Introduction to the 2024 to 2025 Departmental Sustainable Development Strategy Report

The [2022 to 2026 Federal Sustainable Development Strategy \(FSDS\)](#) presents the Government of Canada's sustainable development goals and targets, as required by the [Federal Sustainable Development Act](#). This is the first FSDS to be framed using the 17 Sustainable Development Goals (SDGs) of the United Nations 2030 Agenda and provides a balanced view of the environmental, social, and economic dimensions of sustainable development.

In keeping with the purpose of the Act, to make decision-making related to sustainable development more transparent and accountable to Parliament, National Security and Intelligence Review Agency Secretariat (NSIRA Secretariat) supports the goals laid out in the FSDS through the activities described in NSIRA Secretariat's 2023 to 2027 Departmental Sustainable Development Strategy (DSDS). This Report provides a report on progress related to the NSIRA Secretariat's DSDS in the fiscal year 2024 to 2025.

The [Federal Sustainable Development Act](#) also sets out [7 principles](#) that must be considered in the development of the FSDS as well as DSDSs. These basic principles have been considered and incorporated in NSIRA Secretariat's DSDS and 2024 to 2025 DSDS Report.

To promote coordinated action on sustainable development across the Government of Canada, NSIRA Secretariat's departmental strategy reports on Canada's progress towards implementing the 2030 Agenda and advancing the SDGs, supported by the Global Indicator Framework (GIF) and Canadian Indicator Framework (CIF) targets and indicators. The Report also now captures progress on SDG initiatives that fall outside the scope of the FSDS.

Integrating Sustainable Development

The integration of sustainable development within the NSIRA Secretariat revolves around strategic initiatives aimed at meeting government commitments while adopting responsible operational practices. First, we support the Government of Canada's commitment to ensuring that at least 5% of the total value of contracts is awarded to Indigenous businesses each year. This approach reflects our desire to promote the economic inclusion of Indigenous communities and to strengthen their participation in national economic development.

The NSIRA Secretariat plays a key role in this initiative by actively inviting Indigenous suppliers to bid for goods and services. At the same time, we systematically integrate environmental considerations into our procurement processes, enabling informed choices that promote sustainable practices. To this end, we provide training for procurement specialists, ensuring they can make informed decisions regarding eco-friendly procurement.

Thus, the NSIRA Secretariat is committed not only to adhering to sustainable development standards but also to embodying values of social and environmental responsibility across all its internal policies and operational processes.

NSIRA Secretariat will continue to ensure that its decision-making process includes consideration of FSDS goals and targets through its Strategic Environmental and Economic Assessment (SEEA) process. A SEEA for a policy, program or regulatory proposal includes an analysis of the climate, nature, environmental and economic effects of the given proposal.

Public statements on the results of NSIRA Secretariat's assessments are issued when an initiative that was the subject of a detailed Strategic Environmental and Economic Assessment is implemented or announced.

NSIRA Secretariat did not have any proposals subject to a detailed SEEA that were announced or implemented in 2024-2025.
