the core public administration (in other words, Crown corporations and separate agencies)
- The Employment Equity Data Bank (EEDB) provides data based on voluntary declarations by employment equity groups and, for women, the Pay System

March 31 is the reference date of the data in the statistical tables and in the data systems (the Pay System, Burolis, the PCIS, SOLO and the EEDB).

Notes

Percentage totals may not add up to 100% due to rounding.

The data in this report relating to positions in the core public administration are compiled from the PCIS, except for Tables 15 to 18, which also use the EEDB. Because the data related to official languages are based on the PCIS, they do not match those included in the annual report on *Employment Equity in the Federal Public Service*. The sum of the designated employment groups does not equal the total of all employees because employees may have chosen to self-identify in more than one group and because employees who identified as male were added to the total.

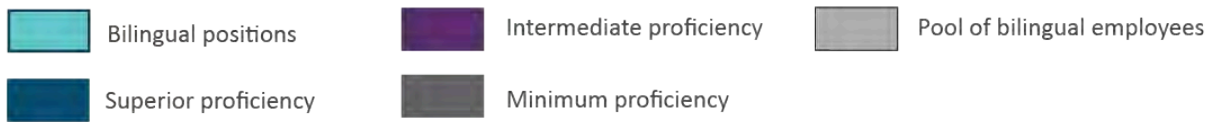

Pursuant to the *Public Service Official Languages Exclusion Approval Order*, incumbents may not meet the language requirements of their position for the following reasons:

- They are exempted
- They have two years to meet the language requirements

The linguistic profile of a bilingual position is based on three levels of second-language proficiency:

- Level A: minimum proficiency
- Level B: intermediate proficiency
- Level C: superior proficiency

Table 1. Bilingual positions and pool of bilingual employees in the core public administration as of March 31

Year	Bilingual positions	Superior proficiency	Intermediate proficiency	Minimum proficiency	Pool of bilingual employees
2000	35%	21%	11%	3%	35%
2010	41%	27%	12%	2%	41%
2020	42%	26%	15%	2%	43%
2021	42%	25%	14%	2%	41%
2022	42%	23%	14%	2%	39%
2023	41%	23%	14%	2%	38%

Table 2. Language requirements of positions in the core public administration as of March 31

Sources: Data from the Regulations Management System and from Canada Post as of March 31, 2023.

1. Includes air, rail and ferry routes.
2. Consulates and embassies are automatically bilingual. Others must measure the demand (for example, Public Services and Procurement Canada, International Development Research Centre).

-
- 1 This schedule was established to ensure compliance with the Act while reducing the reporting burden on federal institutions. However, 22 large institutions submit a review every year.
 - 2 Active offer: A culture of respect, a culture of excellence.
 - 3 Institute for Citizen-Centered Services and Angus Reid, *Citizens First 2023, Government of Canada Jurisdictional Report*. The survey was conducted by Angus Reid from June to August 2023 and included a total of 6,347 Canadian online and telephone respondents.
 - 4 Incumbents in bilingual positions represent 31.3% of the workforce in supervisory positions.
 - 5 A total of 189,584 employees from 90 federal departments and agencies responded to the 2022 Public Service Employee Survey, a response rate of 53%.
 - 6 Positive responses are “Strongly agree” and “Somewhat agree;” neutral responses are “Neither agree nor disagree;” and negative responses are “Somewhat disagree” and “Strongly disagree.” For the statement about senior management, positive responses are “Always/almost always” and “Often;” neutral responses are “Sometimes;” and negative responses are “Rarely” and “Never/almost never.” The calculation of the total number of positive and negative responses excludes the responses “Don’t know” and “Not applicable.”
