

FAMILY AND HOUSEHOLD CHARACTERISTICS OF 2SLGBTQ+ PEOPLE IN CANADA

In the period from 2019 to 2021, approximately 800,000 adults aged 25 to 64 in Canada reported being 2SLGBTQ+.

Almost half of 2SLGBTQ+ adults (46%) were married or in a common-law union, compared with nearly three-quarters (72%) of non-2SLGBTQ+ adults.

2SLGBTQ+ adults were more likely to be living common-law than non-2SLGBTQ+ adults, who were more likely to be married.

Just over 1 in 10 2SLGBTQ+ adults were parents living with at least one child under the age of 12.

A larger share of 2SLGBTQ+ women than men were parents.

Half of 2SLGBTQ+ adults aged 65 and older were living alone, compared with nearly one-third of non-2SLGBTQ+ older adults

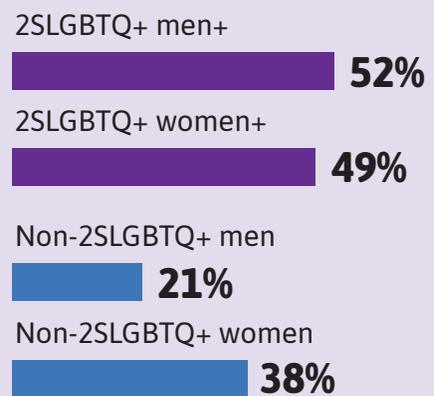

2SLGBTQ+

Non-2SLGBTQ+

Among adults aged 65 and older, 2SLGBTQ+ men were twice as likely to live alone as non-2SLGBTQ+ men.

Notes:

• 2SLGBTQ+ includes persons who are Two-Spirit, lesbian, gay, bisexual, transgender, and queer or who use other terms related to gender or sexual diversity. Non-2SLGBTQ+ includes heterosexual and cisgender persons (those whose gender corresponds to their sex at birth).

• To protect confidentiality, individuals in the category "non-binary persons" are distributed into the other two gender categories of the 2SLGBTQ+ population and are denoted by the "+" symbol.
