Trademarks Journal

Vol. 72 No. 3709

General Information

The *Trademarks Journal* (the “*Journal*”) is published on the website of the Canadian Intellectual Property Office (<http://cipo.gc.ca>). The *Journal* lists trademark applications advertised under subsection 37(1) of the *Trademarks Act* (the “*Act*”), public notices of prohibited marks under section 9 of the *Act*, statements of the Minister in respect of geographical indications under subsection 11.12(2) of the *Act*, as well as erratums to previous volumes.

Electronic *Trademarks Journal*

The *Journal* is available in PDF format and can be downloaded free of charge and viewed and printed with Adobe Acrobat Reader. The *Journal* is also available in a printable HTML format as an alternate official version that contains a search function to narrow and customize the content. The electronic form of the *Journal* is the official version.

Official Languages

The *Journal* is available in English and French. The details displayed for each application are based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the *Journal* are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the *Journal* have been translated. Any registration resulting from the application will be restricted to these goods or services as described in the language of the application.

Filing Dates

The filing date of each trademark application (including those to extend the statement of goods or services of an existing registration) is shown in the YYYY-MM-DD format.

Nice Classification

Where applicable and required, the *Journal* lists the goods or services of each application grouped according to the classes of the Nice Classification, each group being preceded by the number of the class of the Nice Classification to which that group of goods or services belongs and presented in the order of the classes of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Journal* may file a statement of opposition with the Registrar of Trademarks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Certification Mark Standard

The certification mark, as used or intended to be used by persons authorized by the certifier, certifies or is intended to certify that the certified parties' information security management systems and services are found to conform to the International Organization for Standardization ISO/IEC 27001 management system standards. ISO/IEC 27001 is an international standard on how to manage information security. It details requirements for establishing, implementing, maintaining and continually improving an information security management system (ISMS), the aim of which is to secure the organization's data and information assets, protect against cyber security risks, and keep operations safe, secure and compliant. ISO/IEC 27001 requires that management of an organization: systematically examine the organization's information security risks, taking account of the threats, vulnerabilities, and impacts; design and implement a coherent and comprehensive suite of information security controls and/or other forms of risk treatment (such as risk avoidance or risk transfer) to address those risks that are deemed unacceptable; and adopt an overarching management process to ensure that the information security controls continue to meet the organization's information security needs on an ongoing basis.

Certification Mark Standard

This certification mark, as used by authorized persons, is to verify and assess the maturity level of a compliance domain of a for-profit, not-for-profit, or government organization based on a seven-level maturity model scale. The higher the maturity level, the better the organization manages compliance requirements, risks and opportunities, providing the public with information to make an informed decision as to the behavior of the organization. To evaluate whether an organization's compliance domain meets the requirements of the model, the certifying person performs a test of the compliance domain to confirm that the organization has met specific requirements of the relevant maturity level. Further details of the certification standard, including a detailed explanation of the specific requirements for each of the seven maturity levels, are set out in the Certification Mark Defined Standard document published by Peter Gaspar, which is attached hereto and is available for the public within the Canadian Intellectual Property Office. The applicant is not engaged in the manufacture, sale, leasing or hiring of goods or the performance of services such as those listed in the application.

Class 01

(1) Agents, reagents, assays, enzymes, nucleotides, buffers, chemical preparations, and biological preparations for genetic research use; diagnostic reagents and preparations for medical research and scientific research; kits containing reagents and a protocol for use thereof for genetic research and scientific research; agents, reagents, assays, enzymes, nucleotides, buffers, chemical preparations, and biological preparations for scientific and research use in the fields of nucleic acid sequencing, genotyping, metagenomics, genetic testing, and genetics; agents, reagents, assays, enzymes, nucleotides, buffers, chemical preparations, and biological preparations for genetic scientific and research use in the fields of nucleic acid sequencing, genotyping, diagnostics, diagnostic research, clinical research, drug development, pharmaceuticals, laboratory research, scientific research, medical research, life sciences, biology, microbiology, metagenomics, biotechnology, agriculture, forensics, food safety, genetic testing, and genetics; kits comprising nucleotides, reagents, enzymes, agents, assays, buffers, chemical preparations, or biological preparations for scientific and research use in the fields of nucleic acid sequencing, genotyping, metagenomics, genetic testing, and genetics; kits comprising nucleotides, reagents, enzymes, agents, assays, buffers, chemical preparations, or biological preparations for genetic scientific and research use in the fields of nucleic acid sequencing, genotyping, diagnostics, diagnostic research, clinical research, drug development, pharmaceuticals, laboratory research, scientific research, medical research, life sciences, biology, microbiology, metagenomics, biotechnology, genetic testing, and genetics.

