**CANDIDE MODEL 1.0 SERIES OF PROJECT PAPERS**

The CANDIDE (CANadian Disaggregated Inter-Departmental Econometric) model is a large-scale, medium-term econometric model of the Canadian economy. This series of project papers describes CANDIDE Model 1.0 which was the initial focal point of the CANDIDE Project. In addition to serving as a description of some salient aspects of the Canadian economy, the model is intended to be useful for policy simulations and for conditional forecasts or projections. It is intended that information about the basic model be readily available to the government, business and academic communities, with the expectation that constructive criticism will be forthcoming to aid the Project staff in their developmental work.

Organization  
of the  
Government  
of Canada

**11<sup>th</sup> Edition**

## Organization of the Government of Canada

This is the book to help you find your way through that labyrinth known as the federal government.

It outlines, in one convenient source, the structure and functions of the myriad departments, agencies, corporations, boards, commissions and councils, providing such useful information as:

- legal name
- address of head office
- addresses of regional offices
- names of principal officers
- historical background
- overall responsibilities
- organization and programs

The book includes over 86 organization charts, a bilingual fold-out chart of the entire federal government, as well as a glossary and index.
