REPORT TO PARLIAMENT BY THE SUB-COMMITTEE ON THE PENITENTIARY
SYSTEM IN CANADA

X already
in.

This report has received substantial media coverage since its tabling in the House of Commons. It will probably be referred to frequently for many years, not only by specialists in this area but also by the general public. It is a highly-readable and disturbing report, with a number of haunting black and white photographs, on existing conditions and attitudes in Canada's penitentiary system. Its message and significance are evident in its first recommendation contained in the preface: "A crisis exists in the Canadian penitentiary system. It can be met only by the immediate implementation of large scale reforms. It is imperative that the Solicitor General act immediately on this Report as a matter of utmost urgency". The report contains 65 recommendations, numerous black and white photographs, and appendices. Separate French edition. Reprint.

THE AQUATIC EXPLORERS - A HISTORY OF THE FISHERIES RESEARCH BOARD OF CANADA

X already in

Co-published with University of Toronto Press. In 1898 a group of scientists, working without pay, often under hazardous conditions with primitive equipment, began a systematic study of Canada's fishes. The team operated under the aegis of a board of management which later evolved into the Fisheries Research Board, a scientific organization that has placed Canada among the world's leaders in fishery knowledge. This history of the Fisheries Research Board examines the aims and achievements of its research, its attempts to deal with the often conflicting demands of pure and applied science, and its confrontations with a frequently uncomprehending and dissatisfied government. The people who shaped and sustained the organization figure prominently in the account. Appendices. Index. Numerous black & white photographs.. (Cat. No. FS99-13/1977, Stock No. 11068283, ISBN 0-8020-2270-7) This book should be ordered directly from University of Toronto Press.