Class 05

(2) Agents, reagents, assays, enzymes, nucleotides, buffers, chemical preparations, and biological preparations for medical genetic testing; diagnostic reagents and agents for medical diagnostic use; kits containing reagents and a protocol for use thereof for medical genetic testing purposes; Medical diagnostic assay kits containing primarily medical diagnostic reagents and assays for testing body fluids, such medical diagnostic reagents and assays including nucleotides, reagents, enzymes, agents, assays, buffers, chemical preparations, or biological preparations for medical genetic testing and medical diagnostic purposes ; agents, reagents, assays, enzymes, nucleotides,

buffers, chemical preparations, and biological preparations for medical purposes in the fields of nucleic acid sequencing, genotyping, metagenomics, genetic testing, and genetics; agents, reagents, assays, enzymes, nucleotides, buffers, chemical preparations, and biological preparations for medical genetic testing purposes in the fields of nucleic acid sequencing, genotyping, diagnostics, metagenomics, genetic testing, and genetics.

Class 09

(3) Apparatus and instruments for medical research and scientific research in laboratories, namely, genetic sequencers; laboratory devices for detecting genetic sequences; diagnostic biomolecule and genetic sequence apparatus for the detection of pathogens for laboratory or scientific research use; medical research and scientific research apparatus and instruments for use in genetic analysis, namely computer hardware and software for scientific analysis of genetic sequences; apparatus for DNA and RNA testing for research purposes, namely diagnostic biomolecule and genetic sequence detection; scientific apparatus and instruments for measuring relative DNA, RNA and protein and parts and fittings therefor, namely diagnostic biomolecule and DNA and RNA sequence detection and measurement devices and parts and fittings therefor; medical laboratory research instruments for DNA and RNA analysis; computer hardware; computer hardware for use in the fields of nucleic acid sequencing, genotyping, diagnostics, diagnostic research, clinical research, drug development, pharmaceuticals, laboratory research, scientific research, medical research, life sciences, biology, microbiology, metagenomics, biotechnology, genetic testing, and genetics; computer hardware for data processing; scientific and research apparatus and instruments for scientific analysis of genetic sequences, namely, nucleic acid sequencers, arrays, scanners, electronic imaging devices and analyzers, testing sample collection equipment, sample quality control instruments, sequencing reagent cartridges and trays, and test sample preparation equipment, for laboratory use including in the fields of nucleic acid sequencing, genotyping, diagnostics, diagnostic research, clinical research, drug development, pharmaceuticals, laboratory research, scientific research, medical research, life sciences, biology, microbiology, metagenomics, biotechnology, genetic testing, and genetics; computer hardware and software for scientific analysis of genetic sequences, namely next-generation sequencing (NGS) bioinformatics data processor; downloadable computer software for scientific analysis of genetic sequences; embedded software sold as a component of genetic sequencing devices for scientific analysis of genetic sequences; downloadable computer software for storing, organizing, and creating a searchable library of genetic data for use in sequence detection, and disease detection and diagnosis; downloadable computer software for database management and for storage of bioinformatics electronic data; downloadable computer software for creating searchable databases of information and data; downloadable computer software for use in connection with database management in the field of nucleic acid sequencing, genotyping, diagnostics, diagnostic research, clinical research, drug development, pharmaceuticals, laboratory research, scientific research, medical research, life sciences, biology, microbiology, metagenomics, biotechnology, genetic testing, and genetics; downloadable computer software for use in connection with databases in the field of nucleic acid sequencing, genotyping, metagenomics, genetic testing, and genetics; downloadable computer software for use in connection with medical and scientific research services in the field of genotyping, diagnostics, molecular pathology, molecular diagnostics, laboratory medicine, and oncology; downloadable computer software for use in connection with DNA sequencing, screening, and analysis services for medical and scientific research purposes; downloadable computer software for use in connection with nucleic acid sequencing, screening, and analysis services for medical and scientific research purposes; downloadable computer software for use in connection with genomic sequencing, screening, and analysis services for medical research purposes; downloadable computer software for use in connection with genetic

