Certification Mark Standard

The use of the certification mark is intended to indicate that the specific goods listed above, in association with which it is used, have met certain quality standards, to indicate the class of individuals who produced the goods, as well as the regions where the goods were produced, and to describe the products. The standard met for the classification of wood is the National Lumber Grades Authority, as contained in the book entitled NLGA Standard Grading Rules for Canadian Lumber. Moreover, the national classification rules, as contained in the NLGA's manual, establish standardized grade categories and names that guarantee a constant design and production for all species of commercial building timber. The National Lumber Grades Authority's manual has been placed on file (see the paper copy) and is also easily available to the public at www.nlga.org. The wood products that bear this mark meet the NLGA's wood grading standards.
