

RESIDUAL TOTAL MAGNETIC FIELD

**Residual Total Magnetic Field**  
 This map of the Residual Total Magnetic Field was derived from data acquired during an aeromagnetic survey carried out by Geo Data Solutions (GDS) Inc. from January 19, 2020 to March 28, 2020. The data were recorded using a split-beam cesium vapour magnetometer (sensitivity 0.005 nT) mounted in the tail boom of a Beechcraft King Air aircraft (C-441R). The nominal traverse and control line spacings were, respectively, 400 m and 2400 m, and the aircraft flew at a nominal terrain clearance of 150 m. Traverse lines were oriented N55°E with orthogonal control lines. The flight path was recovered following post-flight differential corrections to the raw Global Positioning System (GPS) data and inspection of ground images recorded by a vertically-mounted video camera. The survey was flown on a pre-determined flight surface to minimize differences in magnetic values at the intersections of control and traverse lines. These differences were computer-analysed to obtain a mutually levelled set of flight-line magnetic data. The levelled values were then re-sampled to a 100 m grid. The International Geomagnetic Reference Field (IGRF) defined at the average GPS altitude of 1630 m for the year 2020.2 was then removed. Removal of the IGRF, representing the magnetic field of the Earth's core, produces a residual component related almost entirely to magnetizations within the Earth's crust.

This publication is available for free download through GEOCAN (http://geocan.nrcan.gc.ca). Corresponding digital profile and gridded data sets with similar paths for adjacent airborne geophysical surveys are available from Natural Resources Canada's Geoscience Data Repository for Aeromagnetic data at http://gdr.gsc.nrcan.gc.ca. For more information about this survey, please contact the Geological Data Centre, Geological Survey of Canada, 601 Booth Street, Ottawa, Ontario K1A 0E8. Telephone: (613) 995-5326, email: hrcan.inf@gs-c.mcgill.mcgill.ca or gsc.nrcan@nrcan.gc.ca.

Copies of this map may also be obtained from the Yukon Geological Survey, Energy, Mines and Resources, Government of Yukon, P.O. Box 2030 (K-102), Whitehorse, Yukon, Y1A 2C5. Telephone: (867) 967-5201, email: geology@gs.yk.ca, website: http://www.geology.yk.ca.

**Acknowledgements**  
 The author thanks the field crew chief, Sateh Elmousaoui (Geo Data Solutions GDS Inc.) for his cooperation and for his able technical assistance for the duration of this survey contract. Douglas Oneschuk (GSC) for his cartographic design expertise and Mark Pilkington (GSC) for his helpful comments and suggestions to improve the maps.

- MAP SHEET SUMMARY**
- Sheet 1: Residual Total Magnetic Field, parts of NTS 115-P (north half) and 116-A (south half)
  - Sheet 2: Residual Total Magnetic Field, parts of NTS 105-M (north half) and 115-P (north half)
  - Sheet 3: Residual Total Magnetic Field, parts of NTS 105-M, N (north halves)
  - Sheet 4: Residual Total Magnetic Field, parts of NTS 116-A (south half) and 106-D
  - Sheet 5: Residual Total Magnetic Field, parts of NTS 105-C, D
  - Sheet 6: First Vertical Derivative of the Magnetic Field, parts of NTS 115-P (north half) and 116-A (south half)
  - Sheet 7: First Vertical Derivative of the Magnetic Field, parts of NTS 105-M (north half) and 115-P (north half)
  - Sheet 8: First Vertical Derivative of the Magnetic Field, parts of NTS 105-M, N (north halves)
  - Sheet 9: First Vertical Derivative of the Magnetic Field, parts of NTS 116-A (south half) and 106-D
  - Sheet 10: First Vertical Derivative of the Magnetic Field, parts of NTS 105-C, D