analysis and reporting services for medical and scientific research purposes; downloadable computer software for use in connection with next-generation sequencing (NGS) bioinformatics data processor in the fields of nucleic acid sequencing, genotyping, genetic testing, and genetics; downloadable computer software for compressing and decompressing genomic data files; downloadable computer software, namely, software to receive and store DNA, RNA and genetic records, and to authorize medical and research personnel to use records.

Class 10

(4) Clinical or medical diagnostic apparatus and instruments, namely, nucleic acid sequencers and analyzers; medical diagnostic apparatus and instruments for the amplification and analysis of nucleic acids and the preparation of nucleic acid libraries sold; medical equipment, namely, devices for analyzing nucleic acids and for DNA sequencing for the purpose of rendering medical treatment and diagnosis; apparatus for DNA and RNA testing for medical purposes, namely diagnostic biomolecule and dna sequence readers of biomolecule and dna sequence testing results for clinical medical use; medical diagnostic instruments for the analysis of body fluids, namely body fluids analyzer for medical purpose; proteomic sample preparation device for medical diagnostic uses; medical diagnostic apparatus for testing DNA and RNA samples, namely diagnostic biomolecule and dna sequence detection devices for clinical medical purposes.

Services

Class 42

Medical and scientific research in the field of genome sequence analysis and reporting; DNA screening for medical and scientific research purposes; design and development of laboratory apparatus, instruments and computer systems for use in testing DNA and RNA samples; product development, namely, developing equipment for use in preparing, detecting, analyzing, and sequencing nucleic acids and other biological molecules; clinical laboratory services in preparing, amplifying, labeling, detecting, analyzing, and sequencing nucleic acids and other biological molecules from human beings or animals for scientific and medical research purposes; design and development of medical diagnostic apparatus and instruments for use in genetic sequencing; scientific consulting and research services and clinical laboratory testing services in the fields of amplification, detection, sequencing, and analysis of nucleic acids and the preparation of nucleic acid libraries; nucleic acid sequencing services for medical and scientific research purposes; providing temporary use of non-downloadable computer software for scientific analysis of genetic sequences; providing temporary use of non-downloadable computer software for storing, organizing, and creating a searchable library of genetic data for use in sequence detection, and disease detection and diagnosis; providing temporary use of non-downloadable computer software for database management and for storage of bioinformatics electronic data; providing temporary use of non-downloadable computer software for creating searchable databases of information and data; providing temporary use of non-downloadable computer software for use in connection with database management in the field of nucleic acid sequencing, genotyping, diagnostics, diagnostic research, clinical research, drug development, pharmaceuticals, laboratory research, scientific research, medical research, life sciences, biology, microbiology, metagenomics, biotechnology, genetic testing, and genetics; providing temporary use of non-downloadable computer software for use in connection with databases in the field of nucleic acid sequencing, genotyping, metagenomics, genetic testing, and genetics; providing temporary use of non-downloadable computer software for use in connection with medical research services in the field of genotyping, diagnostics, molecular pathology, molecular diagnostics, laboratory medicine, and oncology; providing temporary use of non-downloadable computer software for use in connection with DNA sequencing, screening, and analysis services for medical and scientific research purposes;

providing temporary use of non-downloadable computer software for use in connection with nucleic acid sequencing, screening, and analysis services for medical and scientific research purposes; providing temporary use of non-downloadable computer software for use in connection with genomic sequencing, screening, and analysis services for medical and scientific research purposes; providing temporary use of non-downloadable computer software for use in connection with genetic analysis and reporting services for medical and scientific research purposes; providing temporary use of non-downloadable computer software for use in connection with next-generation sequencing (NGS) bioinformatics data processor in the fields of nucleic acid sequencing, genotyping, genetic testing, and genetics; providing temporary use of non-downloadable computer software for compressing and decompressing genomic data files; providing temporary use of non-downloadable computer software, namely, software to receive and store DNA, RNA and genetic records, and to authorize medical and research personnel to use records.
